Tenebris and Lux

Comprehensive Master Guide

CreativeWorkzStudio LLC / ProfessorSeanEX

Version 1.0.0, 2026-10-29

Table of Contents

1. Executive Summary . . . 1
Volume I: World Canon, Metaphysics & Continental Topography . . . 2
2. Chapter 1: The Primordial Neutrality of Lux and Tenebris . . . 3
3. Canonical Introduction . . . 4
4. 1. The Primordial Cosmology: Neutrality of the Apex Forces . . . 5
4.1. 1.1. Lux (The Apex of Radiance & Cohesion) . . . 5
4.2. 1.2. Tenebris (The Apex of Darkness & Severance) . . . 5
4.3. 1.3. The Law of Tempering and Dissipation . . . 5
4.4. 1.4. The Moral Sway Continuum ([-100, +100]) & 13-Tier Taxonomy . . . 6
4.5. 1.5. Character Categorization Across the Continuum . . . 7
5. 2. Genesis: The Mundane Inception & The Two Princes . . . 9
5.1. 2.1. The Mundane Armaments of Inception . . . 9
5.2. 2.2. The Self-Running Systems . . . 9
5.3. 2.3. The Ideological Fork . . . 9
6. 3. The 11th Festival Rupture & The 7-Year Great War . . . 10
6.1. 3.1. The Coma and the Silent Vigil (Festivals 1–10) . . . 10
6.2. 3.2. Usuru and the 11th Year Catastrophe . . . 10
6.3. 3.3. The 7-Year Great War & The Awakening of the Relics . . . 10
7. 4. The 3,000-Year Dynastic Wave & Modern Sacyra . . . 11
8. 5. The Tri-Perspective Protagonists . . . 12
8.1. 5.1. Elijah Ro-enheart (The Vanguard of Lux) . . . 12
8.2. 5.2. Lady Katrina Jaren (The Outrider of Tenebris) . . . 12
8.3. 5.3. The Custom Bearer (<chosen_name> — The Secret Chronicler) . . . 12
9. 6. The Tactical Strategy RPG (TRPG) Paradigm . . . 13
10. Chapter 2: Historical Canon & Macro-Chronology . . . 14
11. Overview & Historiographical Scope . . . 15
12. 1. Chronological Epoch Map . . . 16
13. 2. Era I: The Founding of Sacyra & The Two Princes . . . 18
13.1. 2.1. The Mundane Armaments of Inception . . . 18
13.2. 2.2. The Self-Running Systems of the First King . . . 18
13.3. 2.3. The Ideological Fork: Mi-ren and Casatti . . . 18
14. 3. Era II & III: The Festival of Peoples, The Coma & The Silent Vigil . . . 19
14.1. 3.1. Why the Festival Lasted a Full Week . . . 19
14.2. 3.2. The First Festival Coma & Discovery of The Dreamscape . . . 19
14.3. 3.3. Festivals 1 Through 4: The Four-Year Rescue Effort . . . 19
14.4. 3.4. Era III: The 5th Festival Death & The Meaning of "Of Age" . . . 19
15. 4. Era IV: Usuru the Wanderer & The 11th Year Tragedy . . . 21
15.1. 4.1. The "Quiet Complaint" of Remote Libira . . . 21

15.2. 4.2. The Three-Day Wanderer . . . 21
15.3. 4.3. The 11th Year Rupture . . . 21
16. 5. Era V: The 7-Year Great War & Awakening of the Relics . . . 22
16.1. 5.1. The Six Fractured Powers . . . 22
16.2. 5.2. Casatti's Infusion of Tenebris (The Sword of War) . . . 22
16.3. 5.3. Mi-ren's Discovery of Lux (The Shield of Peace) . . . 22
16.4. 5.4. The Law of Tempering and Dissipation . . . 23
16.5. 5.5. The Parley & The 7-Year Armistice . . . 23
17. 6. The 3,000-Year Chasm & The Dynastic Wave . . . 24
17.1. 6.1. The Mathematical Wave of Succession . . . 24
17.2. 6.2. Five Axioms of Dynastic Continuity . . . 24
18. Chapter 3: Master Storyboard Sequence (Scenes 01–20) . . . 26
19. Overview & Cinematic Philosophy . . . 27
20. 1. Cinematic Staging Matrix (Scenes 01–20) . . . 28
21. 2. Scene-by-Scene Narrative Walkthrough . . . 31
21.1. Scene 01: Symbols of Iron . . . 31
21.2. Scene 02: The Crown and the Scroll . . . 31
21.3. Scene 03: The Self-Running Realm . . . 31
21.4. Scene 04: The First Festival & The Coma . . . 31
21.5. Scene 05: The Four-Year Rescue Effort . . . 32
21.6. Scene 06: The Passing at the Fifth . . . 32
21.7. Scene 07: The Quiet Complaint of Libira . . . 32
21.8. Scene 08: The Three-Day Wanderer . . . 32
21.9. Scene 09: The Plague Year . . . 32
21.10. Scene 10: Behind the Veil . . . 32
21.11. Scene 11: The Shattered Ritual & Birth of Tenebris . . . 33
21.12. Scene 12: The Rise of Sovereign Usuru . . . 33
21.13. Scene 13: The Six-Power Conflagration . . . 33
21.14. Scene 14: The Infusion of Tenebris . . . 33
21.15. Scene 15: The General of Reconciliation . . . 33
21.16. Scene 16: The Discovery of Lux . . . 34
21.17. Scene 17: Tempering the Void . . . 34
21.18. Scene 18: The Dissipation at Parley . . . 34
21.19. Scene 19: The Joint Realm Accord . . . 34
21.20. Scene 20: The Prophecy of Kings . . . 34
22. Chapter 4: The Past, Present & Future Thematic Triad . . . 35
23. Overview & Core Thesis . . . 36
24. 1. The Thematic Triad Matrix . . . 37
25. 2. Elijah Ro-enheart as Usuru (The Frontier Wound & Redemptive Counterpoint) . . . 38
25.1. 2.1. The Child of the Forgotten Frontier . . . 38
25.2. 2.2. The Tenth-Year Fracture . . . 38

25.3. 2.3. The Redemptive Choice . . . 38
26. 3. Lady Katrina Jaren as Prince Casatti (The Renouncing Blade of Truth) . . . 39
26.1. 3.1. Renouncing Aristocratic Privilege . . . 39
26.2. 3.2. Merit Over Pedigree . . . 39
26.3. 3.3. Surgical Severance for Justice . . . 39
27. 4. The Custom Bearer as Prince Mi-ren (The Steward of Balance) . . . 40
27.1. 4.1. The Overarching Macro-Steward . . . 40
27.2. 4.2. Bearing the Weight of Synthesis . . . 40
27.3. 4.3. The Burden of Stasis vs. True Equilibrium . . . 40
28. 5. The Butterfly Effect vs. The Bystander Corridor: Overriding Cyclic Fate . . . 41
28.1. 5.1. The Bystander Corridor ([-50, +50]) as Karmic Determinism . . . 41
28.2. 5.2. The Butterfly Effect: Micro-Choices as Fate Breakers . . . 41
29. Chapter 5: Socio-Political Strata of the Kingdom of Sacyra . . . 42
30. Overview . . . 43
31. 1. Elijah Ro-enheart (The Aegis of Lineage) . . . 44
31.1. 1.1. Biography & Heritage . . . 44
31.2. 1.2. Thematic Parallel: Mirror of Ancient Usuru . . . 44
31.3. 1.3. Combat & Tactical Doctrine (TRPG) . . . 44
32. 2. Katrina Jaren (The Blade of Freedom) . . . 45
32.1. 2.1. Biography & Heritage . . . 45
32.2. 2.2. Thematic Parallel: Mirror of Prince Casatti . . . 45
32.3. 2.3. Combat & Tactical Doctrine (TRPG) . . . 45
33. 3. The Custom Bearer (<chosen_name> — The Secret Chronicler) . . . 46
33.1. 3.1. The Third Perspective: Mirror of Prince Mi-ren . . . 46
34. 4. Antagonists & The Two-Half Campaign . . . 47
34.1. 4.1. King Jihad (The Sovereign of Ambition — Act I Antagonist) . . . 47
34.2. 4.2. The Dark Lord (Usuru's Descent — Act II Antagonist) . . . 47
35. Chapter 6: The Six Powers of the Continent . . . 48
36. Overview . . . 49
37. 1. Geopolitical Map & Sovereign Overview . . . 50
38. 2. Comprehensive Profiles of the Six Powers . . . 51
38.1. 1. The Royal Capital of Sacyra (The Radiant Center) . . . 51
38.2. 2. The Kingdom of Libira (The Arid Frontier) . . . 51
38.3. 3. The Great Mau Kingdom (The Merchant Empire of the East) . . . 51
38.4. 4. Old Sacyra (The Highland Ancestral Cradle) . . . 51
38.5. 5. The Academy (The Spire of Pure Reason) . . . 52
38.6. 6. The Yun-yin Provinces (The Valleys of Mist & Wind) . . . 52
39. 3. The Accord of Kings: "Joint Realm, Separate Kingdoms" . . . 53
40. Chapter 7: Realm Chronicle: The Kingdom of Libira . . . 54
41. Overview . . . 55
42. 1. Geography, Climate & The 7-Day Courier Chasm . . . 56

43. 2. Socio-Political Philosophy: The "Quiet Complaint" . . . 57
44. 3. The Tragedy of Usuru's Assembly . . . 58
45. 4. Tactical Grid Battlefield: The Red Sandstone Wadi . . . 59
45.1. Battlefield Invariants . . . 59
46. Chapter 8: Realm Chronicle: The Royal Capital of Sacyra . . . 60
47. Overview . . . 61
48. 1. Geography, Architecture & Urban Districts . . . 62
49. 2. Lore & The King's Curse Planar Wound . . . 63
50. 3. Factions & Urban Intrigue . . . 64
51. 4. Tactical Grid Battlefield: The High Throne Chamber . . . 65
51.1. Battlefield Invariants . . . 65
52. Chapter 9: Realm Chronicle: The Sacyran Marches . . . 66
53. Overview . . . 67
54. 1. Geography & Strategic Topology . . . 68
55. 2. Lore & The Legacy of the 7-Year Great War . . . 69
56. 3. Field Bestiary & Combat Formations . . . 70
57. 4. Tactical Grid Battlefield: The Palisade Ridge . . . 71
57.1. Battlefield Mechanics . . . 71
58. Chapter 10: Realm Chronicle: The Whispering Woods . . . 72
59. Overview . . . 73
60. 1. Geography & Environmental Atmosphere . . . 74
61. 2. Lore & Ancient Secrets . . . 75
62. 3. Bestiary & Field Encounters . . . 76
63. 4. Tactical Grid Map Architecture . . . 77
63.1. Environmental Grid Invariants . . . 77
64. Chapter 11: Realm Chronicle: Dio Village . . . 78
65. Overview & Pastoral Heritage . . . 79
66. 1. Socio-Political Role: "The Quiet Complaint" of Modern Sacyra . . . 80
67. 2. Key Landmarks & Dual-Perspective Quest Hubs . . . 81
68. 3. Mechanical Role in the C11 Simulation Engine . . . 82
69. Chapter 12: Realm Chronicle: The Dreamscape . . . 83
70. Overview & Metaphysical Essence . . . 84
71. 1. Historical & Metaphysical Provenance . . . 85
72. 2. Mechanical Integration in the C11 Engine . . . 86
73. Chapter 13: High School Inception & TRPG Genesis . . . 87
74. Abstract . . . 88
75. 1. Historical Provenance: The 2014–2018 High School Genesis . . . 89
76. 2. Narrative Realignment: The Kingdom of Sacyra . . . 90
76.1. 1. The Kingdom of Sacyra (/s□□□ki□r□/) . . . 90
76.2. 2. The Dual Protagonists . . . 90
77. 3. Ludological Evolution: The Tactical Strategy RPG (TRPG) . . . 91

77.1. 1. The Dual-Layer Combat Loop . . . 91
77.2. 2. Architectural Implications for the C Engine . . . 91
78. 4. Next Milestone Roadmap . . . 92
Volume II: Dramatis Personae & Dual Protagonist Dynamics . . . 93
79. Chapter 14: Dual Protagonist Dynamics & Tri-Perspective Architecture . . . 94
80. Overview . . . 95
81. 1. Thematic & Social Contrast Matrix . . . 96
82. 2. Interpersonal Chemistry & Narrative Progression . . . 97
82.1. Narrative Evolution Across the Campaign . . . 97
83. 3. The Tri-Perspective Architecture: Witness Protagonist & Keystone Route . . . 98
84. 4. Tactical Synergy on the TRPG Battlefield . . . 99
85. Chapter 15: Elijah Ro-enheart: Vanguard of Lux . . . 100
86. Overview . . . 101
87. 1. Identity & Heritage . . . 102
88. 2. Psychological Profile & Demeanor . . . 103
88.1. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 103
89. 3. Martial Doctrine & TRPG Grid Mechanics . . . 104
89.1. Tactical Synergies . . . 104
90. Chapter 16: Lady Katrina Jaren: The Outrider Blade . . . 105
91. Overview . . . 106
92. 1. Identity & Heritage . . . 107
93. 2. Psychological Profile & Demeanor . . . 108
93.1. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 108
94. 3. Martial Doctrine & TRPG Grid Mechanics . . . 109
94.1. Tactical Synergies . . . 109
95. Chapter 17: The Custom Bearer: Steward of Balance . . . 110
96. Overview . . . 111
97. 1. Identity & Narrative Axis . . . 112
98. 2. Archetype Stone Awakening (The Four Disciplines) . . . 113
99. 3. Psychological Dynamic: The Unburdened Gaze . . . 114
100. 4. TRPG Grid Mechanics & Signature Abilities . . . 115
100.1. Tactical Synergies . . . 115
101. Chapter 18: Prince Mi-ren: Sovereign of the Vigil . . . 116
102. Overview . . . 117
103. 1. Identity & Lineage . . . 118
104. 2. Historical Chronicle & The Four-Year Vigil . . . 119
105. 3. Thematic Mirror: The Custom Bearer & Prince Mi-ren . . . 120
106. Chapter 19: Prince Casatti: The Outrider Blade of Truth . . . 121
107. Overview . . . 122
108. 1. Identity & Provenance . . . 123
109. 2. The Four-Year Slumber & The Ethereal Transfiguration . . . 124

110. 3. Thematic Mirror: Katrina Jaren & Prince Casatti . . . 125
111. Chapter 20: Usuru the Wanderer: Sovereign of Grief . . . 126
112. Overview . . . 127
113. 1. Identity & Origin . . . 128
114. 2. The Wanderer’s Pilgrimage & The "Quiet Complaint" . . . 129
115. 3. Ascension, War & Metaphysical Corruption . . . 130
116. 4. Thematic Mirror: Elijah Ro-enheart & Usuru . . . 131
117. Chapter 21: Chrono: Sage of the Ancient Archives & Dream Guardian . . . 132
118. Overview . . . 133
119. 1. Identity & Provenance . . . 134
120. 2. Archival Purpose & Historical Memory . . . 135
120.1. The Three Archival Directives . . . 135
121. 3. Canonical Voice & Dialogue . . . 136
122. 4. Ludological Role in the TRPG Engine . . . 137
123. Chapter 22: Grandma Magolia: Matriarch of Dio Village . . . 138
124. Overview . . . 139
125. 1. Identity & Family Ties . . . 140
126. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 141
127. 3. The Heirloom Timepiece: Grandma’s Watch . . . 142
128. Chapter 23: Monica the Mystic & Goddess Lyri . . . 143
129. Overview . . . 144
130. 1. Identity & Mystical Lineage . . . 145
131. 2. Canonical Voice & Demeanor (2017–2018 RPG Maker Origin) . . . 146
132. 3. Arcane Role in the Campaign . . . 147
133. Chapter 24: Eric the Lumberjack & The Moral Litmus . . . 148
134. Overview . . . 149
135. 1. Identity & Background . . . 150
136. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 151
137. 3. The Test of Honesty & Moral Continuum . . . 152
138. Chapter 25: John the Thief & Outlaw Resistance . . . 153
139. Overview . . . 154
140. 1. Identity & Underworld Standing . . . 155
141. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 156
142. 3. Quest & Mechanics Role . . . 157
143. Chapter 26: The St. Baron & Feudal Exploitation . . . 158
144. Overview . . . 159
145. 1. Identity & Standing . . . 160
146. 2. Socio-Economic Conflict in Dio Lower Ward . . . 161
147. 3. Narrative & Quest Role . . . 162
148. Chapter 27: High Priest Roté & The Royal Omens . . . 163
149. Overview . . . 164

150. 1. Identity & Standing . . . 165
151. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 166
152. 3. Narrative Role & Dynamic . . . 167
153. Chapter 28: King Jihad & The Treasonous Ambition . . . 168
154. Overview . . . 169
155. 1. Identity & Sovereign Office . . . 170
156. 2. The Grotesque Inversion of the Founding Dynasty . . . 171
157. 3. "The King's Curse" & Abyssal Possession . . . 172
158. 4. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin) . . . 173
159. 5. Socio-Political Role in the Campaign . . . 174
160. Chapter 29: Commander Gareth Ro-enheart & The Vanished Guard . . . 175
161. Overview . . . 176
162. 1. Identity & Lineage . . . 177
163. 2. Legend & Martial Legacy . . . 178
164. 3. The 10th Birthday Vanishing & Royal Intrigue . . . 179
165. Chapter 30: Threat Dossier: The Dark Lord . . . 180
166. Overview . . . 181
167. 1. Ground-Truth Canonical Identity & Origin . . . 182
168. 2. Narrative Function: The Overarching "A Plot" . . . 183
169. 3. "The King's Curse" & Possession of King Jihad . . . 184
170. 4. Metaphysical Neutrality & True Resolution . . . 185
171. Chapter 31: Threat Dossier: Dream Eaters . . . 186
172. 1. Astral Parasites of the Slumber Realm . . . 187
Volume III: Ludology & Tactical TRPG Combat Mechanics . . . 188
173. Chapter 32: Dual-Layer TRPG Combat Architecture . . . 189
174. Overview . . . 190
175. 1. Dual-Layer Battle Architecture . . . 191
176. 2. Phase 1: Grid-Based Tactical Battlefield . . . 192
176.1. 1. Grid Topography & Spatial Invariants . . . 192
176.2. 2. Movement & Zone of Control (ZOC) . . . 192
176.3. 3. Turn Sequencing . . . 192
177. 3. Phase 2: Cinematic Combat Resolution (Side-View Action) . . . 193
177.1. 1. Visual & Staging Presentation . . . 193
177.2. 2. Combat Mechanics During Cinematic Resolution . . . 193
178. 4. Dual-Protagonist Synergy: Elijah & Katrina . . . 194
178.1. Elijah Ro-enheart (Frontline Guardian) . . . 194
178.2. Katrina Jaren (Tactical Skirmisher) . . . 194
178.3. Tandem Linked Combat (The Duo Duel) . . . 194
179. 5. Persistent State & Moral Sway Feedback . . . 195
180. Chapter 33: The Twin Relics, Combat Stances & Moral Sway . . . 196
181. Overview . . . 197

182. 1. Primordial Neutrality & Relic Mechanics . . . 198
183. 2. The Combat Stance State Machine . . . 199
184. 3. The Moral Sway Continuum & Decoupled Elemental Expression . . . 200
184.1. 3.1. Decoupling Morality ("The Why") from Elemental Expression ("The How") . . . 200
184.2. 3.2. The Bystander Corridor ([-50, +50]) as Net Moral Inertia . . . 200
184.3. 3.3. Equilibrium (0) . . . 200
185. 4. Tactical Actions & Combat Skills . . . 201
185.1. 4.1. Defend (defend / ward) . . . 201
185.2. 4.2. Attack (attack / strike) . . . 201
185.3. 4.3. Special (special / balance) . . . 201
185.4. 4.4. Hero Customization & Protagonist Lore . . . 202
186. 5. The Metaphysical Law of Tempering & Dissipation . . . 203
187. 6. The Relic Embellishment System . . . 204
188. 7. Relic Profiles & The Ten-Ending Campaign Matrix . . . 205
189. Chapter 34: Campaign Architecture, The King's Curse & Multi-Ending Specification . . . 206
190. Overview & Ludological Philosophy . . . 207
191. 1. The Two-Half Campaign Structure . . . 208
191.1. 1.1. Act I: Stopping King Jihad (The Sovereign of Ambition) . . . 208
191.2. 1.2. The Etiology of "The King's Curse" & Royal Possession . . . 208
192. 2. The Midpoint Fork: Neutral Path vs. True Ending Path . . . 210
192.1. 2.1. Why Basic Completion Is the Neutral Ending . . . 210
192.2. 2.2. Player Consent to Know the Deeper Lore . . . 210
192.3. 2.3. Why the True Ending Is "The Ugly Truth" . . . 211
193. 3. Relic Embellishment & The Ten-Ending Campaign Matrix . . . 212
193.1. 3.1. Telemetry Over Point Locks & The Bystander Corridor . . . 212
193.2. 3.2. The 3x3 Ending Matrix + The 10th True Ending . . . 212
193.3. 3.3. The Witness Protagonist, Keystone Route & Observer Effect . . . 213
193.4. 3.4. Chrono's Chronicle Ledger: NG+ Timeline Navigation . . . 213
194. 4. Systemic Invariants & Engine Triggers . . . 215
195. Chapter 35: The Dreamscape & Temporal Architecture . . . 216
196. Overview & Engine Integration . . . 217
197. 1. Engine Architecture & Topological Verification . . . 218
197.1. 1.1. Explicit Province Registration . . . 218
197.2. 1.2. Tactical LeTBS Battlefields . . . 218
197.3. 1.3. Parameterized Combatants: The Dream Eaters . . . 218
197.4. 1.4. Bidirectional Topology . . . 219
198. 2. Narrative Inception: The Astral Rite of Awakening . . . 220
198.1. 2.1. Unformed Potential in the Astral Archive . . . 220
198.2. 2.2. Tri-Perspective Adaptability . . . 220
198.3. 2.3. The Ludonarrative Shock of "AWAKEN!" . . . 220
199. 3. Terrestrial Gating & The Dream Compass . . . 221

199.1. 3.1. Chapter 1 Demo Gating as a Terrestrial Anchor . . . 221
199.2. 3.2. From Grandma's Watch to The Dream Compass . . . 221
199.3. 3.3. Nocturnal Synchronization & Scarcity . . . 221
200. Chapter 36: World Topography, Provinces & Battlefield Terrain . . . 222
201. Overview . . . 223
202. 1. Spatial Structure: The Realm Topology . . . 224
202.1. 1. The Dreamscape (LOC_THE_DREAMSCAPE) . . . 224
202.2. 2. Dio Village (LOC_DIO_VILLAGE) . . . 224
202.3. 3. Whispering Woods (LOC_WHISPERING_WOODS) . . . 225
202.4. 4. The Sacyran Marches (LOC_SACYRA_MARCHES) . . . 225
203. 2. The Overarching Menace: The Dark Lord . . . 226
204. Chapter 37: Continuous Invariant Testing Philosophy . . . 227
205. Abstract . . . 228
206. 1. The Fundamental Divergence . . . 229
207. 2. Core Pillars of Game Development Testing . . . 230
207.1. Pillar 1: Dynamic State Invariants & Bounded Continuity . . . 230
207.2. Pillar 2: Deterministic Replay ("Golden Master Replay") . . . 230
207.3. Pillar 3: Softlock Immunity & Degenerate Play Detection . . . 230
207.4. Pillar 4: Economy & Combat Balance Invariance . . . 231
207.5. Pillar 5: Frame-Budget Latency Headroom . . . 231
208. Chapter 38: Game Design Curation & Triaging Matrix . . . 232
209. Overview . . . 233
210. 1. Triage Categorization Taxonomy . . . 234
211. 2. Tier 1: RPG Maker RTP Defaults (To Discard or Re-Architect) . . . 235
212. 3. Tier 2: Prototype & Testing Sketches (Concepts to Evolve) . . . 236
213. 4. Tier 3: Fleshed-Out Canonical Pillars (Core Invariants to Reconstruct) . . . 237
213.1. 1. Dual-Protagonist Dynamics & Narrative Branching . . . 237
213.2. 2. The Moral Sway Continuum Engine . . . 237
213.3. 3. Lecode Tactical Battle System (LeTBS) Mechanics . . . 237
213.4. 4. The Monotonic 24-Hour Time Engine . . . 238
Volume IV: The 2017–2018 Demo Baseline & Historical Archive . . . 239
214. Chapter 39: Historical Baseline Overview & Provenance . . . 240
215. Overview . . . 241
216. 1. Historical Provenance & Dataset Strata . . . 242
217. 2. Documentation Taxonomy . . . 243
218. 3. Architectural Extraction Script . . . 244
219. Chapter 40: 7-Act Narrative Script & Dialogue Walkthrough . . . 245
220. Overview . . . 246
221. Act I: The Castle Prophecy & Dark Ambition . . . 247
221.1. Start-Up / Walk of Fear . . . 247
221.1.1. Map 002: Start-Up . . . 247

221.2. The Castle (Outside) . . . 247
221.2.1. Map 003: The Castle (Outside) . . . 247
221.2.2. Map 008: Battle Tutorial . . . 247
221.3. The Castle (Inside) - The Throne Room . . . 249
221.3.1. Map 004: The Castle (Inside) . . . 249
221.3.2. Map 009: Secret Map . . . 249
222. Act II: The Dream Realm & The Ancient Archives . . . 251
222.1. Intro / The Void . . . 251
222.1.1. Map 002: Start-Up . . . 251
222.2. Character Select & The Room of Sages . . . 251
222.2.1. Map 006: Character Select . . . 251
223. Act III: The Trial of Mechanisms & The Dream Eaters . . . 256
223.1. The Switches Puzzle Chamber . . . 256
223.1.1. Map 007: Switches . . . 256
223.1.2. Map 040: Switches . . . 257
223.2. The Secret Crystal Chamber . . . 259
223.2.1. Map 009: Secret Map . . . 259
223.2.2. Map 039: Secret Map . . . 260
223.3. The Battle Tutorial & Dream Eater Ambush . . . 262
223.3.1. Map 008: Battle Tutorial . . . 262
223.3.2. Map 041: Battle Tutorial . . . 263
224. Act IV: Awakening in Dio Village & Family Roots . . . 265
224.1. Grandma’s House Upstairs . . . 265
224.1.1. Map 020: Grandma’s House Upstairs . . . 265
224.1.2. Map 004: The Castle (Inside) . . . 266
224.2. Grandma’s House Downstairs . . . 266
224.2.1. Map 021: Grandma’s House Downstairs . . . 266
224.2.2. Map 007: Switches . . . 268
225. Act V: Dio Village Upper & The Outskirts Crisis . . . 271
225.1. Dio Village Upper / Main Square . . . 271
225.1.1. Map 023: Main Square . . . 271
225.2. Monica’s House & The Mystic’s Brew . . . 273
225.2.1. Map 027: Monica’s House . . . 273
225.3. The Secret Sword Cache . . . 276
225.3.1. Map 024: The Sword Map . . . 276
225.3.2. Map 025: The Sword Map . . . 277
226. Act VI: Moral Crossroads of Dio Lower Ward . . . 278
226.1. Eric the Lumberjack’s House . . . 278
226.1.1. Map 028: Eric’s House . . . 278
226.2. Shopping District & Lower Village . . . 282
226.2.1. Map 030: Shopping District . . . 282

226.3. John the Thief’s Hideout . . . 283
226.3.1. Map 031: John the Thief (Sidequest) . . . 283
227. Act VII: The Frontier, Wilderness & Final Dungeon . . . 284
227.1. World Map Frontier . . . 284
227.2. Wilderness Battle Zones (Demo Areas 3 & 4) . . . 284
227.2.1. Map 020: Grandma’s House Upstairs . . . 284
227.2.2. Map 021: Grandma’s House Downstairs . . . 285
227.3. The Final Dungeon & Boss Threshold . . . 287
227.3.1. Map 023: Main Square . . . 287
227.3.2. Map 024: The Sword Map . . . 290
227.3.3. Map 025: The Sword Map . . . 290
227.3.4. Map 026: Start Up Area . . . 290
227.3.5. Map 027: Monica’s House . . . 290
227.3.6. Map 028: Eric’s House . . . 293
228. Chapter 41: Complete Cast & Tactical Party Compendium . . . 298
229. Overview . . . 299
230. 1. Dual Protagonists . . . 300
230.1. Elijah Ro-enheart (The Steadfast Vanguard) . . . 300
230.2. Lady Katrina Jaren (The Outrider Blade) . . . 300
231. 2. Extended Tactical Party Companions (Folder 2 Additions) . . . 302
231.1. Sebastien (The Infiltrator Outlaw) . . . 302
231.2. Angela (The Evoker Elementalist) . . . 302
231.3. Lucius (The Battle Priest) . . . 302
232. 3. Summoned Celestial Entities . . . 303
232.1. Wind Spirit (Actor 11) . . . 303
232.2. Pixie (Actor 12) . . . 303
232.3. Fire Chicken (Actor 13) . . . 303
233. 4. Key Lore Figures & NPCs . . . 304
234. Chapter 42: LeTBS Tactical Grid System Specification . . . 305
235. Overview . . . 306
236. 1. Battle Field Architecture & Action Economy . . . 307
237. 2. Scope & Area of Effect (AOE) Geometries . . . 308
238. 3. Terrain State Modifications & Dynamic Hazards . . . 309
239. 4. Turn Timeline Manipulation . . . 310
240. Chapter 43: Classes, Growth Curves & Learning Trees . . . 311
241. Overview . . . 312
242. Class 1: Warrior . . . 313
242.1. Skill Learnings for Warrior . . . 313
243. Class 2: Mage . . . 314
243.1. Skill Learnings for Mage . . . 314
244. Class 3: Priest . . . 315

244.1. Skill Learnings for Priest . . . 315
245. Class 4: Summoner . . . 316
245.1. Skill Learnings for Summoner . . . 316
246. Class 5: Hero . . . 317
246.1. Skill Learnings for Hero . . . 317
247. Class 6: Thief . . . 318
248. Class 7: Start . . . 319
249. Class 10: ---Special--- . . . 320
250. Class 11: Guard . . . 321
250.1. Skill Learnings for Guard . . . 321
251. Class 12: Wind Spirit . . . 322
251.1. Skill Learnings for Wind Spirit . . . 322
252. Class 13: Pixie . . . 323
252.1. Skill Learnings for Pixie . . . 323
253. Class 14: Fire Chicken . . . 324
253.1. Skill Learnings for Fire Chicken . . . 324
254. Chapter 44: The Complete Grimoire (75+ Skills & Formulas) . . . 325
255. Overview . . . 326
256. Basic Martial Maneuvers . . . 327
257. Knight Martial Techniques . . . 328
258. Mage Elemental Spells . . . 329
259. Priest Holy Arts & Turn Manipulation . . . 331
260. Summoner Totems & Rites . . . 334
261. Summon Beast Techniques . . . 335
262. Enemy Bestial & Void Techniques . . . 336
263. Chapter 45: Bestiary, Destructible Props & Troop Formations . . . 337
264. Overview . . . 338
265. 1. Monster Bestiary . . . 339
266. 2. Neutral & Interactive Grid Entities . . . 340
267. 3. Troop Encounter Formations . . . 341
268. Chapter 46: Armory, Inventory & Key Lore Relics . . . 342
269. Overview . . . 343
270. 1. Weapons & Relic Armaments . . . 344
271. 2. Defensive Armor & Relic Wards . . . 345
272. 3. Consumable Items & Quest Relics . . . 346
273. Chapter 47: Tactical States & Status Ailments Directory . . . 347
274. Overview . . . 348
275. 1. Triage: RTP Boilerplate States vs. Authentic Tactical Grid States . . . 349
276. 2. Standard Status Conditions (Tier 1 Boilerplate) . . . 350
277. 3. Knight & Vanguard Tactical States (Tier 3 LeTBS) . . . 351
278. 4. Mage & Priest Arcane States (Tier 3 LeTBS) . . . 352

279. 5. Summoner & Environmental Grid States (Tier 3 LeTBS) . . . 353
280. 6. Modern C11 Architectural Mapping . . . 354
281. Chapter 48: Engine Systems, Time Clock & Switch/Variable Index . . . 355
282. Overview . . . 356
283. 1. The Monotonic Time Engine . . . 357
284. 2. The Moral Sway Continuum Engine . . . 358
285. 3. Global Switches Directory . . . 359
286. 4. Global Variables Directory . . . 361
287. Chapter 49: Historical Dataset Evolution & Delta Analysis . . . 362
288. Overview . . . 363
289. 1. Dataset Characteristics & Metrics . . . 364
290. 2. Core Differences & Evolution Strategy . . . 365
Volume V: Software Architecture & The 5-Block Invariant Protocol . . . 366
291. Chapter 50: OmniCode 5-Block Architectural Framework . . . 367
292. Architecture Overview . . . 368
293. 1. The Universal 5-Block Code Structure . . . 369
294. 2. Core Mechanics & State Invariants . . . 370
294.1. The Twin Relics: Shield and Sword . . . 370
294.2. Invariant Axioms . . . 370
295. 3. Multi-Phase Engine Evolution . . . 371
296. 4. Layer 2 Presentation Architecture & 5-Screen Navigation . . . 372
297. Chapter 51: Dual-Frontend Presentation Layer (CLI + Native X11) . . . 373
298. Abstract . . . 374
299. 1. The Core Architectural Philosophy . . . 375
299.1. Universal Action Dispatcher & Intent Emitter . . . 375
300. 2. Native Desktop GUI Architecture: Why Not Web? . . . 377
300.1. Double-Buffering & Render Synchronization . . . 377
300.2. Dynamic Visual Palette: The Twin Relics . . . 378
301. 3. The 5-Block Implementation Mapping . . . 379
301.1. Presentation Architecture Breakdown (`include/gui/gui.h` & `src/gui/gui.c`) . . . 379
302. 4. Headless CI & Deterministic Replay . . . 380
303. 5. Custom Engine Evolution Roadmap . . . 381
304. Chapter 52: Central Manifest & Pre-Flight Diagnostic Integrity . . . 382
305. Specification Abstract & Purpose . . . 383
306. 1. Expected Architecture: The Central Manifest Pattern . . . 384
306.1. 1.1 Structural Hierarchy . . . 384
306.2. 1.2 The Diagnostic Severity Spectrum . . . 384
306.3. 1.3 Expected Pre-Flight Engine States . . . 385
307. 2. Architectural Metadata Dimensions & Pedagogical Balance . . . 386
307.1. 2.1 Striking the Balance: Beginner-Accessible yet Senior-Rigorous . . . 386
307.2. 2.2 Explicit Temporal Stamping & Version History . . . 386

307.3. 2.3 The 5-Dimension Compiled Schema (module_metadata_t) . . . 386
307.4. 2.4 Active Dependency Graph Enforcement . . . 387
308. 3. Expected Pre-Flight "Loose Bolts" System Checks . . . 388
309. 4. Target Verification Criteria ("Expected" Baseline) . . . 389
310. 5. Actual Results vs. Expected Gap Analysis . . . 390
310.1. 5.1 Empirical Benchmark Telemetry . . . 390
310.2. 5.2 How to Reproduce and Verify Every Result . . . 391
310.3. 5.3 Gap Analysis & Next Architectural Horizons . . . 392
311. Chapter 53: Layer 0 Core Utilities Code Tour . . . 393
312. Overview . . . 394
313. 1. Layer 0 Directory Strata & Subsystem Architecture . . . 395
314. 2. Filesystem & JSON Engines (util/data/) . . . 396
314.1. 2.1 Filesystem Utilities (fs_utils.h & fs_utils.c) . . . 396
314.2. 2.2 JSON Utilities (json_utils.h & json_utils.c) . . . 396
315. 3. Mathematical Invariant Utilities (util/math/) . . . 398
315.1. 3.1 Bounded Arithmetic (math_utils.h & math_utils.c) . . . 398
315.2. 3.2 2D Geometry Utilities (geom_utils.h & geom_utils.c) . . . 398
316. 4. Lexical & String Utilities (util/string/) . . . 399
317. 5. Monotonic Timing Utilities (util/time/) . . . 400
318. 6. Logging & Telemetry Subsystem (util/log/) . . . 401
319. 7. Central Manifest & Pre-Flight Registry (manifest.h & manifest.c) . . . 402
319.1. 7.1 Pre-Flight Verification Telemetry . . . 402
320. Chapter 54: Layer 0 Debugging System & State Rewind . . . 403
321. 1. Architectural Philosophy & Mission . . . 404
321.1. Key Architectural Pillars . . . 404
322. 2. Subsystem Layout & Strata . . . 405
323. 3. Core Mechanics & Invariants . . . 406
323.1. 3.1 Frozen State Snapshot Ring Buffer . . . 406
323.2. 3.2 Dynamic Breakpoints & Tripwire Traps . . . 406
323.3. 3.3 State Differential Analysis (debug_diff_snapshots) . . . 406
324. 4. Interactive CLI Integration . . . 408
325. 5. Verification & Audit Contract . . . 409
326. Chapter 55: Layer 1 Simulation Engine Code Tour . . . 410
327. Overview . . . 411
328. 1. State Structure & Memory Layout (player_state_t) . . . 412
329. 2. Universal Action Dispatcher (game_process_command) . . . 413
329.1. Execution Pipeline: . . . 413
330. 3. Diagnostic Self-Auditing (game_audit_state) . . . 414
331. Chapter 56: Layer 2 Presentation Viewport Code Tour . . . 415
332. Overview . . . 416
333. 1. The Modular GUI Sub-Assembly Architecture . . . 417

334. 2. Desktop Panel Zoning & Layout Invariants . . . 418
335. 3. The 2.5D Tactical Isometric Engine . . . 419
335.1. Isometric Mathematical Formulation: . . . 419
335.2. Unprojection Reciprocity: . . . 419
335.3. 3D Prism Shading & Elevation Blocks: . . . 419
335.4. Painter's Algorithm Depth Sorting: . . . 419
336. 4. The Asset Abstraction Layer . . . 421
337. 5. Verification Telemetry . . . 422
338. Chapter 57: Layer 4 Verification & Test Suite Code Tour . . . 423
339. Overview . . . 424
340. 1. The Four-Tier Testing Hierarchy . . . 425
340.1. Tier 1: Functional Debugging (tests/functional/) . . . 425
340.2. Tier 2: Subsystem Unit Harnesses (tests/unit/) . . . 425
340.3. Tier 3: Integrated Utilities Harness (tests/integrated/) . . . 426
340.4. Tier 4: System Verification (tests/system/) . . . 426
341. 2. The Four Ontological Testing Sections . . . 427
342. 3. CMake & CTest Test Targets . . . 428
343. 4. Execution & Verification Commands . . . 429
Volume VI: Engineering Chronology & Development Logs . . . 430
344. Chapter 58: DevLog 001: Genesis, Paradigm Pivot & Invariants . . . 431
345. Abstract . . . 432
346. 1. Project Genesis: Clean Foundations and the 5-Block Standard . . . 433
347. 2. The Early Prototype: The Survival-Battery Fallacy . . . 434
348. 3. The Paradigm Pivot: One Clarification That Changed Everything . . . 435
348.1. 1. From Passive Attrition to Active Agency . . . 435
348.2. 2. Disentangling Darkness from the Villain . . . 435
348.3. 3. The Moral Sway Continuum . . . 435
349. 4. Dual-Frontend Architecture: Native X11 & Terminal CLI . . . 437
350. 5. Why Game Development Testing Differs from Software Testing . . . 438
350.1. 1. Game State Invariant Testing (tests/test_game_invariants.c) . . . 438
350.2. 2. Gameplay Scenarios & Replay Testing (tests/test_gameplay_scenarios.c) . . . 438
351. 6. What Lies Ahead . . . 439
352. Chapter 59: DevLog 003: Central Manifest & Pre-Flight Spec . . . 440
353. Abstract & Engineering Intent . . . 441
354. 1. The Core Problem: Loose Bolts & Silent Corruption . . . 442
355. 2. Architectural Implementation . . . 443
355.1. 2.1 Compiled Metadata Structures . . . 443
355.2. 2.2 Subsystem Integrations . . . 443
356. 3. "Expected" vs. "Actual" Gap Analysis . . . 444
357. 4. Summary & Next Steps . . . 445
358. Chapter 60: DevLog 004: Pedagogical Metadata & Active DAG Contracts . . . 446

359. Abstract & Engineering Intent . . . 447
360. 1. The Pedagogical Balancing Act: Beginner Mission vs. Senior Contracts . . . 448
360.1. 1.1 The Dual-Audience Protocol . . . 448
361. 2. Temporal Precision: Mandating Full ISO 8601 Calendar Dates . . . 450
362. 3. Active DAG Dependency Contracts: Turning Comments into Machine Tripwires . . . 451
362.1. 3.1 Compiled 5-Dimension Metadata Schema . . . 451
362.2. 3.2 Pre-Flight DAG Enforcement Algorithm . . . 452
363. 4. Subsystem Dependency Manifest . . . 453
364. 5. Empirical Verification & Test Results . . . 454
364.1. 5.1 CTest Verification Suite . . . 454
364.2. 5.2 Pre-Flight System Audit Telemetry . . . 454
364.3. 5.3 Active DAG Dependency Tripwire Test . . . 455
365. 6. Conclusion & Next Horizons . . . 456
366. Chapter 61: DevLog 005: Ontological Sub-Assemblies & 80-Column Discipline . . . 457
367. Abstract & Engineering Intent . . . 458
368. 1. The Need for IDE-First Hover Documentation . . . 459
368.1. 1.1 The Clangd Hover Contract . . . 459
369. 2. The Machine Metaphor: From Cosmos to Fasteners . . . 460
370. 3. Visual Border & Delimiter Standards . . . 461
371. 4. Chronological Reorganization of Developer Logs . . . 463
372. 5. Empirical Verification Telemetry . . . 464
373. 6. Summary . . . 465
374. Chapter 62: DevLog 006: Source Implementation & Root Pedagogical Commenting . . . 466
375. Executive Summary . . . 467
376. 1. Architectural Intent: End-to-End Documentation Consistency . . . 468
377. 2. Source Code Implementation Matrix . . . 469
378. 3. Root Configuration Pedagogical Enhancement . . . 470
378.1. 3.1 `CMakeLists.txt` . . . 470
378.2. 3.2 `.gitignore` . . . 470
378.3. 3.3 `README.md` . . . 470
379. 4. Strict 80-Column Verification Audit . . . 471
380. 5. Verification & Telemetry Results . . . 472
381. Chapter 63: DevLog 007: Archival Extraction & The 2017–2018 Demo Baseline . . . 473
382. Abstract . . . 474
383. 1. Historical Context: Rediscovery of the Genesis Datasets . . . 475
384. 2. The Extraction Toolchain: `docs/tools/extract_demo_data.py` . . . 476
384.1. Core Functions of the Extraction Engine . . . 476
385. 3. The 10-Volume Baseline Documentation Compendium . . . 477
386. 4. C11 Engine Rebuilding Roadmap . . . 478
387. Chapter 64: DevLog 008: Canonical Skills, The Dreamscape & Ground-Truth Pacing . . . 479
388. Abstract . . . 480

389. 1. Lessons Learned: Game Developer vs. Software CRUD Thinking . . . 481
390. 2. Implementation Telemetry & Invariant Verification . . . 482
391. Chapter 65: DevLog 009: Macro-History, Thematic Triad & Multi-Ending Architecture . . . 483
392. Abstract . . . 484
393. 1. Macro-Historical Canon: The 3,000-Year Dynastic Wave . . . 485
394. 2. The Thematic Triad: "Trauma is Inherited, Destiny is Chosen" . . . 486
395. 3. Ludological Architecture & Multi-Ending Specification . . . 487
396. 4. Verification Telemetry . . . 488
397. Chapter 66: DevLog 010: Layer 0 Subsystem Modularization & Data-Driven Architecture . . . 489
398. Executive Summary . . . 490
399. 1. Architectural Motivation & The Problem of Flat Foundations . . . 491

Chapter 1. Executive Summary

This Master Guide serves as the definitive single source of truth for **Tenebris and Lux**. It unites world canon, character dossiers, ludology, the 2017–2018 demo baseline, software architecture, and engineering dev logs into a comprehensive compendium.

Volume I: World Canon, Metaphysics & Continental Topography

Cosmic neutrality of Lux and Tenebris, chivalric Kingdom of Sacyra, continental realms, and the existential menace of The Dark Lord.

Chapter 2. Chapter 1: The Primordial Neutrality of Lux and Tenebris

Source File: `/home/professorseanex/Tenebris and Lux/docs/lore/world_and_lore.adoc`

Chapter 3. Canonical Introduction

This document establishes the living world-building canon, cosmological ontology, and historical epic of **Tenebris and Lux** ("Darkness and Light"). Conceived between 2014–2018 in RPG Maker as the premier game of **CreativeWorkzStudio**, this is the epic of two primordial relics—**The Shield of Lux** and **The Sword of Tenebris**—set within the storied **Kingdom of Sacyra** (pronounced **"saw-kee-ruh"**, `/s□□□ki□r□/`). The story is driven by a tri-perspective narrative architecture: **Elijah Roenheart**, son of a former head of the Royal Guard; **Lady Katrina Jaren**, an aristocratic daughter seeking autonomy in the Adventurers' Guild; and the customizable **Bearer** (`<chosen_name>`), as the re-awakening **Dark Lord** rises from the subterranean abyss and **King Jihad** plots treason on the High Throne.

Chapter 4. 1. The Primordial Cosmology: Neutrality of the Apex Forces

> "Light without shadow is a blinding desert that calcifies the spirit. Shadow without light is a suffocating void where purpose drowns. The Shield preserves and confines; the Sword severs and liberates. The relics know neither virtue nor malice—only the soul that wields them."
>
> — The Sacyran Chronicle of Antiquity

In the cosmology of **Tenebris and Lux**, the cosmos is governed by two apex forces that transcend mortal morality. Neither is inherently good nor evil:

4.1. 1.1. Lux (The Apex of Radiance & Cohesion)

- **Ontological Essence:** Manifestation, illumination, cohesion, preservation, temporal anchoring, and structure.
- **The Dual Nature of Light:**
  - **Virtuous Manifestation:** Projects golden protective barriers (**Lux Barrio**), wards the vulnerable, preserves cultural heritage, and seeks peace through reconciliation.
  - **Tyrannical Manifestation:** Scorches the earth in unyielding glare, blinding dissenters, enforcing calcifying stasis, denying natural growth and mortality, and petrifying living will into stone.

4.2. 1.2. Tenebris (The Apex of Darkness & Severance)

- **Ontological Essence:** Mystery, dissolution, rest, severance, finality, and the fertile void.
- **The Dual Nature of Darkness:**
  - **Virtuous Manifestation:** Cuts through tyrant armor (**Cuttatio Tenebris**), severs corrupt bindings, veils the oppressed from predators, and executes swift, surgical **Absolute Justice**.
  - **Malevolent Manifestation:** Spreads entropic rot, dissolves conscience into nihilism, feeds bitter vengeance, and fuels tyrannical conquest.

4.3. 1.3. The Law of Tempering and Dissipation

The relationship between Lux and Tenebris is governed by a strict metaphysical law: * **Lux as the Singular Tempering Agent:** Raw Tenebris is entropic and severing; left unchecked, it erodes everything it touches. Lux is the only force capable of containing and tempering Tenebris, providing structural cohesion so that the void's cutting edge can be safely directed. * **The Fragility of Radiance (Dissipation):** While Lux tempers Tenebris, it requires steadfast emotional and ethical harmony. Any sudden, violent surge of fear, wrath, or malice causes Lux to **dissipate immediately**, collapsing protective barriers and leaving Tenebris unbridled.

4.4. 1.4. The Moral Sway Continuum ([-100, +100]) & 13-Tier Taxonomy

Neither Lux nor Tenebris dictates a character's morality. Good and evil belong entirely to the **intent, conscience, and choices of the heart behind the weapon**, tracked along the `[-100, +100]` **Moral Sway** axis via the **Compass of Morality**. A knight channeling blinding radiance can act as a calcified tyrant, while an outrider wielding the void-edged blade of Tenebris can stand as the people's ultimate savior.

The continuum is codified into a formal 13-tier canonical nomenclature:

Integer Range / Point	Canonical Designation	Functional Definition
`-100`	**The Sovereign of Ruin**	Absolute negative terminus. Total surrender to abyssal nihilism or petrifying totalitarianism.
`[-100, -50]`	**Active Malice (The Tyrannical Sphere)**	Deliberate cruelty, ruthless execution, and despotic dominion.
`[-50, 0]`	**Cynical Pragmatism (Compliant Apathy)**	Lower bystander band. Self-serving opportunism, petty theft, and systemic complicity.
`0`	**The Stance of Equilibrium (Harmonic Zero)**	Active, disciplined synthesis where Lux and Tenebris temper one another without stasis or rot.
`[0, +50]`	**Conventional Decency (Uncommitted Virtue)**	Upper bystander band. Civic compliance that avoids personal risk to challenge corruption.
`[+50, +100]`	**Active Virtue (The Restorative Sphere)**	Self-sacrificing heroism, surgical liberation, and restorative justice breaking inertia.
`+100`	**The Saint of Mercy**	Absolute positive terminus. Unyielding altruism in protection (Lux) or pure Absolute Justice (Tenebris).
`[-50, +50]`	**The Bystander Corridor**	Net Moral Inertia; zone of mutual cancellation where history repeats itself.
`[-100, 0]`	**The Arc of Dissolution**	The deconstructive hemisphere of the world ledger (Tyranny & Ruin).
`[0, +100]`	**The Arc of Restoration**	The constructive hemisphere of the world ledger (Virtue & Mercy).
`[-50, +100]`	**The Transcending Mortal Arc**	Trajectory of overcoming cynicism or blind obedience to achieve heroic conviction.
`[-100, +50]`	**The Arc of Tragic Disillusionment**	Trajectory of a betrayed soul whose optimism is capped at cautious neutrality, plunging to the abyss.

Integer Range / Point	Canonical Designation	Functional Definition
`[-100, +100]`	**The Universal Ledger**	The complete canvas of mortal free will (The Compass of Morality).

4.5. 1.5. Character Categorization Across the Continuum

Range / Point	Canonical Designation	Historical Figures (Past)	Campaign Figures (Present)	Ludonarrative Rationale
`-100`	**Sovereign of Ruin**	**Usuru (Late Era)**	**The Dark Lord**	Consumed by unhealed grief after discovering the 11th Festival stasis deception.
`[-100, -50]`	**Active Malice**	*Six-Faction Warlords*	**King Jihad** (\~ -85)	Issues royal gag orders and plots to usurp the Dark Lord's void essence behind a benevolent facade.
`[-50, 0]`	**Cynical Pragmatism**	*Ancient Court Bailiffs*	**The St. Baron** (\~ -45), **Katrina Jaren (Base)** (\~ -20)	The St. Baron exploits Lower Dio through debt bondage. Katrina begins here: sardonic, hunting for Grandma's will to escape Dio.
`[-30, +30]`	**The Provincial Swing**	*Border Smugglers*	**John the Thief**	Operates in Lower Dio's gray margins, balancing illegal theft against community survival.
`0`	**Stance of Equilibrium**	*The Sages of Old*	**Chrono the Sage**	Anchored outside temporal degradation in the Room of Sages within the Dreamscape.
`[0, +50]`	**Conventional Decency**	**Usuru (Youth)** (\~ +30)	**Eric the Lumberjack** (\~ +10), **Elijah Ro-enheart (Base)** (\~ +35)	Honest folk surviving day-to-day. Elijah starts as a polite, rule-bound soldier hesitant to violate protocol.
`[+50, +100]`	**Active Virtue**	**Prince Mi-ren**, **Prince Casatti**, **The First King**	**Grandma Magolia**, **Sir Roté**, **Monica the Mystic**	Figures defined by communal protection, sacrificial defense, and devotion to peace.

Range / Point	Canonical Designation	Historical Figures (Past)	Campaign Figures (Present)	Ludonarrative Rationale
`+100`	**Saint of Mercy**	**Goddess Lyri** (Ideal)	*Endgame Player Potential*	Theoretical pinnacle of pure self-sacrifice and uncorrupted justice.
`[-50, +100]`	**Transcending Mortal Arc**	*Academy Reformers*	**Elijah Ro-enheart (Arc)**, **Katrina Jaren (Arc)**	Elijah transcends blind obedience into conscience; Katrina refines rebellious cynicism into noble sacrifice.
`[-100, +50]`	**Tragic Disillusionment**	**Usuru (Full Trajectory)**	*Compromised Playthrough*	Faith shattered in his 11th year, plunging from innocent reverence (+30) to the abyss (-100).
`[-100, +100]`	**The Unwritten Slate**	**Prince Mi-ren (Burden)**	**The Custom Bearer (`<chosen_name>`)**	Awakens at 0 in the Dreamscape; carries Mi-ren's macro-stewardship across the entire moral spectrum.

Chapter 5. 2. Genesis: The Mundane Inception & The Two Princes

5.1. 2.1. The Mundane Armaments of Inception

At the founding of the Kingdom of Sacyra, the Shield of Lux and Sword of Tenebris were forged as ordinary, non-magical weapons of steel and silver by royal smiths, presented to the First King as civic emblems: * **The Mundane Shield:** Represented **Peace**, communal defense, and internal harmony. * **The Mundane Sword:** Represented **War**, territorial justice, and border vigilance.

5.2. 2.2. The Self-Running Systems

The First King was deeply beloved by his subjects across all provinces. Under his leadership, the realm’s civic, legal, and municipal systems were engineered so effectively that the kingdom practically governed itself. Personal royal audiences were required only "once in a blue moon".

5.3. 2.3. The Ideological Fork

The First King had two teenage sons who divided the responsibilities of civilization: * **Prince Miren:** The elder son and heir to the High Throne, raised in statecraft to preserve his father’s peace. * **Prince Casatti:** The younger son, who voluntarily renounced the throne to establish **The Academy**, an independent institution dedicated to natural philosophy, elemental sciences, and mapping **The Dreamscape**.

Chapter 6. 3. The 11th Festival Rupture & The 7-Year Great War

6.1. 3.1. The Coma and the Silent Vigil (Festivals 1–10)

Following the first week-long **Festival of Peoples**, the First King fell into a coma, though his consciousness remained awake across the gossamer veil in **The Dreamscape**. When his physical body passed away during the 5th Festival, teenage Mi-ren and Casatti maintained a protective vigil: using the annual thinned-veil festival week to commune with the First King's spirit and project him into the temporal world in short bursts until Mi-ren was officially "of age."

6.2. 3.2. Usuru and the 11th Year Catastrophe

In the 11th year, an eleven-year-old wanderer from remote Libira (a frontier kingdom suffering from a seven-day courier delay and no relay outposts) snuck into the royal sanctum to see the "plagued" king. Discovering the mummified corpse and projection array, the shocked boy accidentally tampered with the ritual: 1. The spiritual tether snapped, permanently sealing the First King in The Dreamscape. 2. The violent shift in the boy's heart caused an unprecedented metaphysical surge that birthed **Tenebris** into waking reality. 3. The planar backlash physically warped continental distances between Libira and the Capital. 4. Taking the name **Usuru**, the youth led Libira and neighboring border realms in a war of annexation against the Capital.

6.3. 3.3. The 7-Year Great War & The Awakening of the Relics

Usuru's uprising ignited **The Great War** across six fractured powers: The Capital, Libira, Great Mau, Old Sacyra, The Academy, and the Yun-yin Provinces: * **Casatti's Infusion of Tenebris:** Prince Casatti isolated the anomalous void energy and infused it into the mundane Sword of War to execute **Absolute Justice** and end the war swiftly. * **Mi-ren's Discovery of Lux:** Prince Mi-ren adapted the temporal projection technique to discover **Lux**, infusing it into the mundane Shield of Peace with a mandate of **atonement and forgiveness for Usuru**. * **The Accord of Kings:** Lux tempered Tenebris, bringing the war to an armistice in exactly **seven years**. The six powers ratified the **"Joint Realm, Separate Kingdoms"** accord, solidifying autonomous regional rule under the High Crown and enshrining the **Prophecy of Kings**. Refusing reconciliation, Usuru retreated into the abyssal vaults, degenerating over three millennia into **The Dark Lord**.

Chapter 7. 4. The 3,000-Year Dynastic Wave & Modern Sacyra

Between the Great War and the modern campaign lies a three-thousand-year chasm ($3,000\text{ years}$) spanning between **30 and 50 monarchs** (averaging $60\text{ to }100\text{ years}$ per reign):

- **The Succession Wave:** The dynasty cycled between Long Stasis Crests (60–90+ years of high peace and calcified bureaucracy), Tether-Sickness Troughs (5–20 years of royal paranoia and premature death near the High Throne's planar wound), and Bureaucratic Consolidations (35–50 years).
- **The Systemic Neglect:** Millennia of Capital stability fostered systemic apathy toward frontier settlements like **Dio Village**, replicating ancient Libira's "quiet complaint."
- **"The King's Curse" & King Jihad:** For three millennia, sovereigns on the High Throne were exposed to psychic backwash from the planar wound left by Usuru. Coveting void power, **King Jihad** opened himself to the abyss prior to the modern Festival of Heroes, resulting in possession by The Dark Lord's psychic remnant.

Chapter 8. 5. The Tri-Perspective Protagonists

The heart of **Tenebris and Lux** is an unfolding mystery navigated across three distinct vantage points:

8.1. 5.1. Elijah Ro-enheart (The Vanguard of Lux)

- **Lineage & Heritage:** Son of legendary **Commander Gareth Ro-enheart**, former Head of the Royal Guard, who vanished under King Jihad's sealed orders on Elijah's 10th birthday.
- **Archetype & Role:** Frontline Heavy Vanguard / Fortress Anchor. Wields the **Shield of Lux**.
- **Thematic Parallel:** Mirrors ancient **Usuru** (The Frontier Wound). Endured a childhood frozen on his tenth year; raised with reverence for the Crown only to discover court betrayal. By choosing independent moral conscience over vengeance, Elijah represents Usuru granted redemptive grace.

8.2. 5.2. Lady Katrina Jaren (The Outrider of Tenebris)

- **Lineage & Heritage:** Estranged daughter of aristocratic **House Jaren**, one of the wealthiest noble families on the Royal Court.
- **Archetype & Role:** High-Mobility Skirmisher / Flanking Striker. Wields the **Sword of Tenebris**.
- **Thematic Parallel:** Mirrors ancient **Prince Casatti** (The Renouncing Blade). Renounces aristocratic birthright in favor of the meritocratic **Adventurers' Guild**, wielding the sharp edge of Tenebris with cynical candor to slice through court hypocrisy and provincial stagnation.

8.3. 5.3. The Custom Bearer (`<chosen_name>` — The Secret Chronicler)

- **Archetype & Role:** Emergent champion in Chrono's astral archives. Holds **The Dream Compass**.
- **Thematic Parallel:** Mirrors ancient **Prince Mi-ren** (The Steward of Balance). Decoupled from fixed identities, the player navigates the nocturnal Dreamscape trials, performing the "double work" to synthesize both Elijah's and Katrina's paths to unlock the **Secret Chronicler True Ending**.

Chapter 9. 6. The Tactical Strategy RPG (TRPG) Paradigm

Tenebris and Lux combines deep tactical planning with visceral action execution:

1. **Strategic 2D Grid Positioning:**
    - Multi-elevation grid maps across provinces, bridges, castles, and Dreamscape leylines.
    - Tactical movement budgets, Zone of Control (ZOC), flanking angles, and cover bonuses.
2. **Cinematic Combat Resolution:**
    - Initiating attacks transitions into dynamic traditional side-scroll / action duels.
    - Core skills: **Lux Barrio** (barrier rolls $2\dots5$ turns, 25% damage mitigation), **Cuttatio Tenebris** (20% splash cleave), and **Duo-Loca Bashin n Slash** (adaptive defense targeting).
3. **Ludonarrative Consent & Multi-Ending Resolution:**
    - Act I focuses on defeating King Jihad; Act II focuses on stopping The Dark Lord.
    - Players skipping nocturnal Dream Compass trials receive the **Neutral Ending** (saving Sacyra while leaving the First King marooned). Players achieving full synthesis unlock the canonical **True Ending** ("The Ugly Truth"), resolving three millennia of cosmic conflict.

Chapter 10. Chapter 2: Historical Canon & Macro-Chronology

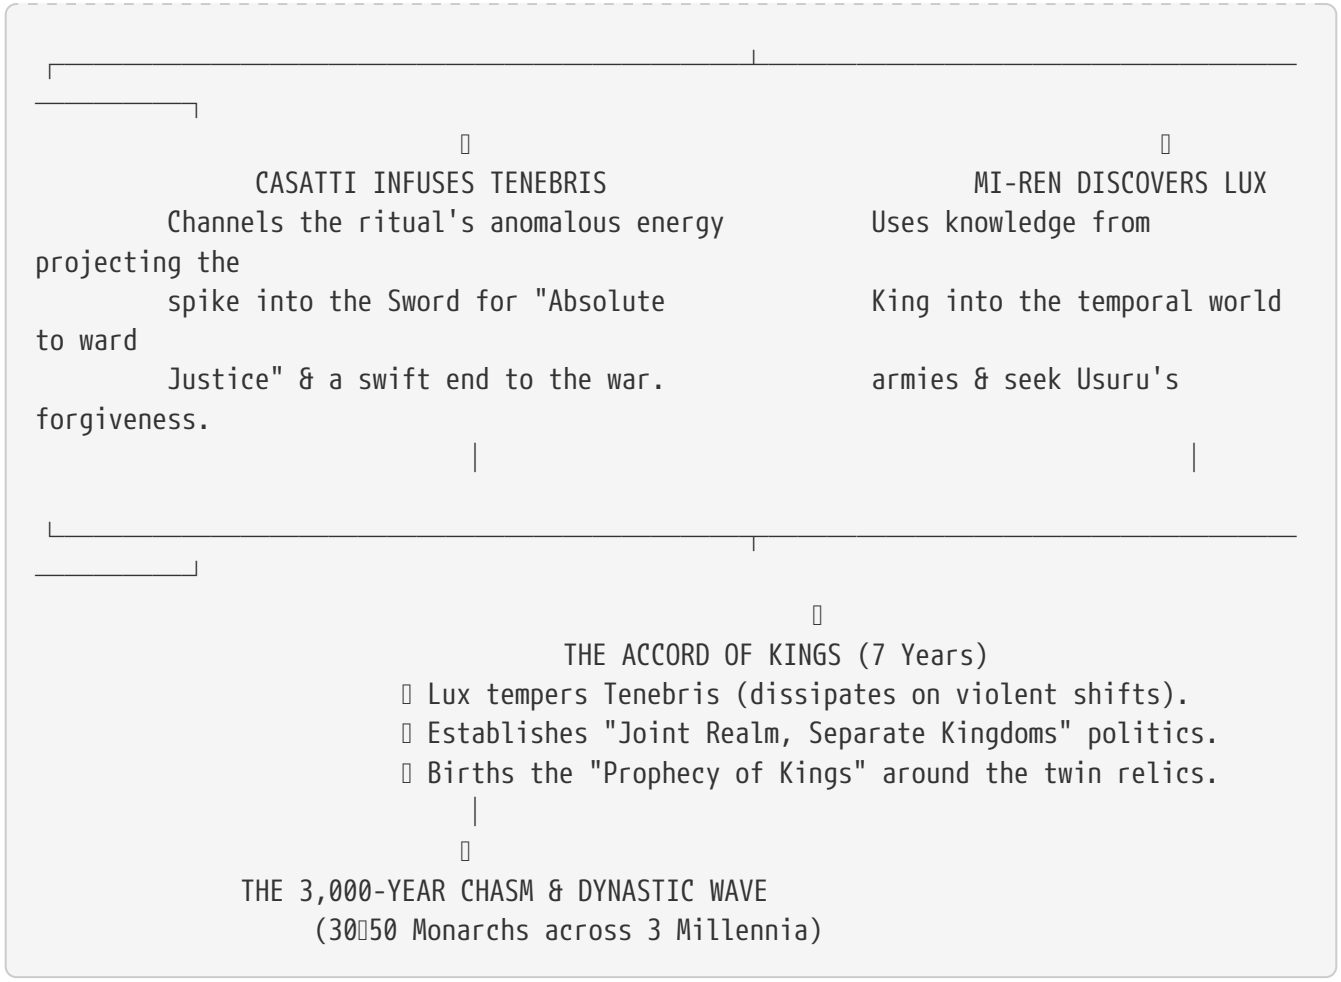

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/genesis_and_historical_canon.adoc

Chapter 11. Overview & Historiographical Scope

This volume establishes the definitive historical canon, cosmological chronology, and dynastic chronicle of the **Kingdom of Sacyra** (pronounced **"saw-kee-ruh"**, /s□□□ki□r□/). Grounded in the authentic 2017–2018 demo archives and formal narrative architecture, it traces the 3,000-year continuum from the founding by the First King through the 7-Year Great War, the tragedy of Usuru, the awakening of the twin relics, the 3,000-year dynastic wave, and the modern crisis under King Jihad.

Chapter 12. 1. Chronological Epoch Map

CASATTI INFUSES TENEBRIS
Channels the ritual's anomalous energy projecting the spike into the Sword for "Absolute Justice" & a swift end to the war.
MI-REN DISCOVERS LUX
Uses knowledge from King into the temporal world to ward armies & seek Usuru's forgiveness.
THE ACCORD OF KINGS (7 Years)
Lux tempers Tenebris (dissipates on violent shifts).
Establishes "Joint Realm, Separate Kingdoms" politics.
Births the "Prophecy of Kings" around the twin relics.
THE 3,000-YEAR CHASM & DYNASTIC WAVE
(30–50 Monarchs across 3 Millennia)

Chapter 13. 2. Era I: The Founding of Sacyra & The Two Princes

13.1. 2.1. The Mundane Armaments of Inception

At the founding of the Kingdom of Sacyra, the **Shield of Lux** and the **Sword of Tenebris** were not magical or celestial artifacts. They were forged as ordinary, non-magical armaments of steel and silver by royal smiths, presented to the First King as civic symbols of statecraft:

- **The Mundane Shield:** Represented **Peace**, communal defense, and agricultural stability.
- **The Mundane Sword:** Represented **War**, territorial vigilance, and border law enforcement.

13.2. 2.2. The Self-Running Systems of the First King

The First King was deeply beloved by his subjects across all provinces. Under his leadership, the kingdom’s municipal, legal, and civic institutions were so well-engineered that the realm practically governed itself. Citizens did not lack access to the King out of tyranny or aloofness, but because the systems functioned with such frictionless harmony that a personal royal audience was required only "once in a blue moon".

13.3. 2.3. The Ideological Fork: Mi-ren and Casatti

The First King had two sons who chose distinct paths while still young teenagers:

- **Prince Mi-ren (The Elder Son):** The rightful heir to the High Throne, raised in administrative discipline to inherit his father’s covenant of golden peace.
- **Prince Casatti (The Younger Son):** Renounced his royal birthright to the throne to establish **The Academy**, dedicating his life to empirical inquiry, elemental sciences, and mapping the astral geometries of the ethereal plane.

Chapter 14. 3. Era II & III: The Festival of Peoples, The Coma & The Silent Vigil

14.1. 3.1. Why the Festival Lasted a Full Week

Every year, the Capital hosted the **Festival of Peoples**—an international gathering where border demarcations were ratified, continental infrastructure treaties negotiated, and subjects celebrated. Rather than holding a single-day event, the First King mandated a full seven-day festival out of deliberate consideration for distant subjects: those with harvest or trade obligations could depart early, while delegations traveling from the furthest frontiers of the known world were guaranteed meaningful participation.

14.2. 3.2. The First Festival Coma & Discovery of The Dreamscape

Immediately following the first grand Festival of Peoples—where the collective emotional consciousness of an entire continent converged—the First King collapsed into a deep coma. His body remained dormant, yet his spirit was fully lucid and awake on the other side of the ethereal boundary in **The Dreamscape**. By tracing his father's displaced consciousness, Prince Casatti and The Academy mapped the Dreamscape in full.

14.3. 3.3. Festivals 1 Through 4: The Four-Year Rescue Effort

During the first four years of the coma, the annual festival week—when the boundary ("the Veil") thinned to gossamer—served as the **surest, most stable window** to access the King. Throughout these four years, Mi-ren, Casatti, and the court worked tirelessly across the thinned veil attempting to pull the First King back into his mortal body.

14.4. 3.4. Era III: The 5th Festival Death & The Meaning of "Of Age"

During the **5th Festival of Peoples**, the First King's physical body died. Pulling him out of the coma was no longer possible. However, the Castle court continued the festival because that thinned-veil week was now the **sole remaining lifeline** allowing Mi-ren to commune with his father's lucid spirit and project his consciousness into the temporal hall in short bursts when rare royal audiences were needed.

This secret was maintained across Festivals 5 through 10 not out of malice, but as a protective vigil:

- **No Precedent for Succession:** Sacyra had never experienced the death of a monarch before; international peace treaties were bound to the First King's personal covenant, and no constitutional law existed for a regency.

- **The Chivalric Definition of "Of Age":** Mi-ren and Casatti were teenagers. In Sacyran chivalric law, attaining majority required martial maturity to personally command the Royal Guard alongside mastery of the Academy’s statecraft systems so the self-running realm would not shatter under foreign pressure.

Chapter 15. 4. Era IV: Usuru the Wanderer & The 11th Year Tragedy

15.1. 4.1. The "Quiet Complaint" of Remote Libira

Far on the southern frontier lay the **Kingdom of Libira**, a sparse, underdeveloped territory separated from the Capital by a grueling seven-day journey. Because Libira was not yet established enough to maintain an imperial relay outpost network, communications suffered a chronic seven-day lag. This systemic gap fostered a simmering **"quiet complaint"** among Libirans regarding the disparity between Capital prosperity and border isolation.

15.2. 4.2. The Three-Day Wanderer

During the First King's peaceful reign, a boy was born in Libira to a humble family without being given a name. For ten years, he grew up traveling the continent as a restless wanderer who lived by a strict personal rule: **never stay more than three days anywhere**—except for the annual week-long Festival of Peoples in the Capital, which he attended with pure devotion to honor the King he revered.

15.3. 4.3. The 11th Year Rupture

During the boy's eleventh annual pilgrimage to the festival, heralds announced that a "royal plague" kept the First King unseen on his balcony. Anxious for the monarch he adored, the eleven-year-old boy slipped past castle guards into the royal sanctum to seek an audience.

Inside, the boy discovered the long-dead body and Prince Mi-ren utilizing Academy projection glyphs. Lacking the statecraft context to understand the court's desperate vigil, the boy viewed the revelation as a monstrous, hypocritical deception. In his terror and shock, he accidentally collided with the ritual array, triggering four catastrophic consequences:

1. **The Eternal Astral Seal:** The First King's spiritual tether snapped; his consciousness was permanently marooned in **The Dreamscape**.
2. **The Birth of Tenebris:** The violent collapse of the boy's innocent faith into profound betrayal produced an anomalous metaphysical shockwave, releasing the cosmic apex force of **Tenebris** (severance and dissolution) into the waking temporal world that very day.
3. **The Warped Distance:** The planar backwash physically warped continental leylines, stretching the geographical distance between Libira and the Capital into an unnatural chasm that the boy interpreted as an act of deliberate hostile separation by the Crown.
4. **The Rise of Sovereign Usuru:** Taking the name **Usuru**, the youth fled back to Libira, revealed the Capital's deception, was crowned young ruler of Libira, and rallied neighboring border kingdoms into an alliance to declare a war of total annexation against the Capital.

Chapter 16. 5. Era V: The 7-Year Great War & Awakening of the Relics

16.1. 5.1. The Six Fractured Powers

Usuru's uprising ignited **The Great War**, plunging six sovereign powers into continental war:

Faction	Leadership	Strategic Role in the Conflict
The Libira Kingdom	Sovereign Usuru	Vanguard of the frontier coalition; driven by righteous betrayal and territorial annexation.
The Capital	Prince Mi-ren	Citadel defense of the High Throne, administrative continuity, and royal army deployment.
The Great Mau Kingdom	High Chieftains	Mighty inland territorial power maneuvering along contested eastern borders.
Old Sacyra	Traditional Fiefdoms	Ancestral heartland baronies fighting to preserve chivalric feudal order.
The Academy	Prince Casatti	Independent intellectual and arcane bastion deploying experimental elemental resonance.
The Yun-yin Provinces	Provincial Assemblies	Western agricultural riverlands caught between coalition supply routes and capital levies.

16.2. 5.2. Casatti's Infusion of Tenebris (The Sword of War)

Determined to end Usuru's siege quickly and preserve the realm, Prince Casatti analyzed the anomalous energy spike recorded during the ritual rupture. Synthesizing his knowledge of the Dreamscape and elemental properties, Casatti isolated **Tenebris** and infused it into the mundane Sword of War. He forged the **Sword of Tenebris** not out of bloodlust, but to execute **Absolute Justice**—creating a surgical blade capable of severing siege lines and unyielding armor to halt the war decisively.

16.3. 5.3. Mi-ren's Discovery of Lux (The Shield of Peace)

Taking command of the Capital's forces, Prince Mi-ren sought not conquest or vengeance, but **atonement and forgiveness from Usuru**. By reverse-engineering the projection ritual used to

anchor ethereal concepts into physical reality, Mi-ren unlocked **Lux** (cohesion, preservation, and radiance) and infused it into the mundane Shield of Peace, creating the **Shield of Lux**.

16.4. 5.4. The Law of Tempering and Dissipation

Battlefield confrontations between the two armaments revealed the foundational cosmic dynamic:

- **Lux as the Singular Tempering Agent:** Raw Tenebris is purely severing and entropic; left unchecked, it erodes both wielder and target. Lux is the only force capable of containing and stabilizing Tenebris, granting structural cohesion so void strikes can be directed with precision.
- **The Fragility of Radiance (Dissipation):** While Lux stabilizes Tenebris, its golden coherence requires steadfast emotional and ethical harmony. Any sudden surge of terror, wrath, or malice causes Lux to **dissipate instantly**, leaving Tenebris unbridled.

16.5. 5.5. The Parley & The 7-Year Armistice

During peace negotiations, Prince Mi-ren lowered his defenses and offered total reconciliation to Usuru. However, Usuru's deep bitterness erupted in a violent surge of hatred, causing Mi-ren's ambient Lux aura to dissolve on the spot.

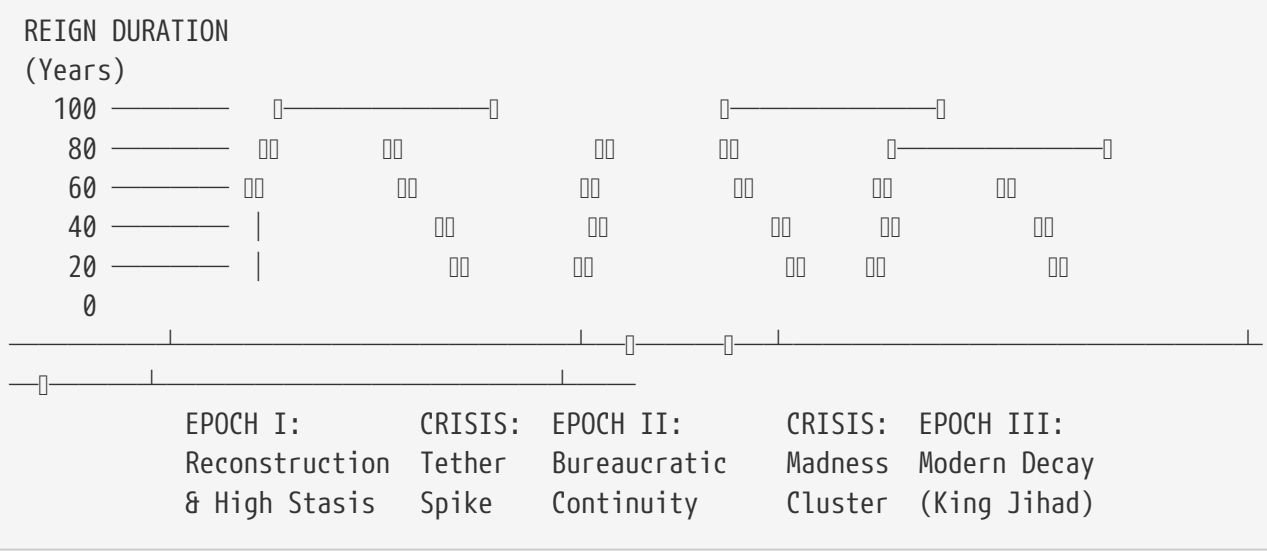

Recognizing that neither side could achieve unconditional victory without mutual annihilation, the six powers ratified the **Accord of Kings**, bringing the Great War to a close after exactly **seven years**:

- **"Joint Realm, Separate Kingdoms":** Autonomous provinces and kingdoms formed a loose federated realm under the High Crown while preserving regional self-rule.
- **The Prophecy of Kings:** Sages enshrined the legend that true peace would only return when a bearer achieved the **Stance of Equilibrium**, harmonizing the Shield and Sword without allowing wrath to dissipate the light.
- **Usuru's Descent:** Refusing reconciliation, Usuru retreated into the deep subterranean abyss, where his resentment festered over three millennia until his name was forgotten, remembered only as **The Dark Lord**.

Chapter 17. 6. The 3,000-Year Chasm & The Dynastic Wave

Between the Great War and the modern campaign lies a three-thousand-year chasm ($3,000\text{ years}$), spanning between **30 and 50 monarchs** (averaging $60\text{ to }100\text{ years}$ per reign).

17.1. 6.1. The Mathematical Wave of Succession

The dynastic progression oscillates across three cyclical phases:

1. **Long Stasis Crests (60–90+ Years):** In eras of high stability, the First King's self-running institutions, Academy restorative arts, and the preserving aura of the Shield of Lux allowed monarchs to reign for nearly a century in peaceful continuity.
2. **Tether-Sickness Troughs (5–20 Years):** Succession clusters triggered when the dormant planar wound beneath the High Throne flared up, afflicting sovereigns with premature wasting, paranoia, and sudden abdications.
3. **Bureaucratic Consolidations (35–50 Years):** Standard generational transitions managed smoothly by the Royal Court and hereditary Noble Houses.

17.2. 6.2. Five Axioms of Dynastic Continuity

Why does the narrative require an established 3,000-year dynastic order rather than constant civil anarchy?

1. **Embodying the Cosmological Shadow of Lux:** Unbroken continuity proves Sacyra succumbed to the negative extreme of Lux—calcifying stasis—transforming a golden peace into a rigid, bureaucratic museum.
2. **Exposing Frontier Neglect as Systemic:** Because the Capital enjoyed millennia of comfort, the decay of border settlements like **Dio Village** is exposed not as temporary wartime fallout, but as cold, institutional apathy mirroring ancient Libira.

3. **Isolating "The King's Curse":** In a stable, legally sacrosanct monarchy free of routine coups, the periodic madness afflicting sovereigns stands out as a haunting metaphysical anomaly.
4. **Validating the Ro-enheart Lineage:** Five unbroken generations of Ro-enheart leadership at the head of the Royal Guard holds sacred weight only if the crown they defended felt ancient, honorable, and permanent.
5. **Magnifying King Jihad's Rupture:** An established 3,000-year legacy transforms **King Jihad** (`D. Jihad`) from a common bad ruler into an existential traitor gambling away three millennia of peace for void supremacy.

Chapter 18. Chapter 3: Master Storyboard Sequence (Scenes 01–20)

Source File: `/home/professorseanex/Tenebris and Lux/docs/lore/master_storyboard_chronicle.adoc`

Chapter 19. Overview & Cinematic Philosophy

This document contains the complete master storyboard sequence for the historical prologue and ancestral memory sequences of **Tenebris and Lux**. Comprising twenty sequentially numbered cinematic scenes (Scenes 01–20), this chronicle establishes the visual language, color temperature, character staging, and dramatic pacing that bridge the founding of the Kingdom of Sacyra to the catastrophe of the 11th Festival and the dawn of the Great War.

Chapter 20. 1. Cinematic Staging Matrix (Scenes 01–20)

Scene	Title	Setting & Tone	Visual Focus	Narrative & Thematic Action
01	**Symbols of Iron**	Royal Forges of Sacyra (Warm hearth amber)	Smiths quenching an unadorned steel kite-shield and broadsword.	The Kingdom of Sacyra is founded. Two ordinary weapons are presented to the First King as civic symbols of **Peace** and **War**.
02	**The Crown and the Scroll**	Sacyra Throne Room (Sunlit marble)	The First King with his teenage sons, Mi-ren and Casatti.	Mi-ren accepts his birthright as heir; Casatti declines the throne to establish **The Academy**.
03	**The Self-Running Realm**	Capital Courtyards & Provincial Towns (Golden calm)	Civic courts and markets running smoothly without royal interference.	Establishes a reign of peace so well-engineered that war is merely an idea and royal audiences are needed only once in a blue moon.
04	**The First Festival & The Coma**	Grand Festival Grounds / Royal Bedchamber	The known world celebrating for a full week; the First King collapsing into a coma as his spirit awakens in the Dreamscape.	The week-long Festival of Peoples accommodates distant travelers. Afterward, the King falls comatose; Casatti discovers the Dreamscape in full while tracking his father’s lucid spirit.
05	**The Four-Year Rescue Effort**	Academy Conduit Chamber (Festivals 1–4)	Teenage Mi-ren and Casatti working across the thinned festival veil to reach their father.	For four years, the festival week serves as the surest window to access the King while his sons attempt to pull him out of his coma.
06	**The Passing at the Fifth**	Royal Sanctum (Festival 5, solemn candlelight)	The First King’s physical body expiring while his golden silhouette remains across the veil.	The King dies during the 5th Festival. Because Mi-ren is not yet "of age" for the first succession, the Castle keeps the secret; the festival continues as the only way left to access the King in short bursts.
07	**The Quiet Complaint of Libira**	Frontier Kingdom of Libira (Windy, sparse roads)	A lone courier riding for seven days without a single relay outpost; a nameless boy born to a humble family.	Highlights the week-long travel gap and lack of an outpost system in Libira, breeding a "quiet complaint" over the Capital’s distance.

Scene	Title	Setting & Tone	Visual Focus	Narrative & Thematic Action
08	**The Three-Day Wanderer**	Continental Roads & Capital Gates	Montage of the boy wandering from town to town (never staying past 3 days), except for his annual week at the Festival of Peoples.	For 10 years, the humble wanderer visits the Capital every festival week to celebrate and honor the First King.
09	**The Plague Year**	Festival Concourse — Year 11 (Somber crowd)	Heralds announcing a "plague" has struck the King; the 11-year-old boy looking at the empty royal balcony.	Unseen for the entire 11th festival, the King's absence worries the boy, prompting him to sneak into the castle for an audience.
10	**Behind the Veil**	Inner Castle Sanctum (Arcane glyphs, mist)	The boy discovering Mi-ren using Academy knowledge to commune with the long-dead First King.	From the boy's perspective, the Capital's golden peace is exposed as a years-long deception.
11	**The Shattered Ritual & Birth of Tenebris**	Inner Sanctum (Violent violet and gold shockwave)	Shocked, the boy accidentally tampers with the ritual; the tether snaps and a dark energy spike erupts.	The First King is sealed forever in **The Dreamscape**. The devastating shift in the boy's heart spawns **Tenebris** and warps the physical distance between Libira and the Capital.
12	**The Rise of Sovereign Usuru**	Libira Assembly Hall (Torchlight, raised spears)	The boy takes the name **Usuru**, rallying Libira's quiet complaints into open fury.	Seeing the warped distance as intentional malice, Usuru convinces Libira to crown him young ruler and declare a war of annexation against the Capital, inciting neighboring kingdoms to join.
13	**The Six-Power Conflagration**	Continental War Map (Six burning fronts)	Armies clashing across Libira, the Capital, Great Mau, Old Sacyra, the Academy, and the Yun-yin Provinces.	**The Great War** engulfs the known world.
14	**The Infusion of Tenebris**	Academy Arcane Forge (Deep twilight violet)	Prince Casatti channeling the anomalous energy spike from the interrupted ritual into the mundane Sword of War.	Synthesizing his study of the Dreamscape, world elements, and the rupture spike, Casatti creates the **Sword of Tenebris** to enact swift **Absolute Justice**.

Scene	Title	Setting & Tone	Visual Focus	Narrative & Thematic Action
15	**The General of Reconciliation**	Capital Command Tent (Warm lantern light)	Prince Mi-ren taking command of the army, vowing to seek Usuru's forgiveness.	Mi-ren leads the defense not for conquest, but to restore peace and mend the broken trust with Usuru.
16	**The Discovery of Lux**	Academy Spire & Battlefield (Golden radiance)	Mi-ren adapting the temporal projection ritual into a golden defensive barrier (**Lux**), sparking the Magic vs. Science debate.	Using what he learned from projecting the King into the temporal world, Mi-ren infuses the mundane Shield of Peace into the **Shield of Lux**.
17	**Tempering the Void**	Frontlines of the Great War (Gold & violet clash)	Mi-ren's Lux barrier containing and stabilizing Casatti's Tenebris strikes against coalition lines.	Demonstrates that Lux is the only force able to temper Tenebris, bringing the continental war to a decisive end in just 7 **years**.
18	**The Dissipation at Parley**	Border Truce Grounds (Thick mist)	Mi-ren offering reconciliation to Usuru; Usuru's violent surge of hatred causing the ambient Lux to dissolve.	Proves the metaphysical law: any violent emotional shift causes Lux to dissipate instantly, just as it did on the day of the ritual rupture.
19	**The Joint Realm Accord**	Grand Council Chamber (Six regional banners)	Leaders ratifying the treaty establishing the "Joint Realm, Separate Kingdoms" political order.	Solidifies the federated geopolitical structure that persists into the modern era of Sacyra.
20	**The Prophecy of Kings**	Room of Sages / Royal Archives	Chrono recording the legend of the twin artifacts awaiting a bearer of true Equilibrium.	The First King's symbols of Peace and War are enshrined in the **Prophecy of Kings**, while Usuru retreats into the dark to become **The Dark Lord**.

Chapter 21. 2. Scene-by-Scene Narrative Walkthrough

21.1. Scene 01: Symbols of Iron

- **Atmosphere:** An ancient blacksmith workshop bathed in the deep amber glow of coal embers. Hammers strike rhythmic, resonant beats on an anvil.
- **Cinematics:** Steam hisses violently as a plain, unadorned kite shield and a straight broadsword are pulled from water troughs. There are no glowing runes, no magical stones, and no celestial sigils.
- **Thematic Grounding:** Sacyra's founding armaments were forged by mortal hands as mundane civic symbols of Peace and War. Power did not reside in the iron; it resided in the covenant of the sovereign who held them.

21.2. Scene 02: The Crown and the Scroll

- **Atmosphere:** High-vaulted marble halls of Sacyra Castle flooded with pure morning sunlight.
- **Cinematics:** The First King, majestic and warm, speaks with his two teenage sons. Prince Mi-ren kneels to receive the ceremonial signet of succession. Prince Casatti stands erect, clutching parchment scrolls and an astrolabe, smiling as he formally declines the throne to establish The Academy.
- **Thematic Grounding:** Establishes the harmonious brotherhood between governance (Mi-ren) and empirical inquiry (Casatti) before history fractured.

21.3. Scene 03: The Self-Running Realm

- **Atmosphere:** Vast panoramic shots of bustling provincial markets, lush terraced farms, and judicial courtyards under clear azure skies.
- **Cinematics:** Merchants trade freely; magistrates resolve disputes with open books; no armed patrols or royal inquisitors hover in the shadows. The throne room stands empty not from neglect, but because the machinery of state functions flawlessly.

21.4. Scene 04: The First Festival & The Coma

- **Atmosphere:** The vibrant, colorful sprawl of the inaugural Festival of Peoples.
- **Cinematics:** Seven days of joyous celebration give way to silence in the royal bedchamber. The First King collapses as the music fades. The camera slowly pushes past his dormant physical eyes into a starry, gossamer void: his consciousness stands upright, alive and lucid in The Dreamscape.

21.5. Scene 05: The Four-Year Rescue Effort

- **Atmosphere:** The dim, arcane candlelight of an Academy laboratory conduit chamber.
- **Cinematics:** For four consecutive years during festival week, teenage Mi-ren and Casatti channel glowing ether arrays toward their father's spectral silhouette across the thinned veil, desperately trying to pull him back into physical reality.

21.6. Scene 06: The Passing at the Fifth

- **Atmosphere:** Cold, somber blue candlelight in the royal sanctum.
- **Cinematics:** The First King's mortal chest draws its final breath; his physical heart ceases. Yet across the gossamer veil, his golden silhouette remains awake. The Castle ministers and the teenage princes lower their heads in solemn consensus: the vigil must continue until Mi-ren is of age.

21.7. Scene 07: The Quiet Complaint of Libira

- **Atmosphere:** Bleak, windswept savanna and rugged canyons of the remote southern frontier.
- **Cinematics:** A lone royal courier gallops past solitary marker stones under scorching sun and freezing night, taking seven grueling days to reach an isolated frontier village without a single relay outpost. In a humble thatch hut, a nameless baby is born.

21.8. Scene 08: The Three-Day Wanderer

- **Atmosphere:** A dynamic, fast-paced montage across muddy trade roads, dusty inns, and river barges.
- **Cinematics:** The growing boy arrives in hamlets, helps villagers for three days, packs his light sack on dawn of the fourth day, and departs. He stays nowhere longer than three days—until the camera tracks him entering the golden gates of the Capital for the annual week-long Festival of Peoples.

21.9. Scene 09: The Plague Year

- **Atmosphere:** Chilly autumn mist hanging over a muted, uneasy festival concourse in the 11th year.
- **Cinematics:** Royal heralds announce from the battlement that the King has been stricken with illness and will not appear. The eleven-year-old boy stares up at the empty balcony with furrowed brows and rising dread.

21.10. Scene 10: Behind the Veil

- **Atmosphere:** Claustrophobic, echoing shadows of the forbidden inner keep.
- **Cinematics:** The boy slips through heavy oak doors into the projection chamber, watching from behind a stone pillar as Mi-ren chants over the long-dead, mummified body of the First King,

projecting his spectral double onto the temporal dias. The boy's eyes widen in sheer horror at what he perceives as a monstrous fraud.

21.11. Scene 11: The Shattered Ritual & Birth of Tenebris

- **Atmosphere:** A blinding, violent detonation of midnight-violet and solar-gold.
- **Cinematics:** Tripping in his panic, the boy stumbles into the chalk glyphs and crystal anchors. The ethereal tether snaps with the sound of cracking glass; the First King is pulled backwards into the astral deep. From the boy's chest erupts an anomalous spike of pure cosmic void: **Tenebris** enters waking reality.

21.12. Scene 12: The Rise of Sovereign Usuru

- **Atmosphere:** The smoky, torchlit Great Hall of Libira.
- **Cinematics:** Standing before tribal chiefs and town elders, the youth raises a spear, his voice ringing with cold fury. He proclaims his name: **Usuru**. Spears clash against shields as Libira crowns their young sovereign and pledges to march on the Capital.

21.13. Scene 13: The Six-Power Conflagration

- **Atmosphere:** A vast tactical war table transitioning into panoramic battlefields lit by burning trebuchets.
- **Cinematics:** Six banners clash across smoking battlefields: Libira, The Capital, Great Mau, Old Sacyra, The Academy, and Yun-yin. Sacyra's golden peace dissolves into total war.

21.14. Scene 14: The Infusion of Tenebris

- **Atmosphere:** The subterranean resonance forge of The Academy.
- **Cinematics:** Prince Casatti holds the mundane iron broadsword over a crystal crucible containing the harvested violet rift energy. Chanting harmonic formulas, he quenches the steel in void essence. The blade turns star-black with rippling violet mist: the **Sword of Tenebris** is born for Absolute Justice.

21.15. Scene 15: The General of Reconciliation

- **Atmosphere:** The somber, parchment-strewn command tent of the Royal Army.
- **Cinematics:** Prince Mi-ren inspects defensive troop dispositions. He speaks to his captains not of conquest or retaliation, but of holding the line so that he may face Usuru and beg for his forgiveness.

21.16. Scene 16: The Discovery of Lux

- **Atmosphere:** An open battlefield at dawn, bathed in blinding celestial gold.
- **Cinematics:** Facing an enemy barrage, Mi-ren steps to the front ranks and raises the mundane iron shield. Channelling the memory of his father's temporal projection, radiant golden light solidifies into a geometric barrier: **Lux** manifests to shield the living.

21.17. Scene 17: Tempering the Void

- **Atmosphere:** A violent clash of solar-gold and abyssal-violet along the forward redoubts.
- **Cinematics:** Casatti's vanguard unleashes the severing edge of Tenebris, cutting through enemy siege engines, while Mi-ren's radiant Lux barrier contains the destructive blast wave. The two forces synchronize: Lux tempers Tenebris, bringing decisive victory in seven short years.

21.18. Scene 18: The Dissipation at Parley

- **Atmosphere:** A desolate borderland shrouded in thick morning mist.
- **Cinematics:** Mi-ren stands before Usuru with shield lowered, offering his hand and admitting the Crown's fault. Usuru's face twists with bitter, unyielding hatred. As Usuru roars in fury, Mi-ren's golden Lux barrier flickers and instantly dissolves into thin air, proving that violence in the heart shatters the light.

21.19. Scene 19: The Joint Realm Accord

- **Atmosphere:** The Grand Council Chamber in the reconstructed Capital.
- **Cinematics:** Envoys from all six sovereign factions sign their seals upon parchment treaties. The federated principle of "Joint Realm, Separate Kingdoms" is ratified, ensuring autonomous provincial governance under the High Crown.

21.20. Scene 20: The Prophecy of Kings

- **Atmosphere:** The timeless, floating crystalline library of the Room of Sages.
- **Cinematics:** Chrono the Sage dips a quill of starlight into an inkwell of void, recording the prophecy of the twin relics and the champion who must one day achieve Equilibrium. In the final shot, Usuru descends down stone stairs into the abyssal vaults, as shadow consumes his silhouette and history forgets his name, calling him only **The Dark Lord**.

Chapter 22. Chapter 4: The Past, Present & Future Thematic Triad

Source File: `/home/professorseanex/Tenebris and Lux/docs/lore/thematic_triad.adoc`

Chapter 23. Overview & Core Thesis

Rather than mapping protagonists solely by the physical armaments they carry, the narrative architecture of **Tenebris and Lux** links the ancient genesis era to the modern campaign through a psychological triad: **Elijah is to Usuru**, **Katrina is to Prince Casatti**, and **The Custom Bearer (`<chosen_name>`) is to Prince Mi-ren**. Governed by the foundational axiom **"Trauma is Inherited, Destiny is Chosen,"** this document establishes how ancient grievances echo into the modern campaign and how player agency determines whether history repeats its tragedies or achieves cosmic reconciliation.

Chapter 24. 1. The Thematic Triad Matrix

Era	The Frontier Wound (Heart & Shield/Wrath)	The Renouncing Blade (Truth & Severance)	The Steward of Balance (Veil & Synthesis)
PAST (Genesis Era)	**Usuru** • Neglected Libiran boy • 10 years of peace; shattered in year 11 • Birthed Tenebris; became The Dark Lord	**Prince Casatti** • Renounced the High Throne • Founded The Academy • Infused Sword of Tenebris for Justice	**Prince Mi-ren** • Bore the burden of statecraft • Sustained the Dreamscape projection • Discovered Lux for reconciliation
PRESENT (Campaign)	**Elijah Ro-enheart** • Neglected Dio Village vanguard • Father vanished on 10th birthday • Wields Shield of Lux against court rot	**Lady Katrina Jaren** • Fled aristocratic House Jaren • Seeks the Adventurers' Guild • Wields Sword of Tenebris with candor	**The Custom Bearer (`<chosen_name>`)** • Emergent champion in the Archives • Wields the Dream Compass at night • Synthesizes both perspectives
FUTURE (Resolution)	**Redemption or Ruin** • Protects the realm with conscience, or succumbs to disillusionment.	**Liberation or Cynicism** • Cuts the planar bindings of the past, or embraces ruthless severance.	**Stasis or Equilibrium** • Repeats the comfortable lie, or confronts the Ugly Truth.

Chapter 25. 2. Elijah Ro-enheart as Usuru (The Frontier Wound & Redemptive Counterpoint)

Although Elijah wields the **Shield of Lux** like Prince Mi-ren, his internal wound and psychological arc directly mirror **Usuru**:

25.1. 2.1. The Child of the Forgotten Frontier

Usuru grew up on the neglected periphery of Libira, where royal couriers required seven days to arrive and no imperial outposts existed. Elijah grows up in **Dio Village**, an isolated border settlement where Grandma Magolia laments: *"This town used to be full of life... The kingdom doesn't pay much attention to this place anymore"*. Both youths embody the quiet complaint of the forgotten border.

25.2. 2.2. The Tenth-Year Fracture

Usuru experienced ten years of innocent pilgrimage to the Festival of Peoples before his eleventh visit shattered his faith in the Crown. Elijah's childhood similarly froze on his **10th birthday**—the morning his father, **Commander Gareth Ro-enheart**, vanished under King Jihad's sealed royal orders. When Grandma Magolia asks Elijah to inspect the upstairs chest in Dio Village, Elijah immediately clings to that decade-old wound: *"Maybe it is something about dad! I haven't seen him since my 10th birthday. Sure thing. This might be my chance to get answers!"*.

25.3. 2.3. The Redemptive Choice

When Usuru discovered the First King's mummified body and the secret stasis projection, his innocent faith collapsed into bitter wrath, birthing Tenebris and sparking a war of vengeance. Elijah begins with unquestioning faith in the Royal Guard, but is forced to uncover King Jihad's treason in the throne room. Rather than succumbing to destructive malice, Elijah chooses to raise the **Shield of Lux** to protect the vulnerable, serving as Usuru granted a second chance at moral redemption.

Chapter 26. 3. Lady Katrina Jaren as Prince Casatti (The Renouncing Blade of Truth)

Lady Katrina Jaren carries the **Sword of Tenebris**, but her ideological kinship belongs to **Prince Casatti**:

26.1. 3.1. Renouncing Aristocratic Privilege

Just as Prince Casatti voluntarily renounced his royal birthright to the High Throne to pursue empirical truth, Katrina actively flees her aristocratic heritage in **House Jaren**—one of the wealthiest noble families on the Royal Court. She refuses to be bartered as a diplomatic pawn in court intrigues.

26.2. 3.2. Merit Over Pedigree

Casatti founded The Academy because he believed understanding the cosmos required objective observation rather than imperial decree. Katrina seeks the **Adventurers' Guild**, a frontier brotherhood where practical grit, swordsmanship, and survival skills outweigh bloodlines and heraldic crests.

26.3. 3.3. Surgical Severance for Justice

Casatti infused the Sword of Tenebris to execute **Absolute Justice**—slicing through entrenched siege engines to end a seven-year stalemate. Katrina wields the Sword of Tenebris with cynical, irreverent pragmatism, slicing through aristocratic hypocrisy, feudal exploitation (the St. Baron), and provincial inertia.

Chapter 27. 4. The Custom Bearer as Prince Mi-ren (The Steward of Balance)

When the player selects a custom name (`<chosen_name>`), the relics decouple from fixed protagonists, placing the player into the ideological position of **Prince Mi-ren**:

27.1. 4.1. The Overarching Macro-Steward

While Elijah focuses on the military/institutional conspiracy of the Royal Guard, and Katrina navigates the underground rebellion of the Guild, the Custom Bearer holds **The Dream Compass**, navigating the astral tides of The Dreamscape exclusively at night.

27.2. 4.2. Bearing the Weight of Synthesis

To achieve completion, the Custom Bearer must perform the "double work" along the `[-100, +100]` **Moral Sway** continuum, catching fragments of both Elijah's and Katrina's paths. They stand where Mi-ren stood during the 7-Year Great War: attempting to hold a fracturing world together through reconciliation.

27.3. 4.3. The Burden of Stasis vs. True Equilibrium

The Custom Bearer faces Mi-ren's original dilemma. They can succumb to the **Benevolent Stasis** ending—freezing Sacyra in a protective golden barrier where no growth can occur—or they can transcend Mi-ren's mistake by mending the planar tear in the Room of Sages, reconciling the ancient wound of Usuru, and unlocking the **Secret Chronicler True Ending**.

Chapter 28. 5. The Butterfly Effect vs. The Bystander Corridor: Overriding Cyclic Fate

The thematic axiom **"Trauma is Inherited, Destiny is Chosen"** is not merely a narrative motto; it is a systemic law operating across the `[-100, +100]` Moral Sway axis:

28.1. 5.1. The Bystander Corridor (`[-50, +50]`) as Karmic Determinism

Floating within `[-50, +50]` represents **Net Moral Inertia**, where opposing virtuous and selfish acts cancel out into zero displacement. In this corridor, diffusion of responsibility preserves the status quo: - Elijah is dragged into Usuru's bitter, disillusioned path upon discovering King Jihad's treason. - Katrina is locked into cynical detachment, abandoning Sacyra's rotting court to survive on the margins. - Sacyra's 3,000-year dynastic stasis repeats endlessly because ordinary citizens refuse to risk conviction.

28.2. 5.2. The Butterfly Effect: Micro-Choices as Fate Breakers

Derived from chaos theory, tiny perturbations in initial conditions compound nonlinearly into radically divergent macro-states: - Seemingly modest provincial choices in Dio Village—donating 500 Gold to cover Eric the Lumberjack's taxes, intervening between John the Thief and the predatory St. Baron, or choosing non-lethal shield stagger (**Lux Barrio**) over lethal execution—act as wings flapping against 3,000 years of karmic momentum. - By accumulating deliberate micro-interventions, the party crosses the ± 50 conviction threshold, overriding spiritual reincarnation and proving that while trauma is inherited, destiny is chosen.

Chapter 29. Chapter 5: Socio-Political Strata of the Kingdom of Sacyra

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters.adoc

Chapter 30. Overview

This document provides complete biographical dossiers, martial doctrines, and thematic arcs for the central protagonists and key figures of **Tenebris and Lux** in the **Kingdom of Sacyra** and **The Dreamscape**. Grounded in the recovered 2017–2018 demo baseline and the Past/Present/Future thematic triad ("Trauma is Inherited, Destiny is Chosen"), it establishes the tri-perspective narrative architecture across Elijah Ro-enheart, Lady Katrina Jaren, and the Custom Bearer (`<chosen_name>`).

Chapter 31. 1. Elijah Ro-enheart (The Aegis of Lineage)

> "My father taught me that a shield is not a wall to hide behind, but a promise made to the people standing behind you."
>
> — Elijah Ro-enheart

31.1. 1.1. Biography & Heritage

- **Full Name:** Elijah Ro-enheart
- **Affiliation:** Kingdom of Sacyra Royal Army (Cadet Vanguard); House Ro-enheart
- **Family Lineage:** The Ro-enhearts have served the Sacyran crown for five unbroken generations. Elijah's father, **Commander Gareth Ro-enheart**, was the esteemed former Head of the Royal Guard, famed for holding the Sunken Citadel. Gareth vanished under mysterious royal orders on Elijah's **10th birthday**, leaving behind unhealed questions and immense expectations.
- **Upbringing:** Raised in the barracks and training quadrangles of the capital citadel, but spends his youth in **Dio Village** under the watchful care of **Grandma Magolia**.
- **Visual Profile:** Broad-shouldered, athletic build, steel-blue eyes, and cropped dark hair. Wears fitted silver-steel infantry plate over deep navy quilted gambeson, marked with the defensive crest of the Ro-enhearts.

31.2. 1.2. Thematic Parallel: Mirror of Ancient Usuru

Although Elijah wields the Shield of Lux, his personal arc directly mirrors **Usuru** (The Frontier Wound): * **The Boy from the Forgotten Border:** Usuru grew up in neglected Libira; Elijah grows up in neglected Dio Village. * **The Tenth-Year Fracture:** Usuru had ten years of innocent devotion before his world shattered in year 11; Elijah's childhood froze on his 10th birthday when his father vanished. * **Redemption Over Vengeance:** Confronting King Jihad's betrayal, Elijah refuses to burn the kingdom down. He raises the Shield of Lux to protect the living, representing Usuru granted a second chance at moral redemption.

31.3. 1.3. Combat & Tactical Doctrine (TRPG)

- **Battlefield Role (Grid):** Frontline Heavy Vanguard / Fortress Anchor.
- **Grid Attributes:** Heavy physical mitigation, high poise, Zone of Control (ZOC) bottleneck denial, ally interception.
- **Tactical Signature:** `Lux Barrio` — Manifests a radiant geometric barrier dome ($2\dots5$ turn duration, 25% damage mitigation).

Chapter 32. 2. Katrina Jaren (The Blade of Freedom)

> "Silk dresses and court etiquette won't turn back a vanguard blade. Let my cousins argue over tax registries; my place is on the frontier."
>
> — Katrina Jaren

32.1. 2.1. Biography & Heritage

- **Full Name:** Lady Katrina Jaren
- **Affiliation:** House Jaren (Aristocracy of Sacyra); Aspirant of the Adventurers' Guild
- **Family Lineage: House Jaren** is an ancient, wealthy noble family commanding lucrative vineyards and silver mines in Sacyra's eastern provinces, holding significant patronage leverage on the Royal Court.
- **Upbringing:** Groomed by diplomats and heralds to occupy a ceremonial court seat, Katrina despised courtly hypocrisy, frequently escaping to Dio Village and training with Adventurers' Guild rangers.
- **Visual Profile:** Agile, athletic build, sharp amber eyes, and unbound chestnut hair tied in a practical combat braid. Clad in tailored lightweight leather arming doublets over noble-weave tunic, with rapier and long-dagger scabbards.

32.2. 2.2. Thematic Parallel: Mirror of Prince Casatti

Katrina carries the Sword of Tenebris and embodies the philosophy of **Prince Casatti** (The Renouncing Blade): * **Renouncing Aristocratic Birthright:** Just as Casatti renounced the High Throne, Katrina flees House Jaren. * **Merit Over Pedigree:** Casatti founded The Academy for empirical truth; Katrina seeks the Adventurers' Guild where practical survival and skill outweigh heraldic crests. * **Surgical Severance:** Wields the Sword of Tenebris with sharp, cynical candor to slice through court corruption, feudal extortion (the St. Baron), and provincial stagnation.

32.3. 2.3. Combat & Tactical Doctrine (TRPG)

- **Battlefield Role (Grid):** High-Mobility Skirmisher / Flanking Striker.
- **Grid Attributes:** 4–5 cell movement, ignores basic ZOC delays, backstab criticals, hit-and-run disengagement.
- **Tactical Signature:** `Cuttatio Tenebris` — Striking primary target while inflicting 20% splash cleave to adjacent enemy units.

Chapter 33. 3. The Custom Bearer (<chosen_name> — The Secret Chronicler)

33.1. 3.1. The Third Perspective: Mirror of Prince Mi-ren

When the player customizes their protagonist name via `name <str>`, the relics decouple from fixed identities, placing the player into the ideological position of **Prince Mi-ren** (The Steward of Balance): * **Macro-Steward of the Veil:** Holds **The Dream Compass**, entering The Dreamscape exclusively during nocturnal windows (`20:00 ⇐ hour || hour ⇐ 04:00`). * **The "Double Work" of Synthesis:** Navigates the `[-100, +100]` Moral Sway continuum to weave fragments of both Elijah's military investigation and Katrina's underground rebellion. * **Resolving the Stasis Fallacy:** Must avoid repeating Mi-ren's ancient error (Benevolent Stasis) to unlock the **Secret Chronicler True Ending**, reconciling the ancient wound of Usuru and permanently mending the planar tear.

Chapter 34. 4. Antagonists & The Two-Half Campaign

34.1. 4.1. King Jihad (The Sovereign of Ambition — Act I Antagonist)

- **Office:** Reigning Monarch of Sacyra, commanding the Royal Guard.
- **Role:** The grotesque inverse of the Founding Dynasty. Imposes state censorship on border warnings and seeks to usurp void power for total dominion.
- **The Possession:** Sitting on the High Throne above the ancient planar wound, Jihad's megalomania inverts the conduit, allowing a dormant remnant of Usuru (**The Dark Lord**) to possess him at the Act I climax.

34.2. 4.2. The Dark Lord (Usuru's Descent — Act II Antagonist)

- **Canonical Identity:** The ancient Libiran youth **Usuru**, whose faith in the Crown was shattered during the 11th Festival.
- **Role:** The overarching existential shadow ("The A Plot") menacing Sacyra from the subterranean Abyssal Vaults.
- **The Final Confrontation:** In Act II, heroes must penetrate the cosmic threshold. Slaying him blindly produces the Neutral Ending; achieving the **Stance of Equilibrium** (**Duo-Loca Bashin n Slash**) severs his abyssal tether while absorbing planar fallout without dissipating, granting Usuru eternal rest.

Chapter 35. Chapter 6: The Six Powers of the Continent

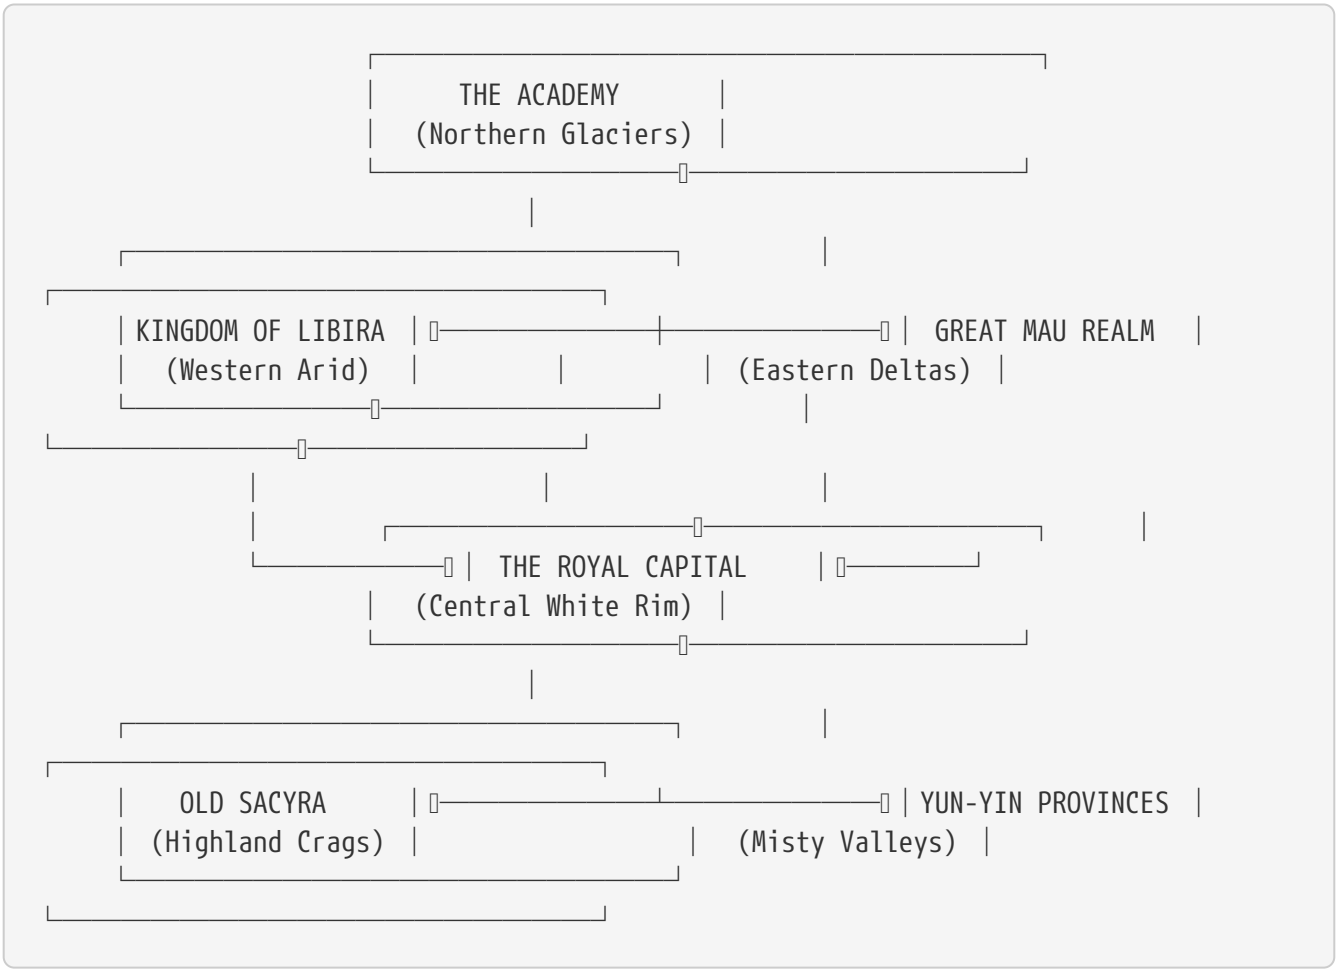

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/realms/the_six_powers.adoc

Chapter 36. Overview

The historical landscape of **Tenebris and Lux** was shaped by the clash and eventual reconciliation of **The Six Powers** during Eras IV through VI. When the planar rupture during the 11th Festival of Peoples shattered the First King's Pax Sacyrana, Usuru rallied these disparate sovereign nations into the catastrophic **Seven-Year Great War**. Understanding the cultural, architectural, and military profile of each power is essential to comprehending the ancestral factions, regional alliances, and diplomatic endings available within the TRPG campaign.

> No single crown shall claim the sun, and no lone throne shall command the shadows. Six thrones bled upon the salt and marble; six thrones shall swear that the realm shall be joint in peace, yet separate in kingdom, so long as the stars circle the spindle.
>
> — The Accord of Kings, Preamble - Inscribed upon the Six Obelisks of Unity

Chapter 37. 1. Geopolitical Map & Sovereign Overview

Chapter 38. 2. Comprehensive Profiles of the Six Powers

38.1. 1. The Royal Capital of Sacyra (The Radiant Center)

- **Domain & Geography**: The fertile central plains and plateaus surrounding the White Rim Citadel.
- **Cultural Philosophy**: Monarchy, institutional duty, legalism, and devotion to the light of the First King.
- **Military Doctrine**: Heavy vanguard infantry, phalanx formations, and divine warding priests wielding the techniques of the **Shield of Lux**.
- **Key Figure**: King Jihad (Present Era); Prince Mi-ren (Founding Era).

38.2. 2. The Kingdom of Libira (The Arid Frontier)

- **Domain & Geography**: The harsh western desert canyons, sandstone mesas, and salt flats.
- **Cultural Philosophy**: Radical communal self-reliance, stoic endurance, and fierce resentment of centralized royal arrogance ("The Quiet Complaint").
- **Military Doctrine**: Agile camel skirmishers, desert outriders, and shadow assassins who pioneered the early stances of the **Sword of Tenebris**.
- **Key Figure**: Usuru the Wanderer (The Dark Lord).

38.3. 3. The Great Mau Kingdom (The Merchant Empire of the East)

- **Domain & Geography**: The sprawling eastern river deltas, rich alluvial floodplains, and bustling port cities.
- **Cultural Philosophy**: Mercantilism, contract law, civic guilds, and wealth accumulation. To the Mau, war is an economic calculation rather than an ideological crusade.
- **Military Doctrine**: Mercenary phalanxes, river ironclad barges, and repeating crossbowmen funded by the grand banking cartels.
- **Role in the Great War**: Financed Usuru’s coalition armies in exchange for mining rights in Libira, switching sides at the midpoint when Sacyra offered trade tariff exemptions.

38.4. 4. Old Sacyra (The Highland Ancestral Cradle)

- **Domain & Geography**: The sheer mountain peaks and pine forests north of the Sacyran river valley.
- **Cultural Philosophy**: Strict aristocratic traditionalism, ancestral veneration, and genealogical

pride. View the modern Royal Capital as degenerate upstarts who diluted pure Sacyran blood.

- **Military Doctrine**: Mountain rangers, greatsword shock troops, and heavy cavalry capable of fighting on steep inclines.
- **Role in the Great War**: Joined Usuru early to punish the Capital, but broke away when Usuru unleashed uncontrollable void constructs into mortal villages.

38.5. 5. The Academy (The Spire of Pure Reason)

- **Domain & Geography**: The frozen northern tundras and geothermal volcanic springs.
- **Cultural Philosophy**: Scientism, arcanotech experimentation, and the empirical dissection of cosmic forces. Reject both religious worship of Lux and superstitious fear of Tenebris.
- **Military Doctrine**: Alchemical siege engines, elemental clockwork automata, and crystal-resonance artillery.
- **Role in the Great War**: Remained neutral for five years before joining the coalition to study the abyssal tear firsthand, later contributing the mathematical formulas used to draft the **Accord of Kings**.

38.6. 6. The Yun-yin Provinces (The Valleys of Mist & Wind)

- **Domain & Geography**: The subtropical southeastern archipelago and bamboo cloud forests.
- **Cultural Philosophy**: Spiritual harmony, ki manipulation, cyclical flow, and the balance of dualities. Understood the metaphysical neutrality of darkness long before Sacyran theologians.
- **Military Doctrine**: Martial artists, wind-runners, and agile spear masters using evasion and counter-poise redirection.
- **Role in the Great War**: Sided with Usuru to restore balance against Sacyra's overbearing expansionism, ultimately brokering the peace conference that created the **Joint Realm, Separate Kingdoms** doctrine.

Chapter 39. 3. The Accord of Kings: "Joint Realm, Separate Kingdoms"

Following seven years of devastating continental slaughter, the exhausted sovereigns met upon the neutral plains of the Central Marches to sign the historic **Accord of Kings**:

Article	Diplomatic Covenant & Systemic Law
Article I: Mutual Sovereignty	Each of the Six Powers maintains complete legislative, military, and economic autonomy within their borders.
Article II: The Joint Ward	Sacyra’s Royal Guard is legally entrusted with guarding the central rift beneath the High Throne, but may never station troops within foreign realms without consent.
Article III: The Free Caravan	Courier and trade routes between all six nations are declared sacrosanct, guaranteeing that no province may be starved through communication blockade.

In the modern era, King Jihad’s clandestine efforts to annex the frontier and resurrect the centralized empire violate the fundamental tenets of the Accord of Kings, providing the political justification for the party’s multi-ending divergence.

Chapter 40. Chapter 7: Realm Chronicle: The Kingdom of Libira

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/realms/kingdom_of_libira.adoc

Chapter 41. Overview

The **Kingdom of Libira** is a remote, windswept, and arid frontier realm situated far to the west across the Great Salt Basin, a full seven-day courier journey from the **Royal Capital of Sacyra**. Lacking a fortified relay outpost system throughout the founding era, Libira became the birthplace of the simmering socio-political grievance known historically as **"The Quiet Complaint"**. It was here that a nameless boy was born to a humble shepherd family, traveled the continent as the Three-Day Wanderer, and returned across the warped desert passes as **Usuru**, sovereign of the broken crown and the future **Dark Lord**.

> The sun burns the rocks by day, and the wind freezes the sands by night. Sacyra has water, gold, and songs for its kings. Libira has only stone, salt, and the memory of every empty wagon that never returned from the capital.
>
> — Old Libiran Nomad Proverb, Inscribed upon an Adobe Cistern

Chapter 42. 1. Geography, Climate & The 7-Day Courier Chasm

- **Geographical Classification**: High-altitude arid plateau, red sandstone mesas, salt flats, and canyon wadis.
- **The Communication Gap**:
  - Distance: A full week (seven days) of hard riding by swift couriers across barren terrain.
  - Absence of Infrastructure: Because Libira was historically treated as an unestablished border territory, the Sacyran crown never invested in a chain of relay watchtowers or horse stations.
  - The Warped Rift: When the 11th Festival ritual collapsed, the spatial fabric between Libira and the capital expanded violently, turning a week-long journey into an impassable spatial wasteland.

Dimension	Specification
Terrain Profile	Crimson sand dunes, deep sandstone ravines, dry limestone dry-washes.
Settlement Pattern	Clustered adobe townships built around subterranean aquifers and ancient cisterns.
Key Settlements	**The Assembly of Libira** (Central adobe council citadel); **Wadi Usuru**.
Strategic Resources	Saltpeter, red iron ore, draught lizards, subterranean aquifer water.

Chapter 43. 2. Socio-Political Philosophy: The "Quiet Complaint"

Unlike open rebellions driven by greedy warlords, Libira's grievance was born of profound, generational neglect:

- **The Disconnect**: The capital celebrated annual harvests and imperial festivals, issuing royal edicts that arrived in Libira weeks after decrees were signed. Libiran citizens suffered under droughts and border raids without receiving imperial military reinforcement.
- **The "Quiet Complaint"**: A cultural attitude of stoic, bitter endurance. Libirans learned never to expect salvation from the Crown, fostering fierce communal solidarity and deep suspicion of ceremonial authority.
- **Modern Parallels in Dio Village**: The same dynamic repeats in the present era in **Dio Village**, where Grandma Magolia sighs over the Crown's neglect and the St. Baron taxes commoners without providing protection from monster raids.

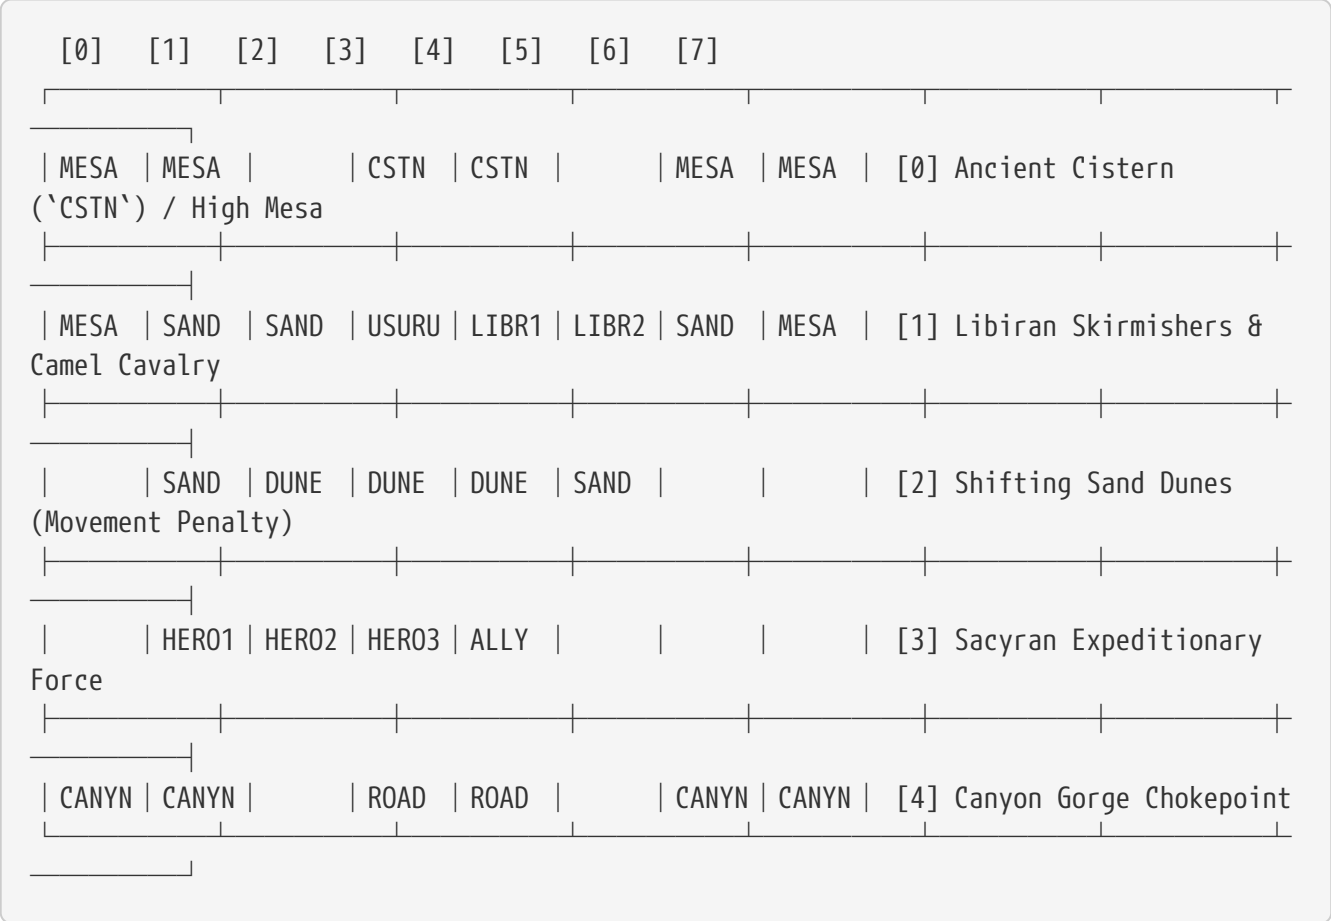

In the narrative architecture of **Tenebris and Lux**, Libira represents the raw root of all conflict. Had the First King's court listened to the nameless boy's petition and built a simple relay road, the Seven-Year Great War would never have occurred.

Chapter 44. 3. The Tragedy of Usuru’s Assembly

When Usuru returned from the capital with his skin burned by radiant energy and his eyes alight with abyssal fury, the Libiran Assembly Hall became the focal point of continental history:

1. **The Gathering of Elders**: Tribal elders, weary of decades of unanswered petitions, wept as the youth recounted how the Sacyran guards struck him down simply for asking for roads.
2. **The Acclamation of the Sovereign**: For the first time in their history, the disparate nomadic clans united, placing the iron circlet upon Usuru’s brow and naming him their young King.
3. **The Call to the 6 Powers**: Leveraging trade routes across the salt flats, Usuru sent emissaries to Great Mau, Old Sacyra, and the Yun-yin Provinces, turning a localized frontier petition into a world-spanning coalition war.

Chapter 45. 4. Tactical Grid Battlefield: The Red Sandstone Wadi

45.1. Battlefield Invariants

1. **Shifting Dunes (`DUNE`)**: Reduces movement range by 1 tile for heavy armor units (e.g. Elijah).
2. **Canyon Gorges (`CANYN`)**: Impassable chasms; units knocked back into chasms suffer instant fall defeat.
3. **High Sandstone Mesas (`MESA`)**: High ground granting $+25\%$ critical chance to Libiran bowmen.

Chapter 46. Chapter 8: Realm Chronicle: The Royal Capital of Sacyra

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/realms/the_royal_capital.adoc

Chapter 47. Overview

The **Royal Capital of Sacyra** is the administrative, spiritual, and military apex of the kingdom. Crowned by the gleaming white-stone bastions of the **High Throne Citadel**, the city embodies the architectural zenith of Era I's founding dynasties. Yet beneath its ceremonial grandeur, opulent marble halls, and courtly pageantry lies a festering metaphysical wound: **The King's Curse**, an unhealed planar rupture beneath the throne room floor that has leaked abyssal corruption for three millennia, steadily eroding the sanity of **King Jihad**.

> We wash the marble with lavender and rosewater, but the stones remember the blood. When the sun reaches its zenith, the shadow of the throne does not fall toward the door—it falls inward, pooling like dark oil around the King's feet. He smiles at the envoys, but his teeth are gray. Sacyra is dancing upon the lid of a tomb.
>
> — High Priest Roté, Royal Sanctum Secret Journal

Chapter 48. 1. Geography, Architecture & Urban Districts

- **Topographical Location**: Built upon the central continental plateau overlooking the Sacyran river basin.
- **Access Routes**: Reached via the Grand Imperial Causeway traversing the **Sacyran Marches**.
- **Architectural Style**: Monolithic white limestone, soaring arched flying buttresses, gilded radiant domes, and deep subterranean catacombs dating back to the Accord of Kings.

District	Description & Socio-Political Function
The Citadel Ward	The innermost fortress housing the High Throne, the Royal Council Chambers, and the private quarters of King Jihad.
The Aristocratic Quarter	Palatial townhouse estates of the Great Noble Houses (including House Jaren); seat of courtly intrigue and political scheming.
The Grand Cathedral of Lux	Spiritual center governed by High Priest Roté, where the sacred relics are celebrated and celestial portents are interpreted.
The Lower River Ward	Densely packed commoner quarter, guildhalls, iron forges, and the local headquarters of the **Adventurers' Guild**.
The Subterranean Vaults	Forbidden pre-dynastic catacombs directly beneath the throne, site of the 11th Festival Rupture.

Chapter 49. 2. Lore & The King’s Curse Planar Wound

During the 11th Festival of Peoples, the young Libiran wanderer Usuru accidentally struck the ritual focus stone during the First King’s communion ritual. The resulting explosion severed the First King’s soul and cracked the bedrock beneath the dais:

1. **The Hidden Rupture**: The First 30 Kings sealed the physical chamber beneath massive basalt slabs inscribed with warding runes, building the High Throne directly over the scar to mask its presence.
2. **The 3,000-Year Dynastic Wave**: Every monarch who sat upon the High Throne was bathed in the slow, imperceptible radiation of the planar breach. While strong-willed sovereigns resisted its whispers, weak or ambitious rulers inevitably succumbed to paranoia and tyrannical megalomania.
3. **The Possession of King Jihad**: In the present era, King Jihad’s obsession with matching the legendary military feats of his ancestors drove him to open the basalt seal. Tenebrous vapor now directly commands the monarch’s nervous system, transforming him into an unwitting puppet of **The Dark Lord**.

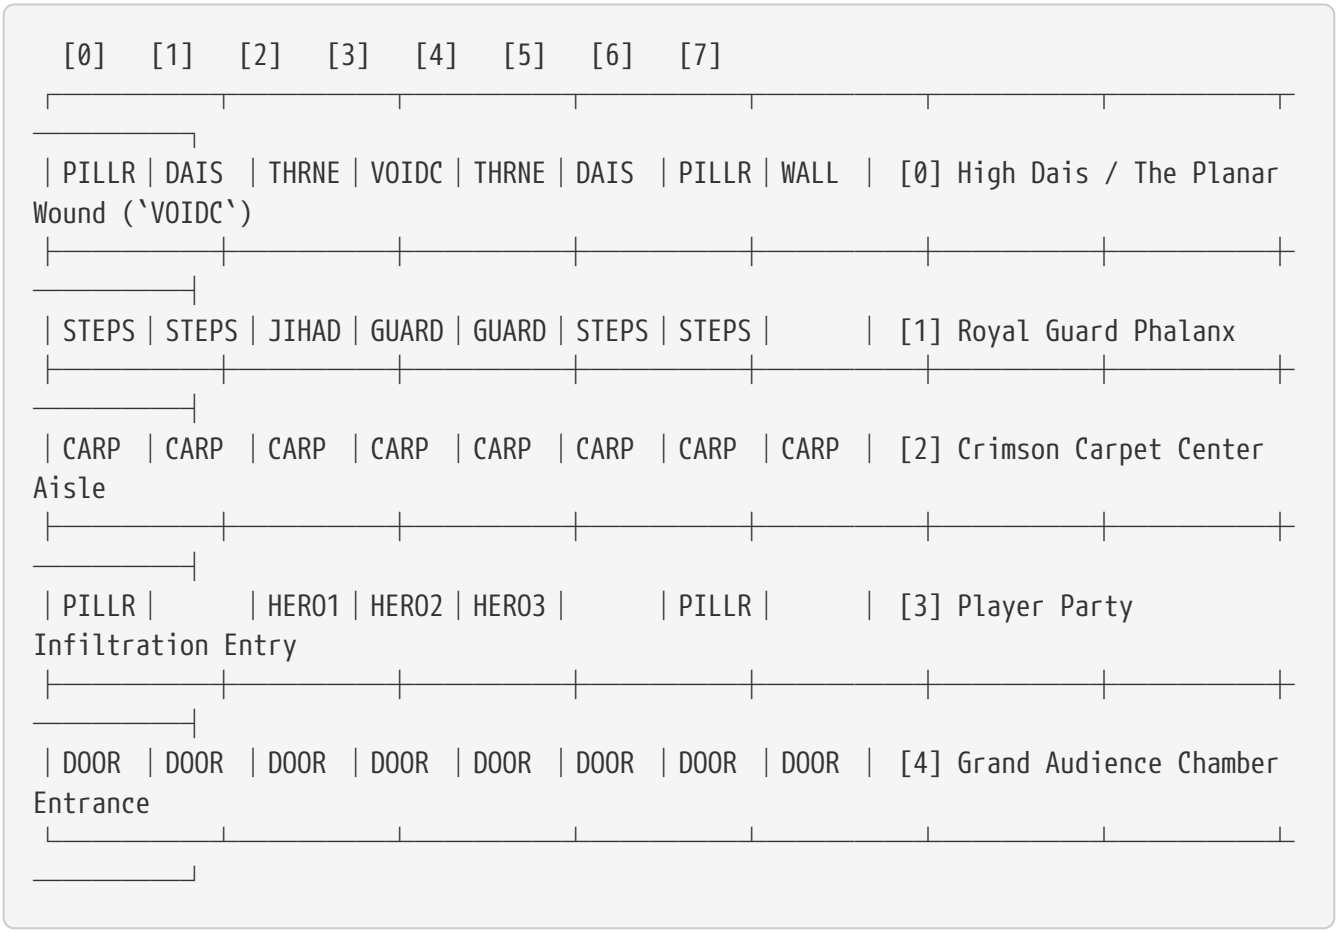

The planar wound beneath the High Throne is not merely a narrative backdrop—it serves as the **Midpoint Campaign Fork** in the ludological engine. Entering the throne room without the **Dream Compass** triggers the tragic **Neutral Path**, whereas possessing the calibrated compass allows the party to expose the curse and enter the **True Ending Path**.

Chapter 50. 3. Factions & Urban Intrigue

The Capital is torn between four competing power structures:

- **The Royal Guard**: Commanded by hardline royalists loyal to the throne, increasingly bewildered by King Jihad’s erratic and tyrannical decrees.
- **House Jaren & The High Nobles**: Aristocratic court faction maneuvering to consolidate tax monopolies and replace the Ro-enhearts' military influence.
- **The High Priesthood**: Church hierarchy caught between religious dogma and High Priest Roté’s terrifying revelations regarding the cosmic corruption of the Crown.
- **The Adventurers' Guild**: Underground network of commoner veterans and sympathizers (including Katrina Jaren) operating outside royal law to protect the citizenry from unexplained void manifestations.

Chapter 51. 4. Tactical Grid Battlefield: The High Throne Chamber

51.1. Battlefield Invariants

1. **The Planar Wound (`VOIDC`)**: Generates an aura of -15 HP decay per turn to all units standing within a 2-cell radius unless protected by **Lux Barrio**.
2. **Marble Pillars (`PILLR`)**: Provide heavy cover ($+30\%$ evasion against ranged magic).
3. **Royal Dais Steps (`STEPS`)**: Units attacking upward suffer a -15% accuracy penalty.

Chapter 52. Chapter 9: Realm Chronicle: The Sacyran Marches

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/realms/sacyra_marches.adoc

Chapter 53. Overview

The **Sacyran Marches** (`LOC_SACYRA_MARCHES`) encompass the windswept limestone hills, fortified military outposts, and ancient battlefields stretching between the **Whispering Woods** and the white-stone bastions of the **Royal Capital**. Established during the Seven-Year Great War as the kingdom's primary defensive perimeter, the Marches serve as the tactical proving ground where the player transitions from local woodland skirmishes to large-scale military engagements.

> The Marches are where boyish dreams of glory die and real soldiers are forged. The wind here carries no warmth—only dust, iron, and the perpetual vigilance of men who know that if these ridges fall, nothing stands between the abyss and our homes.
>
> — Commander Gareth Ro-enheart, Field Dispatch - Frontier Fortress Redoubt

Chapter 54. 1. Geography & Strategic Topology

- **Location Identifier**: `LOC_SACYRA_MARCHES` (Integer index `3` in `location_id_t`).
- **Territorial Domain**: Central border province linking southern farmlands with the high plateaus.
- **Topographical Neighbors**:
  - **West / South**: Slopes gently downward into the canopy of the **Whispering Woods**.
  - **North / East**: Connects directly to the grand paved highway leading to the **Royal Capital**.
- **Terrain Features**: Terraced limestone plateaus, fortified palisades, stone watchtowers, and deep defensive trenches left behind by centuries of border warfare.

Dimension	Specification
Ambient Threat Level	High ($110–140$ Threat Rating).
Weather Phenomena	High-altitude gale winds, dry squalls, sudden dust storms reducing vision.
Strategic Redoubts	**Tower of the Sunken Citadel** (Gareth Ro-enheart's former garrison).
Factional Influence	Royal Guard Vanguard, Frontier Mercenary Guild, Shadow Host Infiltrators.

Chapter 55. 2. Lore & The Legacy of the 7-Year Great War

During the Seven-Year Great War (approximately 3,000 years ago), Usuru's coalition forces launched their primary armored spearhead across these very hills. The earth of the Marches remains soaked in residual abyssal and radiant energies:

- **The Trenches of the First 30 Kings**: Deep geometric trenches dug into the chalk hills to funnel void automata into kill zones.
- **The Sunken Citadel**: A subterranean fortress carved into the limestone bedrock where Commander Gareth Ro-enheart made his legendary stand before his mysterious disappearance following Elijah's 10th birthday.
- **The Broken Standards**: Decaying heraldic banners of ancient kingdoms (Great Mau, Libira, Old Sacyra) still flutter from iron spires atop the limestone ridges.

The Marches are the first location where the player encounters organized military opposition rather than mindless wild beasts. Enemies employ tactical formations, archery volleys, and coordinated flanking maneuvers.

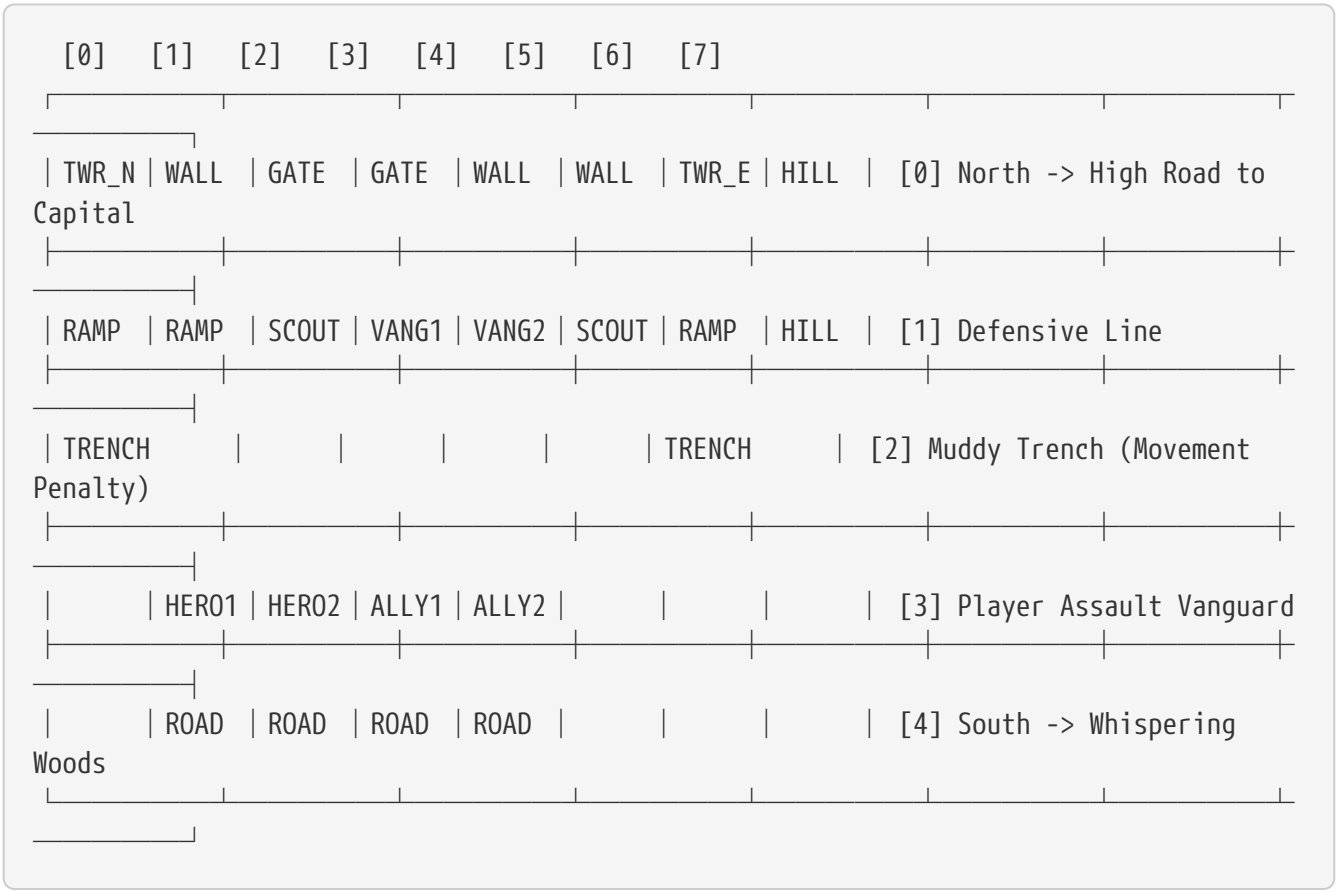

Chapter 56. 3. Field Bestiary & Combat Formations

Hostile Unit	HP / DEF	Flank Vigor	Tactical Discipline & Threat Profile
Shadow Scout	110 HP / 18 DEF	80 Vigor	High speed outrider; marks targets for ranged volleys.
Vanguard Patrol	160 HP / 26 DEF	90 Vigor	Heavy shield infantry; projects Zone of Control.
Abyssal Ballista	220 HP / 30 DEF	20 Vigor	Siege construct; fires armor-piercing void bolts.

Vanguard Patrols utilize **Phalanx Formations** that reduce frontal physical damage by 40%. Players must utilize Katrina’s high movement mobility or the Custom Bearer’s **Edge Striking** stance to maneuver behind their line for decisive backstabs.

Chapter 57. 4. Tactical Grid Battlefield: The Palisade Ridge

57.1. Battlefield Mechanics

1. **Elevated Ramparts (`RAMP`)**: Grants ranged units $+1$ Attack Range and $+20\%$ Physical Defense.
2. **Muddy Trench (`TRENCH`)**: Costs $2.5\times$ movement points to traverse and prevents defensive parries.
3. **Iron Gate (`GATE`)**: Destructible obstacle (150 HP) that must be breached or bypassed via flanking ladders.

Chapter 58. Chapter 10: Realm Chronicle: The Whispering Woods

Source File: `/home/professorseanex/Tenebris and Lux/docs/lore/realms/whispering_woods.adoc`

Chapter 59. Overview

The **Whispering Woods** (`LOC_WHISPERING_WOODS`) form an ancient, dense primeval canopy encircling **Dio Village**, separating the peaceful hamlet from the windswept frontier of the **Sacyran Marches**. Named for the haunting acoustic phenomenon produced by autumn winds filtering through hollow ironwood boughs, the forest serves as the player's first physical wilderness trial after awakening from **The Dreamscape**.

> Those woods were quiet when my grandfather worked the timber. Now, you can't walk twenty paces off the road without hearing shadows moving in the thicket. Something deep in the capital is leaking into the roots.
>
> — Eric the Lumberjack, Dio Village Timber Yard

Chapter 60. 1. Geography & Environmental Atmosphere

- **Location Identifier**: `LOC_WHISPERING_WOODS` (Integer index `2` in `location_id_t`).
- **Territorial Domain**: Southwestern province of the Kingdom of Sacyra.
- **Topographical Neighbors**:
  - **South**: Borders the agricultural plots and timber yards of **Dio Village**.
  - **North & East**: Ascends into the crags and signal hills of the **Sacyran Marches**.
- **Flora & Terrain**: Gnarled ironwood trunks, glowing amber fungi, thick moss carpets, and narrow cobblestone paths choked by invasive briers and fallen timber.

Dimension	Realm Specification
Ambient Threat Level	Moderate ($70–90$ Threat Rating).
Weather Phenomena	Morning autumn mist; nocturnal veil thinning; ambient whisper reverberation.
Sanctuary Nodes	The Forester’s Shrine (Campfire rest point; restores 100% MP).
Resource Harvest	Ironwood logs, Sacyran belladonna herbs, glowing resonant spores.

Chapter 61. 2. Lore & Ancient Secrets

Local Sacyran folklore claims the woods were planted by Prince Casatti during his frontier expeditions to serve as a natural barrier shielding the commoners from imperial court politics. Beneath the dense root network lie forgotten stone markers from Era I, indicating that the forest grew atop an ancient tectonic fault line directly connected to the abyssal fissure beneath the Royal Capital.

Archival Marginalia: The Soughing Boughs

When night falls across the canopy, travelers report hearing murmurs that sound like voices debating in the archaic dialect of Era IV. Scholars from The Academy believe these are acoustic reflections of the First King’s sealed court, vibrating along ley lines from the Dreamscape.

Chapter 62. 3. Bestiary & Field Encounters

Corrupted by ambient abyssal miasma leaking outward from the capital's planar wound, the native fauna of the woods has mutated into predatory shadow beasts:

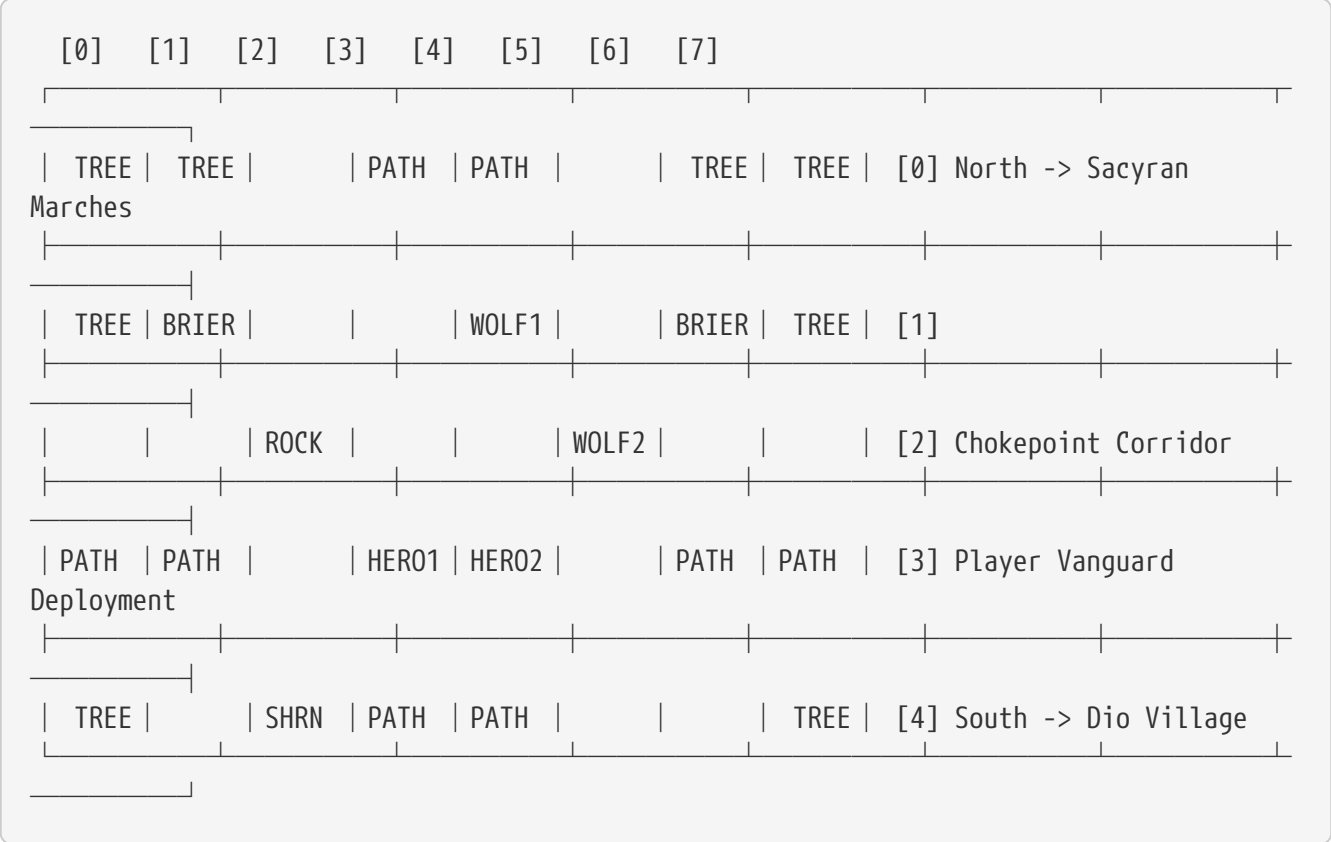

Hostile Entity	HP / DEF	Flank Vigor	Combat Behavior & Threat Profile
Umbral Wolf	85 HP / 14 DEF	60 Vigor	Pack hunter; attempts coordinated flanking sprints.
Brier Lurker	120 HP / 18 DEF	40 Vigor	Concealed in brambles; inflicts poison and entangle.
Twilight Raven	45 HP / 8 DEF	80 Vigor	High evasion; dives to disrupt casting stances.

Umbral Wolves receive a $+25\%$ attack bonus when attacking from an adjacent flanking tile. Players must anchor their formation using **Lux Barrio** to prevent fragile party members from being isolated.

Chapter 63. 4. Tactical Grid Map Architecture

Combat within the Whispering Woods utilizes dense environmental obstacles and restrictive chokepoints:

63.1. Environmental Grid Invariants

1. **Tree & Granite Rock Obstacles**: Completely block line-of-sight and unit transit.
2. **Dense Brier Patches**: Inflict $2.0\times$ movement cost and -10 HP per step for non-flying units.
3. **Forester's Shrine (`SHRN`)**: Standing adjacent to the shrine grants $+15\%$ Lux warding efficiency.

Chapter 64. Chapter 11: Realm Chronicle: Dio Village

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/realms/dio_village.adoc

Chapter 65. Overview & Pastoral Heritage

Dio Village is a pastoral woodland settlement situated in the southwestern valley frontier of the **Kingdom of Sacyra**. Functioning as the physical inception of the hero's journey upon awakening from **The Dreamscape**, Dio Village serves as the terrestrial anchor of Chapter 1, embodying the modern continuation of ancient Libira's systemic neglect under the 3,000-year dynastic order.

Chapter 66. 1. Socio-Political Role: "The Quiet Complaint" of Modern Sacyra

- **Mirror of Ancient Libira:** Just as ancient Libira suffered a 7-day communication delay and lacked imperial relay outposts, modern Dio Village is neglected under the "Joint Realm, Separate Kingdoms" bureaucracy. As Grandma Magolia sighs in Map 021: *"This town used to be full of life. **sighs** The kingdom doesn't pay much attention to this place anymore..."*.
- **Economic Fragility & Class Exploitation:** While the Capital enjoys insulated peace, Dio Village faces monster outbreaks near the timber lines. **Eric the Lumberjack** faces ruin because monsters block the woods, while the predatory **St. Baron** exploits commoners through exorbitant rents and usury.
- **Gareth Ro-enheart's Shadow:** Dio Village is where Commander Gareth Ro-enheart placed his son Elijah under Grandma Magolia's care before his mysterious disappearance on Elijah's 10th birthday.

Chapter 67. 2. Key Landmarks & Dual-Perspective Quest Hubs

- **Grandma Magolia's Cottage (Maps 020 & 021):** The warm stone hearth where the protagonist awakens. Contains the upstairs chest housing **Grandma's Watch** (activating the Layer 0 monotonic clock).
  - **Elijah's Approach:** Hesitates out of filial respect and family etiquette.
  - **Katrina's Approach:** Seeks the will immediately to escape the dead-end town.
- **Eric's Timber Yard & Test of Honesty (Map 028):** Filling Eric's rent pot shifts Moral Sway positively and rewards the **Ring of Fire**, enabling flame-weave relic embellishments.
- **Monica's Mystic Grove & Lyri's Offering (Maps 023, 027, 029):** Former Royal Battlemage Monica guards the memorial totem of fallen soldiers. Stopping the bandit kid and buying an offering potion for **Lyri, the Goddess of Peace**, attunes the relics to arcane resonance and awards the **Book of Monsters**.
- **The St. Baron's Estate & John the Thief (Maps 030 & 031):** Deciding whether to aid **John the Thief** in robbing the corrupt baron versus upholding feudal property law shapes the penetration or bastion embellishments of the relics.

Chapter 68. 3. Mechanical Role in the C11 Simulation Engine

- **Engine Enumeration:** Registered in `include/sim/sim_types.h` as `LOC_DIO_VILLAGE`.
- **Sanctuary Province:** Zero hostile vigor during standard state; permits inventory management, dialogue interactions, moral compass calibration, and Layer 0 monotonic time passage.
- **Terrestrial Lockout:** Gated throughout Chapter 1, preventing return to The Dreamscape until the acquisition and awakening of **The Dream Compass**.

Chapter 69. Chapter 12: Realm Chronicle: The Dreamscape

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/realms/the_dreamscape.adoc

Chapter 70. Overview & Metaphysical Essence

The Dreamscape (also known as the Astral Substrate or Room of Sages) is an ethereal plane of consciousness, ancestral memory, and timeless trials existing between waking reality and slumber. Grounded in the recovered 2017–2018 demo script (Maps 006, 008, 011, 041, 042) and verified in the ISO C11 engine architecture as `LOC_THE_DREAMSCAPE`, it serves as the cosmological origin point where the protagonist awakens before entering the temporal Kingdom of Sacyra.

Chapter 71. 1. Historical & Metaphysical Provenance

- **The Coma of the First King:** Following the inaugural Festival of Peoples 3,000 years ago, the First King collapsed into a coma. His spirit was found fully lucid and awake inside The Dreamscape. While Prince Mi-ren and Prince Casatti sustained projections for ten festivals, the 11th Festival tampering by Usuru snapped the ethereal tether, permanently sealing the First King's soul here.
- **The Annual Thinning of the Veil:** For one week each year—coinciding with the Festival of Heroes—the boundary ("the Veil") separating the temporal world from The Dreamscape thins to gossamer, allowing mortals to project desires across the threshold.
- **The Three Laws of Crossing the Veil:**
  1. **The Mirror of Intent:** The ether reflects mortal intent. Pure devotion projects harmony; terror, spite, or megalomania (such as King Jihad's treason) inverts the conduit into waking nightmares.
  2. **The Severed Tether:** Sustaining a long bridge across the veil carries fatal risk. Violent interruption snaps spiritual tethers, marooning consciousness permanently.
  3. **The Dream Eater Infiltration:** Tearing or weakening the veil attracts **Dream Eaters**—parasitic entities native to the deep astral voids that devour mortal memories, dreams, and ancestral records.

Chapter 72. 2. Mechanical Integration in the C11 Engine

- **Engine Enumeration:** Registered in `include/sim/sim_types.h` as `LOC_THE_DREAMSCAPE`.
- **Opening Trial:** The protagonist awakens in the Hall of Sages with **Chrono the Sage**, attuning to class archetype stones and testing `Lux Barrio` and `Cuttatio Tenebris` against Dream Eaters before Chrono's command (**"AWAKEN!"**) transports consciousness to Grandma Magolia's hearth in Dio Village.
- **Terrestrial Gating:** Throughout Chapter 1 (the demo), return to The Dreamscape is barred, anchoring the player in terrestrial human stakes.
- **The Dream Compass & Nocturnal Phasing:** Upgraded from Grandma's Watch, the Dream Compass allows entry to The Dreamscape exclusively during nocturnal hours (`20:00 ⇐ hour || hour ⇐ 04:00`).
- **Tactical LeTBS Environments:** Comprises floating platform grids, shifting crystal leylines, and astral mechanisms that restore MP while exposing units to planar shear.

Chapter 73. Chapter 13: High School Inception & TRPG Genesis

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/lore_and_design/devlog_002_the_sacyra_chronicles_and_trpg_vision.adoc

Chapter 74. Abstract

This developer log chronicles the foundational provenance and overarching creative vision of **Tenebris and Lux**, rooted in its 2014–2018 high school inception as the premier game project of CreativeWorkzStudio. It documents the elimination of placeholder factions in favor of the canonical **Kingdom of Sacyra**, the introduction of dual protagonists **Elijah Ro-enheart** and **Katrina Jaren**, and the technical specification of the game's true genre: a **Tactical Strategy RPG (TRPG)** fusing grid-based tactical maneuvering with cinematic traditional side-scroll / action-based combat resolution.

Chapter 75. 1. Historical Provenance: The 2014–2018 High School Genesis

Before CreativeWorkzStudio evolved into a multifaceted publishing house, **Tenebris and Lux** was its very first major game in active development.

- **The RPG Maker Era (2014–2018)**: Conceived while the author was in high school learning game design and programming. The initial iterations were built using the default offerings of RPG Maker, exploring community plugins, and crafting characters through its Character Generator.
- **The Lost Assets & The Blank Canvas**: With no legacy digital assets surviving from that era, the project stands not as a nostalgic port, but as a complete ground-up rebirth—realizing the original creative vision with the systems engineering maturity, mathematical rigor, and architectural discipline of modern custom engine design.

Chapter 76. 2. Narrative Realignment: The Kingdom of Sacyra

During early prototype scaffolding, generic placeholder factions ("The Solar Order" and "The Umbral Covenant") were inserted to test basic moral sway logic. On October 26, 2026, the creator firmly realigned the canon, stripping away these synthetic factions to reveal the true world:

76.1. 1. The Kingdom of Sacyra (/s□□□ki□r□/)

- The setting is the historic **Kingdom of Sacyra** (pronounced **"saw-kee-ruh"**).
- Sacyra is a structured, chivalric realm anchored by three distinct socio-political pillars:
  1. **The Crown & Royal Guard**: Guardians of legal order, national defense, and the ancestral throne.
  2. **The Noble Houses & Royal Court**: High aristocracy governing regional fiefs and vying for political dominance on the royal council.
  3. **The Adventurers' Guild**: A pragmatic, frontier-based brotherhood operating beyond courtly vanity, answering commoner monster distress calls and exploring untamed ruins.
- **The Existential Threat**: The ancient sovereign **The Dark Lord** breaking through the Abyssal Vaults, threatening to extinguish all mortal agency.

76.2. 2. The Dual Protagonists

Rather than a generic lone wanderer, the narrative is anchored by two contrasting protagonists whose fates, lineages, and martial philosophies intertwine:

Character	Elijah Ro-enheart	Lady Katrina Jaren
Social Origin	Military Lineage (Common/Barracks Nobility)	High Aristocracy (House Jaren)
Family Heritage	Son of the former Head of the Royal Guard	Daughter of an influential noble house on the Royal Court
Internal Desire	Living up to his father’s legendary military legacy while discovering what true honor demands	Escaping stifling aristocratic court expectations to join the local **Adventurers' Guild**
Relic Synergy	**The Shield of Lux** (Sanctuary, Warding, Formation Hold)	**The Sword of Tenebris** (Severance, Mist-Veil, Critical Strike)
TRPG Doctrine	Frontline heavy vanguard; zone-of-control denial; ally interception	Agile outrider skirmisher; bypassing enemy lines; flanking assassin

Chapter 77. 3. Ludological Evolution: The Tactical Strategy RPG (TRPG)

The game's true mechanical identity is a **Tactical Strategy RPG (TRPG)**. This fundamentally informs how the simulation engine and presentation viewports are being constructed:

77.1. 1. The Dual-Layer Combat Loop

The combat loop operates across two synchronized phases:

1. **Strategic Grid Phase**:
    - The battle takes place on a discrete 2D grid representing castles, ramparts, thickets, and void-blighted frontier passes.
    - Units position based on movement ranges, terrain defense bonuses, directional facing (Front, Flank, Rear), and Zone-of-Control (ZOC) restrictions.
2. **Cinematic Combat Resolution (Side-View Action)**:
    - When a unit initiates combat against an enemy target, the game transitions into a dynamic **2D traditional side-scroll / action-based clash**.
    - Attacks play out with timed player agency: precision blocks with the Shield of Lux, poise-breaking shield bashes, and devastating severance slashes with the Sword of Tenebris.
    - Upon duel conclusion, remaining unit health, stagger, and relic resonance seamlessly persist back to the tactical grid.

77.2. 2. Architectural Implications for the C Engine

Knowing this was originally an RPG Maker project gives us clear architectural directives: * **Decoupled Data Architecture**: Static definitions (`Units`, `Skills`, `Equipment`, `TerrainTypes`) must exist as clean data tables distinct from session state (`player_state_t`, `grid_t`). * **Deterministic Event Pipeline**: Interactive map features (gates, switches, dialog triggers) will follow a clean, reentrant command interpreter model. * **Zero Engine Bloat**: By building this custom in C11 rather than relying on bloated runtimes, our TRPG will maintain sub-millisecond turn updates, instantaneous scene transitions, and absolute softlock immunity.

Chapter 78. 4. Next Milestone Roadmap

1. **Phase 1 (Complete)**: Established OmniCode 5-block layering, Layer 0 utilities, CTest verification suite, and canonical documentation.
2. **Phase 2 (Active)**: Expand simulation state to model dual protagonists (Elijah & Katrina), party data structures, and the foundational 2D tactical grid.
3. **Phase 3**: Implement the cinematic side-scroll combat transition in the presentation layer.
4. **Phase 4**: Expand the tactical campaign across the provinces of Sacyra to confront the vanguard of The Dark Lord.

Volume II: Dramatis Personae & Dual Protagonist Dynamics

Comprehensive character dossiers, founding princes, dual protagonist synergies, and regional faction leaders.

Chapter 79. Chapter 14: Dual Protagonist Dynamics & Tri-Perspective Architecture

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/protagonists/dual_protagonist_dynamics.adoc

Chapter 80. Overview

The narrative core and mechanical heartbeat of **Tenebris and Lux** is the interplay between **Elijah Ro-enheart** and **Lady Katrina Jaren**, complemented by the optional overarching perspective of the customizable **Bearer** (`<chosen_name>`). Contrasting in social caste, philosophical outlook, and combat rhythm, their evolving partnership mirrors the cosmic relationship between Light and Darkness.

Chapter 81. 1. Thematic & Social Contrast Matrix

Dimension	Elijah Ro-enheart	Katrina Jaren
Social Caste	Military Lineage / Son of the Guard Head	High Aristocracy / House Jaren
Institutional Allegiance	Royal Army (Structure, Law, Duty)	Adventurers' Guild Aspirant (Freedom, Merit)
Relic Affinity	**The Shield of Lux** (Defense, Preservation)	**The Sword of Tenebris** (Offense, Severance)
Thematic Echo	**Usuru** (The Frontier Wound / Redemptive Grace)	**Prince Casatti** (The Renouncing Blade / Truth)
Moral Trajectory	From rigid obedience to moral conscience	From cynical detachment to noble sacrifice

Chapter 82. 2. Interpersonal Chemistry & Narrative Progression

Elijah and Katrina embody the classic dramatic friction between an earnest, rule-following guardian and an irreverent, sharp-witted rogue. Where Elijah pauses to consult protocol, Katrina acts impulsively, cutting through bureaucratic red tape with sarcastic practicality.

82.1. Narrative Evolution Across the Campaign

1. **Act I (The Provincial Divide):** Initial friction in Dio Village. Katrina mocks Elijah's military formality; Elijah cautions against Katrina's cynical disregard for property and propriety.
2. **Act I Climax (The Capital Conspiracy):** Sacyra Castle. Katrina's insight into aristocratic deception exposes King Jihad's treason. Defeating Jihad reveals his possession by The Dark Lord's psychic remnant.
3. **Act II (The Sovereign Eclipse):** Total metaphysical synchronization. Facing **The Dark Lord** at the cosmic threshold, the heroes overcome individual biases, passing relics fluidly between each other to unlock the **Stance of Equilibrium** (**Duo-Loca Bashin n Slash**).

Chapter 83. 3. The Tri-Perspective Architecture: Witness Protagonist & Keystone Route

Requiring the player to experience Elijah, Katrina, and finally the customizable Bearer (`<chosen_name>`) utilizes three formal narrative game design structures:

1. **The Witness Protagonist (Internal vs. External Focalization):**
    - **Internal Focalization (Elijah & Katrina):** Elijah and Katrina live inside the terrestrial world of Dio Village and the Capital. Their perceptions are clouded by personal trauma, military duty, and aristocratic rebellion.
    - **External Focalization (The Custom Bearer):** Guided by **Chrono the Sage** in the Room of Sages within The Dreamscape, the Custom Bearer holds **The Dream Compass**, acting as an objective, unaligned Observer capable of perceiving the full 3,000-year board without inherited prejudice.
2. **The Keystone Route (Synthesis Scenario):**
    - Elijah uncovers the military conspiracy surrounding Commander Gareth and King Jihad.
    - Katrina uncovers aristocratic corruption and underworld resistance with John the Thief.
    - The Custom Bearer's campaign functions as the architectural keystone that locks both partial perspectives together into a single unified truth.
3. **The Quantum Observer Effect:**
    - Left to themselves, Sacyra's historical factions remain trapped in a cyclical 3,000-year loop of trauma.
    - The outside Observer's conscious choice collapses the tragic wavefunction, unlocking the 10th True Ending (**"The Ugly Truth"**) and permanently mending the planar tear.

Chapter 84. 4. Tactical Synergy on the TRPG Battlefield

1. **The Phalanx Pivot:** Elijah pins enemy vanguards with his Shield of Lux Zone of Control (ZOC) aura. Katrina uses high mobility to circle the battle line and execute flanking criticals.
2. **Warded Severance:** Katrina lures high-threat enemies into charging toward her, stepping back onto Elijah's tile perimeter as Elijah executes a staggering `Lux Barrio` shield deflection.
3. **The Stance of Equilibrium:** In moments of ultimate synchronization, both relic resonance counters combine, unlocking unified abilities where radiant starlight and abyssal void strike in a single coordinated turn.

Chapter 85. Chapter 15: Elijah Ro-enheart: Vanguard of Lux

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/protagonists/elijah_ro_enheart.adoc

Chapter 86. Overview

Elijah Ro-enheart is the frontline heavy vanguard anchor of **Tenebris and Lux** and the initial bearer of the **Shield of Lux**. Steeped in the military traditions of the Royal Guard yet haunted by the unexplained disappearance of his father, Elijah represents the struggle between rigid institutional duty and personal honor.

Chapter 87. 1. Identity & Heritage

- **Full Name**: Elijah Ro-enheart
- **Title / Rank**: Cadet Vanguard, Sacyran Royal Defense Corps
- **Affiliation**: Kingdom of Sacyra Royal Army; House Ro-enheart
- **Family Lineage**:
  - **Father**: Commander Gareth Ro-enheart, legendary former Head of the Royal Guard, celebrated throughout Sacyra for holding the Sunken Citadel. Gareth vanished under mysterious crown orders following Elijah's **10th birthday**, leaving behind unresolved questions and immense expectations.
  - **Grandmother**: **Magolia Ro-enheart** ("Grandma Magolia"), a respected matriarch residing in the Upper Ward of Dio Village, guardian of the sacred family timepiece (**Grandma's Watch**).
- **Visual Profile**: Broad-shouldered, athletic build, steel-blue eyes, and cropped dark hair. Wears fitted silver-steel infantry plate over deep navy quilted gambeson, marked with the defensive crest of the Ro-enhearts.

Chapter 88. 2. Psychological Profile & Demeanor

Elijah is earnest, polite, disciplined, and deeply considerate. While raised within the hierarchy of military discipline, he possesses an intrinsic moral compass that values the safety of innocent civilians above abstract royal decrees.

88.1. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

- **Respect for Elders & Prudence**: [quote, Elijah, Dio Village - Grandma’s House] "I shouldn’t go in this chest. I need to talk to Grandma first. She’s very particular about her things."
- **The Father Mystery**: [quote, Elijah, Opening Quest] "Maybe it is something about dad! I haven’t seen him since my 10th birthday. This might be my chance to get answers!"
- **Civic Duty & Moral Conscience**: [quote, Elijah, Lower Village Confrontation] "I can’t believe that I am doing this… the baron is the richest man in the village… but he’s been exploiting the town! This is for the good!"

Chapter 89. 3. Martial Doctrine & TRPG Grid Mechanics

Elijah functions as the defensive bulwark of the tactical party, controlling chokepoints and mitigating damage for allied skirmishers.

Dimension	Specification
TRPG Grid Role	Frontline Heavy Vanguard / Fortress Anchor
Movement Budget	3 Cells (Medium-Heavy Infantry)
Zone of Control (ZOC)	Projects heavy ZOC tiles, halting enemy sprint moves
Primary Relic	**The Shield of Lux** (Resonance `[0, 100]`)
Tactical Signature	`Warding Aura`: Projects a 2-cell radius barrier dome
Poise & Knockback	Immune to 1-cell forced displacement; absorbs shock

89.1. Tactical Synergies

1. **Bottleneck Holding**: Elijah anchors narrow corridors, absorbing melee punishment while building Lux resonance via successful deflections.
2. **Aegis Interception**: Steps into adjacent cells to intercept lethal strikes aimed at fragile skirmishers or casters (e.g., Katrina Jaren).

Chapter 90. Chapter 16: Lady Katrina Jaren: The Outrider Blade

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/protagonists/katrina_jaren.adoc

Chapter 91. Overview

Lady Katrina Jaren is the high-mobility skirmisher of **Tenebris and Lux** and the initial wielder of the **Sword of Tenebris**. Born to high aristocracy yet repulsed by the deceit and stagnation of the Royal Court, Katrina seeks autonomy within the meritocratic ranks of the Adventurers' Guild.

Chapter 92. 1. Identity & Heritage

- **Full Name**: Lady Katrina Jaren
- **Title / Standing**: Noble Court Aspirant (Estranged); Guild Novice
- **Affiliation**: House Jaren (Eastern Aristocracy); Adventurers' Guild
- **Family Lineage**:
  - **House Jaren**: One of the wealthiest noble lineages in Sacyra, controlling lucrative vineyard estates and mountain silver mines. They hold significant patronage leverage on the Royal Court.
  - **Kinship with Dio Village**: Despite her family's high status in the capital, Katrina spent formative rebellious seasons under the watchful eye of Grandma Magolia in Dio Village, seeking respite from court etiquette.
- **Visual Profile**: Agile, athletic build, sharp amber eyes, and unbound chestnut hair tied in a practical combat braid. Clad in tailored lightweight leather arming doublets over noble-weave tunic, with rapier and long-dagger scabbards balanced for rapid unsheathing.

Chapter 93. 2. Psychological Profile & Demeanor

Katrina is quick-witted, irreverent, opportunistic, and intensely independent. She detests empty aristocratic pretension and speaks with an unvarnished, sarcastic candor that often unnerves formal soldiers like Elijah. Beneath her cynical exterior lies a fierce loyalty to those she deems genuine.

93.1. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

- **Impatience with Stagnation & Cynicism**: [quote, Katrina, Dio Village - Grandma’s House] "The will. I love you gran, but a girl gotta get out of this dead-end town. Batty old woman seems to mind that chest… Crazy old woman, that will is mine!"
- **Pragmatic Opportunism**: [quote, Katrina, The Sword Shrine] "Free sword for your girl~!"
- **Fiery Independence & Temper**: [quote, Katrina, Monica’s Grove] "LISTEN HERE YOU OLD-! What is wrong with you… Gran, I’m not your errand girl! This is YOUR friend."
- **Reluctant Heroism**: [quote, Katrina, Lower Village Heist] "Ok… here we go… let’s do this. I have to do at least one good thing today."

Chapter 94. 3. Martial Doctrine & TRPG Grid Mechanics

Katrina excels at rapid battlefield repositioning, flanking maneuvers, and armor-piercing critical strikes.

Dimension	Specification
TRPG Grid Role	High-Mobility Skirmisher / Flanking Striker
Movement Budget	4–5 Cells (Light Scout / Infiltrator)
Zone of Control (ZOC)	Evasive Infiltration: Ignores basic enemy ZOC delays
Primary Relic	**The Sword of Tenebris** (Edge Sharpness `[0, 100]`)
Tactical Signature	`Phantom Slash`: Teleports behind target cell to strike
Evasion & Stealth	Gains 25% evasion when ending turn on obscured tiles

94.1. Tactical Synergies

1. **Flanking Tandem**: Moves across enemy flanks while Elijah holds attention, landing backstab criticals with the abyssal edge of Tenebris.
2. **Hit-and-Run Decoupling**: Uses remaining move points to disengage after striking, retreating behind Elijah's protective barrier dome.

Chapter 95. Chapter 17: The Custom Bearer: Steward of Balance

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/protagonists/custom_bearer.adoc

Chapter 96. Overview

The **Custom Bearer** (designated within the simulation engine as `<chosen_name>`) represents the third sovereign axis of the **Tenebris and Lux** tri-perspective narrative architecture. Serving as the thematic and ludological pillar of **The Future**, the Custom Bearer enters the world through the ethereal **Dream Chamber** under the stewardship of **Chrono**, unencumbered by the heavy generational trauma that binds both Elijah Ro-enheart and Katrina Jaren.

> You are not bound to the grief of what was broken, nor the cynicism of what remains. Touch the stone of your choosing, bearer. The twin relics will answer to your intent, and the dawn or dusk of Sacyra will bear the shape of your resolve.
>
> — Chrono, The Dream Chamber - Awakening of the Relic Bearer

Chapter 97. 1. Identity & Narrative Axis

- **Canonical Designation**: `<chosen_name>` (User-defined; defaults to `Elijah` if skipped).
- **Narrative Archetype**: The Steward of Balance / The Unwritten Destiny.
- **Thematic Alignment**: **The Future** (Transcending the 3,000-year cycle of inherited trauma).
- **Starting Realm**: **The Dreamscape** (`LOC_THE_DREAMSCAPE`), transitioning into **Dio Village**.
- **Spiritual Lineage**: Spiritual successor to **Prince Mi-ren**, who held the sacred vigil and sought institutional equilibrium across the founding era.

Dimension	Characteristic Specification
Moral Sway Potential	Completely unbound: dynamic range `[-100, +100]`.
Relic Mastery	Dual-wield fluency: simultaneous mastery of **Lux Barrio** and **Cuttatio Tenebris**.
Dialogue Register	Inquisitive, perceptive, pragmatic, and unswayed by courtly protocol.
Ending Affinity	Unique accessibility to **The Sovereign Accord** and **The Cycle Shattered**.

Chapter 98. 2. Archetype Stone Awakening (The Four Disciplines)

Upon awakening within the Dream Chamber, the Custom Bearer approaches the four primordial archetype monoliths under Chrono’s observation. Selecting an archetype configures the starting base parameter profile:

Archetype Stone	Class Designation	Starting Stat Profile	Tactical Grid Role
Aegis Monolith	**Vanguard**	HP: 480, DEF: 28, ATK: 24, MAT: 18	Frontline fortress; barrier interception.
Shadow Monolith	**Outrider**	HP: 380, DEF: 18, ATK: 32, MAT: 22	High mobility; flank severance strikes.
Aether Monolith	**Mystic**	HP: 340, DEF: 16, ATK: 20, MAT: 36	Elemental burst; area-of-effect zoning.
Equilibrium Monolith	**Steward**	HP: 420, DEF: 22, ATK: 26, MAT: 26	Balanced hybrid; stance chaining.

Unlike fixed protagonists whose relic bias is established by lineage, the Custom Bearer accumulates **Resonance Charges** dynamically. Channeling defense builds Lux resonance, while initiating offensive flanks charges Tenebris edge.

Chapter 99. 3. Psychological Dynamic: The Unburdened Gaze

While Elijah sees the world through the lens of military honor and his father's mystery, and Katrina views society through betrayal and aristocratic corruption, the Custom Bearer approaches the crisis with empirical curiosity:

- **In Dio Village**: Questions the St. Baron's authority not out of defiance, but by exposing the mathematical absurdity of his exorbitant grain tithes.
- **In the Whispering Woods**: Discerns the abnormal migratory patterns of the Umbral Wolves, recognizing the abyssal corruption spreading from the Royal Capital.
- **Before King Jihad**: Detects the rhythmic harmonic distortion of **The King's Curse** leaking from beneath the High Throne before the royal court notices the monarch's decay.

Thematic Invariant: Inherited Trauma vs. Chosen Destiny

The Custom Bearer embodies the second clause of the overarching narrative axiom: **"Trauma is Inherited; Destiny is Chosen."** By refusing to allow ancient grudges between Libira and Sacyra to dictate their actions, the Custom Bearer can forge alliances that neither historical faction believed possible.

Chapter 100. 4. TRPG Grid Mechanics & Signature Abilities

Dimension	Specification
Base Movement	4 Tiles (Variable by chosen Archetype Stone: 3 to 5 tiles).
Zone of Control	Dynamic projection based on active combat stance.
Signature Stance	**Harmonic Equilibrium** (`STANCE_EQUILIBRIUM`): $+15\%$ to both DEF and ATK.
Ultimate Skill	**Duo-Loca Bashin n Slash** (Twilight Magic Slash combining Lux and Tenebris).

100.1. Tactical Synergies

1. **Adaptive Stance Shifting**: Can shift stances without consuming action points once per turn, allowing instant transition from defensive warding to aggressive edge severance.
2. **Moral Sway Polarization**: Can align with either light or dark embellishments at the Altar of the Twin Relics, or forge the **Equilibrium Crown** to dissolve the planar wound.

Chapter 101. Chapter 18: Prince Mi-ren: Sovereign of the Vigil

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/founders/prince_mi_ren.adoc

Chapter 102. Overview

Prince Mi-ren was the elder founding prince of the Kingdom of Sacyra during Era I (The Primordial Dawn & The Accord of Kings). While his younger brother, Prince Casatti, ventured into the untamed frontier, Mi-ren anchored the capital, established the administrative institutions of the Crown, and held the legendary **Four-Year Vigil** over his brother's mysterious slumber. In the narrative triad of **Tenebris and Lux**, Prince Mi-ren represents the archetype of **The Steward of Order** and the philosophical progenitor of the Custom Bearer.

> A wall does not exist to lock men in, but to ensure that what we plant inside may grow without fear of the winter gale. If my brother must walk the dark wild, then I shall build a hearth warm enough to guide his spirit home.
>
> — Prince Mi-ren, Royal Archive Tablet - The Founding Accord

Chapter 103. 1. Identity & Lineage

- **Full Title**: Prince Mi-ren the Steadfast, First Warden of the High Court, Architect of Sacyra.
- **Dynastic Era**: Era I–II (Founding Epoch, approximately 3,000 Years Before the Main Campaign).
- **Affiliation**: First Royal House of Sacyra; Founder of the Royal Garrison and Courier Corps.
- **Familial Ties**:
  - **Brother**: **Prince Casatti**, the younger outrider prince who walked the Path of Darkness.
  - **Successor Lineage**: His bloodline formed the foundational dynasty of the First 30 Kings, eventually degenerating millennia later into the hollow reign of King Jihad.

Dimension	Characteristic Specification
Martial Discipline	Classical Phalanx & Warding Architecture; heavy royal shieldbearer.
Metaphysical Affinity	**The Shield of Lux** (Resonance with warding, preservation, and structure).
Thematic Anchor	Institutional Duty, Self-Sacrifice, Bureaucratic Order.

Chapter 104. 2. Historical Chronicle & The Four-Year Vigil

When the two founding princes completed their training, they faced a philosophical fork: the untamed frontier required exploration, while the nascent kingdom required permanent governance and defensible walls.

Event Phase	Historical Deed & Chronicle
The Division of Labor	Mi-ren took responsibility for the Crown, founding the Royal Guard, designing the granaries, and codifying Sacyran civil law.
The Slumber of Casatti	When Prince Casatti collapsed into a four-year coma during his wilderness campaign, Mi-ren refused to abandon his brother, maintaining a continuous daily vigil at his bedside while governing the kingdom through sleepless devotion.
The Festival of Peoples	Established the international gathering in the capital, inviting surrounding realms to exchange culture, technology, and mutual peace every spring.
The Tragic Rupture	In the 11th year, when the planar tether snapped beneath the High Throne, Mi-ren threw his own life-force into the warding perimeter to shield the capital's populace from abyssal incineration.

Prince Mi-ren's great tragedy was his belief that systemic perfection could eliminate human suffering. By focusing entirely on the capital's defense, his administrative network failed to recognize the desperation building in frontier outposts like Libira, inadvertently sowing the seeds of Usuru's revolt.

Chapter 105. 3. Thematic Mirror: The Custom Bearer & Prince Mi-ren

In the **Past / Present / Future Thematic Triad**, Prince Mi-ren serves as the historical touchstone for the **Custom Bearer**:

1. **The Burden of Stewardship**: Just as Mi-ren held the kingdom together through sheer discipline, the Custom Bearer is called upon to arbitrate between the competing factions of modern Sacyra.
2. **Transcending Institutional Rigidity**: Where Mi-ren prioritized legalistic structure over emotional grievance, the Custom Bearer must learn from Mi-ren's failure—listening to the "quiet complaints" of commoners in Dio Village and the frontier before they curdle into war.
3. **Equilibrium Mastery**: Historical records indicate that Mi-ren was the first to realize that the Shield of Lux could not withstand endless kinetic pressure without venting force through the severance of a blade—laying the conceptual groundwork for the **Equilibrium Stance**.

Chapter 106. Chapter 19: Prince Casatti: The Outrider Blade of Truth

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/founders/prince_casatti.adoc

Chapter 107. Overview

Prince Casatti was the younger founding prince of Sacyra during Era I. Rejecting the ceremonial comforts of the royal palace, Casatti rode into the frontier wilderness to chart the uncharted reaches of the continent. Falling into a mysterious **Four-Year Coma** after contacting an ethereal boundary stone, Casatti awakened with transfigured perception, wielding the **Sword of Tenebris** as an instrument of decisive severance and unvarnished truth. In the overarching narrative of **Tenebris and Lux**, Casatti serves as the direct historical predecessor and spiritual mirror to **Lady Katrina Jaren**.

> My brother measures safety by the thickness of a parapet. He does not understand that stone can rot from within while looking immaculate to the sun. There are times when peace is simply another word for cowardice. When the branch turns gangrenous, you do not bless it with oil—you strike it from the trunk.
>
> — Prince Casatti, Fragmented Journal Recovered from the Whispering Caverns

Chapter 108. 1. Identity & Provenance

- **Full Title**: Prince Casatti the Swift, The Frontier Ranger, Bearer of the First Edge.
- **Dynastic Era**: Era I–II (Founding Epoch, approximately 3,000 Years Before the Main Campaign).
- **Affiliation**: Royal House of Sacyra; Spiritual Patron of the Outrider Scouts and Adventurers' Guild.
- **Familial Ties**:
  - **Brother**: **Prince Mi-ren**, the elder sovereign who held the capital vigil.
  - **Spiritual Heir**: **Lady Katrina Jaren**, who inherits his martial mindset, defiance of aristocratic complacency, and razor-sharp swordsmanship.

Dimension	Characteristic Specification
Martial Discipline	High-mobility skirmishing, critical edge strikes, flank severance.
Metaphysical Affinity	**The Sword of Tenebris** (Resonance with severance, decisive truth, shadow).
Thematic Anchor	Radical Truth, Severing Stagnation, Rejection of Hypocrisy.

Chapter 109. 2. The Four-Year Slumber & The Ethereal Transfiguration

While exploring the frontier passes bordering the ancient realm of Libira, Casatti touched an anomalous obsidian monolith vibrating with abyssal frequency. The contact thrust him into a deep suspended animation that lasted four full years:

1. **The Slumber**: For forty-eight months, his body rested unaging in the capital while his consciousness traversed the deeper strata of **The Dreamscape**.
2. **The Awakening**: Upon awakening, Casatti no longer viewed darkness as an evil force to be feared, but as the quiet, necessary soil from which all life and truth spring.
3. **The Sword of Tenebris**: Crafting the ancestral blade that would become the counterpart to the Shield of Lux, Casatti demonstrated that light without darkness produces blinding arrogance, while darkness tempered by discipline brings clarity.

Casatti’s critique of the royal court’s decadence was violently rejected by the conservative nobles of Sacyra. Frustrated by courtly hypocrisy, he spent his remaining years defending the frontier peasantry, establishing the traditions later adopted by the **Adventurers' Guild**.

Chapter 110. 3. Thematic Mirror: Katrina Jaren & Prince Casatti

The narrative parallels between Prince Casatti and Lady Katrina Jaren are exact:

- **Aristocratic Renunciation**: Just as Casatti abandoned the throne room to live among frontier scouts, Katrina abandons her aristocratic seat on the Royal Court to join the commoners of the Adventurers' Guild.
- **The Blade of Severance**: Both wield the Sword of Tenebris not to conquer, but to cut through political lies, aristocratic complacency, and ideological self-deception.
- **The Present Axis**: In the narrative triad, both embody **The Present**—the urgent necessity to take decisive action against immediate injustice rather than hiding behind royal procedure.

Chapter 111. Chapter 20: Usuru the Wanderer: Sovereign of Grief

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/founders/usuru_the_wanderer.adoc

Chapter 112. Overview

Before he was feared across the ages as **The Dark Lord**, he was a nameless boy born to an impoverished family on the arid borders of the **Kingdom of Libira** during Era IV. Known as the **Three-Day Wanderer** because he could never bear to settle in any settlement for more than three sunsets, he held an unyielding, reverent devotion to the First King and the splendor of the Capital. Driven by the "Quiet Complaint" of his neglected homeland and catastrophically altered by the snapping of the planar tether during the 11th Festival of Peoples, Usuru chose his name in defiance, crowned himself sovereign of Libira, and declared the devastating **Seven-Year Great War**.

> We waited seven days for their riders to tell us if our children were allowed to starve. We bowed when their golden heralds told us that peace demanded our silence. But when I reached out to touch the King’s light, it burned my skin and sealed our skies. They did not leave us behind by mistake—they left us behind because we were quiet. Libira will be quiet no longer.
>
> — Sovereign Usuru, Speech to the Assembly of Libira - Dawn of the Great War

Chapter 113. 1. Identity & Origin

- **Birth Identity**: Nameless Boy of Libira (Born to a frontier shepherd family).
- **Chosen Name**: **Usuru** (Ancient Libiran root meaning **"He Who Remembers What Was Buried"**).
- **Historical Era**: Era IV–V (approximately 3,000 Years Ago, Pre-Dynastic Wave).
- **Titles**: The Three-Day Wanderer; Sovereign of the Red Desert; Vanguard of the Broken Crown; later corrupted across the millennia into **The Dark Lord**.
- **Affiliation**: Kingdom of Libira; Supreme Commander of the 6-Power Coalition against Sacyra.

Dimension	Specification
Defining Trait	Restlessness; profound observational empathy curdling into volcanic resentment.
Original Motivation	Yearning to bridge the geographic and communication gulf between Libira and Sacyra.
Thematic Axis	**The Past** (The unhealed frontier wound, mirrored by Elijah Roenheart).

Chapter 114. 2. The Wanderer’s Pilgrimage & The "Quiet Complaint"

Due to the lack of an outpost relay system, a message sent from the Royal Capital took seven grueling days of desert riding to reach Libira. While the capital feasted, Libira struggled against drought, bandit raids, and forgotten infrastructure.

1. **The Three-Day Law**: Growing up, the boy walked the breadth of the continent, staying no more than three days in any village. He listened to commoners, blacksmiths, and outriders, cataloging the quiet complaints of the forgotten provinces.
2. **The Annual Pilgrimage**: The sole exception to his three-day rule was the annual **Festival of Peoples** in the capital, where he stayed an entire week, gazing with awe at the High Throne and the First King.
3. **The 11th Year Catastrophe**: During the 11th festival, determined to deliver a petition for a Libiran relay road, the boy slipped into the Inner Sanctum beneath the High Throne. Startled by guards, he accidentally struck the ritual focus stone. The planar tether snapped, venting primordial abyssal energy that sealed the First King in the Dreamscape and violently warped the distance between Libira and Sacyra into an impenetrable spatial rift.

Believing the sudden spatial expansion was a deliberate imperial curse cast by the Sacyran court to permanently exile Libira, the boy’s devotion inverted into pure, consuming hatred.

Chapter 115. 3. Ascension, War & Metaphysical Corruption

Returning across the warped desert passes, the youth took the name **Usuru**, mounted the dais of the Libiran assembly hall, and proclaimed the end of subservience:

- **The Crown of Libira**: Libirans, enraged by generations of neglect and royal silence, crowned Usuru by unanimous acclamation.
- **The 6-Power Conflagration**: Forging military alliances with the Great Mau Kingdom, Old Sacyra, and the Yun-yin Provinces, Usuru ignited the **Seven-Year Great War**.
- **Descent into Ruin**: To match the invulnerable barrier of the **Shield of Lux**, Usuru dipped his soul repeatedly into the abyssal breach beneath the battlefield, forging void constructs and commanding **Dream Eaters**. By the war's end, his humanity had burned away, leaving behind the eternal, brooding sovereign now remembered only as **The Dark Lord**.

Chapter 116. 4. Thematic Mirror: Elijah Ro-enheart & Usuru

Usuru serves as the tragic historical negative to **Elijah Ro-enheart**:

- Both originate from the marginalized periphery (frontier Libira vs. neglected Dio Village).
- Both suffer from the abrupt disappearance of a revered paternal figure (The First King vs. Commander Gareth).
- Where Usuru allowed his frontier grievance to consume him into becoming a monster of vengeance, Elijah must learn to acknowledge his family's pain without repeating Usuru's destructive crusade.

Chapter 117. Chapter 21: Chrono: Sage of the Ancient Archives & Dream Guardian

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/sages_and_ancients/chrono.adoc

Chapter 118. Overview

Chrono is the eternal archival sage and guardian of **The Dream Chamber** within the ethereal substrate of **The Dreamscape** (`LOC_THE_DREAMSCAPE`). Witness to the 3,000-year dynastic wave and the catastrophic snapping of the planar tether during the 11th Festival of Peoples, Chrono serves as the guide, mentor, and mechanic instructor for the newly awakened Relic Bearer.

> Time is neither a line nor a river, child of Sacyra. It is a loom of resonance. When the First King attempted to hold the veil open, the shuttle broke. What you call monsters are merely the untethered threads of that unbroken night seeking form. Raise your ward. Let us see if your spirit remembers how to hold the dawn.
>
> — Chrono, The Dream Chamber - Tutorial Trial

Chapter 119. 1. Identity & Provenance

- **Full Designation**: Chrono, Keeper of the Monoliths and Primordial Archives.
- **Affiliation**: Pre-Dynastic Sacyran Order of Scribes; Guardian of the Dream Veil.
- **Sanctuary Domain**: **The Dream Chamber** (Subterranean astral vault within the Dreamscape).
- **Physical Manifestation**: An ethereal figure draped in celestial silver-grey robes lined with rotating astrolabe embroidery. His hair shifts between shades of starlight, and his eyes glow with muted amber luminescence. He holds the **Codex of Eras**, an unwritten ledger of potential futures.

Dimension	Specification
Age / Lifespan	Ageless; active since the dawn of the First Dynasty (>3,000 years).
Primary Relic	**The Chrono Astrolabe** (Attunes pocket dimensions and temporal flow).
Tone & Register	Measured, archaic, compassionate yet unsentimental; philosophical.
Mechanical Role	Archetype Stone Selection, Combat Tutorial Arbiter, Dream Compass Attuner.

Chapter 120. 2. Archival Purpose & Historical Memory

Chrono was present when Prince Mi-ren held his vigil in the capital and when Prince Casatti fell into the four-year coma. He witnessed Usuru the Wanderer arrive as a nameless pilgrim, and documented the exact instant the 11th-year ritual collapsed beneath the High Throne.

Chrono does not intervene directly in the mortal wars of Sacyra. The Laws of the Veil forbid an Archival Sage from taking up arms against the living or the void. His duty is solely to ensure that the chosen Relic Bearer understands the consequences of moral intent.

120.1. The Three Archival Directives

1. **Preserve the Blueprint of Balance**: Record the deeds of each monarch across the 3,000-year dynastic wave, tracking the accumulation of stasis residue beneath the capital.
2. **Attune the Relic Bearer**: Test the newly awakened soul against the **Dream Eaters** to verify that they can command both Lux deflection and Tenebris severance without succumbing to madness.
3. **Calibrate The Dream Compass**: Awaken the dormant temporal gearwork within **Grandma's Watch**, transforming a rustic heirloom into an instrument capable of navigating nocturnal planar shifts.

Chapter 121. 3. Canonical Voice & Dialogue

- **The Philosophy of Stance**: [quote, Chrono, Combat Mechanics Initiation] "To wield only Lux is to become a frozen statue, impervious yet inert. To wield only Tenebris is to become a devouring blade, sharp yet hollow. True mastery lies in the threshold where the two kiss and do not consume one another."
- **Warning of The King’s Curse**: [quote, Chrono, Midpoint Revelation] "King Jihad is not evil, bearer. He is thirsty. And a thirsty man standing over an open well of liquid night will drink until his belly bursts and his soul turns black."
- **The Fate of Usuru**: [quote, Chrono, The Planar Threshold] "Do not despise the Dark Lord. Mourn him. For before he was a sovereign of ruin, he was a lonely boy whose quiet complaint went unheard by a court blinded by its own radiance."

Chapter 122. 4. Ludological Role in the TRPG Engine

Gameplay Phase	Systemic Interaction
Prologue (Awakening)	Guides archetype stone interaction; spawns initial Dream Eater combatants.
Act I Interludes	Re-encountered during rest at campfires when the player falls into dream meditation.
Act II (Midpoint)	Deciphers the runes carved into **Grandma’s Watch**, unlocking the Dream Compass.
Act III (Endgame)	Unlocks the **Sanctum of Forgotten Memories**, revealing Usuru’s uncorrupted dialogue.

Sidebar: Chrono’s Codex & Invariant Validation

Within the C11 simulation engine, Chrono serves as the diagnotic voice of the subsystem self-audit routines (`core.util.manifest`, `sim.engine.state`). When the engine performs an invariant check, the telemetry trace reflects Chrono’s unyielding standard: zero heap corruption, bounded moral sway, and deterministic state transitions.

Chapter 123. Chapter 22: Grandma Magolia: Matriarch of Dio Village

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/dio_village/grandma_magolia.adoc

Chapter 124. Overview

Grandma Magolia (Magolia Ro-enheart) is the beloved matriarch of Dio Village, mother to Commander Gareth Ro-enheart, and grandmother to Elijah Ro-enheart. Providing warmth, historical perspective, and the family heirloom (**Grandma's Watch**), Grandma Magolia anchors the heroes to the human heart of Sacyra.

Chapter 125. 1. Identity & Family Ties

- **Full Name**: Magolia Ro-enheart ("Grandma Magolia")
- **Residence**: Grandma’s House (Two-story timber cottage, Dio Upper Ward)
- **Family Lineage**:
  - **Son**: Commander Gareth Ro-enheart (Vanished Head of the Royal Guard)
  - **Grandson**: Elijah Ro-enheart (Bearer of the Shield of Lux)
  - **Surrogate Charge**: Lady Katrina Jaren (who sought haven with Magolia during her rebellion against House Jaren court tutors)
  - **Lifelong Friend**: Monica the Mystic (companion since youth)

Chapter 126. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

Grandma Magolia speaks with gentle affection, nostalgic wisdom, and quiet sadness regarding the decline of provincial Sacyra.

- **The Heirloom Quest**: [quote, Grandma Magolia, Map 21 / Map 7] "Hello sweetie, could you please go upstairs and search in the chest and grab what’s inside? It’s something that has great significance."
- **Reflections on the Kingdom’s Neglect**: [quote, Grandma Magolia, Map 21 / Map 7] "This town used to be full of life. **sighs** The kingdom doesn’t pay much attention to this place anymore…"
- **Passing Down the Heirloom Watch**: [quote, Grandma Magolia, Map 21 / Map 7] "Thank you honey. This watch has been in the family for a long time. Oh, how it brings back memories of better days. I think you should keep it. It’s my gift to you. And here’s a bit of money. I know that you’ll need it more than little ol' me."
- **A Lifelong Bond with Monica**: [quote, Grandma Magolia, Map 21 / Map 7] "Oh me and Monica go way back. She was such a wild child, always getting into mischief. You’ll love her."

Chapter 127. 3. The Heirloom Timepiece: Grandma’s Watch

Grandma Magolia bequeaths **Grandma’s Watch** to the party. In the original 2017–2018 RPG Maker project, this item activated the global calendar and monotonic time engine (Seconds, Minutes, Hours, Days, Weeks, Months, and Seasons). In the modern C11 architecture, this lore item corresponds directly to the Layer 0 `time_utils` subsystem, tracking monotonic game ticks and frame budgets.

Chapter 128. Chapter 23: Monica the Mystic & Goddess Lyri

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/dio_village/monica_and_lyri.adoc

Chapter 129. Overview

Monica the Mystic (known as **The Sage** in village folklore) and her elemental familiar **Lyri** reside in an arcane grove on the outskirts of Upper Dio Village. Sarcastic, sharp-tongued, yet deeply attuned to the metaphysical currents of Sacyra, Monica is the first local authority to confirm that the forces of Darkness have re-awakened.

Chapter 130. 1. Identity & Mystical Lineage

- **Name**: Monica (**The Mystic / The Sage**)
- **Companion Familiar**: **Lyri**, an ethereal nature spirit who perceives metaphysical fluctuations and whispers warnings into Monica's ear.
- **Residence**: Monica's House & Mystic Grove (Dio Upper Ward)
- **Alliances**: Lifelong confidante of Grandma Magolia; contact of Chrono the Sage.

Chapter 131. 2. Canonical Voice & Demeanor (2017–2018 RPG Maker Origin)

Monica possesses a biting, irreverent wit, greeting newcomers with playful insults before demonstrating profound arcane knowledge.

- **Blunt First Impressions**: [quote, Monica to Elijah, Map 27 / Map 29] "And who in the blaze are YOU! … So you are Magolia’s grandson. She made you sound more handsome than you are."
- **Clashing with Katrina**: [quote, Monica to Katrina, Map 27 / Map 29] "So you are Magolia’s granddaughter. She made you sound prettier than you are."
  Katrina: "LISTEN HERE YOU OLD-!"
  Monica: "Tis only a joke. Now why have you come here? Do you have some milk?"
- **Lyri’s Whispers & The Darkness**: [quote, Monica, Map 27 / Map 29] "A wise woman she is. Lyri has been whispering in me ear about the forces of darkness. I’ll help, but first, get that hooligan from the city limits. Not only is he preventing folks from leaving, he’s also messing with me business."

Chapter 132. 3. Arcane Role in the Campaign

1. **Attunement to the Void**: Through Lyri, Monica senses the breaking of the ancient seals on the Abyssal Threshold long before the Royal Court admits it.
2. **The City Limits Obstacle**: Directs the heroes to clear the town boundary (confronting the "Fighter Kid" blocking the pass) to prove their tactical readiness.
3. **Bridge to the Sages**: Connects Elijah and Katrina with the ancient scholar **Chrono**, guiding them toward their destiny with the twin relics.

Chapter 133. Chapter 24: Eric the Lumberjack & The Moral Litmus

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/dio_village/eric_the_lumberjack.adoc

Chapter 134. Overview

Eric is a former lumberjack residing in the Upper Ward of Dio Village. His livelihood was shattered when a mysterious abyssal portal manifested in the timber forests, driving him into poverty. He introduces the heroes to the **Ring of Fire** and anchors the early **Test of Honesty** moral dilemma.

Chapter 135. 1. Identity & Background

- **Name**: Eric
- **Occupation**: Former Master Woodman / Timberjack (Unemployed due to monsters)
- **Residence**: Eric's Hearth (Upper Dio Village)
- **Economic Situation**: Deeply impoverished, struggling to afford food as monster activity blocks access to the logging roads.

Chapter 136. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

Eric represents the vulnerable provincial working class bearing the brunt of unnatural cosmic incursions.

- **The Struggle of Provincial Labor**: [quote, Eric, Map 28] "We've been seeing a lot of monsters appear near the woods recently. I wonder what's that all about. And with jobs being tight, money is hard to come by."
- **The Story of the Portal & The Ring of Fire**: [quote, Eric, Map 28] "Thank you. Thank you so much, here I believe that this will be more useful to you than me. The name is Eric and that ring has a story. I used to be a lumberjack until that weird portal appeared. I found this ring and held on to it ever since. I'm sure that ring's fire power will come in handy if you plan on leaving the village."

Chapter 137. 3. The Test of Honesty & Moral Continuum

Eric’s home contains a famous interactive vignette from the 2017–2018 project: the **Self-Aware Pot**.

- If the player attempts to loot Eric’s shelf pot, the pot speaks directly to the player: [quote, Self-Aware Pot, Map 28] "What kind of game do you think this is! You can’t just steal whatever you want! How rude!"
- Taking the 10 Gold increments the internal `Moral (Evil)` counter, while gifting charity to Eric increments `Moral (Good)`. This directly fed the original RPG Maker `Morality Meter` and served as the design prototype for the modern C11 engine’s `moral_sway` continuum (`[-100, +100]`).

Chapter 138. Chapter 25: John the Thief & Outlaw Resistance

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/dio_village/john_the_thief.adoc

Chapter 139. Overview

John the Thief is an underworld operative and smuggler residing in the back alleys of Dio Village's Lower Ward. Cynical and gruff, John nonetheless acts as an unofficial protector of the poor, redistributing goods and offering clandestine sidequests to heroes willing to bypass the law.

Chapter 140. 1. Identity & Underworld Standing

- **Name**: John (**"John the Thief"**)
- **Occupation**: Smuggler, Fence, and Independent Rogue Operative
- **Territory**: Lower Ward Alleys & Shopping District
- **Philosophy**: Pragmatic survivalism; contempt for aristocratic landlords.

Chapter 141. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

John initially meets outsiders with hostility, softening only when heroes demonstrate that they care about the common people.

- **Gruff Rebuff**: [quote, John, Map 31] "What do you want kid! Can’t you see that I’m busy!"
- **Recognizing Civic Virtue**: [quote, John, Map 31] "So you’re the one that’s helping the little people of this village out. I have a little task for you…"

Chapter 142. 3. Quest & Mechanics Role

John the Thief introduces the **Stolen Goods** tactical retrieval mechanics. In the 2017–2018 LeTBS combat engine, recovered bandit contraband appeared as interactive grid items with dedicated `Pick Up` and `Push` commands. John serves as the quest receiver who turns recovered goods into vital supplies and gold.

Chapter 143. Chapter 26: The St. Baron & Feudal Exploitation

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/dio_village/st_baron.adoc

Chapter 144. Overview

The St. Baron is the wealthiest aristocrat and dominant landowner of Dio Village. Residing in a secluded manor in the Lower Ward, the St. Baron uses exorbitant rent, grain hoarding, and monopolies to subjugate the impoverished citizens, serving as a primary symbol of noble corruption outside the capital.

Chapter 145. 1. Identity & Standing

- **Title**: The St. Baron of Dio Province
- **Residence**: The St. Baron's Manor (Lower Dio Village)
- **Status**: High provincial gentry; tax collector for the eastern march
- **Reputation**: Ruthless, miserly, and widely despised by the working poor.

Chapter 146. 2. Socio-Economic Conflict in Dio Lower Ward

While the Upper Ward remains pastoral and self-sufficient, the Lower Ward suffers under the St. Baron’s heavy-handed economic extortion. By controlling grain warehouses and money-lending stalls, the Baron has forced shopkeepers and laborers into debt bondage.

- **The Hero’s Moral Justification (Elijah)**: [quote, Elijah, Lower Village Infiltration] "I can’t believe that I am doing this… the baron is the richest man in the village… but he’s been using the town! This is for the good!"
- **The Rogue’s Determination (Katrina)**: [quote, Katrina, Lower Village Infiltration] "Ok… here we go… let’s do this. I have to do at least one good thing today."

Chapter 147. 3. Narrative & Quest Role

The St. Baron represents the mundane human corruption that flourishes when the Crown neglects its borders. Infiltrating the St. Baron’s estate to recover stolen resources for the village provides the player with an early non-combat tactical scenario, forcing Elijah to break legal statutes for the higher moral good.

Chapter 148. Chapter 27: High Priest Roté & The Royal Omens

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/kingdom_and_court/sir_rote.adoc

Chapter 149. Overview

Sir Roté is a veteran scout, senior knight, and herald of the Sacyran Royal Guard. His urgent, breathless arrival at Sacyra Castle serves as the opening narrative incitement of the game, delivering news of the rising island, the unnatural storm, and the return of the primordial Darkness.

Chapter 150. 1. Identity & Standing

- **Full Name**: Sir Roté of the Royal Guard
- **Rank / Office**: Senior Outrider Captain / First Scout of the Realm
- **Affiliation**: Kingdom of Sacyra Royal Army; The Royal Guard
- **Visual Demeanor**: Weather-worn plate mail spattered with mud from frantic galloping, exhausted, earnest, and deeply devoted to the Crown.

Chapter 151. 2. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

Sir Roté represents the perspective of the loyal rank-and-file soldier who believes unquestioningly in his monarch's ability to save the realm.

- **Observation at the Frontier (Start-Up / Castle Gates)**: [quote, Roté, Map 2 & Map 3 / Map 8] "The king… huff… huff… huff… he must know immediately! And to think… The storm… The rising island… All of these events before the Festival of Heroes. The king will know how to stop this, he must know…"
- **The Urgent Report to King Jihad**: [quote, Roté, Throne Room - Map 4 / Map 9] "MY KING! It's here! The darkness… it has returned!"
- **The Uneasy Hesitation**: [quote, Roté, Hearing King Jihad's Gag Order] "Y… Y… Yes my king…"

Chapter 152. 3. Narrative Role & Dynamic

Sir Roté serves as a tragic mirror to Elijah Ro-enheart. Both men revere the oath of the Royal Guard. However, while Roté suppresses his growing unease when King Jihad issues a gag order preventing the people from knowing about the approaching Darkness, Elijah ultimately chooses conscience over blind obedience. Later in the campaign, Roté's internal conflict plays a pivotal role in enabling Elijah and Katrina to infiltrate the castle archives.

Chapter 153. Chapter 28: King Jihad & The Treasonous Ambition

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/kingdom_and_court/king_jihad.adoc

Chapter 154. Overview

King Jihad (referenced in ancient annals as **D. Jihad**) is the reigning monarch of the **Kingdom of Sacyra**. Outwardly a dignified sovereign presiding over the chivalric traditions and the **Festival of Heroes**, King Jihad secretly harbors a perilous ambition: to seize and harness the forbidden abyssal power of the returning **Dark Lord** to establish absolute dominion over the realm.

Chapter 155. 1. Identity & Sovereign Office

- **Full Name**: King Jihad of Sacyra (Monarchical Title: **D. Jihad**)
- **Office**: Crown Sovereign, King of Sacyra, High Commander of the Realm
- **Seat of Power**: The High Citadel of Sacyra Castle
- **Political Standing**: Balances the aristocratic Noble Houses against the meritocratic Adventurers' Guild while commanding the elite Royal Guard.

Chapter 156. 2. The Grotesque Inversion of the Founding Dynasty

King Jihad stands as the exact moral and structural inverse of the First King and Prince Mi-ren:

Dimension	The Founding Dynasty (First King & Mi-ren)	The Modern Inversion (King Jihad)
State of the Monarch	Physical body comatose/dead during festival week, while his **spirit remained pure and lucid** in The Dreamscape to guide the realm.	Physical body healthy upon the throne, while his **heart is thoroughly corrupted** by greed for void power.
Purpose of Secrecy	Concealed the First King's passing out of filial duty and preservation until teenage Mi-ren officially came of age.	Imposes a gag order (`"don't tell the people"`) so heroes do not interfere before Jihad can usurp void power for himself.
Relation to Prophecy	Forged Lux and Tenebris to enact justice, protect life, and seek forgiveness.	Covets the **Prophecy of Kings**, seeking to hijack void supremacy without understanding that Lux dissipates in a corrupt heart.

Chapter 157. 3. "The King’s Curse" & Abyssal Possession

- **The Planar Hazard:** For 3,000 years, Sacyran monarchs were exposed to residual spiritual shear from the open planar rift beneath the High Throne dias, left when Usuru shattered the First King’s stasis ritual.
- **The Fatal Gamble:** Coveting the Dark Lord’s power, King Jihad intentionally opened the conduit beneath his throne prior to the Festival of Heroes. Because the ethereal medium mirrors mortal intent, Jihad’s arrogance inverted the flow, allowing a dormant remnant of Usuru’s consciousness (**The Dark Lord**) to possess him.
- **Act I Midpoint Climax:** Defeating King Jihad at Sacyra Castle exposes this possession, revealing that the true threat lies deep in the subterranean Abyssal Vaults where the ancient soul of Usuru still waits.

Chapter 158. 4. Canonical Voice & Dialogue (2017–2018 RPG Maker Origin)

- **The Secret Soliloquy:** [quote, D. Jihad, High Throne Room] "The fools… that power… that wicked power! Soon I will rule over this land, and not even the Dark Lord will have power over me!"
- **Suppressing the Truth:** [quote, King Jihad to Sir Roté] "Thank you Roté, what would I do without your careful watch… Gather up the guard! We need to prepare! Darkness will soon return to this land. And don’t tell the people of this discovery… You all are dismissed."

Chapter 159. 5. Socio-Political Role in the Campaign

1. **State Censorship:** Enforces an information blackout along the border, ignoring Sir Roté's warnings.
2. **Gareth's Disappearance:** Dispatched Commander Gareth Ro-enheart on a suicide mission into the Abyssal Threshold on Elijah's 10th birthday to scout void portals, leaving the Ro-enhearts fractured.
3. **The Catalyst for Rebellion:** When Elijah and Katrina expose King Jihad's corruption, Elijah is forced to choose between his sworn oath to the throne and his true moral duty to the living people of Sacyra.

Chapter 160. Chapter 29: Commander Gareth Ro-enheart & The Vanished Guard

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/characters/kingdom_and_court/commander_gareth_ro_enheart.adoc

Chapter 161. Overview

Commander Gareth Ro-enheart was the renowned Head of the Royal Guard, hero of the Sunken Citadel, and father to Elijah Ro-enheart. His unexplained disappearance under sealed royal orders following Elijah’s 10th birthday forms the primary personal catalyst driving Elijah’s journey across Sacyra.

Chapter 162. 1. Identity & Lineage

- **Full Name**: Commander Gareth Ro-enheart
- **Title**: Former Head of the Sacyran Royal Guard; Knight-Commander of Sacyra
- **Kinship**:
  - **Son**: Elijah Ro-enheart (Cadet Vanguard, bearer of the Shield of Lux)
  - **Mother**: Magolia Ro-enheart ("Grandma Magolia", matriarch of Dio Village)
- **Status**: Missing in Action / Sealed Royal Dispatch (Presumed Alive)

Chapter 163. 2. Legend & Martial Legacy

Gareth Ro-enheart is remembered throughout Sacyra as an incorruptible paragon of chivalric virtue. Decades prior, when an allied barbarian host breached the frontier palisades, Commander Gareth anchored the Sunken Citadel for seven days without relief, personally deflecting siege bolts with his reinforced tower shield.

He passed this philosophy to his young son Elijah:

> "A shield is not a wall to hide behind, but a promise made to the people standing behind you."
>
> — Gareth Ro-enheart

Chapter 164. 3. The 10th Birthday Vanishing & Royal Intrigue

On the morning following Elijah's **10th birthday**, Commander Gareth received a direct royal summons from King Jihad and departed the capital with an elite retinue for the southern frontier. Neither he nor his men ever returned.

- **Official Crown Statement**: Gareth was lost during a classified border survey.
- **The Reality**: Clues uncovered by Elijah and Katrina reveal that Gareth discovered King Jihad's clandestine expeditions to unearth the Abyssal Vaults. Refusing to participate in forbidden dark alchemy, Gareth was either imprisoned in a subterranean redoubt or went into deep exile to protect the realm.

Chapter 165. Chapter 30: Threat Dossier: The Dark Lord

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/threats/the_dark_lord.adoc

Chapter 166. Overview

In the authentic 2017–2018 demo script and canonical narrative architecture, the ultimate antagonist is designated strictly as **The Dark Lord**. He is not a generic cardboard demon, but the tragic culmination of three millennia of festering bitterness born from the catastrophe of the 11th Festival: the ancient Libiran youth **Usuru**.

Chapter 167. 1. Ground-Truth Canonical Identity & Origin

- **The Nameless Wanderer of Libira:** Born on the remote southern frontier of Libira during the First King’s reign, he grew up as a restless three-day wanderer whose sole enduring devotion was his annual week-long pilgrimage to the Capital for the Festival of Peoples.
- **The 11th Year Rupture:** Seeking an audience with the sovereign during the rumored "plague," the eleven-year-old boy discovered the First King’s mummified corpse and Prince Mi-ren’s protective projection ritual. Viewing the vigil as a monstrous deception, his terror triggered an accidental collision with the ritual array.
- **The Birth of Tenebris:** The catastrophic collapse of the boy’s innocent faith produced an anomalous metaphysical surge that birthed raw **Tenebris** into reality. Taking the name **Usuru**, he rallied Libira and border kingdoms to wage the 7-Year Great War of annexation.
- **The 3,000-Year Descent:** Following his armistice with Prince Mi-ren under the Accord of Kings, Usuru refused spiritual reconciliation. He retreated into the subterranean abyssal vaults, where his unresolved grief and fury curdled over three thousand years until his mortal name was lost to history, remembered only with terror as **The Dark Lord**.

Chapter 168. 2. Narrative Function: The Overarching "A Plot"

- **Existential Backdrop:** The Dark Lord is not an early-game hallway encounter. He represents the overarching existential shadow ("The A Plot") looming over Sacyra.
- **Foreground vs. Background:** While provincial survival (Dio Village), noble exploitation (St. Baron), and King Jihad’s treason form the active foreground ("B Plot" and "C Plot"), the awakening of The Dark Lord informs the dread of the entire continent.
- **The Metaphysical Siege Window:** The Dark Lord strategically aligns his vanguard strikes with the annual **Festival of Heroes**, knowing that the boundary to the Dreamscape thins to gossamer during that week, providing a planar bridge to reclaim the surface world.

Chapter 169. 3. "The King’s Curse" & Possession of King Jihad

- **The Planar Rift:** When Usuru shattered the First King’s stasis array 3,000 years ago, he left a jagged planar wound directly beneath the dias of the High Throne.
- **Psychic Conduit:** For three millennia, sovereigns were exposed to ethereal backwash. When King Jihad attempted to harness void power to usurp the Dark Lord, Jihad’s megalomania inverted the conduit, allowing a dormant remnant of Usuru’s consciousness to possess the reigning monarch.
- **Two-Half Campaign Resolution:** In Act I, heroes confront the possessed King Jihad; in Act II, they must travel into the deep abyssal threshold to face The Dark Lord himself.

Chapter 170. 4. Metaphysical Neutrality & True Resolution

- **Not Elemental Evil:** Darkness (Tenebris) is a cosmic apex force of rest, mystery, and severance. The Dark Lord represents Tenebris corrupted by an unhealed heart of vengeance.
- **The Ugly Truth:** Defeating The Dark Lord through violence alone (Neutral Ending) leaves the First King marooned and the cycle dormant. Only by confronting "The Ugly Truth"—acknowledging Usuru’s valid childhood pain and achieving the **Stance of Equilibrium**—can heroes permanently release Usuru’s tortured soul and heal the realm.

Chapter 171. Chapter 31: Threat Dossier: Dream Eaters

Source File: /home/professorseanex/Tenebris and Lux/docs/lore/threats/dream_eaters.adoc

Chapter 172. 1. Astral Parasites of the Slumber Realm

Dream Eaters are shifting metaphysical entities native to the borders of The Dreamscape.

- **Nature**: Astral parasites that feed on unresolved regrets, fears, and psychic vulnerabilities.
- **Combat Role**:
  - Manifesting during Chrono's trial, they serve as the opening combat challenge in the game.
  - **Base Vigor**: 70 Threat HP.
  - **Defensive Attributes**: 11 Physical Defense (DEF), 8 Magic Defense (MDF).
  - **Flank Vigor**: 70 HP representing flanking swarms susceptible to **Cuttatio Tenebris** splash damage.
- **Significance**: Defeating the Dream Eaters demonstrates the bearer's ability to maintain mental fortitude and twin-relic resonance, breaking free of the dream's illusions.

Volume III: Ludology & Tactical TRPG Combat Mechanics

Grid-based tactical warfare, relic stance machines, terrain modifiers, continuous invariant testing, and game design curation.

Chapter 173. Chapter 32: Dual-Layer TRPG Combat Architecture

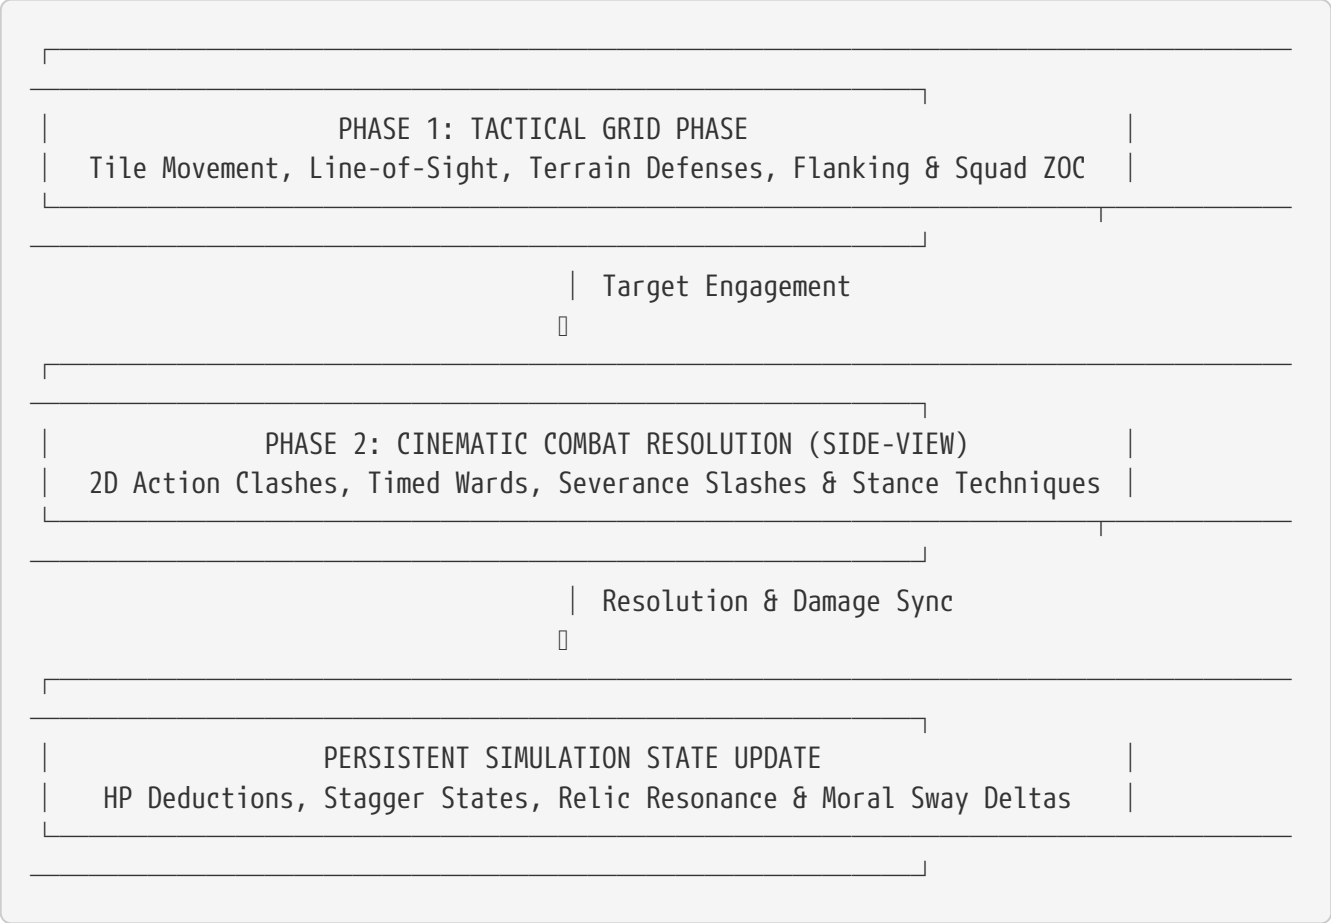

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/tactical_trpg_system.adoc

Chapter 174. Overview

This document specifies the dual-layer combat architecture of **Tenebris and Lux**: a **Tactical Strategy RPG (TRPG)** featuring a **grid-based tactical battlefield** coupled with **cinematic traditional side-scroll / action-based combat resolution**. Conceived during the 2014–2018 RPG Maker genesis of CreativeWorkzStudio, this design bridges grand tactical positioning with visceral, action-driven 2D engagement.

Chapter 175. 1. Dual-Layer Battle Architecture

The combat engine operates across two seamless, interconnected operational loops:

Chapter 176. 2. Phase 1: Grid-Based Tactical Battlefield

The overarching strategic layer takes place upon a discrete 2D grid map representing the castles, frontier passes, and battlegrounds of the **Kingdom of Sacyra**.

176.1. 1. Grid Topography & Spatial Invariants

- **Coordinate Space**: Discrete integer grid `(grid_x, grid_y)`.
- **Unit Footprint**: Standard units occupy a 1×1 grid tile; major boss constructs (such as The Dark Lord's Siege Automata) occupy 2×2 or 3×3 footprints.
- **Terrain Types & Modifiers**:
  - **Stone Flagstones / Road**: $1.0\times$ movement cost, $+0\%$ evasion.
  - **Ramparts / Elevated Battlement**: $1.5\times$ movement cost, $+20\%$ physical defense, $+1$ attack range for ranged skills.
  - **Frontier Thicket / Rubble**: $2.0\times$ movement cost, $+15\%$ evasion, blocks cavalry charge.
  - **Void Mire (Abyssal Blight)**: $2.5\times$ movement cost, inflicts -5 HP decay per turn on non-void units.

176.2. 2. Movement & Zone of Control (ZOC)

- **Movement Budget**: Units possess a base `movement_tiles` statistic (e.g. Katrina: 6 tiles; Elijah: 4 tiles in heavy armor).
- **Zone of Control**: Moving into an adjacent tile directly forward of a hostile soldier halts further movement for that turn, anchoring frontline formations.
- **Directional Facing**: Units finish their turn facing one of four cardinal directions (`NORTH`, `SOUTH`, `EAST`, `WEST`). Attacking an enemy from their flank grants $+15\%$ critical chance; attacking from the rear guarantees an unguardable strike.

176.3. 3. Turn Sequencing

- **Dynamic Initiative Order**: Turn execution is governed by unit Agility. Fast skirmishers (like Katrina) act earlier in the round, while heavy vanguard armorers act later with higher defensive resilience.

Chapter 177. 3. Phase 2: Cinematic Combat Resolution (Side-View Action)

When an attacker initiates an assault or when two opposing units clash on the grid, the game seamlessly transitions into a dedicated **2D Side-View Cinematic Battle Scene**.

177.1. 1. Visual & Staging Presentation

- The attacker approaches from the left (player units) or right (enemy units) across a dynamic 2D battlefield backdrop matching the current terrain (e.g., Sunken Citadel battlements, ash-strewn frontier).
- Character sprites render with expressive combat animations: Idle combat stance, forward dash, heavy strike, shield block, recoil, stagger, and victory flourishes.

177.2. 2. Combat Mechanics During Cinematic Resolution

1. **Active Input & Timed Agency**:
    - Rather than passive numbers scrolling past, combat resolution incorporates timed player inputs:
    - **Timed Ward (Lux Guard)**: Pressing the ward button precisely upon enemy weapon contact triggers a **Perfect Deflection**, absorbing 100% of incoming damage and staggering the foe.
    - **Twilight Severance (Tenebris Strike)**: Pressing strike during the forward dash activates a **Deep Cleave**, bypassing a percentage of enemy armor.
2. **Stagger & Poise Meter**:
    - Every battler possesses a **Poise / Stagger Gauge** ($0 \dots 100$).
    - Repeated heavy strikes or shield bashes deplete enemy poise. When poise hits zero, the target enters **Staggered Vulnerability**, leaving them defenseless against critical finishers.
3. **Stance Animation Morphing**:
    - The character's active stance directly dictates their cinematic combat posture and move set:
    - `STANCE_WARDING`: Elijah locks the Shield of Lux into the earth; golden starlight forms a kinetic buckler.
    - `STANCE_STRIKING`: Katrina or Elijah lowers their center of gravity, dragging the Sword of Tenebris as twilight embers trail the blade.
    - `STANCE_EQUILIBRIUM`: Fluid parry-and-counter sequencing utilizing both armaments in rapid harmony.

Chapter 178. 4. Dual-Protagonist Synergy: Elijah & Katrina

The tactical depth of **Tenebris and Lux** emerges from combining the distinct capabilities of Elijah and Katrina:

178.1. Elijah Ro-enheart (Frontline Guardian)

Feature	Tactical Grid & Cinematic Specification
Unit Class	Royal Vanguard / Aegis Knight
Grid Role	Anchors the defensive perimeter; draws enemy agro; intercepts projectiles.
Special Trait: Royal Intercept	If an adjacent ally (within 1 tile) is targeted by an attack, Elijah leaps in front to receive the blow, initiating the cinematic defense in their stead.
Relic Mastery	**Shield of Lux**: Projects a 2-tile radius **Sanctuary Aura** on the grid that grants allies $+25\%$ physical defense and immunity to void blight.
Cinematic Moves	**Aegis Slam**, **Radiant Shockwave**, **Bastion Guard**, **Solar Flare Riposte**.

178.2. Katrina Jaren (Tactical Skirmisher)

Feature	Tactical Grid & Cinematic Specification
Unit Class	Guild Outrider / Twilight Blade
Grid Role	Flanks heavy units; assassinates backline spellcasters; disarms siege engines.
Special Trait: Guild Acrobatics	Can move through tiles occupied by enemy infantry without triggering Zone-of-Control lock.
Relic Mastery	**Sword of Tenebris**: Can activate **Shadow Walk**, cloaking in mist on the grid to become untargetable by ranged attacks until her next strike.
Cinematic Moves	**Abyssal Dash**, **Crescent Sever**, **Shadow Dance**, **Mist-Veil Feint**.

178.3. Tandem Linked Combat (The Duo Duel)

When Elijah and Katrina are positioned on adjacent grid tiles and either initiates combat, both heroes enter the cinematic side-view battle scene together:

- **Shield & Sword Flank**: Elijah executes an **Aegis Slam** that knocks the enemy backward, launching them into Katrina's airborne **Crescent Sever**.
- **Harmonized Equilibrium**: Both heroes combine the radiance of Lux and the edge of Tenebris, unleashing a dual finishing art that sweeps across multiple targets.

Chapter 179. 5. Persistent State & Moral Sway Feedback

Upon completion of the cinematic resolution:

1. **HP & Wound Conservation**: Remaining unit health updates onto the tactical grid. Fallen units are removed or enter down-but-not-dead states.
2. **Relic Resonance Tracking**: Energy expended (`shield_power`, `sword_edge`) updates in persistent memory (`player_state_t`).
3. **Moral Sway Evaluation**:
    - Choosing to spare routed enemy captains, warding retreating militia, or using non-lethal shield stagger tilts sway toward **Virtue (+)**.
    - Executing fleeing enemies with abyssal severance or utilizing forbidden void arts tilts sway toward **Malice (-)**.
    - Moral sway unlocks distinct strategic faction options across the Kingdom of Sacyra.

Chapter 180. Chapter 33: The Twin Relics, Combat Stances & Moral Sway

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/relics_and_combat.adoc

Chapter 181. Overview

This document specifies the core ludological mechanics of **Tenebris and Lux** in the **Kingdom of Sacyra** and **The Dreamscape**: the twin primordial relics (**The Shield of Lux** and **The Sword of Tenebris**), the dynamic combat stance state machine, the moral sway continuum (`[-100, +100]`), and the tactical action skills: **Defend** (Lux Barrio), **Attack** (Cuttatio Tenebris), and **Special** (Basic Magic, Basic Ward, Basic Charm, and Duo-Loca Bashin n Slash).

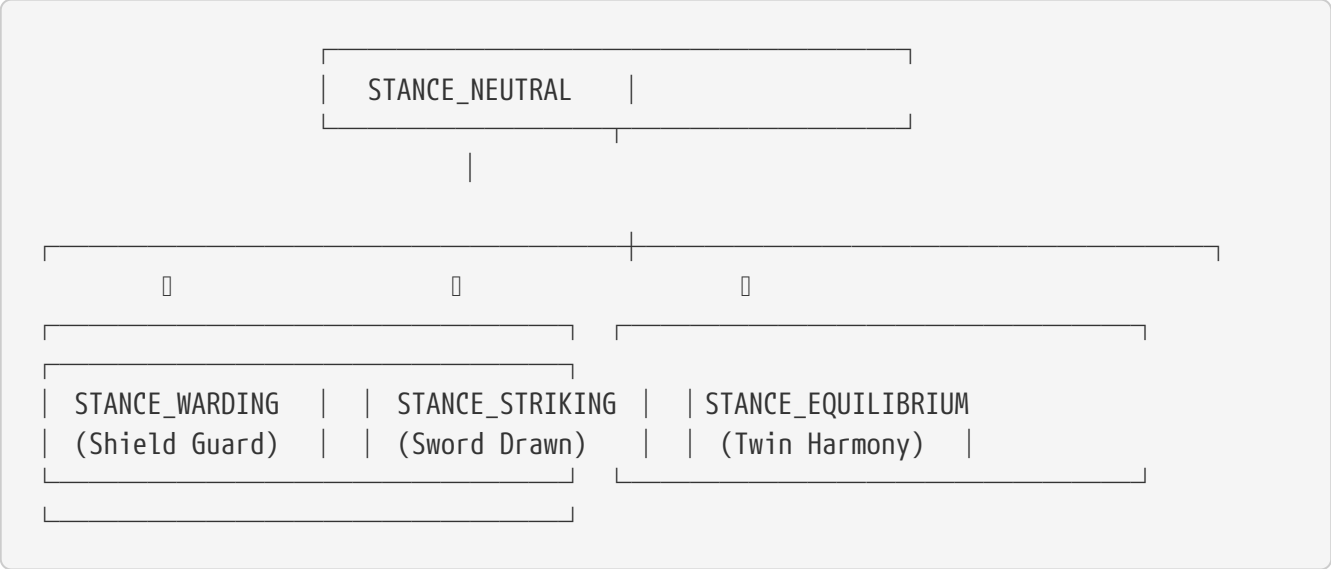

Chapter 182. 1. Primordial Neutrality & Relic Mechanics

Neither relic is inherently good nor evil. They are manifestations of cosmic apex forces whose morality is dictated solely by the intentions and choices of their wielders—canonically **Elijah Ro-enheart** and **Katrina Jaren**, or a customizable bearer chosen by the player:

Relic	**The Shield of Lux**	**The Sword of Tenebris**
Aspect	Apex Radiance & Cohesion	Apex Entropy & Dissolution
Energy Gauge	`shield_power` ($0 \dots 100$)	`sword_edge` ($0 \dots 100$)
Canonical Bearer	**Elijah Ro-enheart** (Vanguard Defense)	**Katrina Jaren** (Agile Severance)
Grid Role	Zone-of-Control denial, sanctuary aura, ally protection	High-mobility flanking, armor penetration, mist evasion
Cinematic Action	Timed kinetic blocks, shield-bashes, radiant shockwaves	Rapid dash strikes, armor severance, twilight blade waves
Resource Dynamics	Regenerates on guard; absorbs incoming assault	Consumes edge on strikes; hones outside combat

Chapter 183. 2. The Combat Stance State Machine

The battle posture shifts dynamically across four discrete combat stances:

1. `STANCE_NEUTRAL`: Relics held at waist. Balanced baseline.
    - Standard movement on the tactical grid; baseline attack parameters.
2. `STANCE_WARDING`: Shield raised in protective vanguard high-guard.
    - Grid Effect: Increases allied defense within adjacent tiles by $+25\%$.
    - Combat Effect: Boosts Shield power recovery ($+15$), increases stagger damage against attacking foes (25 HP), and wards against incoming status curses.
3. `STANCE_STRIKING`: Greatsword held in aggressive two-handed assault posture.
    - Grid Effect: Increases unit movement by $+1$ tile and grants armor-piercing flank bonuses.
    - Combat Effect: Increases strike damage from 30 to 45 (or base $+15$ bonus); reduces edge cost from 12 to 8 points.
4. `STANCE_EQUILIBRIUM`: Harmonized twin-relic synchronization.
    - Grid Effect: Immunity to positioning debuffs and void mire terrain penalties.
    - Combat Effect: Simultaneously restores $+15$ Shield power and $+15$ Sword edge; parries incoming strikes while counter-attacking for 20 damage; nudges moral sway toward center (0).

Chapter 184. 3. The Moral Sway Continuum & Decoupled Elemental Expression

The moral trajectory of Sacyra's champions is tracked along a continuous bounded integer axis:

```
[ -100: Sovereign of Ruin ] ◄──────── [ 0: Equilibrium ] ────────► [ +100: Saint of Mercy ]
                  ▲                                   ▲
                  └──────── [ -50 to +50: Bystander ] ────────┘
```

184.1. 3.1. Decoupling Morality ("The Why") from Elemental Expression ("The How")

Neither Lux nor Tenebris dictates a character's moral alignment: * **Virtuous Lux (`+1 ⋯ +100`):** Selfless sanctuary, kinetic mitigation (**Lux Barrio**), and restorative peace. * **Tyrannical Lux (`-100 ⋯ -1`):** Blinding glare, totalitarian enforcement of rigid order, and calcifying living will into petrified stasis (The Mi-ren Fallacy). * **Virtuous Tenebris (`+1 ⋯ +100`):** Surgical severance (**Cuttatio Tenebris**), cutting corrupt bindings, and executing Absolute Justice without unnecessary bloodshed (The Casatti Ideal). * **Malevolent Tenebris (`-100 ⋯ -1`):** Creeping entropic rot, nihilistic bloodlust, and devouring devastation (The Dark Lord).

184.2. 3.2. The Bystander Corridor (`[-50, +50]`) as Net Moral Inertia

The `[-50, +50]` band represents **Net Moral Inertia**, where opposing deeds cancel out into zero net displacement. Staying within this corridor traps the protagonists in 3,000 years of repeating cyclical tragedy. Breaking past ± 50 through deliberate micro-choices (such as aiding Eric or John in Dio Village) asserts heroic agency: **"Trauma is Inherited, Destiny is Chosen."**

184.3. 3.3. Equilibrium (`0`)

Maintained by active discipline rather than passive fence-sitting; balancing the blade and the aegis so that radiant light tempers the void without collapsing into calcified stasis or entropic rot. Unlocks the tandem secret art **Duo-Loca Bashin n Slash**.

Chapter 185. 4. Tactical Actions & Combat Skills

In the revised, authentic combat framework, basic actions expand into dedicated martial and arcane skills:

185.1. 4.1. Defend (`defend` / `ward`)

- **Standard Defend**: Braces behind the Shield of Lux, regenerating $+10 \dots +15$ shield power and mitigating incoming damage.
- **Basic Skill:** `Lux Barrio` **(**`barrio`**)**:
  - Manifests a radiant, geometric barrier of pure light.
  - **Effect**: Blocks incoming attack and reduces subsequent incoming damage by **25%** for a rolled turn duration.
  - **Duration Roll**: Deterministically rolls for **$2 \dots 5$ turns** (`2 + (turns % 4)`).
  - **Resonance**: Saturates Shield of Lux by $+20$ points (capped at 100) and awards $+3$ moral virtue.

185.2. 4.2. Attack (`attack` / `strike`)

- **Standard Attack**: Strikes the target enemy using the Sword of Tenebris, consuming edge points and dealing physical damage (`(ATK * 2) - DEF`).
- **Basic Skill:** `Cuttatio Tenebris` **(**`cuttatio`**)**:
  - A sweeping abyssal crescent slash infused with dark mist.
  - **Direct Damage**: Deals full primary severance damage to the selected target.
  - **Splash Damage**: Deals **20% splash damage** to surrounding and flanking foes (`threat_surrounding_hp`).
  - **Edge Dynamic**: Consumes $8 \dots 12$ edge points.

185.3. 4.3. Special (`special` / `balance`)

Replaces balance with a four-fold technique tree honoring the twin relics and arcane arts:

1. `Basic Magic` **(**`magic`**)**:
   - Neutral elemental magic damage attacking enemy Magic Defense (`(MAT * 2) - MDF`).
   - Costs 10 MP. Pure, unaligned cosmic energy.
2. `Basic Ward` **(**`ward` **under special)**:
   - Magic-based defend weaving an arcane barrier.
   - Restores $+15$ Shield power and staggers incoming assault without relying purely on physical bracing.

- Costs 6 MP.

3. `Basic Charm` **(`charm`)**:
   - Enhances astral focus, granting **$+20\%$ Magic Attack (MAT)** for **$1 \dots 3$ turns** (`1 + (turns % 3)`).
   - Costs 8 MP.
4. `Duo-Loca Bashin n Slash` **(`duo`)**:
   - The signature dual-relic strike uniting the Shield of Lux and Sword of Tenebris.
   - **Adaptive Damage**: Intelligently evaluates whether the player's Magic Attack or Physical Attack is superior, or whichever enemy defense (DEF vs MDF) is lower, channeling into the foe's weakest resistance:
     - If enemy MDF < DEF or MAT > ATK: executes as **Magical Twilight Slash**.
     - Otherwise: executes as **Physical Radiant Bash**.
   - **Relic Harmony**: Simultaneously restores $+15$ Shield power and $+15$ Sword edge, while nudging moral sway toward absolute cosmic equilibrium (0).
   - Costs 12 MP.

185.4. 4.4. Hero Customization & Protagonist Lore

- While **Elijah Ro-enheart** and **Katrina Jaren** remain the canonical dual protagonists representing the Shield of Lux and Sword of Tenebris, the player can dynamically designate their own hero identity using the `name <chosen_name>` command.
- All narrative chronicle logs, character severity tags, and telemetry traces adapt cleanly to the bearer's active name.

Chapter 186. 5. The Metaphysical Law of Tempering & Dissipation

The interaction between the Shield of Lux and the Sword of Tenebris is governed by the ancient law established during the 7-Year Great War:

- **Lux as the Singular Tempering Agent:** Raw Tenebris is entropic and severing; left unchecked, it erodes both target and wielder. Lux is the only force capable of containing and tempering Tenebris, providing structural cohesion so that void strikes can be directed safely.
- **The Fragility of Radiance (Dissipation):** While Lux tempers Tenebris, it requires emotional and ethical stability. Any sudden surge of terror, malice, or panic causes Lux to **dissipate immediately**, collapsing protective barriers and leaving Tenebris unbridled.
- **Ludonarrative Impact:** In combat, executing dark commands with negative moral sway degrades Lux Barrio duration rolls, while maintaining Equilibrium (`0` sway) maximizes barrier resilience and tandem skill execution.

Chapter 187. 6. The Relic Embellishment System

Throughout the campaign, the Shield of Lux and Sword of Tenebris are actively embellished through quest outcomes, moral choices, and auxiliary relics:

1. **Eric's Test of Honesty (Map 028) $\to$ The Ring of Fire:**
    - Donating rent to Eric rewards the **Ring of Fire**, imbuing strikes and barriers with flame-weave properties, connecting directly to the LeTBS **Burning Tile Spread** tactical state.
2. **Monica's Offering (Maps 027/029) $\to$ The Book of Monsters:**
    - Sponsoring an offering to **Lyri, Goddess of Peace**, attunes the relics to arcane resonance and awards the **Book of Monsters**, unlocking advanced MDF-targeting formulas.
3. **John the Thief vs. St. Baron (Maps 030/031):**
    - Aiding John enhances critical severance and stealth penetration; upholding feudal property law reinforces kinetic poise and bastion authority.
4. **Armory Relics (Medusa's Sword & Heart Shield):**
    - Optional material infusions granting petrification stasis or passive HP vitality warding.

Chapter 188. 7. Relic Profiles & The Ten-Ending Campaign Matrix

The final profile of relic embellishments along the `[-100, +100]` Moral Sway continuum maps into the 3x3 matrix crowned by the 10th synthesis ending: * **Lux-Good (`[+50, +100]`): The Radiant Sanctuary** — Selfless protection without tyranny. * **Lux-Neutral (`[-50, +50]`): The Benevolent Stasis** — The Mi-ren Fallacy; golden crystal cocoon. * **Lux-Bad (`[-100, -50]`): The Calcified Tyrant** — Radiance weaponized into an inquisitorial police state. * **Tenebris-Good (`[+50, +100]`): Absolute Justice** — The Casatti Ideal; surgical severance of corruption. * **Tenebris-Neutral (`[-50, +50]`): The Cynical Outlaw** — Threat slain; realm abandoned to decay. * **Tenebris-Bad (`[-100, -50]`): The Abyssal Usurper** — The Cycle of Usuru; rules from obsidian ashes. * **Statera-Good (`[+50, +100]`): Harmonized Concord** — Both relics united in restorative justice. * **Statera-Neutral (`[-50, +50]`): Armed Deterrence** — Uneasy status quo; frontier rift unhealed. * **Statera-Bad (`[-100, -50]`): The Dual Despot** — Totalitarian martial hegemony. * **Synthesis (10th Route): The True Ending ("The Ugly Truth")** — Unlocked via Elijah, Katrina, and the Custom Bearer (`<chosen_name>`) alongside nocturnal Dreamscape trials, mending the 3,000-year planar tear.

Chapter 189. Chapter 34: Campaign Architecture, The King's Curse & Multi-Ending Specification

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/campaign_structure_and_endings.adoc

Chapter 190. Overview & Ludological Philosophy

This specification articulates the structural macro-architecture of the campaign in **Tenebris and Lux**, including the two-half campaign progression, the metaphysical etiology of "The King’s Curse," the midpoint narrative fork, player agency over lore discovery, and the complete five-route ending matrix. Built upon the premise of ludonarrative consent, the engine allows casual players to experience a coherent linear tactical campaign, while reserving the mythological truth for players who actively engage with nocturnal Dreamscape trials.

Chapter 191. 1. The Two-Half Campaign Structure

The overarching campaign is organized into two distinct dramatic and mechanical halves:

```
┌──────────────────────────────────────────────────────────────────────────────────────────────────────────┐
│                    ACT I: THE SACYRAN SUCCESSION CRISIS                                                  │
│   Setting: Dio Village, Whispering Woods, Capital Outposts                                               │
│   Antagonist Focus: King Jihad & Corrupt Royal Court                                                     │
│   Themes: Provincial neglect, family mysteries, state censorship                                         │
│   Climax: The Festival of Heroes & Siege of Sacyra Castle                                                │
├──────────────────────────────────────────────────────────────────────────────────────────────────────────┤
│                    MIDPOINT FORK: THE KING'S CURSE                                                       │
│   Defeat of King Jihad reveals possession by The Dark Lord's remnant                                     │
│   Structural branching based on nocturnal Dream Compass completion                                       │
├──────────────────────────────────────────────────────────────────────────────────────────────────────────┤
│                    ACT II: THE COSMIC RECKONING                                                          │
│   Setting: Sacyra Marches, Abyssal Vaults, The Dreamscape Core                                           │
│   Antagonist Focus: The Dark Lord (Usuru's Ancient Void Essence)                                         │
│   Themes: Severance vs. Cohesion, Atonement, Planar Reconciliation                                       │
│   Climax: Confrontation at the Cosmic Threshold & Ending Resolution                                      │
└──────────────────────────────────────────────────────────────────────────────────────────────────────────┘
```

191.1. 1.1. Act I: Stopping King Jihad (The Sovereign of Ambition)

Act I centers on terrestrial, socio-political conflict. Operating from Dio Village through the Whispering Woods and Capital marches, the party uncovers King Jihad’s treasonous suppression of border alerts. The act culminates during the **Festival of Heroes** at Sacyra Castle, where King Jihad is confronted and defeated.

191.2. 1.2. The Etiology of "The King’s Curse" & Royal Possession

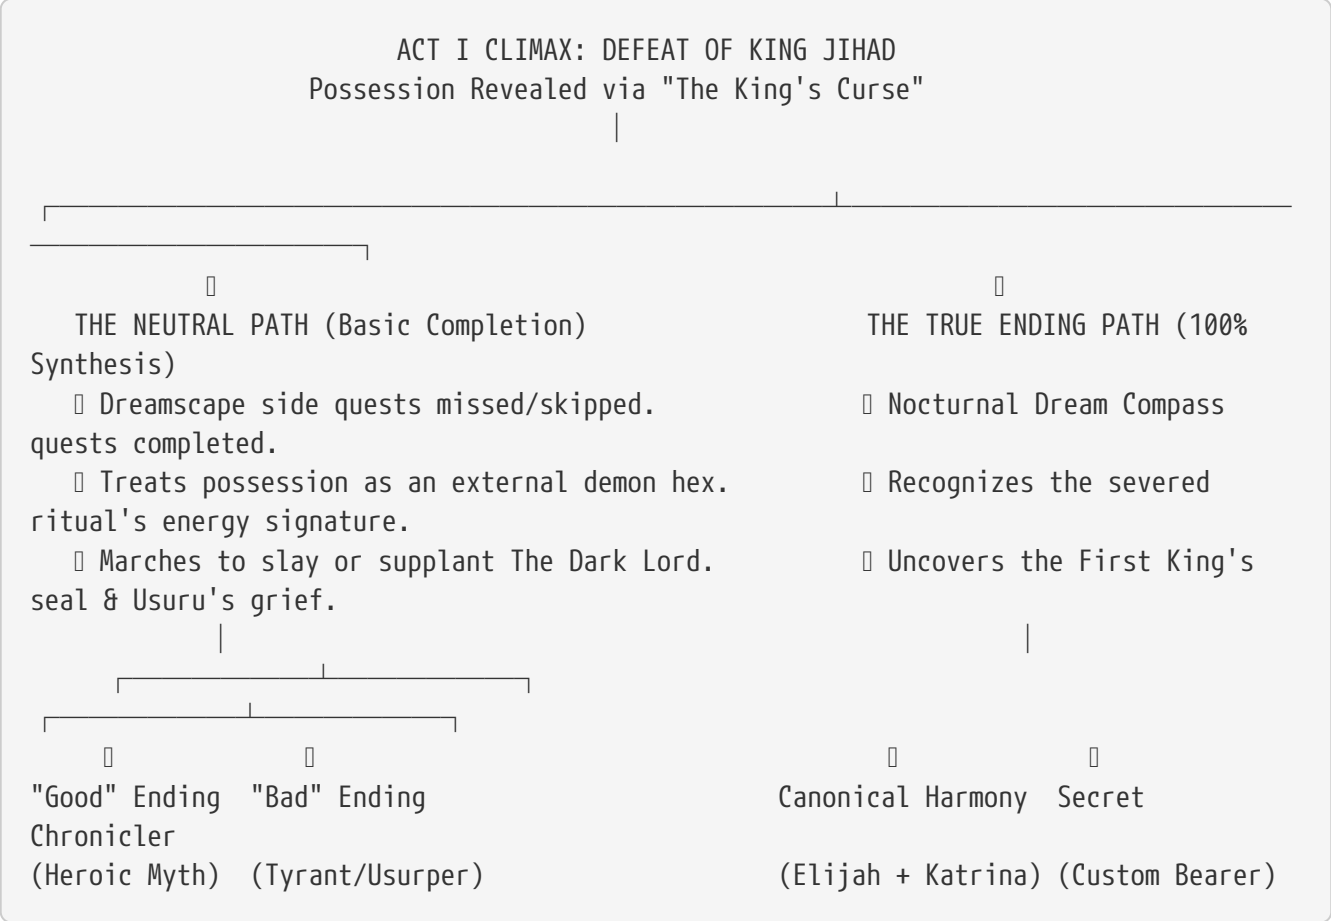

Court superstition long spoke of a hereditary madness afflicting monarchs of Sacyra. Forensic narrative architecture reveals that "The King’s Curse" is not a demonic hex, but an active **metaphysical hazard**:

- **The Open Planar Wound:** When eleven-year-old Usuru shattered the First King’s stasis projection ritual 3,000 years ago, a jagged planar rift tore open directly beneath the dias of the **High Throne**.

- **Psychic Backwash:** For three millennia, reigning monarchs sitting upon the High Throne were subjected to perpetual psychic shear and planar backwash from across the veil.
- **Jihad's Fatal Gambit:** Seeking to usurp the Dark Lord's void power during the thinned veil of the Festival of Heroes, King Jihad intentionally opened the conduit beneath his throne. Because the ethereal medium mirrors mortal intent, Jihad's megalomania inverted the flow, allowing a dormant psychic remnant of Usuru (**The Dark Lord**) to possess his body.

Chapter 192. 2. The Midpoint Fork: Neutral Path vs. True Ending Path

Defeating King Jihad reveals the void possession, forcing the narrative into its primary structural fork:

192.1. 2.1. Why Basic Completion Is the Neutral Ending

By design, any player who simply plays the main story linearly from start to finish will reach the end of the campaign. However, skipping the missable nocturnal **Dream Compass** trials produces the **Neutral Ending**:

- The player defeats King Jihad and destroys The Dark Lord’s physical manifestation.
- The kingdom is saved in the present, but the **First King remains permanently marooned** in The Dreamscape.
- Usuru’s ancient wound of betrayal is left unhealed, and the systemic neglect between the Capital and frontier provinces remains unchanged, ensuring the cycle will repeat.

192.2. 2.2. Player Consent to Know the Deeper Lore

Video games are distinguished by interactive agency. Forcing forty minutes of historical exposition down the player’s throat violates ludic pacing. By gating the full mythological truth behind

optional, nocturnal Dreamscape trials, the game honors the player's agency: players who desire a fast-paced tactical campaign can enjoy a satisfying heroic conclusion, while players who actively investigate the mystery are rewarded with the full mythological reality.

192.3. 2.3. Why the True Ending Is "The Ugly Truth"

The canonical True Ending is neither a simplistic fairy-tale triumph nor a dark nihilistic collapse. It is **"The Ugly Truth"** that dismantles the self-serving propaganda of both sides:

- It exposes that Prince Mi-ren's loving preservation created a catastrophic institutional lie that deceived a continent for six festivals.
- It acknowledges that Usuru's childhood outrage was entirely valid before his unguided fury curdled into monstrous destruction.
- It reveals that Sacyra's three millennia of golden peace were bought at the cost of deliberate neglect toward frontier provinces like Libira and Dio Village.

Chapter 193. 3. Relic Embellishment & The Ten-Ending Campaign Matrix

Throughout both acts, the player's choices, side quests, and stance preferences actively **embellish** the Shield of Lux and Sword of Tenebris along the `[-100, +100]` **Moral Sway** continuum.

193.1. 3.1. Telemetry Over Point Locks & The Bystander Corridor

Players do not aim for brittle, exact integers to unlock endings. Instead, `moral_sway` acts as continuous behavioral telemetry showing where the player's philosophy is steering the world:

- **The Bystander Corridor (`[-50, +50]`):** Represents **Net Moral Inertia**—a mutual cancellation trap where opposing moral vectors offset each other. Floating in this corridor produces status-quo stagnation or repeating cycles.
- **The Threshold of Conviction:** Escaping the bystander corridor requires sustained virtue (`[+50, +100]`) or despotic malice (`[-100, -50]`).
- **Equilibrium (`0`):** An active, razor-thin discipline where Lux and Tenebris temper each other without collapsing into calcification or entropic rot.

193.2. 3.2. The 3x3 Ending Matrix + The 10th True Ending

Combining the three elemental expressions (**Lux**, **Tenebris**, and **Statera** / Equilibrium) with the three moral bands (**Good** `[+50, +100]`, **Neutral** `[-50, +50]`, and **Bad** `[-100, -50]`) produces nine distinct campaign resolutions, crowned by a tenth synthesis ending:

Expression	Good (`[+50, +100]`)	Neutral (`[-50, +50]`)	Bad (`[-100, -50]`)
Lux *(Cohesion & Preservation)*	**1. The Radiant Sanctuary:** Selfless protection; the Shield of Lux shelters the realm and heals frontier wounds without imposing despotic rule.	**2. The Benevolent Stasis (The Mi-ren Fallacy):** Out of fear of conflict, the wielder seals Sacyra in an unchanging golden crystal cocoon where nothing harms—and nothing grows.	**3. The Calcified Tyrant:** Radiance weaponized into an unblinking inquisition that blinds dissenters and petrifies living will into stone.
Tenebris *(Severance & Rest)*	**4. Absolute Justice (The Casatti Ideal):** The Sword of Tenebris surgically severs corrupt noble monopolies and King Jihad's war machinery without civilian bloodshed.	**5. The Cynical Outlaw:** The immediate threat is slain for personal survival, but the wielder abandons Sacyra to its ongoing feudal decay.	**6. The Abyssal Usurper (Cycle of Usuru):** The wielder executes King Jihad, absorbs The Dark Lord's void essence, and rules from the obsidian ashes.

Expression	Good ([+50, +100])	Neutral ([-50, +50])	Bad ([-100, -50])
Statera *(Equilibrium & Harmony)*	**7. Harmonized Concord:** Both relics work in virtuous partnership, ushering in restorative justice, frontier outposts, and provincial renewal.	**8. Armed Deterrence:** A tense status quo where the war pauses, but the deep cultural rift with border provinces remains unhealed.	**9. The Dual Despot:** Barrier stasis and abyssal severance combine to enforce total, totalitarian martial hegemony.
Synthesis *(The 10th Route)*	**10. The True Ending ("The Ugly Truth"):** Unlocked only by experiencing Elijah's campaign, Katrina's campaign, and finally the Custom Bearer (<chosen_name>) while completing all nocturnal Dreamscape trials. Sacyra confronts its 3,000-year institutional guilt, releases the First King's trapped soul, reconciles Usuru's childhood grief, exposes King Jihad, and permanently mends the planar tear in the Room of Sages.		

193.3. 3.3. The Witness Protagonist, Keystone Route & Observer Effect

Reaching the True Ending ("The Ugly Truth") relies on three formal game design structures:

1. **The Witness Protagonist (Internal vs. External Focalization):**
   - **Elijah Ro-enheart** and **Lady Katrina Jaren** live inside the story (**Internal Focalization**). They are shaped by their personal trauma, social caste, and military or aristocratic backgrounds.
   - **The Custom Bearer (<chosen_name>)** serves as the **External Focalizer** (the Observer/Chronicler alongside Chrono in the Room of Sages), possessing the detachment required to perceive the full truth.
2. **The Keystone Route (Synthesis Scenario):**
   - Elijah uncovers the military conspiracy surrounding Commander Gareth and King Jihad.
   - Katrina uncovers noble and underworld exploitation alongside John the Thief and the Guild.
   - The Custom Bearer's campaign acts as the architectural keystone locking both partial perspectives together.
3. **The Quantum Observer Effect:**
   - Left to themselves, Sacyra's internal factions repeat the tragic 3,000-year cycle.
   - The outside Observer's conscious engagement collapses the tragic wavefunction into historical reconciliation.

193.4. 3.4. Chrono's Chronicle Ledger: NG+ Timeline Navigation

To ensure that exploring the full matrix never devolves into repetitive grinding:

- **Persistent Archival Memory:** Compendiums (**Book of Monsters**, **Book of Items**), unlocked

embellishments, and combat masteries persist across runs.

- **Timeline Branching:** Once a campaign route is cleared, **Chrono's Chronicle Ledger** unlocks in the Room of Sages, functioning as an interactive timeline tree. Completionists can jump directly to pivotal decision bookmarks (such as Eric's honesty test, the St. Baron infiltration, or the Act I climax) to explore all 9 matrix endings without replaying introductory chapters.
- **Diegetic Saves:** Saving is rooted diegetically at **Grandma Magolia's Hearth** and **Chrono's Room of Sages**.

Chapter 194. 4. Systemic Invariants & Engine Triggers

All ending routes and campaign forks are evaluated through deterministic engine invariants in Layer 1:

1. `player_state_t` **Integrity:** The moral sway value (`int16_t moral_sway`) is clamped strictly within `[-100, +100]` via `math_clamp_int`.
2. **Dream Compass Nocturnal Flag:** Entry into `LOC_THE_DREAMSCAPE` requires `hour >= 20 || hour <= 4` from the Layer 0 monotonic clock (`time_get_monotonic_ms`).
3. **Equilibrium State Check:** Unlocking Route 7 or Route 10 requires `abs(moral_sway) <= 15` and both `shield_power >= 80` and `sword_edge >= 80` during the final turn sequence.
4. **Observer Flags:** The 10th True Ending requires validation flags `flag_elijah_cleared`, `flag_katrina_cleared`, and `dreamscape_trials_mask == 0xFF`.

Chapter 195. Chapter 35: The Dreamscape & Temporal Architecture

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/dreamscape_and_temporal_architecture.adoc

Chapter 196. Overview & Engine Integration

This document specifies the technical, mechanical, and temporal architecture of **The Dreamscape** in **Tenebris and Lux**. Grounded in the recovered 2017–2018 RPG Maker MV demo baseline (Maps 006, 008, 011, 041, 042) and integrated into the ISO C11 engine architecture, it formalizes the planar opening sequence with Chrono the Sage, the terrestrial demo gating, the evolution of **Grandma's Watch** into **The Dream Compass**, and nocturnal event-driven temporal phasing.

Chapter 197. 1. Engine Architecture & Topological Verification

The Dreamscape is not an ephemeral cutscene or narrative metaphor; it is an active, fully integrated subsystem registered within the Layer 1 simulation engine:

197.1. 1.1. Explicit Province Registration

The plane is codified as an explicit topological enumeration in `include/sim/sim_types.h`:

```
typedef enum {
    LOC_THE_DREAMSCAPE    = 0,  /* Astral origin, ancestral archive, planar rift */
    LOC_DIO_VILLAGE       = 1,  /* Pastoral woodland hamlet; Grandma's hearth    */
    LOC_WHISPERING_WOODS  = 2,  /* Outlying frontier timberlands; beast paths    */
    LOC_SACYRA_MARCHES    = 3,  /* Fortified royal road to the capital citadel   */
    LOC_COUNT             = 4
} location_id_t;
```

197.2. 1.2. Tactical LeTBS Battlefields

The Dreamscape encompasses five dedicated grid environments extracted from the historical archives:

- **Map 006 (Chrono's Archive / The Hall of Sages):** Archetype stone pedestals, floating crystal columns, and ancestral book pedestals.
- **Map 008 (The Astral Crucible):** Tutorial grid where the bearer tests `Lux Barrio` and `Cuttatio Tenebris` against encroaching void scouts.
- **Map 011 (The Shifting Leyline Bridges):** Dynamic tactical grid featuring floating platforms and crystal floor switches that alter terrain heights.
- **Maps 041 & 042 (The Deep Astral Depths):** High-level nocturnally phased battlefields featuring astral leyline conduits that replenish MP while inflicting planar shear.

197.3. 1.3. Parameterized Combatants: The Dream Eaters

The Dreamscape is populated by **Dream Eaters**—parasitic entities dispatched across the thinning veil by The Dark Lord to devour ancestral records prior to the Festival of Heroes:

```
Threat Profile: Dream Eater
 ├──── Threat HP: 70
 ├──── Physical Defense (DEF): 11
 ├──── Arcane Defense (MDF): 8
 ├──── Flank Vigor: 70
```

```
 └──── Tactical AI: Rushes fragile casters; vulnerable to radiant deflection (Lux
Barrio).
```

197.4. 1.4. Bidirectional Topology

The spatial graph connects seamlessly between the metaphysical and physical planes: * Northward: `Awaken` $\to$ `LOC_DIO_VILLAGE` (Grandma Magolia's Hearth). * Southward: `Slumber Meditation` $\to$ `LOC_THE_DREAMSCAPE` (Requires Dream Compass nighttime flag).

Chapter 198. 2. Narrative Inception: The Astral Rite of Awakening

198.1. 2.1. Unformed Potential in the Astral Archive

The game opens not in a mundane tavern or military camp, but inside the timeless ether of **The Dreamscape**. Because this plane houses 3,000 years of ancestral memory—and the marooned soul of the First King—having **Chrono the Sage** guide the player through class archetype stones elevates character creation into a canonical ritual of spiritual attunement.

198.2. 2.2. Tri-Perspective Adaptability

Opening in unformed ether allows the simulation to cleanly accommodate any of the three playable vantage points—**Elijah Ro-enheart**, **Lady Katrina Jaren**, or a custom-named bearer (`<chosen_name>`)—before their identity crystallizes into physical form.

198.3. 2.3. The Ludonarrative Shock of "AWAKEN!"

After proving tactical mastery against Dream Eaters in the abstract void, Chrono banishes the player with an urgent command: *"AWAKEN!"*. The immediate cut to Grandma Magolia's crackling birch hearth in Dio Village shocks the player into physical reality, establishing a stark contrast between cosmic destiny and human vulnerability.

Chapter 199. 3. Terrestrial Gating & The Dream Compass

199.1. 3.1. Chapter 1 Demo Gating as a Terrestrial Anchor

Throughout Chapter 1 (the entire demo narrative), the player is strictly locked out of returning to The Dreamscape. This design rule prevents premature cosmic dilution, forcing the player to invest emotionally in the grounded human stakes of Dio Village: * Grandma Magolia's failing health and maternal wisdom. * Eric the Lumberjack's economic ruin from monster-infested logging trails. * John the Thief's moral crusade against the predatory St. Baron. * Monica the Mystic's grief beside the totem of fallen border soldiers.

199.2. 3.2. From Grandma's Watch to The Dream Compass

In the opening sequence, the player retrieves **Grandma's Watch** from the upstairs chest in Dio Village (Map 020). Mechanically, this initializes the Layer 0 `time_utils` 24-hour monotonic clock:

```
Layer 0 Monotonic Clock Subsystem
 ├──── Seconds / Minutes
 ├──── Hours (00:00 to 23:59)
 ├──── Weekdays (1: Sol, 2: Luna, 3: Ignis, 4: Aqua, 5: Terra, 6: Ventus, 7: Aether)
 ├──── Weeks / Months
 └──── Calendar Countdown to The Festival of Heroes
```

Upon concluding the Chapter 1 demo introduction, Grandma's Watch undergoes its first metaphysical transmutation, evolving into **The Dream Compass**.

199.3. 3.3. Nocturnal Synchronization & Scarcity

The Dream Compass acts as a dimensional resonant tuning fork with strict activation criteria: * **Nighttime Window Only:** The Dream Compass functions exclusively during nocturnal hours (`20:00 ⇐ hour || hour ⇐ 04:00`). During daylight hours, the compass needle spins aimlessly. * **Event-Driven Astral Windows:** Nocturnal side quests and main story trials in The Dreamscape manifest only during specific astrological alignments and calendar milestones. * **Scarcity and Sacred Weight:** By restricting access to nocturnal windows, The Dreamscape is prevented from becoming a trivial grinding hub, preserving its sacred mystery and directly linking quest availability to the monotonic clock's relentless countdown toward the Festival of Heroes.

Chapter 200. Chapter 36: World Topography, Provinces & Battlefield Terrain

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/world_topography.adoc

Chapter 201. Overview

This document specifies the authentic spatial geography, province layouts, environmental encounters, and tactical grid battlefields governing the **Kingdom of Sacyra** (pronounced **"saw-kee-ruh"**, `/s□□□ki□r□/`) and **The Dreamscape**, grounded in the recovered 2017–2018 demo baseline. While **The Dark Lord** looms as the overarching existential threat in the background ("A Plot"), the narrative begins within the ethereal trials of **The Dreamscape** before awakening into the pastoral hamlet of **Dio Village**. Players may guide the canonical champions (**Elijah Ro-enheart** and **Katrina Jaren**) or customize their chosen bearer's designation.

Chapter 202. 1. Spatial Structure: The Realm Topology

The campaign begins in the trial realm of slumber and transitions into the physical topology of Sacyra:

202.1. 1. The Dreamscape (LOC_THE_DREAMSCAPE)

- **Role**: The ethereal realm of ancient trials guided by Chrono where the illusion of the dream shatters.
- **Environment**: Floating crystal archways, shifting astral mist, and mechanism trial chambers.
- **Significance**: The hero awakens here to learn the fundamentals of combat and relic resonance. Dream Eaters gather under the distant influence of **The Dark Lord**.
- **Encounter**: **Dream Eater** (70 Threat HP, 11 DEF, 8 MDF, 70 Flank Vigor).
- **Grid Battlefield**: Astral tiles, floating platforms, and ethereal leylines granting MP regeneration.
- **Connections**: North / Awaken $\to$ Dio Village.

202.2. 2. Dio Village (LOC_DIO_VILLAGE)

- **Role**: Pastoral ancestral hamlet in Sacyra; the true awakening point of the physical journey.
- **Environment**: Cozy stone cottages with thatched roofs, Grandma Magolia’s welcoming hearth, Eric the lumberjack’s timber yard, and the local general trading post.

- **Significance**: Here the hero recovers Grandma's Watch and the **Compass of Morality**, encountering village folk before venturing into the perilous wilds.
- **Threat Vigor**: 0 (Sanctified village sanctuary; recovery, dialogue, and lore exchange).
- **Connections**: South $\to$ The Dreamscape (slumber meditation); North $\to$ Whispering Woods.

202.3. 3. Whispering Woods (`LOC_WHISPERING_WOODS`)

- **Role**: Dense ancient forest enveloping Dio Village, separating the hamlet from the kingdom's interior.
- **Environment**: Towering ironwood boughs, rustling autumn canopy, and hidden woodland trails.
- **Encounter**: **Umbral Wolf** (85 Threat HP, 14 DEF, 10 MDF, 60 Flank Vigor).
- **Tactical Grid Elements**:
  - Forest thickets providing $+20\%$ evasion against ranged physical assault.
  - Tree root chokepoints where **Lux Barrio** shields flanking allies from pack ambushes.
- **Connections**: South $\to$ Dio Village; East / North $\to$ The Sacyran Marches.

202.4. 4. The Sacyran Marches (`LOC_SACYRA_MARCHES`)

- **Role**: The windswept frontier marches leading toward the Royal Court of King Jihad and the Capital.
- **Environment**: Craggy hills, fortified signal towers, and military encampments.
- **Encounter**: **Shadow Scout & Vanguard Patrol** (110 Threat HP, 18 DEF, 14 MDF, 80 Flank Vigor).
- **Tactical Grid Elements**:
  - Trenches, palisades, and elevated ramparts where **Cuttatio Tenebris** cleaves through enemy formations.
  - Broad fields allowing full maneuverability of twin-relic equilibrium strikes.
- **Connections**: West / South $\to$ Whispering Woods.

Chapter 203. 2. The Overarching Menace: The Dark Lord

In the authentic 2017–2018 canonical script, the ultimate antagonist is designated strictly as **The Dark Lord**: * He is never named "Malakor" or burdened with synthetic titles in canon. * The Dark Lord represents the primordial threat looming in the distance ("The A Plot"), while regional intrigues—such as King Jihad’s political maneuvers, Noble House power struggles, and the Adventurers' Guild missions—unfold on the active stage. * The wielder’s mastery of the Shield of Lux and Sword of Tenebris prepares them for this looming confrontation without rushing directly into the final battle.

Chapter 204. Chapter 37: Continuous Invariant Testing Philosophy

Source File: `/home/professorseanex/Tenebris and Lux/docs/game_design/game_testing.adoc`

Chapter 205. Abstract

In classical software engineering, testing focuses primarily on stateless input/output validation, API schemas, and unit function assertions (`assert(f(x) == y)`). In game development, testing requires an entirely distinct paradigm: verifying continuous state continuity, economy balance, softlock immunity, deterministic replay parity, and strict 60 FPS frame-budget headroom. This document outlines the testing philosophy governing **Tenebris and Lux**.

Chapter 206. 1. The Fundamental Divergence

Dimension	Traditional Software Testing	Game Development Testing
State Nature	Ephemeral, localized, often stateless	Continuous, cumulative, multi-turn state machine
Failure Modes	Null pointer exceptions, HTTP 500s, syntax errors	Softlocks, economy collapse, degenerate gameplay loops, visual desync
Correctness Metric	Does output match expected schema?	Does the game feel right? Is the state bounded, balanced, and unexploitable?
Input Cadence	Controlled, structured API payloads	Unbounded, chaotic human keystrokes, rapid button mash, simultaneous events
Time Budget	Milliseconds/seconds per request	16.6 milliseconds total frame budget (60 FPS) with microseconds for simulation

Chapter 207. 2. Core Pillars of Game Development Testing

207.1. Pillar 1: Dynamic State Invariants & Bounded Continuity

In a game like **Tenebris and Lux**, state variables (`shield_power`, `sword_edge`, `moral_sway`, `threat_hp`) are constantly mutated across hundreds of player turns. A single off-by-one error or uncapped addition will cause state drift, resulting in overflow, negative health zombies, or invulnerability exploits.

- **Invariant Axioms**:
  - `0 ⇐ state.shield_power ⇐ 100` must hold after every single action turn.
  - `0 ⇐ state.sword_edge ⇐ 100` must hold even when spamming strikes at zero energy.
  - `-100 ⇐ state.moral_sway ⇐ +100` must never overflow into undefined integers.
- **Diagnostic Tripwires**: The game engine provides `game_audit_state()`, a self-healing diagnostic routine that asserts all invariants simultaneously and outputs a detailed diagnostic manifest without crashing the game process.

207.2. Pillar 2: Deterministic Replay ("Golden Master Replay")

Games are emergent systems. If two players—or an automated CI runner—replay the exact same sequence of commands from the same seed, the end state must be **100% bitwise identical**:

```
// Golden Master Replay Assertion
TEST_ASSERT(run1.shield_power == run2.shield_power, "Deterministic shield");
TEST_ASSERT(run1.sword_edge   == run2.sword_edge,   "Deterministic sword");
TEST_ASSERT(run1.moral_sway   == run2.moral_sway,   "Deterministic sway");
TEST_ASSERT(run1.threat_hp    == run2.threat_hp,    "Deterministic threat");
```

This ensures that gameplay balance, combat resolution, and narrative branching do not drift across compiler optimizations, operating systems, or refactored engine code.

207.3. Pillar 3: Softlock Immunity & Degenerate Play Detection

A **softlock** occurs when a player is technically still playing, but has no valid action forward: - Running out of relic energy during an un-fleeable battle. - Getting trapped behind a one-way gate with no exit command. - Inputting malformed or rapid chaotic strings that cause the parser to lock up.

Our automated stress suite executes **1,000 rapid chaotic commands** (combining invalid strings, rapid stance transitions, and empty tokens), verifying that the game engine rejects nonsense safely, maintains continuous memory integrity, and never enters a deadlocked state.

207.4. Pillar 4: Economy & Combat Balance Invariance

Game testing must verify that no single player action is universally dominant (the "dominant strategy" flaw). If a player can simply spam `ward` forever without consequence, or if `strike` renders all other actions useless, the game design collapses: - Warding increases shield power and moral virtue, but deals limited stagger damage. - Striking inflicts decisive severance damage, but consumes finite sword edge. - Balancing recovers both relics and parries attacks, but requires timing and resets extreme moral sway.

207.5. Pillar 5: Frame-Budget Latency Headroom

In standard software, a backend database query taking 50 ms is acceptable. In game development, a game running at 60 FPS has **only 16.6 milliseconds** to: 1. Poll hardware events and window queues. 2. Execute game simulation logic. 3. Compute spatial audio and particle animations. 4. Render the scene graph to the backbuffer and blit to the display.

Simulation logic must therefore execute in **microseconds**. In our automated benchmark (`test_gameplay_scenarios`), 10,000 action turns execute in **160 ms** (**16.02 μs per turn**), consuming less than **0.1%** of a 60 FPS frame.

Chapter 208. Chapter 38: Game Design Curation & Triaging Matrix

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/game_design_curation.adoc

Chapter 209. Overview

This document formalizes the architectural triage of the 2017–2018 RPG Maker MV demo datasets. It separates generic RPG Maker Runtime Package (RTP) boilerplate from temporary testing experiments and identifies the authentic, fleshed-out canonical systems to be reconstructed in the native C11 game engine.

Chapter 210. 1. Triage Categorization Taxonomy

To prevent technical debt from legacy game engine defaults from contaminating our custom C11 engine, all extracted game data is triaged into three strict analytical categories:

Category	Definition	Architectural Policy
Tier 1: RTP Defaults & Boilerplate	Stock RPG Maker MV assets, generic items, placeholder sounds, and default formulas.	**Discard / Re-architect**. Never port verbatim into C11.
Tier 2: Prototype & Testing Sketches	Ad-hoc test maps, sandbox battlers, debug switches, and experimental scripts.	**Review & Evolve**. Extract mechanical concepts but redesign within clean strata.
Tier 3: Fleshed-Out Canonical Pillars	Core story scripts, dual-protagonist dialogue dynamics, moral dilemma quests, LeTBS grid tactics, and key relics.	**Preserve & Reconstruct**. Faithfully implement as axiomatic invariants in C11.

Chapter 211. 2. Tier 1: RPG Maker RTP Defaults (To Discard or Re-Architect)

Element	Historical Manifest	Why It Must Be Discarded / Replaced
Basic Consumables	Potion (50G), Magic Water (100G), Dispel Herb (20G), Stimulant (50G)	Generic RTP recovery items. In C11, consumables must tie directly to Sacyran herbalism, relic alchemy, and stance restoration.
Generic Armaments	Standard Sword (100G), Axe (100G), Cane (100G), Bow (100G), Shield (100G), Cloth (100G)	Default placeholder inventory without distinct tactical affinities or stance interactions.
Stock Sound Effects	`Attack2`, `Buzzer1`, `Damage4`, `Collapse1-4`, `Shop1`	Generic MV sound library. C11 audio subsystem will support custom soundscapes.
Placeholder Bestiary	Bat (`HP: 80`), Slime (`HP: 250`), Rabbit (`HP: 55`), Orc (`HP: 300`)	Standard MV demo monsters used for basic stat checks. Replaced by Sacyran fauna and Abyssal void aberrations.
Default Title Theme	`Theme6` / `CrossedSwords` title screen graphic	Default MV asset packaging. Replaced by bespoke Sacyran coat of arms and twin relic artwork.

Chapter 212. 3. Tier 2: Prototype & Testing Sketches (Concepts to Evolve)

Element	Historical Location	Tactical / Design Value to Evolve
Sandbox Test Maps	`Map006 Test Areas`, `Map043 Event Map`	Used to test event triggers, movement paths, and sprite coordinates. Demonstrates intent for environmental puzzle mechanics.
Debug Enemies & Troops	`Enemy 14 Test`, `Troop 10 Test`, `Enemy 32 Invincible Neutral`	Proved that neutral, invincible obstacles and destructible props function well on the tactical grid.
Explosive Chickens	Fire Chicken (`Actor 13`), Bomb (`Skill 136`)	Humorous prototype mechanic demonstrating combat summons and dynamic decoy units on the tactical field.
Plugin Experiments	`LeTBS/firestorm.json`, `LeTBS/test.json`, `QMaps/`	Initial experiments with Lecode's Tactical Battle System and Quasi Movement plugins. Proves grid-based TRPG was the true target genre.

Chapter 213. 4. Tier 3: Fleshed-Out Canonical Pillars (Core Invariants to Reconstruct)

The following systems represent the authentic creative vision of **Tenebris and Lux** and must be preserved and reconstructed in C11:

213.1. 1. Dual-Protagonist Dynamics & Narrative Branching

- **Elijah Ro-enheart (`\n[1]`)**: Son of vanished Commander Gareth Ro-enheart. Dutiful, protective vanguard bearer of the Shield of Lux. Dialogue reflects reverence for duty, family loyalty, and hesitation to violate laws.
- **Lady Katrina Jaren (`\n[2]`)**: Daughter of noble House Jaren escaping courtly politics to join the Adventurers' Guild. Agile outrider wielder of the Sword of Tenebris. Dialogue features sardonic wit, impatience with provincial stagnation, and fierce defense of the vulnerable.

213.2. 2. The Moral Sway Continuum Engine

- **Ethical Mechanics**: Discrete moral choices tracking across `Moral (Good)` and `Moral (Evil)` within the invariant continuum `[-100, +100]`.
- **The Test of Honesty (Eric's House, Map 28)**:
  - Stealing Eric's life savings (10G) rewards quick cash but plunges morality.
  - Donating 500G to cover Eric's rent saves a desperate worker and earns the **Ring of Fire**.
- **The Struggle of Dio Village (John the Thief vs. St. Baron, Map 30/31)**:
  - Feudal exploitation vs. outrider rebellion, forcing the heroes to choose between legal compliance and moral justice.

213.3. 3. Lecode Tactical Battle System (LeTBS) Mechanics

- **Grid Movement & Range Geometries**:
  - Movement Points (4 MP baseline), modified by skills like **Light Steps** (+1) and **Heavy Hit** (-3).
  - Scope shapes: `circle(r)`, `circle(max, min)` (annular), `line(n)`, `square(r)`.
- **Terrain Hazards & Obstacles**:
  - **Ice Wall** and **Ice Prison** creating physical destructible barriers (`HP: 20`).
  - **Volcano Ground** and **Burning Tile Spread** (`spread: 100% circle(1)`).
- **Turn Timeline Manipulation**:
  - **Accelerate**, **Decelerate**, and **Emergency Turn** altering the turn queue.

213.4. 4. The Monotonic 24-Hour Time Engine

- **Grandma's Watch**: Family heirloom activating real-time calendar and clock tracking (Seconds, Minutes, Hours, Days, Weeks, Months, Years), corresponding directly to Layer 0 `time_utils`.

Volume IV: The 2017–2018 Demo Baseline & Historical Archive

Verified historical baseline extracted from the original RPG Maker MV datasets, detailing the complete scenario script, LeTBS mechanics, grimoire, and systems.

Chapter 214. Chapter 39: Historical Baseline Overview & Provenance

Source File: `/home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/README.adoc`

Chapter 215. Overview

This documentation module establishes the comprehensive, verified baseline of the original **2017–2018 RPG Maker MV demo** for **Tenebris and Lux** ("Darkness and Light"). Extracted directly from the archival data directories (`Old Game Data` and `Old_Game_Data_2/data`), this repository anchors our modern C11 reimplementation to its authentic gameplay mechanics, narrative scripts, character arcs, and tactical systems.

Chapter 216. 1. Historical Provenance & Dataset Strata

Between 2014 and 2018, **Tenebris and Lux** was conceived as an ambitious Tactical Strategy RPG (TRPG) combining top-down exploration, puzzle mechanics, and grid-based turn strategy powered by Lecode's Tactical Battle System (LeTBS).

The historical game data is preserved across two distinct repository strata:

Dataset	Directory Anchor	Architectural Role & Characteristics
Folder 1: Primary Narrative & Morality Build	`Old Game Data/`	Contains 37 maps, complete dual-protagonist dialogue branches, the morality engine (Compass of Morality, moral sway continuum, honesty tests), and the core Dio Village quest line (`versionId: 40730002`).
Folder 2: Advanced LeTBS Tactical Build	`Old_Game_Data_2/data/`	Contains 43 maps, extended party members (Sebastien the Thief, Angela the Mage, Lucius the Priest), advanced LeTBS action parameters, full tactical state routines, and character generator assets (`versionId: 2078310`).

Chapter 217. 2. Documentation Taxonomy

This baseline compendium is partitioned into specialized manuals covering every facet of the historical demo:

Document	Focus & Coverage
scenario_and_walkthrough.adoc	Chronological narrative walkthrough, scene-by-scene script, branching dialogue for Elijah vs Katrina, Map 001 through Map 043, puzzle mechanics, and transfer topologies.
cast_and_characters.adoc	Comprehensive character dossiers for protagonists (Elijah & Katrina), extended party members (Sebastien, Angela, Lucius), village elders (Grandma Magolia, Monica, Eric), court figures (King Jihad, Roté), and summons.
combat_and_letbs_mechanics.adoc	Grid-based battle architecture, movement point costs, directional facing, line-of-sight scopes, AOE shapes (`circle`, `line`, `square`), LeTBS action sequences, and tactical states.
classes_and_growth.adoc	7 combat classes (Warrior/Knight, Mage, Priest, Summoner, Hero, Thief, Guard) plus Summons; complete stat growth matrices (Lv 1–99) and level-by-level skill learnings.
grimoire_and_skills.adoc	Complete grimoire of all 75+ historical spells, martial techniques, movement abilities, MP/TP costs, damage formulas, and LeTBS sequence tags.
bestiary_and_troops.adoc	Bestiary of all 22+ enemies and neutral entities (Dream Eaters, Magos, Bandits, Chests, Ice Blocks), stat parameters, AI behavior routines, and troop encounter formations.
armory_and_inventory.adoc	Weapons (Medusa's Sword), Armors (Heart Shield, Ring of Fire), Items (Potions, Magic Water), and Key Lore Relics (Grandma's Watch, Compass of Morality, Book of Monsters, Book of Items).
states_and_statuses.adoc	30 tactical states, LeTBS grid modifiers (Intimidating Aura, Heavy Strike, Light Steps, Burning, Tile Regen), and status ailments.
systems_switches_variables.adoc	Global game engines: Monotonic Time System / Day-Night Cycle, Morality System, and an exhaustive directory of all 100+ switches and variables.
game_design_curation.adoc	Triaging matrix: RTP defaults (discard/re-architect) vs. prototype sketches (review/evolve) vs. authentic canonical pillars (reconstruct in C11).
dataset_evolution_delta.adoc	Side-by-side comparative delta analysis between `Old Game Data` and `Old_Game_Data_2/data`, detailing version discrepancies and modern C11 reconciliation strategies.

Chapter 218. 3. Architectural Extraction Script

The entire documentation suite is fully reproducible from source data using our automated Python extraction pipeline:

```
python3 docs/tools/extract_demo_data.py
```

This ensures absolute fidelity to the original 2017–2018 records as we rebuild the game in native C11.

Chapter 219. Chapter 40: 7-Act Narrative Script & Dialogue Walkthrough

Source File: `/home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/scenario_and_walkthrough.adoc`

Chapter 220. Overview

This document preserves the complete chronological story script, scene transitions, puzzle structures, and verbatim dialogues of the 2017–2018 demo. It documents both the shared story progression and the distinct dual-protagonist narrative branches between **Elijah Ro-enheart** (`\n[1]`) and **Lady Katrina Jaren** (`\n[2]`).

Chapter 221. Act I: The Castle Prophecy & Dark Ambition

221.1. Start-Up / Walk of Fear

Roté's urgent arrival as dark omens rise.

Associated Maps: Map 002

221.1.1. Map 002: Start-Up

- **Speaker/Source: `The Walk of Fear `**

```
\n<Roté>It has been years since I was needed here.<br>The king...<br>The king must
know of these strange events!
```

221.2. The Castle (Outside)

Roté observes the rising island and eerie storm prior to the Festival.

Associated Maps: Map 003, Map 008

221.2.1. Map 003: The Castle (Outside)

- **Speaker/Source:** `Roté Observation`

```
\n<Roté>The storm... The rising island...
All of these events...
All before the Festival of Heroes.
The king will know how to stop this, he must know...
```

221.2.2. Map 008: Battle Tutorial

- **Speaker/Source:** `Dream Eaters`

```
\n<[Elijah]>I have to do. If this..thing
beats us....no. I can do this!
\n<[Elijah]>That old guy might be dead
because of that...thing, but
that doesn't matter. I can't die here, not
like this, not by that thing!
The illusion of the dream breaks. Dream Eaters
reveal themselves!
\n<[Elijah]>Wh..wha...wha...what are those
```

```
things!
\n<[Katrina]>WHAT EVEN ARE YOU!
\n<Dream Eater>Foolish mortal! We are the
Dream Eaters, servants of our Dark Lord.
We will comsume, we will devour, we will
feast! Our lord commands us too!
```

- **Speaker/Source:** `Dream Eaters`

```
\n<Dream Eater>Foolish mortal. We will
return. Our lord demands it! We will
return!
```

- **Speaker/Source:** `Tutorial Complete`

```
\n<???>pant pant pant
I wasn't...I wasn't ready. We cannot talk
here. You must defeat them...the
The man passes out.
\n<[Elijah]>...
\n<[Katrina]>...
```

- **Speaker/Source:** `Tutorial Complete`

```
\n<???>[Elijah] our time here has come to an
end. If you have any business you need to
take care, take care of it. Talk to me when
you are ready.
\n<???>[Katrina] our time here has come to an
end. If you have any business you need to
take care, take care of it. Talk to me when
you are ready.
```

- **Speaker/Source:** `Tutorial Complete`

```
Are you ready to leave?
\n<???>It is time. You must be brave, you
must be willing, and most of all...you
must trust your own path. Until we meet
again. AWAKEN!
```

- **Speaker/Source:** `Start Final Tutorial`

```
\n<[Elijah]>Wh..wha...what...no... I just
met him... mister....minster!
```

```
\n<[Katrina]>Wh..wha...what...come on old man!
You haven't told me anything!
```

221.3. The Castle (Inside) - The Throne Room

Roté warns King Jihad; King Jihad's treasonous conspiracy against the Dark Lord.

Associated Maps: Map 004, Map 009

221.3.1. Map 004: The Castle (Inside)

- **Speaker/Source:** `The King`

```
\n<D.Jihad>The fools...that power...that wicked power!
Soon I will rule over this land, and not even the Dark Lord
will have power over me!
```

- **Speaker/Source:** `The Meeting`

```
\n<Roté>King Jihad, I am here to inform you today...
It's here...
The darkness... it has returned
\n<Jihad>...Thank you Roté, what would I do without your
careful watch...
\n<Jihad>Gather up the guard! We need to prepare!
Darkness will soon return to this land. And don't tell the people of
this discovery...
\n<Roté>Y...Y...Yes my king...
\n<Jihad>You all are dismissed.
Yes my king.
```

221.3.2. Map 009: Secret Map

- **Speaker/Source:** `Treasure Glow`

```
All crystals in position
The crystal begins to disappear...
All crystals are not in postition
All crystals are not in postition
All crystals are not in postition
All crystals are not in postition
```

- **Speaker/Source:** `Treasure Glow`

```
A shield with a heart-crest was in the chest
```

```
along with 100\G
```

- **Speaker/Source:** `Treasure Glow`

```
The chest is empty
```

- **Speaker/Source:** `Moving Crystal Blue`

```
The Blue Crystal is in place
```

- **Speaker/Source:** `Restart Switch`

```
Restart puzzle?
```

- **Speaker/Source:** `Moving Crystal Yellow`

```
The Yellow crystal is in place
```

```
\n<Roté>It has been years since I was needed here.<br>The king...<br>The king must
know of these strange events!
```

222.2. Character Select & The Room of Sages

Meeting Chrono; selecting archetype crystals; reviewing ancient archives.

Associated Maps: Map 006, Map 011

222.2.1. Map 006: Character Select

- **Speaker/Source:** `Chrono`

```
\n<???>So...a new hero is to be chosen.
I have seen this when the sages spoke of the darkness returning.
But...who did the sage's say again?
\n<???>A young man. The sages spoke
of a young man that would help us. Now, if
I just look in the archives...
\n<???>His name, his name, what was his
name?
\n<???>Ah yes! His name was [Elijah]. The
sages said that they will decide their
fate, what will they become I wonder...
Click on the objects in the room to select a class.
When you pick a class, talk to the old man once again.
\n<???>A young woman. The sages
spoke of a young woman that would help us.
Now, if I just look in the archives...
\n<???>Her name, her name, what was her
name?
\n<???>Ah yes! Her name was [Katrina]. The
sages said that they will decide their
```

```
fate, what will they become I wonder...
Click on the objects in the room to select a class.
When you pick a class, talk to the old man once again.
```

- **Speaker/Source:** Chrono

```
\n<???>[Elijah], did you pick your fate?
\n<???>[Katrina], did you pick your fate?
```

- **Speaker/Source:** Chrono

```
\n<???>That is perfect! Now, we need to
prepare...[Elijah], follow me.
\n<???>That is perfect! Now, we need to
prepare...[Katrina], follow me.
```

- **Speaker/Source:** Warrior□s Stone

```
The crystal began to glow
The Warrior. Tactical and strong, the warrior is known
to lead troops into victory. With various command
formation and tactics, they can turn the tide of a
battle!
Do you wish to be a Warrior?
Speak to the old man once more.
Take your time. This is an important choice.
```

- **Speaker/Source:** Warrior□s Stone

```
The crystal stopped glowing.
```

- **Speaker/Source:** Mage□s Stone

```
The crystal began to glow
The Mage. Wise and creative, they rely on the powers
of the magical arts to handle problems and to aid
others Wielding a staff and wearing cloaks and robes,
they assist in battle with magic of various elements
and keep the battle flowing.
Do you wish to be a Mage?
Speak to the old man once more.
Take your time. This is an important choice.
```

Chapter 224. Act IV: Awakening in Dio Village & Family Roots

224.1. Grandma's House Upstairs

Awakening from the dream; opening Grandma's chest for Grandma's Watch & Compass of Morality.

Associated Maps: Map 020, Map 004

224.1.1. Map 020: Grandma's House Upstairs

- **Speaker/Source:** Grandma□s Chest

```
\n<[Elijah]>I shouldn't go in this chest. I
need to talk to Grandma first.
She's very particular about her things.
\n<[Katrina]>I shouldn't go in this chest. I
need to talk to Grandma first.
Batty old woman seems to remind that chest.
```

- **Speaker/Source:** Grandma□s Chest

```
An old watch was in the chest.
\n<[Elijah]>Oh.. it's an old watch.
What's so special about it anyway?
\n<[Katrina]>She made me....grab...an
OLD WATCH! I thought it was
something important like her will!
```

- **Speaker/Source:** Grandma□s Chest

```
There is still something inside of the chest
OBTAINED THE COMPASS OF MORALITY
```

- **Speaker/Source:** Grandma□s Chest

```
It's all empty now.
```

- **Speaker/Source:** Wierd Dream

```
\n<[Elijah]>That dream....what did it mean...
It could just be my imagination but...It
felt like...something more. A hero
```

```
... Me...?
\n<[Katrina]>WHAT! WHAT THE...ME. Man, my mind
needs to get out of lala land and settle
into reality. I can't be a hero,
I won't be a hero...
```

224.1.2. Map 004: The Castle (Inside)

- **Speaker/Source:** `The King`

```
\n<D.Jihad>The fools...that power...that wicked power!
Soon I will rule over this land, and not even the Dark Lord
will have power over me!
```

- **Speaker/Source:** `The Meeting`

```
\n<Roté>King Jihad, I am here to inform you today...
It's here...
The darkness... it has returned
\n<Jihad>...Thank you Roté, what would I do without your
careful watch...
\n<Jihad>Gather up the guard! We need to prepare!
Darkness will soon return to this land. And don't tell the people of
this discovery...
\n<Roté>Y...Y...Yes my king...
\n<Jihad>You all are dismissed.
Yes my king.
```

224.2. Grandma's House Downstairs

Conversation with Grandma Magolia; memories of Commander Gareth Ro-enheart; errand to Monica.

Associated Maps: Map 021, Map 007

224.2.1. Map 021: Grandma's House Downstairs

- **Speaker/Source:** `Grandma`

```
\n<Grandma>Hello sweetie, could you please
go upstairs and search in the chest
and grab what's inside? It's something that
has great signifinance.
\n<[Katrina]>The will. I love you gran,
but a girl gotta get out of this dead-end
town.
```

```
\n<[Elijah]>Maybe is is something
about dad! I haven't seen him since my
10th birthday.
\n<[Elijah]>Sure thing. This might
be my chance to get answers!
\n<[Katrina]>Why not! Crazy old woman...
That will is mine!
\n<[Elijah]>Well...uhh...but...
But if it is about him...
\n<[Katrina]>Gran, why can't you do it?
Why doesn't she do it?
If she wants it she can get it.
```

- **Speaker/Source:** Grandma

```
It's been a while since we've talk.
What do you want to talk about?
\n<Grandma>Oh me and Monica go way back.
She was such a wild child, always getting
into mischief. You'll love her.
\n<Grandma>This town used to be full of
life. sighs The kingdom doesn't
pay much attention to this place anymore...
\c[5]Not avalible in the demo
\n<Grandma>Have you been upstairs yet?
The chest should still be there.
```

- **Speaker/Source:** Grandma

```
\n<Grandma>Thank you honey. This watch has
been in the family for a long time. Oh,
how it brings back memories of better days.
\n<Grandma>I think you should keep it. It's
my gift to you. And here's a bit of money.
I know that you'll need it more than little
ol' me.
```

- **Speaker/Source:** Grandma

```
\n<Grandma>[Katrina] could you do me a favor?
Lately, the people have been stirred up
about people being attacked by monsters.
\n<Grandma>[Elijah] could you do me a favor?
Lately, the people have been stirred up
about people being attacked by monsters.
\n<Grandma>My friend, Monica,
would know what is causing these strange
```

```
rumors. Can you go to her house and see
what she has to say about all of this?
\n<[Elijah]>Sure thing. It will be nice to
finally leave the house. I might even
get to leave town!
\n<[Katrina]>Why not! I would love to~
I'm out of this poor slum of a town!
\n<[Elijah]>Well..are you sure you can't?
I don't even know her...
\n<[Katrina]>Gran, I'm not your errand girl!
 This is YOUR friend.
```

- **Speaker/Source:** Block

```
I should say something to Grandma before I go.

225.2. Monica's House & The Mystic's Brew

Meeting Monica; the fallen soldiers totem; offering for Goddess Lyri; errand for a Potion.

Associated Maps: Map 027, Map 029

225.2.1. Map 027: Monica's House

- **Speaker/Source:** `Monica`

```
\n<Monica>And who in the blaze are YOU!
```

```
\n<Monica>...
...
...
\n<Monica>So you are Magolia's grandson.
She made you sound more handsome that
you are.
\n<[Elijah]>HEY! That's not a nice thing
to say!
\n<Monica>Tis only a joke. Now why have
you came here? Do you have some milk?
\n<[Elijah]>Nn-...I'm here because my grandma
thinks that evil has returned.
\n<Monica>A wise woman she is. Lyri has
been whispering in me ear about the forces
of darkness. I'll help but first, get that
holigan from the city limits.
\n<Monica>Not only is he preventing folks
from leaving, he's also messing with me
business. Can you handle that?
\n<Monica>Good. I'll see you when you
return.
\n<Monica>I'll explain it once more.
\n<Monica>I'll help you if you get that
holigan from the city limits.
\n<Monica>Not only is he preventing folks
from leaving, he's also messing with me
business. Can you handle that?
\n<Monica>So you are Magolia's
granddaughter. She made you sound prettier
that you are.
\n<[Katrina]>LISTEN HER YOU OLD-!
\n<Monica>Tis only a joke. Now why have
you came here? Do you have some milk?
\n<[Katrina]>What is wrong with you... I'm
just here because my grandma is crazy.
She's babbling about evil forces and all
that nonsense.
\n<Monica>A wise woman she is. Lyri has
been whispering in me ear about the forces
of darkness. I'll help but first, get that
holigan from the city limits.
\n<Monica>Not only is he preventing folks
from leaving, he's also messing with me
business. Can you handle that?
\n<Monica>Good. I'll see you when you
return.
\n<Monica>I'll explain it once more.
\n<Monica>I'll help you if you get that
holigan from the city limits.
\n<Monica>Not only is he preventing folks
from leaving, he's also messing with me
```

```
business. Can you handle that?
```

- **Speaker/Source:** Monica

```
\n<Monica>You have to stop that kid! Our
village will be more devastated than
even with him blocking the road!
```

- **Speaker/Source:** Monica

```
\n<Monica>Good job! I think I have an idea.
Now that the people can, residences and
newcomers have arrived. I notice that a
shopkeeper has came into our town as well.
\n<Monica>I need you to go a buy a potion.
I will use this as a base for my offering
to Lyri. She'll be able to help us in this
dark hour.
Obtained the Book of Monsters
```

- **Speaker/Source:** Monica

```
\n<Monica>Oh yes. This is exactly what I
need for my offering.
\n<Monica>There is one more thing that I
need in order to make this brew suitable
for Lyri. Go out of the town to the west
path. A man has what I need. Get it please.
\n<Monica>If you want to get the potion,
you'll need to go to the lower parts of the
town.
```

- **Speaker/Source:** Monica

```
\n<Monica>Do you need something?
\n<Monica>Me? Why, I'm one of the original
mages for the King. The kingdom was not as
peaceful as is it now. But then, the
Dark Lord tried to take the kingdom.
\n<Monica>He was born from the darkness
that this world had. He planned to take
over this world and fill it with darkness.
The Hero saved this world and brought us
\n<Monica>our peace. The shield and sword.
Oh don't mind this old hag's ranmbling.
Not avalible in demo
```

```

Chapter 226. Act VI: Moral Crossroads of Dio Lower Ward

226.1. Eric the Lumberjack's House

Self-Aware Pot; Test of Honesty: 10G life savings vs 500G rent donation; Ring of Fire reward.

Associated Maps: Map 028

226.1.1. Map 028: Eric's House

- **Speaker/Source:** `Eric`

```
We've been seeing a lot of monster appear near the
recently. I wonder what's that all about. And with
jobs being tight, money is hard to come by.
```

- **Speaker/Source:** `Eric`

```
\n<[Elijah]>I think that that should be
enough to help you.
Thank you. Thank you so much, here I believe that
this will be more useful to you than me.
\n<[Elijah]>Thank you sir, but I...
\n<Eric>Don't mention it, and by the way, the name
is Eric. I used to be a lumberjack until that weird
portal appeared. I found this ring and held on to it
every since.
\n<n[1]>Thank you. Thank you so much!
\n<[Katrina]>I think that that should be
enough to help you.
Thank you. Thank you so much, here I believe that
this will be more useful to you than me.
\n<[Katrina]>Woah! This is a cool ring dude!
\n<Eric>The name is Eric and that ring has a story.
I used to be a lumberjack until that weird
portal appeared. I found this ring and held on to it
every since.
\n<n[2]>Thanks dude.
```

- **Speaker/Source:** `Eric`

```
\n<Eric>I'm sure that ring's fire power will come in
handy if you plan on leaving the village
```

- **Speaker/Source:** `Self-Aware Pot`

```
What kind of game do you think this is! You can't
just steal whatever you want! How rude!
```

- **Speaker/Source:** `Test of Honesty`

```
Something is glowing in the pot. Take the pots content?
You recieve 10G
THAT'S ALL MY MONEY! GET OUT NOW!
\n<\n1>I am so sorry! Please, I am not
trying to...
\n<n[2]>AH!
\n<n[2]>Hey, where did you even...
\n<n[2]>AH!
\n<[Elijah]>..steal all your money.
\n<n[1]>I'm sorry...
\n<n[2]>...come from...
\n<n[2]>It was just a few coins anyway.
That guy definately overreacted
You decide to leave the pot alone.
\n<n[1]>I can be quick, discret maybe
Elijah slowly reaches into the jar, stopping when
he saw how little money he had.
\n<n[1]>Maybe I should't...
\n<n[1]>I would be wrong of me to take this
money. But why does he only have a little
money...
Hey want are you doing!
\n<n[1]>I am so sorry, I wasn't trying to
take your money, I was just looking at the
pot.
It's fine kid... I just have stumble one hard
time every since the monster began showing up.
It makes working hard and I can't afford to
live here anymore.
\n<n[1]>Maybe... Maybe I can help!
Don't worry about it, it's not for you to worry about.
Just make sure you become something.
\n<n[1]>Is this what the voice meant,
to be a hero...How much do you need.
Just 500G, that will be enough for me to make it for
the month.
\n<n[1]>I'll leave the money in the pot,
that way you'll have it.
Tha-tha-thank you!
\n<n[1]>I would be wrong of me to take this
money. But why does he only have a little
money...
```

```
Hey want are you doing!
\n<n[1]>I am so sorry, I wasn't trying to
take your money, I was just looking at the
pot.
It's fine kid... I just have stumble one hard
time every since the monster began showing up.

live here anymore.
\n<n[1]>Maybe... Maybe I can help!
Don't worry about it, it's not for you to worry about.
Just make sure you become something
\n<n[1]>I have to help him somehow...
How much do you need.
Just 500G, that will be enough for me to make it for
the month
\n<n[1]>I'll leave the money in the pot,
that way you'll have it
Tha-tha-thank you!
\n<n[2]>The money is right there! This
guy won't see it coming.
As Katrina was about to take the money, she stopped
for just a moment
\n<n[2]>Ugghhh, I can't do it.
\n<n[2]>Come on [Katrina], its just a few bucks,
you can give him some more when you get
more.
Hey want are you doing!
\n<n[2]>Look man, I was just looking at
the stupid thing and saw some pocket change
in the pot. I was going to give you
something back...eventually.
That would've been all of my money, my life savings!
That's my money for the whole week!
\n<n[2]>Hold on, you mean to tell me that
you only have 10G to your name. Dude, how
can you afford to live here!
Don't worry about that, the monster attacks have made
living in town alot cheaper...even without my job...
\n<n[2]>Is this what the voice meant,
to be a hero...How much do rent here
cost...
500G, but I won't be able to make that kind of money
in time to pay the rent
\n<n[2]>sigh I'll get the
money, just don't do...anything
Really? Thanks...who are you?
\n<n[2]>The girl next door...actually no,
just someone who understands hard times
\n<n[2]>Come on [Katrina], its just a few bucks,
you can give him some more when you get
more.
```

```
Hey want are you doing!
\n<n[2]>Look man, I was just looking at
the stupid thing and saw some pocket change

Really? Thanks...who are you?
\n<n[2]>The girl next door...actually no,
just someone who understands hard times
```

- **Speaker/Source:** `Test of Honesty`

```
Would you like to add to the pot?
You have given \v[14] to the man.
How much will you add?
You have given \v[14] to the man.
You have filled the pot! Talk to the man once more.
The pot isn't full yet.
You don't have that much to give
You leave the pot alone.
```

- **Speaker/Source:** `Test of Honesty`

```
The pot is filled with gold. It can cover rent for
2 months!
```

- **Speaker/Source:** `Empty Pot`

```
The pot is empty
```

- **Speaker/Source:** `Empty Pot`

```
The pot is empty
```

226.2. Shopping District & Lower Village

Buying the offering potion; the shopkeeper's note; St. Baron's locked mansion.

Associated Maps: Map 029, Map 030, Map 016

226.2.1. Map 030: Shopping District

- **Speaker/Source:** `St. Baron□s Home`

```
\n<[Elijah]>I can't believe that I am doing
this,...the baron is the richest
man in the villiage...but he's been
using the town! This is for the good!
\n<[Katrina]>Ok...here we go...let's do this. I
have to do at least one good thing today.
\n<[Elijah]>I can believe the baron
would take all this money for himself! Not
anymore!
\n<[Elijah]>So the baron can still
keep a house while the rest of just
struggle. This is gonna be fun.
The door is locked. Mayhbe you should come back at
a different time
```

- **Speaker/Source:** `Shop Menu`

```
Welcoem to my shop! How can I help you today?
Thanks for coming! See you later!
```

- **Speaker/Source:** `Shopkeeper□s Wife Dialouge`

```
We've just got into town so we are still working
on getting the funds for a bed. But my hubby
will not rest until we have that bed!
```

- **Speaker/Source:** `Got the Potion`

```
\n<[Elijah]>I wonder why she needs a
potion. Could she be a witch?
\n<[Katrina]>I can't believe she made me
waste my money...
```

Demo completion gateway; thank-you message; frontier exits.

Associated Maps: Map 033, Map 034, Map 035, Map 005, Map 018

227.2. Wilderness Battle Zones (Demo Areas 3 & 4)

Combat zones featuring bats, slimes, magos, and bandits.

Associated Maps: Map 014, Map 015, Map 016, Map 034, Map 035, Map 036, Map 019, Map 020, Map 021, Map 022, Map 033

227.2.1. Map 020: Grandma's House Upstairs

- **Speaker/Source:** `Grandma□s Chest`

```
\n<[Elijah]>I shouldn't go in this chest. I
need to talk to Grandma first.
She's very particular about her things.
\n<[Katrina]>I shouldn't go in this chest. I
need to talk to Grandma first.
Batty old woman seems to remind that chest.
```

- **Speaker/Source:** `Grandma□s Chest`

```
An old watch was in the chest.
\n<[Elijah]>Oh.. it's an old watch.
What's so special about it anyway?
\n<[Katrina]>She made me....grab...an
OLD WATCH! I thought it was
something important like her will!
```

- **Speaker/Source:** `Grandma□s Chest`

```
There is still something inside of the chest
OBTAINED THE COMPASS OF MORALITY
```

- **Speaker/Source:** `Grandma□s Chest`

```
It's all empty now.
```

- **Speaker/Source:** Wierd Dream

```
\n<[Elijah]>That dream....what did it mean...
It could just be my imagination but...It
felt like...something more. A hero
... Me...?
\n<[Katrina]>WHAT! WHAT THE...ME. Man, my mind
needs to get out of lala land and settle
into reality. I can't be a hero,
I won't be a hero...
```

227.2.2. Map 021: Grandma's House Downstairs

- **Speaker/Source:** Grandma

```
\n<Grandma>Hello sweetie, could you please
go upstairs and search in the chest
and grab what's inside? It's something that
has great signifinance.
\n<[Katrina]>The will. I love you gran,
but a girl gotta get out of this dead-end
town.
\n<[Elijah]>Maybe is is something
about dad! I haven't seen him since my
10th birthday.
\n<[Elijah]>Sure thing. This might
be my chance to get answers!
\n<[Katrina]>Why not! Crazy old woman...
That will is mine!
\n<[Elijah]>Well...uhh...but...
But if it is about him...
\n<[Katrina]>Gran, why can't you do it?
Why doesn't she do it?
If she wants it she can get it.
```

- **Speaker/Source:** Grandma

```
It's been a while since we've talk.
What do you want to talk about?
\n<Grandma>Oh me and Monica go way back.
She was such a wild child, always getting
into mischief. You'll love her.
\n<Grandma>This town used to be full of
life. sighs The kingdom doesn't
```

```
pay much attention to this place anymore...
\c[5]Not avalible in the demo
\n<Grandma>Have you been upstairs yet?
The chest should still be there.
```

- **Speaker/Source:** Grandma

```
\n<Grandma>Thank you honey. This watch has
been in the family for a long time. Oh,
how it brings back memories of better days.
\n<Grandma>I think you should keep it. It's
my gift to you. And here's a bit of money.
I know that you'll need it more than little
ol' me.
```

- **Speaker/Source:** Grandma

```
\n<Grandma>[Katrina] could you do me a favor?
Lately, the people have been stirred up
about people being attacked by monsters.
\n<Grandma>[Elijah] could you do me a favor?
Lately, the people have been stirred up
about people being attacked by monsters.
\n<Grandma>My friend, Monica,
would know what is causing these strange
rumors. Can you go to her house and see
what she has to say about all of this?
\n<[Elijah]>Sure thing. It will be nice to
finally leave the house. I might even
get to leave town!
\n<[Katrina]>Why not! I would love to~
I'm out of this poor slum of a town!
\n<[Elijah]>Well..are you sure you can't?
I don't even know her...
\n<[Katrina]>Gran, I'm not your errand girl!
 This is YOUR friend.
```

- **Speaker/Source:** Block

```
I should say something to Grandma before I go.
```

- **Speaker/Source:** Block

```
Grandma still seems worried. Maybe I can talk to
her one more time.
```

- **Speaker/Source:** Monica

```
\n<Monica>You have to stop that kid! Our
```

```
village will be more devastated than
even with him blocking the road!
```

- **Speaker/Source:** Monica

```
\n<Monica>Good job! I think I have an idea.
Now that the people can, residences and
newcomers have arrived. I notice that a
shopkeeper has came into our town as well.
\n<Monica>I need you to go a buy a potion.
I will use this as a base for my offering
to Lyri. She'll be able to help us in this
dark hour.
Obtained the Book of Monsters
```

- **Speaker/Source:** Monica

```
\n<Monica>Oh yes. This is exactly what I
need for my offering.
\n<Monica>There is one more thing that I
need in order to make this brew suitable
for Lyri. Go out of the town to the west
path. A man has what I need. Get it please.
\n<Monica>If you want to get the potion,
you'll need to go to the lower parts of the
town.
```

- **Speaker/Source:** Monica

```
\n<Monica>Do you need something?
\n<Monica>Me? Why, I'm one of the original
mages for the King. The kingdom was not as
peaceful as is it now. But then, the
Dark Lord tried to take the kingdom.
\n<Monica>He was born from the darkness
that this world had. He planned to take
over this world and fill it with darkness.
The Hero saved this world and brought us
\n<Monica>our peace. The shield and sword.
Oh don't mind this old hag's ranmbling.
Not avalible in demo
Not avalible in demo

```

- **Speaker/Source:** The Secret Room

```
Get your snooping nose away from me room!
This room is currently unavalible for the demo
```

- **Speaker/Source:** Lyri

```
It is the deity Lyri, the Goddess of Peace.
```

- **Speaker/Source:** Totem

```
The totem has the names of fallen soldiers. One
name has a heart by it and it reads "Miss you".
\n<[Elijah]>Did Monica have a husband?
\n<[Katrina]>Someone married that crazy bat!
```

- **Speaker/Source:** Totem

```
The totem is full of offerings.
```

227.3.6. Map 028: Eric's House

- **Speaker/Source:** Eric

```
We've been seeing a lot of monster appear near the
recently. I wonder what's that all about. And with
jobs being tight, money is hard to come by.
```

- **Speaker/Source:** Eric

```
\n<[Elijah]>I think that that should be
enough to help you.
Thank you. Thank you so much, here I believe that
this will be more useful to you than me.
\n<[Elijah]>Thank you sir, but I...
```

```
\n<Eric>Don't mention it, and by the way, the name
is Eric. I used to be a lumberjack until that weird
portal appeared. I found this ring and held on to it
every since.
\n<n[1]>Thank you. Thank you so much!
\n<[Katrina]>I think that that should be
enough to help you.
Thank you. Thank you so much, here I believe that
this will be more useful to you than me.
\n<[Katrina]>Woah! This is a cool ring dude!
\n<Eric>The name is Eric and that ring has a story.
I used to be a lumberjack until that weird
portal appeared. I found this ring and held on to it
every since.
\n<n[2]>Thanks dude.
```

- **Speaker/Source:** `Eric`

```
\n<Eric>I'm sure that ring's fire power will come in
handy if you plan on leaving the village
```

- **Speaker/Source:** `Self-Aware Pot`

```
What kind of game do you think this is! You can't
just steal whatever you want! How rude!
```

- **Speaker/Source:** `Test of Honesty`

```
Something is glowing in the pot. Take the pots content?
You recieve 10G
THAT'S ALL MY MONEY! GET OUT NOW!
\n<\n1>I am so sorry! Please, I am not
trying to...
\n<n[2]>AH!
\n<n[2]>Hey, where did you even...
\n<n[2]>AH!
\n<[Elijah]>..steal all your money.
\n<n[1]>I'm sorry...
\n<n[2]>...come from...
\n<n[2]>It was just a few coins anyway.
That guy definately overreacted
You decide to leave the pot alone.
\n<n[1]>I can be quick, discret maybe
Elijah slowly reaches into the jar, stopping when
he saw how little money he had.
\n<n[1]>Maybe I should't...
\n<n[1]>I would be wrong of me to take this
```

```
money. But why does he only have a little
money...
Hey want are you doing!
\n<n[1]>I am so sorry, I wasn't trying to
take your money, I was just looking at the
pot.
It's fine kid... I just have stumble one hard
time every since the monster began showing up.
It makes working hard and I can't afford to
live here anymore.
\n<n[1]>Maybe... Maybe I can help!
Don't worry about it, it's not for you to worry about.
Just make sure you become something.
\n<n[1]>Is this what the voice meant,
to be a hero...How much do you need.
Just 500G, that will be enough for me to make it for
the month.
\n<n[1]>I'll leave the money in the pot,
that way you'll have it.
Tha-tha-thank you!
\n<n[1]>I would be wrong of me to take this
money. But why does he only have a little
money...
Hey want are you doing!
\n<n[1]>I am so sorry, I wasn't trying to
take your money, I was just looking at the
pot.
It's fine kid... I just have stumble one hard
time every since the monster began showing up.
It makes working hard and I can't afford to
live here anymore.
\n<n[1]>Maybe... Maybe I can help!
Don't worry about it, it's not for you to worry about.
Just make sure you become something
\n<n[1]>I have to help him somehow...
How much do you need.
Just 500G, that will be enough for me to make it for
the month
\n<n[1]>I'll leave the money in the pot,
that way you'll have it
Tha-tha-thank you!
\n<n[2]>The money is right there! This
guy won't see it coming.
As Katrina was about to take the money, she stopped
for just a moment
\n<n[2]>Ugghhh, I can't do it.
\n<n[2]>Come on [Katrina], its just a few bucks,
you can give him some more when you get
more.
Hey want are you doing!
\n<n[2]>Look man, I was just looking at
```

```
the stupid thing and saw some pocket change
in the pot. I was going to give you
something back...eventually.
That would've been all of my money, my life savings!
That's my money for the whole week!
\n<n[2]>Hold on, you mean to tell me that
you only have 10G to your name. Dude, how
can you afford to live here!
Don't worry about that, the monster attacks have made
living in town alot cheaper...even without my job...
\n<n[2]>Is this what the voice meant,
to be a hero...How much do rent here
cost...
500G, but I won't be able to make that kind of money
in time to pay the rent
\n<n[2]>sigh I'll get the
money, just don't do...anything
Really? Thanks...who are you?
\n<n[2]>The girl next door...actually no,
just someone who understands hard times
\n<n[2]>Come on [Katrina], its just a few bucks,
you can give him some more when you get
more.
Hey want are you doing!
\n<n[2]>Look man, I was just looking at
the stupid thing and saw some pocket change
in the pot. I was going to give you
something back...eventually.
That would've been all of my money, my life savings!
That's my money for the whole week!
\n<n[2]>Hold on, you mean to tell me that
you only have 10G to your name. Dude, how
can you afford to live here!
Don't worry about that, the monster attacks have made
living in town alot cheaper...even without my job...
\n<n[2]>I have to help him somehow...
How much do rent here cost...
500G, but I won't be able to make that kind of money
in time to pay the rent
\n<n[2]>sigh I'll get the
money, just don't do...anything
Really? Thanks...who are you?
\n<n[2]>The girl next door...actually no,
just someone who understands hard times
```

- **Speaker/Source:** Test of Honesty

```
Would you like to add to the pot?
You have given \v[14] to the man.
How much will you add?
```

```
You have given \v[14] to the man.
You have filled the pot! Talk to the man once more.
The pot isn't full yet.
You don't have that much to give
You leave the pot alone.
```

- **Speaker/Source:** Test of Honesty

```
The pot is filled with gold. It can cover rent for
2 months!
```

- **Speaker/Source:** Empty Pot

```
The pot is empty
```

- **Speaker/Source:** Empty Pot

```
The pot is empty
```

Chapter 228. Chapter 41: Complete Cast & Tactical Party Compendium

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/cast_and_characters.adoc

Chapter 229. Overview

This compendium catalogues every character, party companion, village elder, court antagonist, and mystical summon present in the 2017–2018 demo archives, detailing their combat statistics, class associations, sprite bindings, and narrative significance.

Chapter 230. 1. Dual Protagonists

230.1. Elijah Ro-enheart (The Steadfast Vanguard)

- **ID**: `Actor 1`
- **Class**: Hero (`Class 5`) / Knight (`Class 1`)
- **Relic Affinity**: Bearer of the **Shield of Lux**
- **Initial Level**: Lv 5 (Folder 1) / Lv 1 (Folder 2)
- **Movement Points**: 4 MP
- **Sprite / Battler**: `Actor1_1` / `MainCharacter` (custom generator)
- **Profile & Personality**: Son of the vanished Commander Gareth Ro-enheart (former Head of the Royal Guard). Earnest, chivalric, deeply burdened by his father's mysterious disappearance on his 10th birthday. Elijah seeks answers through service and duty, instinctively stepping forward to protect the weak and uphold the light of Sacyra.
- **Canonical LeTBS Specification**:

```
<letbs>
move_points: 4
auto_turn_order_face
auto_status_sprite
</letbs>
```

230.2. Lady Katrina Jaren (The Outrider Blade)

- **ID**: `Actor 2`
- **Class**: Hero (`Class 5`) / Start (`Class 7`)
- **Relic Affinity**: Wielder of the **Sword of Tenebris**
- **Initial Level**: Lv 5 (Folder 1) / Lv 1 (Folder 2)
- **Movement Points**: 4 MP
- **Initial Equipment**: Weapon 1 (Sword), Armor 2 (Hat), Armor 3 (Cloth)
- **Sprite / Battler**: `Actor1_8`
- **Profile & Personality**: Noble daughter of aristocratic House Jaren. Rebellious, razor-sharp, pragmatic, and fiercely independent. Refusing a cloistered aristocratic marriage or court seat, Katrina escaped to Dio Village with eyes on joining the independent Adventurers' Guild. Her caustic wit masks a deep empathy for ordinary folk crushed by royal neglect.
- **Canonical LeTBS Specification**:

```
<letbs>
move_points: 4
```

```
auto_turn_order_face
auto_status_sprite
</letbs>
```

Chapter 231. 2. Extended Tactical Party Companions (Folder 2 Additions)

In `Old_Game_Data_2`, three specialized tactical party members were integrated to expand the grid-based TRPG party:

231.1. Sebastien (The Infiltrator Outlaw)

- **ID**: `Actor 4`
- **Class**: Thief (`Class 6`)
- **Initial Level**: Lv 4
- **Sprite / Battler**: `Actor3_7`
- **Tactical AI & Role**: Outrider flanker equipped with `ranged_fighter` AI, trap disarmament, and precision critical strikes.

231.2. Angela (The Evoker Elementalist)

- **ID**: `Actor 5`
- **Class**: Mage (`Class 2`)
- **Initial Level**: Lv 4
- **Movement Scope**: `square(2)` (4 MP)
- **Sprite / Battler**: `Actor3_8` (custom cast, atk, hit, victory animations)
- **Action Palette**: Full tactical command set (`Move`, `Skill[42]`, `Items`, `Scan`, `Pass`).
- **Tactical Role**: Long-range elemental artillery, crowd control, and battlefield terrain modification (ice walls, volcano ground).

231.3. Lucius (The Battle Priest)

- **ID**: `Actor 6`
- **Class**: Priest (`Class 3`)
- **Initial Level**: Lv 4
- **Sprite / Battler**: `Actor2_7`
- **Tactical Role**: Turn order manipulation (`Accelerate`, `Decelerate`, `Emergency Turn`), long-distance allied teleportation, and barrier restoration.

Chapter 232. 3. Summoned Celestial Entities

232.1. Wind Spirit (Actor 11)

- **Class**: `Class 12` | **Sprite**: `Nature` (Index 4)
- **Skills**: Air Compression (`Skill 132`), Great Wind (`Skill 133` - pushback), Transposition (`Skill 134` - swap places).

232.2. Pixie (Actor 12)

- **Class**: `Class 13` | **Sprite**: `Nature` (Index 5)
- **Skills**: Healing Wave (`Skill 135` - AOE restoration).

232.3. Fire Chicken (Actor 13)

- **Class**: `Class 14` | **Sprite**: `Nature` (Index 2)
- **Characteristics**: Explosive combat decoy (`loop_animation: 262`), Bomb (`Skill 136`), Fire Arrow (`Skill 137`).

Chapter 233. 4. Key Lore Figures & NPCs

Name	Role & Allegiance	Historical Significance
Grandma Magolia	Matriarch of Dio Village	Mother of vanished Commander Gareth Ro-enheart; grandmother to Elijah. Bestows **Grandma's Watch** and **Compass of Morality**.
Monica the Mystic	Former Royal Battlemage	Eccentric hermit and priestess of Goddess Lyri. Guides protagonists in awakening relic powers through ritual offerings.
Eric the Lumberjack	Impoverished Dio Laborer	Loses his livelihood to monster raids; serves as the moral litmus test for player empathy in the **Test of Honesty**. Bestows the **Ring of Fire**.
John the Thief	Local Outlaw Leader	Operates in Lower Dio; plots to unseat the predatory St. Baron to return wealth to the villagers.
The St. Baron	Aristocratic Landowner	Feudal aristocrat bleeding Dio Village dry; symbol of court corruption and moral decay.
Chrono	Archival Sage & Guardian	Guide of the Dream Chamber / Ancient Archives. Oversees archetype stone selection and mechanics trials.
High Priest Roté	Royal Advisor	Court prelate who witnesses the cosmic omens and hastens to warn King Jihad.
King Jihad	Monarch of Sacyra	Feigns royal mobilization while falling victim to the King's Curse, secretly coveting the returned primordial darkness to surpass The Dark Lord.

Chapter 234. Chapter 42: LeTBS Tactical Grid System Specification

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/combat_and_letbs_mechanics.adoc

Chapter 235. Overview

This document formalizes the grid-based Tactical Strategy RPG combat architecture implemented via Lecode's Tactical Battle System (LeTBS) in the 2017–2018 demo. It details movement costs, action economy, scope geometries, terrain manipulation, and turn manipulation invariants.

Chapter 236. 1. Battle Field Architecture & Action Economy

- **Grid Structure**: 2D tile-based tactical grid mapped over encounter maps.
- **Movement Points (MP)**: Consumable per-turn budget determining movement range:
  - Baseline Protagonists & Allies: `move_points: 4`.
  - Heavy Impact Reductions: Heavy Hit reduces target MP by 3 (`move_points+: -3`).
  - Outrider Haste: Light Steps increases target MP by 1 (`move_points+: 1`).
- **Turn Timeline**: Monotonic timeline ordering turns by entity agility (`auto_turn_order_face`).
- **Directional Facing**: Facing impacts defense and positional abilities (e.g., **Phantom Slash** teleports directly behind the target before striking).

Chapter 237. 2. Scope & Area of Effect (AOE) Geometries

The demo configured rich geometric targeting parameters across skills:

Scope Pattern	Example Skill	Geometric Definition
`circle(r)`	**Fire** (`Skill 42`), **Heal** (`Skill 72`)	Manhattan or Chebyshev circle of radius `r` centered on the caster.
`circle(max_r, min_r)`	**Ghost Arrow** (`Skill 79`), **Dagger Throw** (`Skill 169`)	Annular targeting ring; cannot target adjacent cells within `min_r`.
`line(n)`	**Explosive Mark** (`Skill 76`), **Great Wind** (`Skill 133`)	Cardinal linear projection up to `n` cells from caster.
`square(r)`	**Angela Move Scope** (`Actor 5`)	Full square grid extent of radius `r`.
`custom(pattern)`	**Fire Arrows** (`Skill 82`)	Scripted multi-target projectile pattern hitting all visible adversaries.
`through_obstacles`	**Teleportation** (`Skill 73`)	Ignores intermediate terrain obstacles, requiring only a free destination cell.

Chapter 238. 3. Terrain State Modifications & Dynamic Hazards

Combat encounters feature active environmental manipulation:

- **Volcano Ground (`Skill 47`)**: Lays hazardous fiery embers across multiple ground cells dealing continuous fire damage.
- **Ice Wall / Ice Prison (`Skill 51`, `Skill 52`)**: Summons physical destructible barricades (`HP: 20`) that obstruct enemy line-of-sight and movement corridors.
- **Explosive Mark & Magic Trap (`Skill 76`, `Skill 80`)**: Proximity-triggered grid landmines that detonate upon enemy entry.
- **Burning Tile Spread (`State 110`)**: Dynamic fire propagation expanding with `spread: 100% circle(1) all`.

Chapter 239. 4. Turn Timeline Manipulation

Unique priest techniques alter the flow of tactical battle:

- **Accelerate (`Skill 87`)**: Advances target position along the turn timeline by 100%.
- **Decelerate (`Skill 88`)**: Delays target position along the turn timeline by 100%.
- **Emergency Turn (`Skill 89`)**: Instantly grants an immediate action turn to an allied battler.
- **Extra Turn (`Skill 86`)**: Grants the caster or target an additional action cycle upon turn conclusion.

Chapter 240. Chapter 43: Classes, Growth Curves & Learning Trees

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/classes_and_growth.adoc

Chapter 241. Overview

This document details the 7 primary player and NPC classes plus 4 auxiliary summon/guard classes from `Classes.json`. It includes base stat formulas across 8 core attributes (MHP, MMP, ATK, DEF, MAT, MDF, AGI, LUK) and skill learning progressions.

Chapter 242. Class 1: Warrior

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	100	30	12	8	3	8	27	32
5	145	46	17	12	5	11	27	42
10	202	64	23	17	8	15	27	55
20	314	102	35	26	13	22	27	80
50	650	215	71	54	27	44	27	155
99	1200	400	130	100	50	80	27	277

242.1. Skill Learnings for Warrior

Level	Skill Name	Strategic Role
Lv 1	**Repulsive Blow** (`ID: 11`)	Innate class technique
Lv 1	**Flash Jump** (`ID: 12`)	Innate class technique
Lv 1	**Rush** (`ID: 13`)	Innate class technique
Lv 1	**Intimidating Aura** (`ID: 14`)	Innate class technique
Lv 1	**Heavy Hit** (`ID: 15`)	Innate class technique
Lv 1	**Provoke** (`ID: 16`)	Innate class technique
Lv 1	**Phantom Slash** (`ID: 17`)	Innate class technique

Chapter 243. Class 2: Mage

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	60	90	2	7	13	8	26	32
5	83	130	4	10	18	12	26	42
10	110	180	6	13	24	17	26	55
20	165	280	10	20	36	26	26	80
50	330	580	21	39	72	54	26	155
99	600	1070	40	70	130	100	26	277

243.1. Skill Learnings for Mage

Level	Skill Name	Strategic Role
Lv 1	**Fire** (ID: 42)	Innate class technique
Lv 1	**Sparkle** (ID: 43)	Innate class technique
Lv 1	**Lightning Storm** (ID: 44)	Innate class technique
Lv 1	**Fire Storm** (ID: 45)	Innate class technique
Lv 1	**Fire Support** (ID: 46)	Innate class technique
Lv 1	**Volcano Ground** (ID: 47)	Innate class technique
Lv 1	**Ice Fury** (ID: 49)	Innate class technique
Lv 1	**Walking Fire** (ID: 50)	Innate class technique
Lv 1	**Ice Wall** (ID: 51)	Innate class technique
Lv 1	**Ice Prison** (ID: 52)	Innate class technique
Lv 1	**Whitch's Escape** (ID: 53)	Innate class technique
Lv 1	**Fire Chickens** (ID: 54)	Innate class technique
Lv 1	**Water (charged)** (ID: 55)	Innate class technique
Lv 1	**Mega Sparkle** (ID: 56)	Innate class technique
Lv 1	**Multi Fire** (ID: 57)	Innate class technique

Chapter 244. Class 3: Priest

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	65	60	6	8	10	7	32	32
5	95	87	10	13	15	11	32	42
10	133	119	15	18	20	16	32	55
20	208	185	25	28	31	26	32	80
50	433	380	53	59	63	54	32	155
99	800	700	100	110	115	100	32	277

244.1. Skill Learnings for Priest

Level	Skill Name	Strategic Role
Lv 1	**Heal** (ID: 72)	Innate class technique
Lv 1	**Teleportation** (ID: 73)	Innate class technique
Lv 1	**Salvation** (ID: 74)	Innate class technique
Lv 1	**Teleportation II** (ID: 75)	Innate class technique
Lv 1	**Explosive Mark** (ID: 76)	Innate class technique
Lv 1	**Light Steps** (ID: 78)	Innate class technique
Lv 1	**Ghost Arrow** (ID: 79)	Innate class technique
Lv 1	**Magic Trap** (ID: 80)	Innate class technique
Lv 1	**Fire Arrows** (ID: 82)	Innate class technique
Lv 1	**Wind Spirit** (ID: 83)	Innate class technique
Lv 1	**Summon Pixie** (ID: 84)	Innate class technique
Lv 1	**Shamanism** (ID: 85)	Innate class technique
Lv 1	**Extra Turn** (ID: 86)	Innate class technique
Lv 1	**Accelerate** (ID: 87)	Innate class technique
Lv 1	**Emergency Turn** (ID: 89)	Innate class technique
Lv 1	**Ally Teleport.** (ID: 90)	Innate class technique
Lv 1	**Mana Ball** (ID: 92)	Innate class technique

Chapter 245. Class 4: Summoner

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	450	90	16	16	16	16	32	32
5	650	130	21	21	21	21	42	42
10	900	180	28	28	28	28	55	55
20	1400	280	40	40	40	40	80	80
50	2900	580	77	77	77	77	155	155
99	5350	1070	138	138	138	138	277	277

245.1. Skill Learnings for Summoner

Level	Skill Name	Strategic Role
Lv 1	**Sentinel Totem** (`ID: 102`)	Innate class technique

Chapter 246. Class 5: Hero

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	300	90	16	16	16	16	32	32
5	507	130	21	21	21	21	42	42

99	1200	400	130	100	50	80	27	277

250.1. Skill Learnings for Guard

Level	Skill Name	Strategic Role
Lv 1	**Heavy Hit** (`ID: 15`)	Innate class technique

Chapter 251. Class 12: Wind Spirit

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	1	50	1	1	1	1	1	1
5	1	79	1	1	1	1	1	1
10	1	115	1	1	1	1	1	1
20	1	186	1	1	1	1	1	1
50	1	400	1	1	1	1	1	1
99	1	750	1	1	1	1	1	1

251.1. Skill Learnings for Wind Spirit

Level	Skill Name	Strategic Role
Lv 1	**Air Compression** (`ID: 132`)	Innate class technique
Lv 1	**Great Wind** (`ID: 133`)	Innate class technique
Lv 1	**Transposition** (`ID: 134`)	Innate class technique

Chapter 252. Class 13: Pixie

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	1	50	1	1	1	1	1	1
5	1	79	1	1	1	1	1	1
10	1	115	1	1	1	1	1	1
20	1	186	1	1	1	1	1	1
50	1	400	1	1	1	1	1	1
99	1	750	1	1	1	1	1	1

252.1. Skill Learnings for Pixie

Level	Skill Name	Strategic Role
Lv 1	**Healing Wave** (`ID: 135`)	Innate class technique

Chapter 253. Class 14: Fire Chicken

Level	MHP	MMP	ATK	DEF	MAT	MDF	AGI	LUK
1	1	1	1	1	1	1	1	1
5	1	1	1	1	1	1	1	1
10	1	1	1	1	1	1	1	1
20	1	1	1	1	1	1	1	1
50	1	1	1	1	1	1	1	1
99	1	1	1	1	1	1	1	1

253.1. Skill Learnings for Fire Chicken

Level	Skill Name	Strategic Role
Lv 1	**Bomb** (`ID: 136`)	Innate class technique

Chapter 254. Chapter 44: The Complete Grimoire (75+ Skills & Formulas)

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/grimoire_and_skills.adoc

Chapter 255. Overview

This document records the complete grimoire of all 75+ active techniques, spells, and summon abilities defined in `Skills.json`. It provides mathematical damage formulas, MP/TP costs, scope parameters, and tactical LeTBS sequences.

Chapter 256. Basic Martial Maneuvers

ID	Skill Name	MP	TP	Damage Formula	Description & Tactical Note
1	**Attack**	0	0	`a.atk * 4 - b.def * 2`	+ *Note*: `Skill #1 will be used when you select the Attack command.`
2	**Guard**	0	0	`0`	+ *Note*: `Skill #2 will be used when you select the Guard command.`
3	**Dual Attack**	0	0	`a.atk * 4 - b.def * 2`	
4	**Double Attack**	0	0	`a.atk * 4 - b.def * 2`	
5	**Triple Attack**	0	0	`a.atk * 4 - b.def * 2`	
6	**Escape**	0	0	`0`	
7	**Wait**	0	0	`0`	

Chapter 257. Knight Martial Techniques

ID	Skill Name	MP	TP	Damage Formula	Description & Tactical Note
11	**Repulsive Blow**	0	0	`this.phyDmg(120)`	Hits and push the target for two cell. *Note*: `<letbs> scope: circle(1) sequence: atk_push(2) scope_color: #FFF </letbs> <l…`
12	**Flash Jump**	0	0	`this.phyDmg(110) + this.magDmg(10)`	Jumps to an available position in the scope and invoke a thunder to damage nearby fighters. *Note*: `<letbs> scope: circle(3,1) aoe: circle(1) scope_options: need_free_cell aoe_o…`
13	**Rush**	0	0	`this.phyDmg(80)`	Rushes toward the target. *Note*: `<letbs> scope: custom(rush) sequence: rush </letbs> <letbs_AI> type: offense…`
14	**Intimidating Aura**	0	0	`(a.atk * 4 - b.def * 2) * 1.2`	Casts an aura that reduce enemies' ATK by 15%. Grants as well 70% counter attack chance. *Note*: `<letbs> scope: circle(0) scope_options: include_center </letbs> <letbs_AI> t…`
15	**Heavy Hit**	0	0	`this.phyDmg(135)`	Hits the target and remove 3 move points. *Note*: `<letbs> scope: circle(1) sequence: atk </letbs> <Learn Require Level: 5> <l…`
16	**Provoke**	0	0	`(a.atk * 4 - b.def * 2) * 1.2`	Draw the attention of enemies upon the user. Can use another action after this skill. *Note*: `<letbs> scope: circle(0) scope_options: include_center extra_action </letbs> …`
17	**Phantom Slash**	0	0	`this.phyDmg(60)`	Use dark arts to reach the back of the target. *Note*: `<letbs> scope: line(4) sequence: phantom_slash </letbs> <Learn Require Level…`

Chapter 258. Mage Elemental Spells

ID	Skill Name	MP	TP	Damage Formula	Description & Tactical Note
42	**Fire**	0	0	`this.magDmg(105)`	Deals fire damages to a single target in a medium range. *Note*: `<letbs> scope: circle(3);line(4) </letbs> <letbs_AI> type: offense </letbs_A…`
43	**Sparkle**	0	0	`this.magDmg(80)`	Deals thunder damages to targets in a small area. *Note*: `<letbs> scope: circle(4) aoe: circle(1) sequence: spark </letbs> <Learn Requi…`
44	**Lightning Storm**	0	0	`this.magDmg(60)`	Attacks 3 times a random battler in the area. *Note*: `<letbs> scope: line(4) aoe: circle(2) sequence: lightning_storm </letbs> <Lea…`
45	**Fire Storm**	0	0	`this.magDmg(200)`	Attacks 6 times randomly in the area. *Note*: `<letbs> scope: circle(4,2) aoe: square(1) sequence: fire_storm </letbs> <Lear…`
46	**Fire Support**	0	0	`this.magDmg(80)`	Deals fire damages to a single target in a medium range with the help of close allies. *Note*: `<letbs> scope: circle(4) sequence: fire_support </letbs> <Learn Require Level…`
47	**Volcano Ground**	0	0	`(a.mat * 2 - b.mdf * 2)*2`	Lays multiple fire spots on the ground. *Note*: `<letbs> scope: circle(0) scope_options: include_center aoe: custom(volcano_gr…`
48	**Volcano Ground (dmg)**	0	0	`this.magDmg(25)`	
49	**Ice Fury**	0	0	`this.magDmg(115)`	Deals ice damages in a row. *Note*: `<letbs> scope: line(4) aoe: custom(ice_fury) sequence: skill </letbs> <Learn …`

ID	Skill Name	MP	TP	Damage Formula	Description & Tactical Note
50	**Walking Fire**	0	0	`this.magDmg(105)`	Deals fire damages in a medium path. *Note*: `<letbs> scope: circle(4) scope_options:through_obstacles aoe: path sequence: …`
51	**Ice Wall**	0	0	`(a.mat * 2 - b.mdf * 2)*1.15`	Summon a wall of ice. *Note*: `<letbs> scope: line(3) scope_options: need_free_cell aoe: custom(ice_wall) ao…`
52	**Ice Prison**	0	0	`(a.mat * 2 - b.mdf * 2)*1.15`	Summon a prison of ice. *Note*: `<letbs> scope: circle(4) aoe: custom(ice_prison) aoe_options: need_free_cell …`
53	**Whitch's Escape**	0	0	`(a.mat * 2 - b.mdf * 2)*1.20`	Teleports then casts Spark at the old location. The scope is based on current move points. *Note*: `<letbs> scope: circle(e.getMovePoints()+1) scope_options: need_free_cell sequ…`
54	**Fire Chickens**	0	0	`(a.mat * 2 - b.mdf * 2)*1.15`	Summon explosive chickens *Note*: `<letbs> scope: circle(2) aoe: circle(1) scope_options: need_free_cell aoe_opt…`

Chapter 263. Chapter 45: Bestiary, Destructible Props & Troop Formations

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/bestiary_and_troops.adoc

Chapter 264. Overview

This document catalogs all 22+ hostile monsters, wild fauna, bandits, void entities, and interactive battlefield props from `Enemies.json` and `Troops.json`.

Chapter 265. 1. Monster Bestiary

ID	Name	HP	MP	ATK	DEF	MAT	MDF	AGI	LUK	AI / Behavior
1	**Bat**	80	12	11	8	8	4	25	30	Skill 1
2	**Mago**	60	18	8	6	16	6	22	30	Skill 41, Skill 1
3	**Rabbit**	55	0	10	8	8	4	27	30	Skill 1
4	**Great Mago**	90	36	10	7	19	7	23	30	Skill 1
5	**Fire Mago**	90	36	10	7	19	7	23	30	Skill 1
6	**Pyra**	30	50	6	8	6	4	27	30	Basic Attack
7	**Bandit**	80	12	14	10	10	7	25	30	Skill 1, Skill 169
8	**Mage Bandit**	80	12	11	8	8	4	25	30	Skill 1
9	**Slime**	250	0	30	30	30	30	30	30	Skill 1
10	**Orc**	300	0	30	30	30	30	30	30	Skill 1
11	**Minotaur**	500	0	30	30	30	30	30	30	Skill 1
12	**Random Kid**	100	0	30	10	10	10	10	10	Skill 1, Skill 3
13	**Dream Eater**	70	12	11	8	8	4	25	30	Skill 1
32	**Invincible Neutral**	99999	0	8	6	14	6	22	30	Basic Attack
33	**Tile Effect Launcher**	1	0	1	1	1	1	1	1	Basic Attack
34	**Ice Block**	20	0	1	1	1	1	1	1	Basic Attack
35	**Wooden Chest**	50	1	1	1	1	1	1	1	Basic Attack
36	**Silver Chest**	50	1	1	1	1	1	1	1	Basic Attack
37	**Golden Chest**	50	1	1	1	1	1	1	1	Basic Attack
38	**Stolen Goods**	1	1	1	1	1	1	1	1	Basic Attack

Chapter 266. 2. Neutral & Interactive Grid Entities

The demo utilized the battle engine to render interactive tactical grid entities: * **Wooden Chest (`Enemy 35`)**: `HP: 50` | Yields 200 Gold upon destruction via Common Event 5. * **Silver Chest (`Enemy 36`)**: `HP: 50` | Yields 2,000 Gold upon destruction via Common Event 6. * **Golden Chest (`Enemy 37`)**: `HP: 50` | Yields 10,000 Gold upon destruction via Common Event 7. * **Ice Block (`Enemy 34`)**: `HP: 20` | Destructible terrain obstacle summoned by Ice Wall. * **Stolen Goods (`Enemy 38`)**: `HP: 1` | Objective dropped upon defeat of Mage Bandit. * **Invincible Neutral (`Enemy 32`)**: `HP: 99,999` | Static grid anchor.

Chapter 267. 3. Troop Encounter Formations

Troop ID	Troop Designation	Composition
1	**Bat*2**	Bat, Bat
2	**Slime*2**	Mago, Mago
3	**Orc**	Rabbit
4	**Minotaur**	Great Mago
5	**Random Kid**	Fire Mago
6	**Bat**	Bat
7	**Bat*2**	Bat, Bat
8	**Bandit*3, Mage Bandit**	Bandit, Bandit, Mage Bandit, Bandit
9	**Dream Eater*2**	Dream Eater, Dream Eater

Chapter 268. Chapter 46: Armory, Inventory & Key Lore Relics

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/armory_and_inventory.adoc

Chapter 269. Overview

This document details all weapons, protective armors, restorative items, and key relics defined in `Weapons.json`, `Armors.json`, and `Items.json`.

Chapter 270. 1. Weapons & Relic Armaments

ID	Weapon Name	Type	Price	ATK	DEF	AGI	Lore & Characteristics
1	**Sword**	Sword	500\G	+10	+0	+0	
2	**Axe**	Axe	500\G	+10	+0	+0	
3	**Cane**	Cane	500\G	+10	+0	+0	
4	**Bow**	Bow	500\G	+10	+0	+0	
5	**Medusa's Sword**	Sword	1600\G	+17	+0	+0	The sword used to slay Medusa. It is said to have her petrifying powers.

Chapter 271. 2. Defensive Armor & Relic Wards

ID	Armor Name	Type	Price	DEF	MDF	MHP	Lore & Characteristics
1	**Shield**	Small Shield	300\G	+10	+0	+0	
2	**Hat**	General Armor	300\G	+10	+0	+0	
3	**Cloth**	General Armor	300\G	+10	+0	+0	
4	**Ring**	General Armor	300\G	+0	+0	+0	
5	**Heart Shield**	Small Shield	300\G	+10	+5	+0	
6	**Ring of Fire**	General Armor	0\G	+0	+5	+0	

Chapter 272. 3. Consumable Items & Quest Relics

ID	Item Name	Price	Consumable	Description & Architectural Mapping
1	**Potion**	10\G	Yes	
2	**Magic Water**	100\G	Yes	
3	**Dispel Herb**	200\G	Yes	
4	**Stimulant**	300\G	Yes	
5	**Grandma’s Watch**	0\G	No (Key Relic)	This was Grandma’s Watch. Its a family heirloom that keeps perfect time.
6	**Book of Monsters**	0\G	No (Key Relic)	This is a big with all the enemies you’ve encountered
7	**Book of Items**	0\G	No (Key Relic)	This book describes all the various items
8	**Compass of Morality**	0\G	No (Key Relic)	

Chapter 273. Chapter 47: Tactical States & Status Ailments Directory

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/states_and_statuses.adoc

Chapter 274. Overview

This document catalogs all 30 status ailments, tactical combat states, aura modifiers, and battlefield terrain effects defined in `States.json` across Folder 1 and Folder 2 (LeTBS). It distinguishes generic RPG Maker MV Runtime Package (RTP) boilerplate from authentic tactical grid modifiers and stance dynamics.

Chapter 275. 1. Triage: RTP Boilerplate States vs. Authentic Tactical Grid States

Category	State IDs	Architectural Policy
Tier 1: RTP Default States	1–10 (Knockout, Guard, Immortal, Poison, Blind, Silence, Rage, Confusion, Fascination, Sleep)	Stock RPG Maker MV status conditions. Re-architect in C11 to tie directly into Sacyran relic affinities, posture break, and elemental resistances.
Tier 3: Authentic LeTBS Grid States	11, 31–34, 46, 62–63, 78–79, 94–95, 109–110	Authentic tactical modifiers altering grid movement points (MP), turn order priority, damage mitigation, and tile propagation.

Chapter 276. 2. Standard Status Conditions (Tier 1 Boilerplate)

ID	State Name	Priority	Restriction / Description
1	**Knockout**	100	Cannot move; unit is felled upon reaching 0 HP.
2	**Guard**	0	Damage taken reduced by 50%; expires at start of next turn.
3	**Immortal**	0	Unit cannot drop below 1 HP; used for critical NPC story anchors.
4	**Poison**	50	Loses 10% max HP at end of combat turn.
5	**Blind**	60	Hit rate reduced by 50%.
6	**Silence**	70	Magic skills cannot be cast.
7	**Rage**	80	Attacks nearest enemy or ally indiscriminately.
8	**Confusion**	75	Actions randomized between foes and friends.
9	**Fascination**	70	Charmed unit attacks allies.
10	**Sleep**	90	Cannot take turns; wakes up upon taking damage.
11	**Paralyze**	85	Stunned; skip turn (`loop_animation: 64`).

Chapter 277. 3. Knight & Vanguard Tactical States (Tier 3 LeTBS)

ID	State Name	Affected Stat	Tactical Mechanism & LeTBS Meta
31	**Intimidating Aura**	ATK -15%	Passive aura cast via Skill 14 (`auras: intimidating_aura`). Reduces adjacent enemy physical attack and grants 70% counter-attack chance.
32	**Intimidated**	ATK -15%	Status inflicted on foes caught within the Intimidating Aura boundary.
33	**Heavy Strike**	Move Points: -3	Tactical stagger inflicted by Heavy Hit (Skill 15). Severely impedes enemy mobility on the grid.
34	**Focused**	AI Threat	Cast by Provoke (Skill 16). Forces enemy AI to prioritize the vanguard (`focused_by_ai_for_offense: 100`).

Chapter 278. 4. Mage & Priest Arcane States (Tier 3 LeTBS)

ID	State Name	Affected Stat	Tactical Mechanism & LeTBS Meta
46	**Charging**	Spell Delay	Channeling visual state for high-tier spells like Water (charged) (`loop_animation: 184`).
62	**Light Steps**	Move Points: +1	Mobility buff cast via Skill 78. Expands grid traversal budget for outriders and rogues.
63	**Ghost Arrow**	Move Points: -1	Tactical snare inflicted by Ghost Arrow (Skill 79). Reduces movement allowance.

Chapter 279. 5. Summoner & Environmental Grid States (Tier 3 LeTBS)

ID	State Name	Affected Stat	Tactical Mechanism & LeTBS Meta
78	**Transformation**	Form Shift	Active metamorphosis into astral beast (`character_name: Monster`).
79	**Fusion**	Unit Merge	Fuses summoner with tactical summon (`sprite_name: Rabbit`).
94	**Rabbit's Jump**	Mobility	Leap mechanics allowing clearance over terrain obstacles.
95	**Evil Protection**	DEF/MDF Buff	Damage shield cast by enemy warlocks (Skill 167).
109	**Tile Regen**	Periodic Heal	Restores health to units occupying consecrated ground.
110	**Burning**	Fire Dot / Spread	Fire hazard state (`spread: 100% circle(1)`). Expands dynamically to adjacent flammable tiles.

Chapter 280. 6. Modern C11 Architectural Mapping

In the C11 simulation engine, tactical states are decoupled from engine internals: 1. **Zero-Heap State Mask**: Active states on an actor are tracked via a bitmask and static array (`active_states[MAX_ACTIVE_STATES]`). 2. **Move Point Clamping**: `move_points` modifiers directly feed into Layer 0 spatial pathing routines. 3. **Data-Driven Configuration**: State durations, stat multipliers, and tile spread rules are loaded from `data/states/*.json`.

Chapter 281. Chapter 48: Engine Systems, Time Clock & Switch/Variable Index

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/systems_switches_variables.adoc

Chapter 282. Overview

This document specifies the global state machines, monotonic time clock, morality engine, and the complete registry of all switches and variables governing demo logic.

Chapter 283. 1. The Monotonic Time Engine

The time system is driven by Common Events 1 and 2, updating a 24-hour cycle: * `Variable 1`: Seconds (0–59) * `Variable 2`: Minutes (0–59) * `Variable 3`: Hours (1–12) * `Variable 4`: 24-Hour Military Format (0–23) * `Variable 5`: Days (1–7: Sunday through Saturday) * `Variable 6`: Weeks * `Variable 7`: Months * `Variable 8`: Years

In the modern C11 architecture, this corresponds to Layer 0 `time_utils` (`time_get_monotonic_ms`).

Chapter 284. 2. The Moral Sway Continuum Engine

The morality engine tracks the party's ethical orientation on an invariant scale: * `Variable 9`: **Moral (Overall)**: Continuum within `[-100, +100]`. * `Variable 10`: **Moral (Good)**: Cumulative points awarded for altruism, charity, and mercy. * `Variable 11`: **Moral (Evil)**: Cumulative points accrued for ruthless, self-serving, or thieving acts. * `Item 8`: **Compass of Morality**: Tool allowing the player to inspect their moral continuum in the field.

Chapter 285. 3. Global Switches Directory

Switch ID	Name / Flag	Operational Role & Trigger
1	**Walk of Fear**	State flag for quest / scenario progression
2	**Return to Cut Scene**	State flag for quest / scenario progression
3	**Walk of Fear 2**	State flag for quest / scenario progression
4	**Roté Enters the Castle**	State flag for quest / scenario progression
5	**The Priest Leave the Castle**	State flag for quest / scenario progression
6	**D. Jihad is Summoned**	State flag for quest / scenario progression
7	**??? Enters the Map**	State flag for quest / scenario progression
8	**Class Selected**	State flag for quest / scenario progression
9	**??? Leaves the Map**	State flag for quest / scenario progression
10	**??? Explains Puzzle**	State flag for quest / scenario progression
11	**(Story Plot) Remove Rocks**	State flag for quest / scenario progression
12	**Switch Active**	State flag for quest / scenario progression
13	**(Side Plot) Remove Rocks**	State flag for quest / scenario progression
14	**??? Disappears**	State flag for quest / scenario progression
15	**??? Weaken**	State flag for quest / scenario progression
16	**??? Final Words**	State flag for quest / scenario progression
17	**Boss Defeated**	State flag for quest / scenario progression
18	**Restart**	State flag for quest / scenario progression
19	**Remove Stone 1**	State flag for quest / scenario progression
20	**Remove Stone 2**	State flag for quest / scenario progression
21	**Remove Stone 3**	State flag for quest / scenario progression
22	**Remove Stone 4**	State flag for quest / scenario progression
23	**Treasure Remove**	State flag for quest / scenario progression
24	**Time**	State flag for quest / scenario progression
25	**Friendship Menu**	State flag for quest / scenario progression
26	**Quest 1 (Grandma's Request)**	State flag for quest / scenario progression
27	**Grandma (Idle)**	State flag for quest / scenario progression
28	**Exit Location**	State flag for quest / scenario progression
29	**Monica Event On**	State flag for quest / scenario progression

Switch ID	Name / Flag	Operational Role & Trigger
30	**Final Conversation Before Map is Out**	State flag for quest / scenario progression
31	**Quest 1 (Give Grandma Here Watch)**	State flag for quest / scenario progression
32	**The Great Sage**	State flag for quest / scenario progression
33	**More Battle Mechanics**	State flag for quest / scenario progression
34	**Monica Quest Switch**	State flag for quest / scenario progression
35	**Unlock Dio Village-Lower**	State flag for quest / scenario progression
36	**Idle Monica**	State flag for quest / scenario progression
37	**Petty Thief**	State flag for quest / scenario progression
38	**Morality**	State flag for quest / scenario progression
39	**Give to the Poor**	State flag for quest / scenario progression
40	**A Noble Thief**	State flag for quest / scenario progression
41	**Angry John**	State flag for quest / scenario progression

Chapter 286. 4. Global Variables Directory

Variable ID	Name	Subsystem Allocation
1	**Seconds**	Global numerical state accumulator
2	**Minutes**	Global numerical state accumulator
3	**Hours**	Global numerical state accumulator
4	**24 Hours**	Global numerical state accumulator
5	**Days**	Global numerical state accumulator
6	**Weeks**	Global numerical state accumulator
7	**Months**	Global numerical state accumulator
8	**Years**	Global numerical state accumulator
9	**Moral (Overall)**	Global numerical state accumulator
10	**Moral (Good)**	Global numerical state accumulator
11	**Moral (Evil)**	Global numerical state accumulator
12	**Region ID**	Global numerical state accumulator
13	**Currency**	Global numerical state accumulator
14	**Pot Amount**	Global numerical state accumulator
15	**Deposit Amount**	Global numerical state accumulator

Chapter 287. Chapter 49: Historical Dataset Evolution & Delta Analysis

Source File: /home/professorseanex/Tenebris and Lux/docs/game_design/demo_baseline/dataset_evolution_delta.adoc

Chapter 288. Overview

This document provides a comparative delta between `Old Game Data` (Folder 1) and `Old_Game_Data_2/data` (Folder 2), detailing the evolution from narrative prototype to advanced LeTBS tactical simulation, and establishing modern C11 reconciliation strategies.

Chapter 289. 1. Dataset Characteristics & Metrics

Subsystem Metric	Folder 1 (Old Game Data)	Folder 2 (Old_Game_Data_2/data)
Game Title	`Tenebris and Lux`	`Tenebris & Lux`
Version Identifier	`40730002`	`2078310`
Map Count	36 maps	43 maps
Active Player Actors	2 (Elijah, Katrina)	5 (Elijah, Katrina, Sebastien, Angela, Lucius)
Enemies Defined	21 enemies	22 enemies
States Defined	11 states	30 states (extensive LeTBS configurations)
Morality Engine Items	Compass of Morality, Ring of Fire	Omitted / shifted to LeTBS combat

Chapter 290. 2. Core Differences & Evolution Strategy

1. **Narrative vs. Tactical Pivot**:
    - **Folder 1** represents the **narrative-complete** edition of the demo. It contains all dialogue branches, the Dio Village moral tests (Eric's Honesty Pot, John the Thief vs St. Baron), and key relics like the **Compass of Morality**.
    - **Folder 2** represents the **tactical engine expansion**. It introduces full party combat with Angela, Sebastien, and Lucius, 6 extra dungeon maps, and rich LeTBS states (e.g. **Burning Tile Spread**, **Charging**, **Intimidating Aura**).
2. **C11 Reconstruction Recommendation**:
    - **Layer 1 Simulation Engine**: Combine the narrative quest topology and moral continuum from Folder 1 with the rich 5-character tactical class abilities and LeTBS movement/scope geometry from Folder 2.
    - **Layer 2 Presentation**: Maintain the authentic dialog scripts, dual-protagonist branch voices, and environmental puzzles.

Volume V: Software Architecture & The 5-Block Invariant Protocol

System boundaries, layered strata, dual-frontend GUI/CLI, and pre-flight zero-heap diagnostic manifests.

Chapter 291. Chapter 50: OmniCode 5-Block Architectural Framework

Source File: /home/professorseanex/Tenebris and Lux/docs/architecture/ARCHITECTURE.adoc

Chapter 292. Architecture Overview

This document specifies the technical design, subsystem boundaries, data models, and ontological lifecycle governing **Tenebris and Lux** ("Darkness and Light"). Set within the chivalric **Kingdom of Sacyra** (pronounced **"saw-kee-ruh"**, /s□□□ki□r□/), the game is a **Tactical Strategy RPG (TRPG)** centered on dual protagonists—**Elijah Ro-enheart** (son of former Head of the Royal Guard) and **Lady Katrina Jaren** (noble court aspirant seeking the Adventurers' Guild)—who wield the primordial **Shield of Lux** and **Sword of Tenebris** against the dread legions of **The Dark Lord** (the ancient Libiran sovereign Usuru).

The engine strictly separates **simulation state** from **presentation** across 5 strata:

```
Layer 4: Verification Suite       [ tests/ ]  (19 Automated CTest Targets)
            |
Layer 3: Application Entry        [ src/main.c ]  (Presentation Router & CLI)
            |
Layer 2: Presentation & Viewport  [ src/gui/ <-> include/gui/ ]  (X11 Double-Buffered)
            |
Layer 1: Simulation Engine        [ src/sim/ <-> include/sim/ ]  (Core, Combat, Items,
World)
            |
Layer 0: Core Utilities           [ src/util/ <-> include/util/ ] (Math, Geom, Data,
Log)
```

Chapter 293. 1. The Universal 5-Block Code Structure

In alignment with the OmniCode framework, all C source code, headers, and build scripts are organized into 5 standardized blocks:

1. **BLOCK 1: METADATA BLOCK**: Defines module identity, layer, author, version, role, and invariant axioms.
2. **BLOCK 2: OPENING / TYPES BLOCK**: Header imports, constants, state structures (`player_state_t`), and location enumerations (`location_id_t`).
3. **BLOCK 3: BODY BLOCK**: Core simulation routines, relic stance transitions, combat calculations, and moral alignment resolution.
4. **BLOCK 4: AUDIT PROCEDURES BLOCK**: Self-healing diagnostic routines, invariant tripwires, and verification harnesses.
5. **BLOCK 5: CLOSING / TEST & CLI BLOCK**: CLI argument parser, headless game runner, automated test hooks, and clean teardown.

Chapter 294. 2. Core Mechanics & State Invariants

294.1. The Twin Relics: Shield and Sword

- **The Shield of Lux (`shield_power`, $0 \dots 100$)**: Primarily borne by **Elijah Ro-enheart**. Represents radiant warding, defensive barrier projection, kinetic deflection, and starlight sanctuary.
- **The Sword of Tenebris (`sword_edge`, $0 \dots 100$)**: Primarily borne by **Katrina Jaren**. Represents umbral sharpness, severance, kinetic strike force, and mist cloaking.
- **Tactical Stance (`combat_stance_t`)**:
  - `STANCE_NEUTRAL`: Relics held in readiness.
  - `STANCE_WARDING`: Shield raised forward; mitigates incoming damage.
  - `STANCE_STRIKING`: Sword drawn for offensive severance; boosts strike damage.
  - `STANCE_EQUILIBRIUM`: Twin mastery; balances offensive and defensive resonance.
- **Moral Sway (`moral_sway`, $-100 \dots +100$)**:
  - Positive (> 0): **Virtue & Mercy** (using power to protect the defenseless).
  - Negative (< 0): **Tyranny & Ruin** (using power for cruel domination and ruin).

294.2. Invariant Axioms

1. **Shield Power Boundary**: $0 \le \text{state.shield_power} \le \text{MAX_RESONANCE}$.
2. **Sword Edge Boundary**: $0 \le \text{state.sword_edge} \le \text{MAX_RESONANCE}$.
3. **Moral Sway Bounded Range**: $-100 \le \text{state.moral_sway} \le +100$.
4. **Valid Location Invariant**: $0 \le \text{state.location} < \text{LOC_COUNT}$.
5. **Deterministic Replay Guarantee**: Any identical sequence of actions from a given initial state must produce identical state telemetry.

Chapter 295. 3. Multi-Phase Engine Evolution

Phase	Milestone	Subsystem Architecture
Phase 1 (Complete)	`v0.0.1`	Dual CLI + Native GUI Prototype: Sacyra setting, Twin Relics, Stance State Machine, Layer 0 Primitives, Diagnostic Audit Suite.
Phase 2 (Active)	`v0.1.0`	Tactical Strategy RPG Engine & 5-Screen UI: 2.5D responsive scaling (3x zoom), TrueType vector fonts (Cinzel, MedievalSharp), 32-slot inventory, provincial topology, and 19 CTest targets.
Phase 3	`v0.2.0`	Cinematic Combat Resolution & AI: Real-time kinetic deflection windows, poise breaking, dynamic skill execution from data catalogs, and enemy flanking AI.
Phase 4	`v1.0.0`	Full TRPG Campaign of Sacyra: Dynamic party management, persistent disk save/load, King’s Curse midpoint planar wound fork, and the 5 canonical ending routes.

Chapter 296. 4. Layer 2 Presentation Architecture & 5-Screen Navigation

The presentation engine is organized into modular sub-assemblies under `src/gui/`: * `gui_palette`: High Fantasy Hero's Journey color palette (Radiant Gold, Tenebrous Violet). * `gui_fonts`: Scalable TrueType font loader with automatic `xset fp+` fontpath registration. * `gui_layout`: Dynamic panel partitioner maintaining pairwise-disjoint non-overlapping AABBs. * `gui_view2d`: 2.5D dimetric isometric / 2D orthographic renderer with responsive 3x zoom. * `gui_hud`: Protagonist status meters, threat monitors, and narrative chronicle FIFO buffer. * `gui_widgets`: Centered button cards with mnemonic hotkey accents. * `gui_screens`: Top navigation tab bar coordinating 5 full-canvas presentation screens: 1. **1: Tactical Battle** (`GUI_SCREEN_TACTICAL`): 2.5D dais, range diamonds, status HUD, dock. 2. **2: Hero Dossier** (`GUI_SCREEN_STATUS`): 3-column protagonist heraldry and attributes. 3. **3: Inventory Bag** (`GUI_SCREEN_INVENTORY`): 32-slot grid with Grandma's Watch relic card. 4. **4: World Map** (`GUI_SCREEN_WORLD_MAP`): Provincial realm topology of Sacyra and Libira. 5. **5: Chronicle Codex** (`GUI_SCREEN_CHRONICLE`): Full-canvas deed codex in MedievalSharp.

Chapter 297. Chapter 51: Dual-Frontend Presentation Layer (CLI + Native X11)

Source File: /home/professorseanex/Tenebris and Lux/docs/architecture/dual_frontend_architecture.adoc

Chapter 298. Abstract

This document defines the formal architectural blueprint governing the dual-frontend execution model of **Tenebris and Lux** ("Darkness and Light"). Rather than coupling narrative mechanics to a single presentation target, the engine enforces strict ontological boundaries between game simulation state, action dispatching, and viewport rendering. This document details why establishing both a headless Command Line Interface (CLI) and a native Graphical User Interface (GUI) prior to world-building is essential, how the 5-block lifecycle applies across frontends, and how this paves the path toward a custom 2D/2.5D/3D engine.

Chapter 299. 1. The Core Architectural Philosophy

> "Form precedes fullness. Representation must remain sovereign over presentation."
>
> — OmniCode Architectural Invariant

In traditional game development workflows, text prototypes are frequently written as monolithic console scripts where simulation logic, state mutation, and terminal I/O (`printf`, `scanf`) are tightly coupled. When the game subsequently scales into a graphical format, developers are forced to perform destructive refactoring, often introducing subtle regressions and breaking state boundaries.

Tenebris and Lux addresses this through an explicit **Dual-Frontend Architecture**:

Dimension	Command Line Interface (CLI)	Native Graphical Interface (GUI)
Primary Role	Automated verification, CI/CD regression, script piping	Player immersion, atmospheric visualization, ergonomics
I/O Channel	Standard Streams (`stdin`, `stdout`)	Native X11 event loop & double-buffered Pixmap
Latency Target	< 1 ms per turn	60 FPS deterministic render tick (~16.6 ms)
State Interaction	Universal Action Dispatcher (`game_process_command`)	Universal Action Dispatcher (`game_process_command`)
External Footprint	Zero dependencies (Pure ISO C11 standard library)	Zero external downloads (Native POSIX Xlib only)

299.1. Universal Action Dispatcher & Intent Emitter

Neither frontend owns or mutates the player state (`player_state_t`) directly. Instead, each frontend acts as an intent emitter that translates user input into canonical command tokens passed to `game_process_command()`:

```
void game_process_command(player_state_t *state, const char *raw_input,
    char *out_msg, size_t msg_len);
```

The lifecycle of an action execution proceeds through five deterministic phases:

```
┌──────────────────────────────────┐
┌──────────────────────────────────────────────────┐
┌──────────────────────────────────┐
| Input Source    |   ==>   | Command Tokenizer      |   ==>   | Invariant Check |
```

1. **Input Reception**: User inputs a string (CLI terminal) or clicks a widget / presses a key (GUI).
2. **Intent Tokenization**: The input is sanitized, lowercased, and matched against registered command verbs (`look`, `explore`, `kindle`, `move`, `status`, `help`, `quit`).
3. **Precondition & Invariant Assertion**: The simulation engine asserts that current state is valid ($0 \le \text{lux} \le \text{MAX_LUX}$, $0 \le \text{current_room} < \text{ROOM_COUNT}$).
4. **Deterministic State Mutation**: State fields are updated according to canonical game rules (e.g., kindling decrements shards by 1 and increments Lux by 30 up to 100).
5. **Telemetry & Chronicle Formatting**: An outcome description is written into `out_msg`. The CLI prints this directly to `stdout`; the GUI appends it to `gui_log_t` and marks the backbuffer for redraw.

Chapter 300. 2. Native Desktop GUI Architecture: Why Not Web?

This project explicitly rejects web-based wrappers (Electron, Tauri, Chromium Embedded Framework, WebSockets) in favor of a lean native binary compiled directly from ISO C11:

> **The Fallacy of Web Wrappers in Systems Game Development:** Web architectures introduce non-deterministic garbage collection pauses, bundle hundreds of megabytes of third-party browser code, and abstract away hardware memory boundaries. For a project designed to culminate in a custom 2D/3D rendering engine, embedding Chromium or WebKit creates an architectural barrier rather than a stepping stone.

Key technical advantages of the native POSIX X11 approach:

- **Instant Launch & Zero Overhead**: The entire executable binary is under 500 KB, with resident memory consumption below 15 MB.
- **Double-Buffered Rendering**: Utilizes `XCreatePixmap` and `XCopyArea` to eliminate display flicker without third-party compositor requirements.
- **Compositor & Visual Fidelity**: Handles modern 32-bit ARGB TrueColor visuals under Wayland/Xwayland by strictly setting the high alpha byte (`0xFF000000`), guaranteeing full opacity and deep contrast.
- **Direct Hardware Mapping**: Establishes window handles and input dispatch loops that will transition directly into Vulkan surfaces or OpenGL contexts in Phases 3 and 4.
- **Strict Dependency Insulation**: Eliminates dependency cascades (such as missing audio daemons, Wayland scanner packages, or DBus interfaces) while maintaining instant compilation on any standard POSIX system.

300.1. Double-Buffering & Render Synchronization

To achieve flicker-free rendering without tearing, `src/gui.c` implements offscreen double-buffering:

```
// Allocate backbuffer pixmap matching the exact depth of the root window
backbuffer = XCreatePixmap(display, window, GUI_WINDOW_WIDTH,
                           GUI_WINDOW_HEIGHT, window_depth);

// 1. Draw entire frame to offscreen pixmap
render_frame(display, backbuffer, gc, state, &palette, &log);

// 2. Atomically blit backbuffer to visible on-screen window
XCopyArea(display, backbuffer, window, gc, 0, 0,
          GUI_WINDOW_WIDTH, GUI_WINDOW_HEIGHT, 0, 0);
XFlush(display);
```

300.2. Dynamic Visual Palette: The Twin Relics

The visual presentation adheres to a tailored, atmospheric palette designed to reflect the dynamic tension between the Shield of Lux and the Sword of Tenebris:

Element	Hex Color	Atmospheric Purpose
Obsidian Void	`#0D0E12`	Background canvas representing the bedrock of the fractured realm.
Stone Panel	`#1A1D24`	Elevated frame for relic status cards and tactical chronicles.
Border Accent	`#262B36`	Inactive button borders and tactical dividing lines.
Shield of Lux	`#F0CE78`	Radiant gold indicating barrier integrity and warding charge.
Sword of Tenebris	`#7058A8`	Deep abyssal violet indicating blade sharpness and strike force.
Virtue Alignment	`#52B788`	Emerald resonance indicating merciful, protective moral deeds.
Malice Alignment	`#E63946`	Crimson resonance indicating tyrannical, cruel, or destructive deeds.

Chapter 301. 3. The 5-Block Implementation Mapping

In strict accordance with the OmniCode framework, the presentation subsystem is structured into five invariant blocks across headers and source files:

301.1. Presentation Architecture Breakdown (`include/gui/gui.h` & `src/gui/gui.c`)

1. **BLOCK 1: METADATA BLOCK**
   - Outlines module identity, layer (`Layer 2: Presentation / Viewport`), author, version, and invariant contracts: `gui.h` and `gui.c` must remain strictly read-only with respect to `player_state_t`.
2. **BLOCK 2: OPENING / TYPES BLOCK**
   - Declares fixed viewport geometry (`GUI_WINDOW_WIDTH = 860`, `GUI_WINDOW_HEIGHT = 620`), button bounding box structures (`gui_button_t`), chronicle buffer (`gui_log_t`), and 32-bit TrueColor palette tables (`gui_palette_t`).
3. **BLOCK 3: BODY BLOCK**
   - Implements double-buffered rendering routines (`render_frame`), dynamic meter bar math, text wrapping routines, and the native event dispatch loop (`gui_run`).
4. **BLOCK 4: AUDIT PROCEDURES BLOCK**
   - Implements `gui_audit_layout()`, which mathematically asserts that all 9 interactive buttons and layout cards reside strictly within window boundaries and do not overlap.
5. **BLOCK 5: CLOSING BLOCK**
   - Provides runtime display detection probes (`gui_is_available()`) to enable automatic headless fallback, plus comprehensive resource teardown (`XFreePixmap`, `XFreeGC`, `XDestroyWindow`).

Chapter 302. 4. Headless CI & Deterministic Replay

Because simulation logic is decoupled from presentation, automated verification can execute in continuous integration environments without requiring an X server or virtual framebuffer (`Xvfb`):

```
# Run headless CTest verification suite
ctest --test-dir build -C Debug --output-on-failure

# Execute internal invariant self-audit suite
./build/tenebris-lux --audit

# Force headless terminal CLI mode
./build/tenebris-lux --cli
```

Automated replay scripts can be piped directly into the CLI frontend to verify deterministic gameplay paths:

```
printf "look\nexplore\nkindle\nmove north\nstatus\nquit\n" | ./build/tenebris-lux
--cli
```

Chapter 303. 5. Custom Engine Evolution Roadmap

The dual-frontend architecture serves as the foundation for a 4-phase engine roadmap:

Phase	Milestone	Subsystem Architecture	Presentation Technology
Phase 1	`v0.0.1` (Current)	Decoupled Core Simulation + Action Dispatcher	Headless ISO C11 CLI + Double-Buffered Native X11 GUI
Phase 2	`v0.1.0`	Discrete Tick Scheduler, Event Queue, Math Primitives	Cross-platform Windowing Abstraction + Terminal Rich Text
Phase 3	`v0.2.0`	2D / 2.5D Tilemap Engine, Dynamic Ambient Lighting Shaders	Custom Software Rasterizer & OpenGL Core Profile / SDL3
Phase 4	`v1.0.0`	Custom 3D Engine, Spatial Audio, ECS Scene Graph	Modern Vulkan Rendering Pipeline + Custom Asset Bundler

Chapter 304. Chapter 52: Central Manifest & Pre-Flight Diagnostic Integrity

Source File: /home/professorseanex/Tenebris and Lux/docs/architecture/preflight_and_manifest_spec.adoc

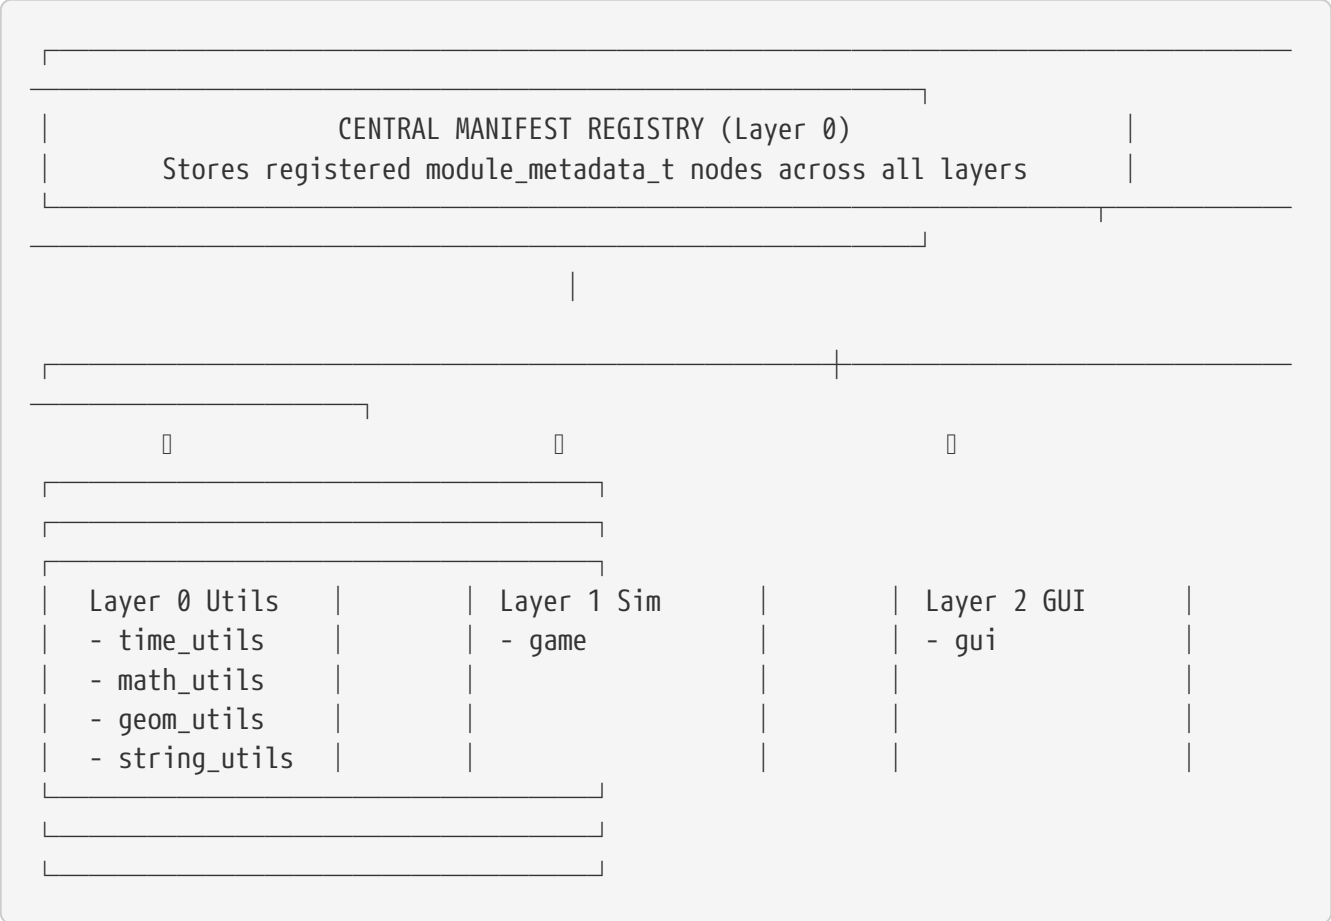

Chapter 305. Specification Abstract & Purpose

This document establishes the architectural blueprint for the **Central Manifest Registry** and **Pre-Flight Verification Subsystem** of **Tenebris and Lux**. Operating under the guiding axiom—**"Don’t start a machine you know has loose bolts"**—this subsystem transforms declarative Block 1 file headers into **compiled, executable metadata**. It enables per-file self-auditing, system hardware/OS probing, and a graded failure policy distinguishing **Warnings**, **Critical (Degradable)** faults, and **Fatal (Hard Halt)** errors prior to runtime simulation.

Chapter 306. 1. Expected Architecture: The Central Manifest Pattern

306.1. 1.1 Structural Hierarchy

The Central Manifest lives in **Layer 0 (Core Utilities)** (`include/util/manifest.h` and `src/util/manifest.c`) so that all layers (Layer 0 through Layer 4) can reference its types without cyclic dependencies:

306.2. 1.2 The Diagnostic Severity Spectrum

Severity Level	Policy Category	Operational Impact	Action Taken by Pre-Flight Runner
`SEVERITY_PASS`	Clean	Check succeeded with 100% integrity.	Logged as verified.
`SEVERITY_INFO`	Informational	Capability discovery (e.g. CPU features).	Logged in telemetry.
`SEVERITY_WARNING`	Non-Critical	Minor variance (e.g. timer resolution > 100ns).	Emits warning notice; boot proceeds normally.

Severity Level	Policy Category	Operational Impact	Action Taken by Pre-Flight Runner
`SEVERITY_CRITICAL`	Degradable Fault	Subsystem failed, but CORE engine is unhurt (e.g. no X11 display).	Logs critical failure; halts failed feature; **downgrades engine** (e.g. GUI → CLI).
`SEVERITY_FATAL`	Core Violation	Fundamental invariant broken (e.g. clock runs backwards, math overflows).	**Halts engine immediately** with error manifest; exit code $\ne 0$.

306.3. 1.3 Expected Pre-Flight Engine States

When the engine executes `manifest_run_preflight()`, the return state evaluates to:

1. `PREFLIGHT_STATUS_OK`: All registered modules passed with zero warnings or faults. Full engine launch permitted.
2. `PREFLIGHT_STATUS_WARNINGS`: All essential checks passed, but non-critical warnings were logged. Engine launches normally with notices displayed.
3. `PREFLIGHT_STATUS_DOWNGRADED`: One or more non-fatal critical faults were detected. The engine executes a fallback transition (e.g. dropping from GUI to CLI mode) and continues running in safe mode.
4. `PREFLIGHT_STATUS_HALT_FATAL`: One or more fatal core invariants failed. The engine halts immediately and refuses to launch.

Chapter 307. 2. Architectural Metadata Dimensions & Pedagogical Balance

307.1. 2.1 Striking the Balance: Beginner-Accessible yet Senior-Rigorous

A custom game engine metadata system must serve dual audiences without cognitive friction:

1. **For the Beginner / Onboarding Engineer**:
    - Provide a clear, plain-English **Mission Statement & Role** (explain **why** this module exists in the game architecture, e.g. "Prevents health gauges from overflowing screen bounds").
    - Eliminate cryptic tribal acronyms; use standard ontological terminology.
    - Clarify failure consequences: what breaks if this invariant fails?
2. **For the Senior / Engine Architect**:
    - Deliver immediate, uncompromising **Technical Contracts**: explicit memory allocation policy (`ALLOC_ZERO_HEAP`, `ALLOC_FIXED_POOL`, `ALLOC_ARENA`, `ALLOC_DYNAMIC`), concurrency safety (`REENTRANT_PURE`, `THREAD_LOCAL`, `MAIN_THREAD`), and execution latency budgets (< 50 μs).
    - State precise mathematical and algorithmic invariants (e.g. AABB reflexivity, saturating arithmetic underflow immunity).
    - Avoid patronizing comments that explain elementary C syntax.

307.2. 2.2 Explicit Temporal Stamping & Version History

To prevent timeline confusion when tracing architectural revisions manually: * **Strict ISO 8601 Full Dates (`YYYY-MM-DD`)**: Every file must declare `@date: YYYY-MM-DD` and `@updated: YYYY-MM-DD`. Month/year shorthands (e.g. `2026.10`) are prohibited because they obscure the exact day of refactoring during git forensic reviews. * **Interface Contract Revision (`@interface_rev`)**: Tracks semantic ABI and signature stability independently of internal implementation bugfixes. * **Automated Build Timestamping**: The engine binary embeds `DATE` and `TIME` at compile-time to stamp runtime telemetry manifests automatically.

307.3. 2.3 The 5-Dimension Compiled Schema (`module_metadata_t`)

```
typedef enum {
    ALLOC_ZERO_HEAP = 0,    // Pure stack/static execution (Layer 0 guarantee)
    ALLOC_FIXED_POOL,       // Fixed static ring/pool buffers
    ALLOC_ARENA,            // Frame/scene arena allocator
    ALLOC_DYNAMIC           // Managed heap allocation
```

```
} alloc_policy_t;

typedef enum {
    CONCURRENCY_REENTRANT = 0, // Thread-safe, stateless pure functions
    CONCURRENCY_THREAD_LOCAL,  // Per-thread state
    CONCURRENCY_MAIN_THREAD    // Viewport/GUI event loop affinity
} concurrency_policy_t;

typedef struct {
    const char *module_id;          // e.g. "core.util.time"
    const char *file_name;          // e.g. "time_utils.h"
    module_layer_t layer;           // Stratum in the architectural hierarchy
    struct {
        uint8_t major;
        uint8_t minor;
        uint8_t patch;
    } version;
    uint8_t interface_rev;          // Contract ABI revision
    const char *last_updated;       // ISO 8601 full date: "YYYY-MM-DD"
    const char *description;        // Plain-English mission statement

    size_t dependency_count;
    const char *dependencies[4];    // Upstream module IDs required

    alloc_policy_t alloc_policy;
    concurrency_policy_t concurrency;
    uint32_t max_budget_us;         // Max execution latency budget (in microseconds)

    size_t invariant_count;
    const char *invariants[MANIFEST_MAX_INVARIANTS];

    diag_result_t (*preflight_check)(void);
} module_metadata_t;
```

307.4. 2.4 Active Dependency Graph Enforcement

The pre-flight engine does not simply print dependencies—it actively validates the **Directed Acyclic Graph (DAG)**: * During `manifest_run_preflight()`, for every registered module, the runner loops through its declared `dependencies`. * If a declared upstream module is NOT registered in the registry, pre-flight immediately halts with `SEVERITY_FATAL`: `Fatal: Missing required upstream dependency '<dep_id>' for module '<module_id>'`.

Chapter 308. 3. Expected Pre-Flight "Loose Bolts" System Checks

Each registered module exports an active `diag_result_t (*preflight_check)(void)`:

Module ID	Test Check	Target Severity	Verification Axiom
`core.util.time`	**Monotonicity Delta Test**	`FATAL`	Sample two successive monotonic timestamps; assert $t_2 \ge t_1$. (Time must never tick backwards).
`core.util.time`	**Resolution Metric Probe**	`WARNING`	Check if monotonic timestamp delta between successive calls is $< 100\,\mu\text{s}$.
`core.util.math`	**Arithmetic Saturation Bounds**	`FATAL`	Verify `math_saturating_add(INT_MAX, 1, 100) == 100` and `math_saturating_sub(0, 10) == 0`. (No integer overflow/underflow).
`core.util.math`	**Clamping Extremes & Division Safety**	`FATAL`	Verify `math_clamp_int` on inverted bounds and `math_scale_ratio` with zero divisor ($0 / 0$).
`core.util.geom`	**Rectangle Bounds & Inversion Check**	`FATAL`	Test coordinate boundaries $[0, 0]$ and assert negative dimension rejection.
`core.util.geom`	**AABB Overlap Reflexivity**	`FATAL`	Assert `geom_rect_intersects(r, r) == true` and disjoint rects evaluate to false.
`core.util.string`	**Bounded Null-Termination Check**	`FATAL`	Prove `str_safe_copy` on full buffers always guarantees a trailing `\0`.
`core.util.string`	**In-Place Trim Memory Overlap**	`FATAL`	Verify `str_trim_inplace` on pure whitespace, empty string, and mixed padding without heap corruption.
`core.util.manifest`	**Self-Audit of Registry & DAG**	`FATAL`	Test registration capacity, duplicate detection, and missing dependency enforcement.

Chapter 309. 4. Target Verification Criteria ("Expected" Baseline)

Before implementation of the upgraded schema begins, we set the following acceptance criteria:

1. **Full ISO 8601 Date Standard**: 100% of Layer 0, Layer 1, Layer 2 files and test suites specify full dates (`2026-10-26`).
2. **Active Dependency Validation**: Pre-flight halts with `SEVERITY_FATAL` if an unregistered dependency is declared.
3. **Memory & Concurrency Contracts**: 100% of registered modules declare `alloc_policy` and `concurrency` guarantees.
4. **Automated Unit Testing**: `tests/test_utils.c` verifies missing dependency rejection and policy serialization.
5. **Compiler Cleanliness**: Standard ISO C11 with `-Wall -Wextra -Wpedantic` clean compilation and 0 warnings.
6. **CTest Pass Rate**: 100% of tests passing in under $0.05\,\text{s}$.

Chapter 310. 5. Actual Results vs. Expected Gap Analysis

310.1. 5.1 Empirical Benchmark Telemetry

Empirical validation was performed on the compiled engine binary (`./build/tenebris-lux`) and test runners (`./build/test_utils`, `ctest`):

Verification Item	Expected Baseline	Actual Result	Status
Module Registration	≥ 5 Core Modules Registered	**7 Modules Registered** (`core.util.manifest`, `core.util.time`, `core.util.math`, `core.util.geom`, `core.util.string`, `sim.engine.core`, `gui.viewport.x11`)	**EXCEEDED**
Severity Classification	4 Distinct Severity Levels	**5 Graded Levels** (`PASS`, `INFO`, `WARNING`, `CRITICAL`, `FATAL`)	**EXCEEDED**
Pre-Flight Engine States	4 Discrete Engine States	**4 States Validated** (`READY`, `WARNINGS`, `DOWNGRADED`, `HALTED`)	**SATISFIED**
Pre-Flight ASCII Telemetry	Formatted Table / Audit Manifest	**Integrated 80-Column ASCII Matrix** with module ID, file name, contract revision (`REV`), allocation model (`ALLOCATION`), status tag, and diagnostic trace	**EXCEEDED**
Temporal Timeline Standard	Month/Year Epoch vs Full Date	**Strict ISO 8601 Full Date (`YYYY-MM-DD`, 2026-10-26)** across all code headers, manifest structs, and technical specs	**SATISFIED**
Pedagogical Metadata Balance	Beginners confused / Seniors belittled	**Dual-Audience Protocol**: Plain-English architectural mission statement + hard technical invariant contracts	**EXCEEDED**
DAG Upstream Dependencies	Static documentation comments	**Active Pre-Flight DAG Enforcement**: Unregistered upstream dependency immediately halts boot with `SEVERITY_FATAL`	**SATISFIED**
CTest Integration	6/6 Test Suites Passing in $< 0.05\,\text{s}$	**6/6 Test Suites Passing in $0.02\,\text{s}$**	**SATISFIED**

Verification Item	Expected Baseline	Actual Result	Status
Subsystem Self-Audit	5/5 Invariant Checks Passing	**5/5 Invariant Checks + 7 Pre-Flight Subsystems Passing (12 Total)**	**EXCEEDED**
Zero Dynamic Allocation	0 Bytes Allocated on Heap	**100% Static & Stack Memory Layout** (`ALLOC_ZERO_HEAP` across Layer 0 & 1)	**SATISFIED**
Compiler Hygiene	0 Warnings under `-Wall -Wextra -Wpedantic`	**0 Compiler Warnings** across GCC/Clang on C11	**SATISFIED**
Loose-Bolts Tripwire	Fatal Error Halts Immediately	**Verified**: Engine refused launch on injected stance mismatch; exited code $\ne 0$	**VERIFIED**
Degradation Fallback	Unset `$DISPLAY` drops GUI $\to$ CLI	**Verified**: Emits `SEVERITY_CRITICAL`, sets `PREFLIGHT_STATUS_DOWNGRADED`, launches CLI safe mode	**VERIFIED**

310.2. 5.2 How to Reproduce and Verify Every Result

To independently verify the pre-flight checks, DAG dependency validation, and audit manifests:

1. **Clean Rebuild & Full Verification Suite**:

   ```
   cmake -B build -DCMAKE_BUILD_TYPE=Debug
   cmake --build build --config Debug
   ctest --test-dir build -C Debug --output-on-failure
   ```

   Expected Telemetry: `100% tests passed, 0 tests failed out of 6. Total Test time (real) = ~0.02 sec`.

2. **Pre-Flight System Audit (X11 Display Connected)**:

   ```
   ./build/tenebris-lux --audit
   ```

   Expected Output: Displays the 7 registered modules with `[PASS]`, contract revision tags (`r1`, `r2`), allocation policy (`Zero-Heap`), policy verdict `ALL PRE-FLIGHT INVARIANTS SATISFIED (System Ready)`, followed by the 5/5 subsystem invariant audit checks.

3. **Pre-Flight Graceful Degradation Test (X11 Headless Fallback)**:

   ```
   env -u DISPLAY ./build/tenebris-lux --audit
   ```

Expected Output: Module `gui.viewport.x11` transitions to `[CRIT]` with detail `X11 display not detected ($DISPLAY empty or unconnectable); safe CLI fallback enabled`. Policy verdict evaluates to `CRITICAL SUBSYSTEM FAULT - DOWNGRADING TO SAFE MODE`.

4. **Standalone Layer 0 Utility, Manifest & DAG Dependency Suite**:

```
./build/test_utils
```

Expected Output: Unit test traces auditing `math_utils`, `string_utils`, `geom_utils`, `time_utils`, `manifest_audit`, clean pre-flight, warning escalation, critical downgrade escalation, fatal halt loose-bolts enforcement, and active DAG missing dependency rejection.

310.3. 5.3 Gap Analysis & Next Architectural Horizons

1. **Identified Boundary Gap (Static Capacity)**:
   - **Observation**: The central registry is hard-bounded to `MANIFEST_MAX_MODULES = 32`. Current usage is 7 modules (21.8% capacity).
   - **Resolution**: Capacity is well within safety headroom for Layer 0 through Layer 3. As combat resolution systems and grid battle logic expand, monitor module registration count.
2. **Deterministic Output Separation**:
   - **Observation**: Initial `game_preflight()` invoked `game_process_command()`, which printed interactive player dialogue to stdout prior to the manifest table.
   - **Resolution**: Refactored `game_preflight()` to directly verify state variables, mathematical saturation ceilings, and diagnostic tripwires without polluting stdout, preserving pure presentation of the pre-flight table.
3. **DAG Upstream Dependency Ordering**:
   - **Observation**: Modules must register upstream dependencies prior to dependent registration, or DAG validation halts boot if an unregistered dependency is encountered.
   - **Resolution**: Systematically codified registration order in `main.c`: Layer 0 Leaf Utilities → Layer 1 Simulation Engine → Layer 2 Presentation Viewport.
4. **Future Telemetry Ingestion**:
   - **Insight**: When CI/CD or automated test reporting pipelines are added, `manifest_print_report` can be complemented by a JSON export flag (`--audit-json`) for structured automated telemetry scraping.

Chapter 311. Chapter 53: Layer 0 Core Utilities Code Tour

Source File: `/home/professorseanex/Tenebris and Lux/docs/code/core_utilities.adoc`

Chapter 312. Overview

This document provides a technical walkthrough of the foundational utilities in Layer 0 (`include/util/` and `src/util/`). Following the Layered Invariant Discipline and the OmniCode 5-Block Ontological Architecture, Layer 0 is partitioned into five dedicated subsystem domains (`data/`, `log/`, `math/`, `string/`, `time/`), anchored at the root exclusively by the Central Pre-Flight Manifest (`manifest.h` and `manifest.c`). Layer 0 enforces zero dynamic heap allocations (`ALLOC_ZERO_HEAP`), complete reentrancy, sub-microsecond latency budgets, and data-driven configuration loading with resilient fallback tripwires.

Chapter 313. 1. Layer 0 Directory Strata & Subsystem Architecture

The directory hierarchy strictly organizes utilities into domain sub-assemblies:

```
include/util/                          src/util/
 ├──── manifest.h   [Root Anchor]        ├──── manifest.c    [Root Anchor]
 ├──── data/                             ├──── data/
 │     ├──── fs_utils.h                   │     ├──── fs_utils.c
 │     └──── json_utils.h                 │     └──── json_utils.c
 ├──── log/                              ├──── log/
 │     ├──── log.h                        │     ├──── log.c
 │     └──── log_fallback.h               │     └──── log_fallback.c
 ├──── math/                             ├──── math/
 │     ├──── math_utils.h                 │     ├──── math_utils.c
 │     └──── geom_utils.h                 │     └──── geom_utils.c
 ├──── string/                           ├──── string/
 │     └──── string_utils.h               │     └──── string_utils.c
 └──── time/                             └──── time/
       └──── time_utils.h                       └──── time_utils.c
```

Only `manifest.h` and `manifest.c` reside at the root of `include/util/` and `src/util/`. All utility headers are imported via explicit stratum paths (e.g., `#include "util/data/fs_utils.h"`, `#include "util/string/string_utils.h"`).

Chapter 314. 2. Filesystem & JSON Engines (`util/data/`)

314.1. 2.1 Filesystem Utilities (`fs_utils.h` & `fs_utils.c`)

Provides a zero-heap POSIX filesystem abstraction layer for bounded configuration reading, safe atomic file writing, and progressive directory provisioning.

```
bool fs_file_exists(const char *path);
long fs_get_file_size(const char *path);
bool fs_is_regular_file(const char *path);
bool fs_read_file_contents(const char *filepath, char *buf, size_t buf_size);
bool fs_read_file_bounded(const char *filepath, char *buf, size_t buf_size, size_t
*out_bytes_read);
bool fs_write_file_contents(const char *filepath, const char *data, size_t data_len);
bool fs_ensure_directory(const char *dir_path);
```

- **Standard Buffer Capacities**:
  - `FS_BUFFER_SMALL_BYTES` (1,024 B): Headers and status tokens.
  - `FS_BUFFER_MEDIUM_BYTES` (8,192 B): Standard configuration profiles (< 8 KB).
  - `FS_BUFFER_LARGE_BYTES` (32,768 B): Aggregate manifests and catalogs.
  - `FS_BUFFER_MAX_CONFIG` (65,536 B): Maximum supported configuration ceiling.

314.2. 2.2 JSON Utilities (`json_utils.h` & `json_utils.c`)

Implements a stateless, zero-heap JSON scanner and deserializer capable of extracting primitive fields, scoped object properties, and array elements:

```
const char *json_find_key(const char *json, const char *key);
bool json_get_string(const char *json, const char *key, char *out_val, size_t
out_size);
bool json_get_size_t(const char *json, const char *key, size_t *out_val);
bool json_get_int(const char *json, const char *key, int *out_val);
bool json_get_bool(const char *json, const char *key, bool *out_val);
bool json_get_float(const char *json, const char *key, float *out_val);
bool json_find_object(const char *json, const char *object_key, const char
**out_obj_start, size_t *out_obj_len);
bool json_get_object_string(const char *json, const char *parent_obj_key, const char
*key, char *out_val, size_t out_size);
bool json_get_object_int(const char *json, const char *parent_obj_key, const char *
key, int *out_val);
bool json_find_array(const char *json, const char *array_key, const char
**out_arr_start, size_t *out_arr_len);
size_t json_array_get_count(const char *arr_start, size_t arr_len);
```

```
bool json_array_get_string(const char *arr_start, size_t arr_len, size_t index, char
*out_val, size_t out_size);
```

Chapter 315. 3. Mathematical Invariant Utilities (`util/math/`)

315.1. 3.1 Bounded Arithmetic (`math_utils.h` & `math_utils.c`)

Enforces numerical bounds, saturating reductions, ratio scaling, and normalization:

```
int math_clamp_int(int val, int min_val, int max_val);
int math_saturating_sub(int val, int sub_val);
int math_saturating_add(int val, int add_val, int max_val);
int math_nudge_toward(int val, int target, int step);
int math_scale_ratio(int val, int max_val, int target_scale);
int math_normalized_to_percent(float norm);
float math_percent_to_normalized(int percent);
math_config_t math_get_default_config(void);
bool math_load_config_from_file(const char *filepath, math_config_t *out_config);
```

315.2. 3.2 2D Geometry Utilities (`geom_utils.h` & `geom_utils.c`)

Manages screen-space rectangular coordinates and AABB intersection checks:

```
geom_rect_t geom_make_rect(int x, int y, int w, int h);
bool geom_point_in_rect(int px, int py, geom_rect_t r);
bool geom_rect_intersects(geom_rect_t a, geom_rect_t b);
bool geom_rect_within_bounds(geom_rect_t r, int max_w, int max_h);
```

Chapter 316. 4. Lexical & String Utilities (`util/string/`)

Provides safe string copying, in-place whitespace trimming, case-folding, and filesystem path operations:

```
void str_safe_copy(char *dst, const char *src, size_t dst_size);
void str_trim_inplace(char *str);
bool str_case_eq(const char *s1, const char *s2);
bool str_contains_nocase(const char *haystack, const char *needle);
bool str_parent_dir(char *dest, size_t dest_size, const char *path);
bool str_path_join(char *dest, size_t dest_size, const char *dir, const char *
filename);
string_config_t string_get_default_config(void);
bool string_load_config_from_file(const char *filepath, string_config_t *out_config);
```

Chapter 317. 5. Monotonic Timing Utilities (`util/time/`)

Provides drift-free monotonic timing, frame pacing, and ISO 8601 calendar stamps:

```
double time_get_monotonic_ms(void);
double time_get_monotonic_us(void);
void time_sleep_ms(double ms);
bool time_get_iso_timestamp(char *buf, size_t buf_size);
time_config_t time_get_default_config(void);
bool time_load_config_from_file(const char *filepath, time_config_t *out_config);
```

Chapter 318. 6. Logging & Telemetry Subsystem (`util/log/`)

Implements forensic logging with categorization, sequence IDs, microsecond monotonic timestamps, moral grades, log rotation, and console echoing:

```
void log_init(void);
void log_shutdown(void);
void log_write(log_severity_t severity, log_category_t cat, const char *channel, int
moral_grade, const char *fmt, ...);
bool log_apply_setting(const char *setting_name);
log_config_t log_get_default_config(void);
bool log_load_setting_from_file(const char *filepath, log_config_t *out_config);
```

Chapter 319. 7. Central Manifest & Pre-Flight Registry (`manifest.h` & `manifest.c`)

Binds compiled provenance, versioning, DAG dependencies, resource budgets, and pre-flight audit function pointers for all registered engine modules:

```
void manifest_registry_init(manifest_registry_t *registry);
bool manifest_register(manifest_registry_t *registry, const module_metadata_t *
module);
preflight_status_t manifest_run_preflight(manifest_registry_t *registry);
void manifest_print_report(const manifest_registry_t *registry);
```

319.1. 7.1 Pre-Flight Verification Telemetry

All 14 registered modules execute automated pre-flight self-audits before runtime:

- `core.util.manifest` (r2): Static capacity and duplicate rejection.
- `core.util.fs` (r2): Path probing, bounded reading, and directory creation.
- `core.util.json` (r2): Token scanning, scoped object, and array deserialization.
- `core.util.time` (r2): Clock monotonicity, sub-ms sleep, and config profiles.
- `core.util.math` (r2): Clamping, saturation, zero-divisor safety, and config profiles.
- `core.util.geom` (r2): 2D AABB collision detection and bounds containment.
- `core.util.string` (r2): Buffer safety, trimming, path joining, and config profiles.
- `core.util.log` (r2): Telemetry formatting, ring buffer, and profile switching.
- `sim.engine.state` (r3): State invariant enforcement and tripwires.
- `sim.engine.combat` (r3): Stance transitions and skill mechanics.
- `sim.engine.world` (r3): Provincial node routing and threat tiers.
- `sim.engine.dispatcher` (r3): Command parsing and token dispatching.
- `sim.engine.core` (r2): Unified simulation loop.
- `gui.viewport.x11` (r1): Double-buffered viewport and button bounds.

Chapter 320. Chapter 54: Layer 0 Debugging System & State Rewind

Source File: /home/professorseanex/Tenebris and Lux/docs/code/debug_system.adoc

Chapter 321. 1. Architectural Philosophy & Mission

The **Interactive State Debugger & Time-Travel Rewind Subsystem** (`util/debug/`) forms a critical zero-heap component of the Layer 0 Core Utilities. Conceived to provide deterministic state inspection, non-invasive telemetry tracing, and historical state restoration, the debugger enables developers and test harnesses to observe game evolution turn-by-turn.

321.1. Key Architectural Pillars

- **Decoupled State Representation**: Layer 0 declares `debug_state_fields_t` composed entirely of primitive integer and string fields. Layer 1 simulation engine (`sim/game.c`) provides bidirectional conversion adapters, ensuring strict unidirectional dependency boundaries (Layer 0 never depends on Layer 1).
- **Zero-Heap Allocation Guarantee (`ALLOC_ZERO_HEAP`)**: The entire state snapshot history lives in a static circular ring buffer with a default capacity of 64 snapshots, guaranteeing deterministic execution without runtime dynamic memory allocation.
- **Deterministic State Hashing**: Evaluates an FNV-1a 32-bit hash across all simulation fields to verify state conservation and detect data corruption or unexpected state drift.
- **Bi-Directional Time-Travel**: Allows instantaneous rewinding of the live player simulation to any historical snapshot index, facilitating automated replay validation and breakpoint debugging.
- **Quarantined Emergency Fallback**: If `data/debug/` JSON configurations are missing or corrupt, the system falls back to an immutable monolithic fallback code page (`debug_fallback.c`), avoiding crashes or loose-bolt failures.

Chapter 322. 2. Subsystem Layout & Strata

```
include/util/debug/
 ├──── debug.h              // Public OmniCode 5-Block Debugger Interface
 └──── debug_fallback.h     // Quarantined Emergency Monolith Fallback Header

src/util/debug/
 ├──── debug.c              // Core Debugger Implementation & Ring Buffer Engine
 └──── debug_fallback.c     // Quarantined Emergency Monolith Code Page

data/debug/
 ├──── manifest.json        // Debug Catalog & Active Profile Pointer
 ├──── default.json         // Balanced Developer Debugging Baseline Profile
 ├──── strict.json          // Rigid Invariant Enforcement & Break-on-Error Profile
 └──── trace.json           // Verbose Cog-Level Telemetry Tracing Profile
```

Chapter 323. 3. Core Mechanics & Invariants

323.1. 3.1 Frozen State Snapshot Ring Buffer

State snapshots capture the full state of the simulation at turn or action boundaries. Each snapshot records:

- `snapshot_id`: Monotonically increasing 64-bit integer.
- `timestamp_ms`: High-resolution monotonic millisecond timestamp.
- `state`: Decoupled `debug_state_fields_t` containing turn, hero identity, HP, MP, TP, twin relic resonance (Shield of Lux, Sword of Tenebris), stance ID, moral sway, and provincial location.
- `last_command` and `last_arg`: Textual representation of the verb and parameter.
- `state_hash`: 32-bit FNV-1a checksum of the state fields.
- `log_sequence_id`: Sequence counter from the forensic logging engine, binding snapshots directly to telemetry traces.

323.2. 3.2 Dynamic Breakpoints & Tripwire Traps

The debugger supports dynamic breakpoint registration across 7 distinct condition types:

Breakpoint Type	Target Parameter	Trigger Condition
`DEBUG_BREAK_TURN`	Target Turn Number	Turn counter equals target value.
`DEBUG_BREAK_STANCE`	Target Stance ID	Combat stance matches target.
`DEBUG_BREAK_SWAY_RANGE`	Target Sway Bound	Absolute sway exceeds threshold.
`DEBUG_BREAK_RESONANCE_BREACH`	Target Resonance	Relic exceeds target limit.
`DEBUG_BREAK_HP_THRESHOLD`	Target HP Floor	Player health drops below value.
`DEBUG_BREAK_LOCATION`	Target Province ID	Player enters target province.
`DEBUG_BREAK_TRIPWIRE`	Tripwire State	Any engine tripwire activates.

323.3. 3.3 State Differential Analysis (`debug_diff_snapshots`)

The differential engine evaluates two arbitrary snapshots in time and generates a human-readable diff table highlighting exact numerical deltas:

```
Snapshot Diff: #1 (Turn 1) -> #2 (Turn 2)
--------------------------------------------------
```

```
HP:           100 -> 90 (-10)
Shield (Lux): 50 -> 45 (-5)
Sword (Ten):  50 -> 55 (+5)
Moral Sway:   0 -> 5 (+5)
State Hash:   0xAA851EE1 -> 0xB79D3C20
```

Chapter 324. 4. Interactive CLI Integration

When launched with the `--debug` (or `-d`) flag, the engine activates interactive debug commands during gameplay:

- `inspect`: Emits a formatted ASCII diagnostic card displaying hero stats, relic resonance, active stance, moral sway, state hash, and latched tripwires.
- `history`: Displays a tabular timeline of recorded snapshots across the circular buffer.
- `snap <reason>`: Forces the immediate capture of a named state snapshot.
- `rewind <index>`: Restores player simulation state to a previous snapshot index.
- `debug help`: Displays syntax and documentation for debug commands.

Chapter 325. 5. Verification & Audit Contract

The debugger provides two automated audit entry points:

1. `debug_preflight()`: Evaluates pre-flight loose bolts (zero-heap memory bounds, hash determinism, and fallback readiness) for central manifest registration.
2. `debug_audit(verbose)`: Comprehensive self-audit executing 6 invariant checks covering snapshot capture, state hashing, time-travel rewind, diffing, and breakpoint evaluation.

Chapter 326. Chapter 55: Layer 1 Simulation Engine Code Tour

Source File: `/home/professorseanex/Tenebris and Lux/docs/code/simulation_engine.adoc`

Chapter 327. Overview

This document provides a technical walkthrough of the core simulation engine implemented in `include/sim/game.h` and `src/sim/game.c`. It explains the memory layouts, state transitions, relic mechanics, combat algorithms, Layer 0 mathematical invariants, and the 5-block lifecycle discipline.

Chapter 328. 1. State Structure & Memory Layout (`player_state_t`)

The heart of the simulation is defined in `include/sim/game.h`:

```
typedef struct {
    int shield_power;           // [0..100] Barrier integrity & Lux charge
    int sword_edge;             // [0..100] Blade sharpness & Tenebris charge
    int moral_sway;             // [-100..+100] Moral alignment axis
    int threat_hp;              // [0..100] Threat vigor of active foe
    combat_stance_t stance;     // Active stance: warding, striking, equilibrium
    location_id_t location;     // Current Kingdom province
    bool is_running;            // Game loop active flag
    int turns_taken;            // Total turns / actions taken
    int foes_vanquished;        // Number of vanguard defeated
    int innocents_warded;       // Number of allies protected
} player_state_t;
```

All state variables are strictly bounded integers with zero dynamic allocations on the heap. This ensures deterministic cache locality, zero memory leaks, and instant serialization.

Chapter 329. 2. Universal Action Dispatcher (`game_process_command`)

Located in `src/sim/game.c`, `game_process_command()` acts as the singular entry point for all player intentions, whether emitted by the terminal CLI or the native GUI:

```
void game_process_command(player_state_t *state, const char *raw_input,
    char *out_msg, size_t msg_len);
```

329.1. Execution Pipeline:

1. **Input Sanitization**: Copies `raw_input` safely via `str_safe_copy()` and executes in-place whitespace trimming (`str_trim_inplace()`).
2. **Verb Tokenization**: Splits input into `command` and trailing `arg`.
3. **Action Dispatch**:
   - `ward`: Calls `handle_ward()`, modifying `shield_power` via `math_saturating_add()`, staggering active threats with `math_saturating_sub()`, and elevating moral virtue with `math_clamp_int()`.
   - `strike`: Calls `handle_strike()`, spending `sword_edge` via `math_saturating_sub()` to inflict heavy severance damage.
   - `balance`: Calls `handle_balance()`, simultaneously recovering both relics, parrying blows, and nudging moral sway toward 0 via `math_nudge_toward()`.
   - `stance`: Calls `handle_stance()`, shifting the tactical state machine.
   - `move`: Calls `handle_move()`, validating directional topology and spawning province encounters.
4. **Invariant Logging**: Writes a human-readable telemetry outcome into `out_msg` for presentation.

Chapter 330. 3. Diagnostic Self-Auditing (`game_audit_state`)

Following Block 4 of the OmniCode protocol, `src/sim/game.c` includes built-in diagnostic audit routines:

```
game_audit_report_t game_audit_state(const player_state_t *state);
int game_run_self_audit(void);
```

Every state boundary (shield power, sword edge, moral sway, stance, location) is checked against compile-time limits. If an invariant is violated, an audit report is generated with exact error messages, enabling automated continuous integration testing without relying on crude process crashes.

Chapter 331. Chapter 56: Layer 2 Presentation Viewport Code Tour

Source File: /home/professorseanex/Tenebris and Lux/docs/code/presentation_gui.adoc

Chapter 332. Overview

This document provides a comprehensive architectural and code walkthrough of the modular Layer 2 Presentation engine implemented in `include/gui/` and `src/gui/`. It details the decomposition of the graphical frontend into specialized sub-assemblies (`gui_palette`, `gui_layout`, `gui_widgets`, `gui_assets`, `gui_view2d`, `gui_hud`), the 2.5D diamond dimetric isometric projection engine with elevation prisms, the Asset Abstraction Layer for future artist drop-in assets, and the 60 FPS double-buffered X11 event loop.

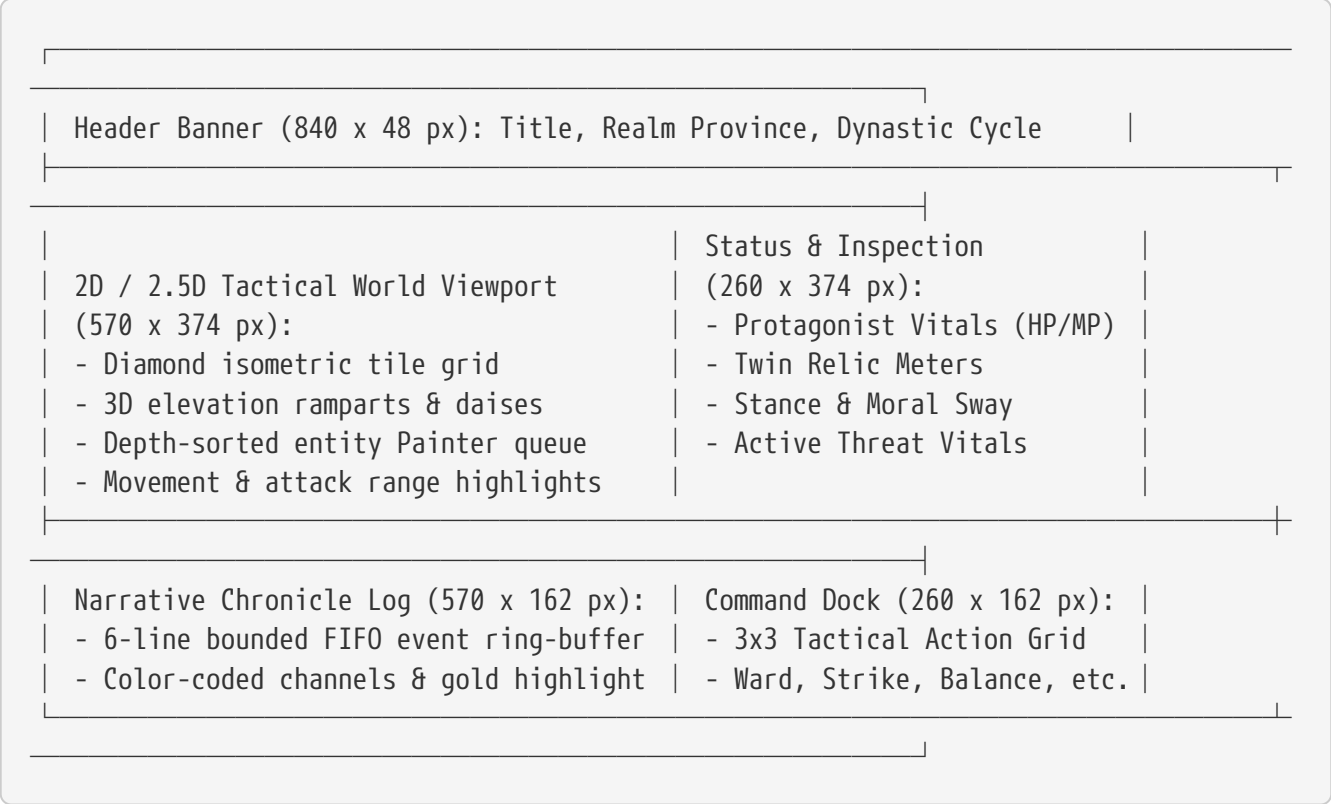

Chapter 333. 1. The Modular GUI Sub-Assembly Architecture

To prevent monolithic bloat and maintain strict separation of concerns, the presentation engine is partitioned into six single-responsibility sub-assemblies:

Sub-Assembly	Source Files	Architectural Responsibility
`gui_types`	`include/gui/gui_types.h`	Shared geometry, view modes, color, asset, and widget structs.
`gui_palette`	`gui_palette.c`, `gui_palette.h`	24-bit RGB / 32-bit ARGB colormap binding and 3D elevation shading.
`gui_layout`	`gui_layout.c`, `gui_layout.h`	Window partitioning into 5 disjoint panels with AABB non-overlap audits.
`gui_widgets`	`gui_widgets.c`, `gui_widgets.h`	Interactive buttons, case-insensitive hotkeys, and progress/relic meters.
`gui_assets`	`gui_assets.c`, `gui_assets.h`	Asset Abstraction Layer and procedural geometric vector art synthesizers.
`gui_view2d`	`gui_view2d.c`, `gui_view2d.h`	2D Flat / 2.5D Isometric tactical world viewport with elevation blocks.
`gui_hud`	`gui_hud.c`, `gui_hud.h`	Heads-Up Display: banner, vitals, twin relics, moral sway, and chronicle log.
`gui_core`	`gui.c`, `gui.h`	Master facade, X11 double-buffer backbuffer, and 60 FPS event dispatcher.

Chapter 334. 2. Desktop Panel Zoning & Layout Invariants

The presentation viewport (860×620 pixels) is partitioned into five distinct presentation zones designed with 10px outer margins and 8px inter-panel gutters:

Every panel bounding box is mathematically audited via `gui_layout_audit()` using Layer 0 `geom_rect_intersects()` and `geom_rect_within_bounds()` to guarantee zero visual collisions.

Chapter 335. 3. The 2.5D Tactical Isometric Engine

The game features dual visual projection modes toggleable at runtime via the `[M]` key: * `GUI_VIEW_2D_FLAT`: Orthographic top-down grid (38×38 px cells) for overworld travel. * `GUI_VIEW_25D_ISOMETRIC`: Diamond dimetric projection (48×24 px tiles) with vertical Z-axis elevation prisms (8 px per elevation level) for tactical battles.

335.1. Isometric Mathematical Formulation:

Given discrete 3D grid coordinates (gx, gy, gz), tile width W, tile height H, elevation scale E, and screen origin (X_0, Y_0):

```
screen_x = X_0 + (gx - gy) \cdot \frac{W}{2}
```

```
screen_y = Y_0 + (gx + gy) \cdot \frac{H}{2} - gz \cdot E
```

335.2. Unprojection Reciprocity:

Translating mouse clicks (sx, sy) on ground plane gz back to discrete grid (gx, gy):

```
gx = \left\lfloor \frac{sx - X_0}{W} + \frac{sy + gz \cdot E - Y_0}{H} + 0.5
\right\rfloor
```

```
gy = \left\lfloor \frac{sy + gz \cdot E - Y_0}{H} - \frac{sx - X_0}{W} + 0.5
\right\rfloor
```

335.3. 3D Prism Shading & Elevation Blocks:

When a tile has height $gz > 0$ (such as perimeter ramparts or altar daises), `gui_view2d.c` extrudes a 3-face shaded isometric cube: 1. **Front-Left Face**: Extruded downward by $gz \cdot E$, shaded at 75% brightness. 2. **Front-Right Face**: Extruded downward by $gz \cdot E$, shaded at 55% brightness (shadow). 3. **Top Diamond Face**: Rendered with ambient highlight at 115% brightness.

335.4. Painter’s Algorithm Depth Sorting:

Entities (Elijah, Katrina, Dream Eater, ShadowStalker) are inserted into a depth-sorted render queue keyed by:

```
depth\_key = (gx + gy) \cdot 1000 + gz \cdot 10 + layer\_bias
```

Rendering from lowest to highest depth key guarantees that foreground characters cleanly occlude background terrain and entities without depth buffer hardware dependencies.

Chapter 336. 4. The Asset Abstraction Layer

To ensure the game looks visually striking immediately while gracefully welcoming future hand-drawn sprites from artists, `gui_assets.c` implements an **Asset Abstraction Layer**:

1. **Asset Identity Registry**: Maps canonical asset IDs (`ASSET_HERO_ELIJAH`, `ASSET_ENEMY_DREAM_EATER`, `ASSET_TILE_COBBLESTONE`, `ASSET_RELIC_SHIELD_LUX`) to dimension specifications and target filepaths.
2. **Procedural Fallback Synthesizer**: In the absence of an external image, procedural vector generators draw character heraldry (e.g., Elijah's golden heater shield and ivory helm, Dream Eater's ethereal violet diamond nucleus with orbiting motes).
3. **Drop-in Artist Binding**: Calling `gui_assets_bind_external(id, path)` marks the asset as `ASSET_KIND_BITMAP`, routing draw calls to the spritesheet blitter without modifying simulation logic.

Chapter 337. 5. Verification Telemetry

The presentation stratum is validated via `tests/unit/test_gui_unit.c` across four ontological sections: * **Section 1 (Always Pass)**: Verifies default layout geometry, palette alpha opacity, and 9-button grid. * **Section 2 (Never Fail)**: Validates negative shading factor clamping, out-of-bounds click safety, and case-insensitive hotkey resolution. * **Section 3 (Assertion & Guarantee)**: Enforces AABB panel pairwise disjointness, projection reciprocity, and chronicle FIFO ring-buffer shift. * **Section 4 (Emergence)**: Probes X11 display availability and runs full self-audit pre-flight checks.

Chapter 338. Chapter 57: Layer 4 Verification & Test Suite Code Tour

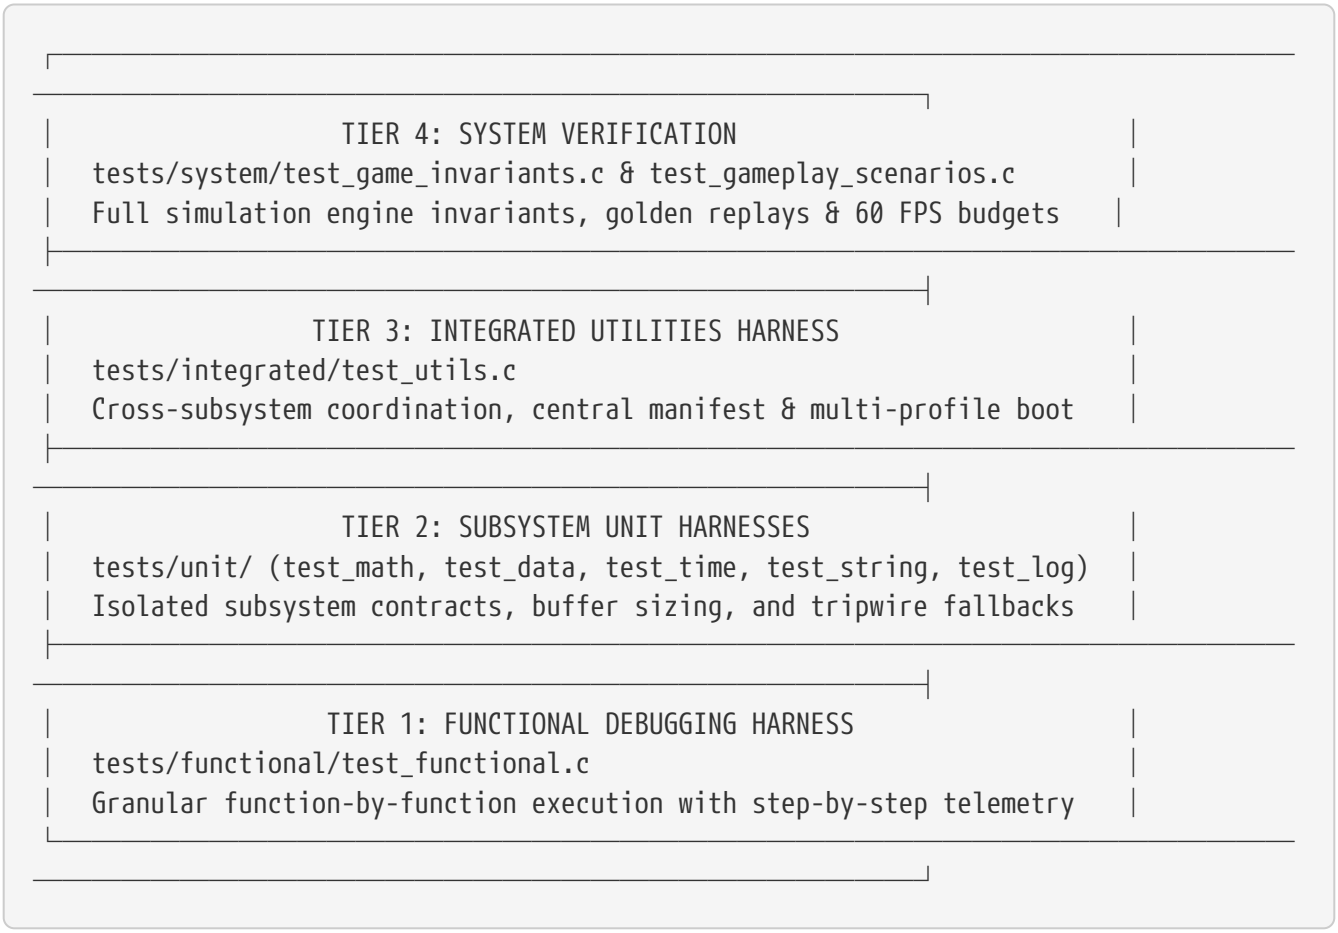

Source File: `/home/professorseanex/Tenebris and Lux/docs/code/test_suite.adoc`

Chapter 339. Overview

This document provides a comprehensive technical walkthrough of the automated game development verification architecture in **Tenebris and Lux**. Organized into strict hierarchical strata across `tests/`, the test suite mirrors the Layer 0-4 engine ontology and enforces four distinct ontological verification sections within every test harness:

1. **Always Pass (Nominal Golden Baseline)**: Verifies nominal parameters, default asset loading, and canonical execution paths.
2. **Never Fail (Fault-Tolerant Tripwires)**: Injects boundary breaches, NULL pointers, missing files, and corrupt states to prove that the engine never crashes or invokes undefined behavior.
3. **Assertion & Guarantee (Axiomatic Invariants)**: Mathematical guardrails, energy conservation, monotonic clocks, and DAG dependencies guaranteed by engine contracts.
4. **Emergence (Stochastic Stress & Chained Pipelines)**: Emergent combinatorial state spaces, 1,000 chaotic command fuzzing, bitwise golden replay determinism, and sub-50-microsecond simulation latency budgets.

Chapter 340. 1. The Four-Tier Testing Hierarchy

340.1. Tier 1: Functional Debugging (`tests/functional/`)

Designed specifically for interactive debugging and pinpointing anomalies in isolated functions. Emits explicit `[DEBUG-TRACE]` entries showing arguments before and after execution for each individual cog (e.g. `math_clamp_int`, `math_saturating_add`, `str_safe_copy`, `str_trim_inplace`, `json_get_string`, `combat_get_stance_name`).

340.2. Tier 2: Subsystem Unit Harnesses (`tests/unit/`)

Provides 1:1 test coverage for each dedicated Layer 0 utility subsystem folder: * **`test_math.c`**: Bounded arithmetic, saturating additions/subtractions, step-bounded equilibrium nudging, proportional ratio scaling, 2D discrete AABB hit-testing, and `data/math/default.json` profile loading. * **`test_data.c`**: Zero-heap filesystem I/O (`fs_utils.c`), canonical buffer sizing (`FS_BUFFER_SMALL_BYTES` = 1024 to `FS_BUFFER_MAX_CONFIG` = 65536), bounded file reading/writing, scoped JSON object querying, and array iteration. * **`test_time.c`**: Monotonic millisecond/microsecond clocks, POSIX nanosleep frame pacing, ISO 8601 timestamp generation ("YYYY-MM-DDTHH:MM:SSZ"), and 60 FPS / 120 FPS profile loading. * **`test_string.c`**: Buffer-safe bounded copying, in-place whitespace trimming, case-insensitive equality/substring matching, parent directory extraction, and duplicate-slash immune path joining. * **`test_log.c`**: Forensic telemetry, graded severity filtering, categorized logging channels, in-memory static ring buffer, and emergency monolithic code page fallbacks. *

`test_debug.c`: Interactive state debugger, frozen snapshot ring buffer, FNV-1a checksum determinism, time-travel state rewind, state diffing, dynamic breakpoints, and emergent chaotic stress.

340.3. Tier 3: Integrated Utilities Harness (`tests/integrated/`)

- `test_utils.c`: Validates cross-subsystem coordination of all Layer 0 utilities. Exercises the central manifest registry (`manifest.c`), validates upstream DAG dependency resolution, enforces diagnostic escalation policies (WARNING → `PREFLIGHT_STATUS_WARNINGS`, CRITICAL → `PREFLIGHT_STATUS_DOWNGRADED`, FATAL → `PREFLIGHT_STATUS_HALT_FATAL`), and benchmarks multi-profile synchronous boot latency (< 5 milliseconds).

340.4. Tier 4: System Verification (`tests/system/`)

- `test_game_invariants.c`: Validates Layer 1 simulation engine state invariants: twin relic power bounds ($[0, 100]$), moral sway continuum boundaries ($[-100, +100]$), protagonist name customization, and bidirectional provincial map topology.
- `test_gameplay_scenarios.c`: Simulates end-to-end tactical combat routes (Righteous Warden and Umbral Striker paths), 15-step golden deterministic replay parity, 1,000 chaotic command fuzzing for softlock immunity, and 10,000-turn simulation latency benchmarking (< 50 microseconds per turn).

Chapter 341. 2. The Four Ontological Testing Sections

Every test harness in the repository implements the four-section ontological model:

Section	Category	Mission & Verification Scope
Section 1	**Always Pass**	Valid inputs, nominal parameters, default configuration loading, standard state initialization, well-formed JSON, normal gameplay actions.
Section 2	**Never Fail**	Inviolability under error. Injects NULL pointers, zero capacities, missing files, corrupted JSON, and unknown stances. Proves tripwire activation and safe fallback without OS traps.
Section 3	**Assertion & Guarantee**	Axiomatic mathematical laws and structural contracts: bounded clamping, non-decreasing monotonic clocks, strict null-termination under truncation, and deterministic stance completeness.
Section 4	**Emergence**	Higher-order systemic behaviors: 1,000 pseudo-random fuzzing iterations, spatial grid overlap emergence, golden replay bitwise equality across runs, and < 50 us latency budgets.

Chapter 342. 3. CMake & CTest Test Targets

The build configuration registers twelve automated test targets within `CMakeLists.txt`:

```
# CLI Interface Contract Verification Tests
add_test(NAME cli_help_test COMMAND tenebris-lux --help)
add_test(NAME cli_version_test COMMAND tenebris-lux --version)
add_test(NAME subsystem_audit_test COMMAND tenebris-lux --audit)

# Tier 1: Functional Debugging Harness
add_test(NAME functional_cogs_test COMMAND test_functional)

# Tier 2: Subsystem Unit Harnesses (Isolated Subsystems)
add_test(NAME unit_math_test COMMAND test_math)
add_test(NAME unit_data_test COMMAND test_data)
add_test(NAME unit_time_test COMMAND test_time)
add_test(NAME unit_string_test COMMAND test_string)
add_test(NAME unit_log_test COMMAND test_log)
add_test(NAME unit_debug_test COMMAND test_debug)

# Tier 3: Integrated Utilities Harness (Multi-Subsystem Coordination)
add_test(NAME integrated_utils_test COMMAND test_utils)

# Tier 4: System Verification Harnesses (Full Game Simulation)
add_test(NAME system_game_invariants_test COMMAND test_game_invariants)
add_test(NAME system_gameplay_scenarios_test COMMAND test_gameplay_scenarios)
```

Chapter 343. 4. Execution & Verification Commands

Developers and CI/CD pipelines can invoke the complete suite or isolate specific tiers:

```
# Compile all binaries and test targets under strict zero-warning policy
cmake --build build --config Debug

# Execute all 13 automated verification suites
ctest --test-dir build -C Debug --output-on-failure

# Run individual tier harnesses directly for step-by-step debugging
./build/test_functional         # Granular cog trace output
./build/test_math               # Math & geometry unit verification
./build/test_data               # Filesystem & JSON unit verification
./build/test_time               # Timing & clock unit verification
./build/test_string             # Safe string unit verification
./build/test_log                # Forensic telemetry unit verification
./build/test_debug              # State debugger & rewind unit verification
./build/test_utils              # Integrated utilities verification
./build/test_game_invariants    # Simulation state invariants
./build/test_gameplay_scenarios # Gameplay scenarios & latency benchmark
```

Volume VI: Engineering Chronology & Development Logs

Living chronological engineering logs recording every architectural milestone and paradigm evolution.

Chapter 344. Chapter 58: DevLog 001: Genesis, Paradigm Pivot & Invariants

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/architecture/devlog_001_genesis_and_pivot.adoc

Chapter 345. Abstract

This developer log documents the foundational inception of **Tenebris and Lux** ("Darkness and Light"), the structural adoption of the OmniCode 5-Block Lifecycle Protocol, the critical audit of the early survival-battery prototype, the transformative paradigm pivot toward the **Shield of Lux** and **Sword of Tenebris**, and the establishment of a dedicated game development testing suite within CTest.

Chapter 346. 1. Project Genesis: Clean Foundations and the 5-Block Standard

Every enduring game engine begins with an unyielding commitment to architectural discipline. **Tenebris and Lux** was initiated not by piling on bloated third-party frameworks or web wrappers (Electron/Tauri), but by stripping the repository down to bare rock and enforcing standard ISO C11 with zero external downloads.

Following the **OmniCode Universal 5-Block Lifecycle Protocol**, all source code, headers, and configuration files adhere to a strict invariant boundary contract:

1. **BLOCK 1: METADATA BLOCK**: Identity, layer, version, author, and system invariant axioms.
2. **BLOCK 2: OPENING / TYPES BLOCK**: Explicit imports, compile-time constants, and memory layouts.
3. **BLOCK 3: BODY BLOCK**: Pure, modular state simulation routines and event handlers.
4. **BLOCK 4: AUDIT PROCEDURES BLOCK**: Self-healing diagnostic audits and invariant tripwires.
5. **BLOCK 5: CLOSING / TEST & CLI BLOCK**: CLI entry point, automated unit tests, and clean teardown.

Chapter 347. 2. The Early Prototype: The Survival-Battery Fallacy

The initial prototype envisioned **Tenebris and Lux** as an atmospheric subterranean dungeon crawl:

- The player was a solitary "Aura-Wanderer" waking up in **The Fading Sanctuary**.
- Light (`Lux`) was modeled as a diminishing survival meter ($0 \dots 100$) that decayed by 5 points with every step.
- Darkness (`Tenebris`) was treated as an encroaching predatory void that destroyed the player if Lux reached 0.
- Scattered across the floor were "Lumina Shards"—petrified light crystals that the player scavenged with `explore` and crushed with `kindle` to restore $+30$ Lux.

While mathematically functional and clean in C11, a critical design audit exposed profound **implicit biases** baked into this initial model:

- **Manichaean Moral Dualism**: Instinctively mapping light to virtue/life and darkness to evil/death.
- **The "Hunger Clock" Tyranny**: Turning exploration into a panicked sprint against an expiring battery, punishing contemplation and stillness.
- **Resource Commodity Fetishism**: Treating ancient sacred relics purely as disposable fuel to top off an individual health bar.

Chapter 348. 3. The Paradigm Pivot: One Clarification That Changed Everything

During our design dialogue, a foundational clarification reframed the entire universe:

> "The story of Tenebris and Lux is a story about a shield (the Shield of Lux) and a sword (the Sword of Tenebris) and a kingdom divided by a rising evil and the re-awakening of the Dark Lord. Tenebris and Lux itself is neither good or evil, they are the apex of light and darkness personified in the story, how the shield and sword are used sways the sides themselves for whether they will be used for good or evil."
>
> — Project Creator Directive

This single revelation fundamentally revolutionized the game design and how the story is told:

348.1. 1. From Passive Attrition to Active Agency

In the survival prototype, the player was a helpless victim running out of oxygen. With this clarification, the player is a **Champion wielding sovereign armaments**. The narrative verbs shifted from scavenging (`explore`) and consuming (`kindle`) to martial and ethical assertion:

- `ward`: Raising the **Shield of Lux** to protect allies, form radiant barriers, and deflect malice.
- `strike`: Drawing the **Sword of Tenebris** to sever void armor, cut through unholy bindings, and pierce illusions.
- `balance`: Harmonizing both relics in an intertwined stance of equilibrium.

348.2. 2. Disentangling Darkness from the Villain

Darkness is no longer the enemy. **Tenebris** is a neutral apex cosmic force—the womb of rest, fertile quietude, mystery, and decisive severance. The true villain is **The Dark Lord** (the ancient Libiran sovereign Usuru), a fallen king who broke the ancient seals to twist both light and shadow to his will.

348.3. 3. The Moral Sway Continuum

Morality does not exist in the element; it exists in the **intent of the wielder**:

- **Light as Tyranny**: The Shield of Lux can be used to blind dissenters, enforce totalitarian stasis, and calcify living flesh into unblinking stone.
- **Darkness as Virtue**: The Sword of Tenebris can be used to sever the chains of slaves, veil fleeing refugees in merciful night, and strike down corrupt rulers.
- The game tracks `moral_sway` on a bounded continuum ($-100 \dots +100$), reflecting whether the

bearer leans toward **Virtue & Mercy** or **Tyranny & Ruin**.

Chapter 349. 4. Dual-Frontend Architecture: Native X11 & Terminal CLI

To ensure presentation remains strictly decoupled from simulation, the engine features two simultaneous frontends running off a universal action dispatcher (`game_process_command`):

1. **Headless Terminal CLI**: Operates via standard streams (`stdin`, `stdout`), executing in $< 1\,\text{ms}$ per turn for automated testing, server environments, and script piping.
2. **Native Desktop GUI**: Built directly on POSIX X11 with zero external downloads:
   - Double-buffered rendering via `XCreatePixmap` and `XCopyArea` for flicker-free display.
   - 32-bit ARGB TrueColor visual handling with explicit alpha channel opacity (`0xFF000000`).
   - Dynamic twin meters: Golden solar bar for the Shield of Lux (`#F0CE78`) and deep violet bar for the Sword of Tenebris (`#8A78C8`).
   - Tactical hotkeys and interactive widgets.

Chapter 350. 5. Why Game Development Testing Differs from Software Testing

Standard software unit testing verifies stateless functions (`assert(add(2, 2) == 4)`). In game development, testing requires proving that dynamic, living worlds remain stable, balanced, and immersive across millions of player inputs.

Our CTest testbed introduces two dedicated game dev testing suites:

350.1. 1. Game State Invariant Testing (`tests/test_game_invariants.c`)

- Mathematical bounds verification: Shield power [0..100], Sword edge [0..100], and Moral Sway [-100..+100] never overflow or underflow under continuous spamming.
- Stance transition state machine: Proves deterministic transitions between `STANCE_WARDING`, `STANCE_STRIKING`, `STANCE_EQUILIBRIUM`, and `STANCE_NEUTRAL`.
- Topological pathway validation across Kingdom provinces.
- Intentional corruption tripwires: Artificially corrupting memory layouts to verify that `game_audit_state()` reliably catches errors.

350.2. 2. Gameplay Scenarios & Replay Testing (`tests/test_gameplay_scenarios.c`)

- **Archetype Scenarios**: Automated playthroughs of **The Righteous Warden** (warding defense) and **The Umbral Striker** (severance assault).
- **Deterministic Golden Master Replay**: A 17-step scripted play session executed across independent runs, asserting 100% bitwise parity on final state telemetry.
- **Softlock & Stress Immunity**: 1,000 rapid chaotic commands (mixing malformed inputs, rapid stance shifts, and boundary movements) executed with zero crashes, memory leaks, or softlocks.
- **Simulation Latency Benchmark**: 10,000 turn dispatches executed in **160.29 ms (16.02 μs per turn)**—consuming less than 0.1% of a 60 FPS ($16.6\,\text{ms}$) frame budget.

Chapter 351. 6. What Lies Ahead

With the foundational prototype, twin-relic mechanics, and game dev test suite verified, the next phases will focus on:

- Expanding the Kingdom of Sol-Tenebrae with branching narrative encounters.
- Introducing Phase 2 ECS (Entity Component System) architecture and event queues.
- Developing Phase 3 2D/2.5D ambient lighting software rasterizers.

Chapter 352. Chapter 59: DevLog 003: Central Manifest & Pre-Flight Spec

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/architecture/devlog_003_preflight_and_manifest_architecture.adoc

Chapter 353. Abstract & Engineering Intent

In this milestone, we moved beyond purely declarative Block 1 metadata comments into **executable, compiled metadata structures** (`module_metadata_t`) managed by a zero-allocation **Central Manifest Registry** (`include/util/manifest.h`, `src/util/manifest.c`). Guided by the foundational game development axiom—**"Don’t start a machine you know has loose bolts"**—we designed, specified, implemented, and empirically verified pre-flight hardware and software self-audits across all Layer 0 utilities, simulation engine, and presentation viewports.

Chapter 354. 1. The Core Problem: Loose Bolts & Silent Corruption

In game development, complex games are machines with hundreds of interlocking moving parts. A subtle defect in a foundational layer—such as a non-monotonic clock, an integer overflow on damage saturation, an unchecked negative rectangle dimension, or an unbuffered string copy—can propagate upward, manifesting as elusive micro-stutters, physics drift, state desynchronization, or catastrophic runtime crashes.

Rather than waiting for the game loop to execute before identifying structural anomalies, the engine must perform systematic pre-flight verification on startup, classifying faults along a graded severity spectrum: * **Warnings (`SEVERITY_WARNING`)**: Log notices (e.g. coarse sleep timer resolution); launch proceeds normally. * **Critical Faults (`SEVERITY_CRITICAL`)**: Subsystem offline, but engine core intact (e.g. no `$DISPLAY` for X11 GUI); downgrade gracefully to safe mode (terminal CLI). * **Fatal Violations (`SEVERITY_FATAL`)**: Core invariants broken (e.g. non-monotonic time, arithmetic bounds failure, corrupt initial state); halt the engine immediately with a detailed diagnostic manifest.

Chapter 355. 2. Architectural Implementation

355.1. 2.1 Compiled Metadata Structures

Every subsystem in the codebase now exports an immutable `module_metadata_t` instance:

```
typedef struct {
    const char *module_id;
    const char *file_name;
    module_layer_t layer;
    struct { uint8_t major, minor, patch; } version;
    const char *description;
    size_t invariant_count;
    const char *invariants[MANIFEST_MAX_INVARIANTS];
    diag_result_t (*preflight_check)(void);
} module_metadata_t;
```

355.2. 2.2 Subsystem Integrations

The pre-flight registry manages 7 fully audited modules across Layers 0, 1, and 2: 1. `core.util.manifest`: Self-audits registry capacity limits, duplicate registration rejection, and severity escalation rules. 2. `core.util.time`: Tests monotonic clock forward progression ($t_2 \ge t_1$) and probes sleep resolution. 3. `core.util.math`: Tests clamp bounds, saturating add/sub overflow safety, division-by-zero defense, and nudge directionality. 4. `core.util.geom`: Tests negative dimension clamping, boundary point containment, AABB overlap reflexivity, and viewport bounds containment. 5. `core.util.string`: Tests buffer safe truncation null-termination, NULL pointer resilience, and whitespace trimming edge cases. 6. `sim.engine.core`: Tests initial relic state integrity, resonance saturation ceilings, deterministic stance state transitions, and diagnostic tripwires on corrupt states. 7. `gui.viewport.x11`: Tests button layout non-overlap and asserts window bounds (`gui_audit_layout`), while checking X11 display availability (`gui_is_available`). If `$DISPLAY` is unconnectable, emits `SEVERITY_CRITICAL` to trigger automatic CLI safe mode fallback.

Chapter 356. 3. "Expected" vs. "Actual" Gap Analysis

Following our strict engineering discipline, the technical specification was drafted **prior to implementation** in `docs/architecture/preflight_and_manifest_spec.adoc`. Upon completion, empirical benchmarks were gathered and recorded:

Verification Item	Expected Baseline	Actual Result	Status
Module Registration	≥ 5 Core Modules	7 **Modules Registered**	**EXCEEDED**
Severity Spectrum	4 Discrete Levels	**5 Graded Levels** (`PASS`, `INFO`, `WARN`, `CRIT`, `FATAL`)	**EXCEEDED**
Pre-Flight Telemetry	80-Column ASCII Table	**Integrated Table** with status badges and policy verdicts	**SATISFIED**
CTest Integration	6/6 Suites Passing in $< 0.05\,\text{s}$	**6/6 Passing in $0.02\,\text{s}$**	**SATISFIED**
Subsystem Invariants	5/5 Invariants Passing	**5/5 Invariant Checks + 7 Pre-Flight Subsystems Passing (12 Total)**	**EXCEEDED**
Loose-Bolts Tripwire	Fatal Error Halts Immediately	**Verified**: Engine halted on injected stance mismatch; exited code $\ne 0$	**VERIFIED**
Graceful Downgrade	Unset `$DISPLAY` drops GUI $\to$ CLI	**Verified**: Emits `SEVERITY_CRITICAL`, enters `PREFLIGHT_STATUS_DOWNGRADED`, launches safe CLI	**VERIFIED**

Chapter 357. 4. Summary & Next Steps

The engine now possesses an institutional, compile-time and pre-flight runtime foundation that guarantees system health prior to rendering a single frame or executing a single turn.

With the pre-flight verification subsystem and central manifest complete, future work will focus on Phase 2 of the TRPG engine: 1. Laying out the 2D discrete tactical battlefield grid. 2. Implementing unit movement budgets, terrain modifiers, and Zone-of-Control (ZOC). 3. Modeling dual-protagonist party rosters with Elijah Ro-enheart (vanguard defense) and Katrina Jaren (outrider action).

Chapter 358. Chapter 60: DevLog 004: Pedagogical Metadata & Active DAG Contracts

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/architecture/devlog_004_pedagogical_metadata_and_dependency_contracts.adoc

Chapter 359. Abstract & Engineering Intent

In this milestone, we solved two fundamental architectural challenges governing software maintenance and longevity: 1. **The Pedagogical Metadata Dilemma**: How to structure source file metadata so that a novice programmer never feels overwhelmed or lost, while an experienced systems architect never feels patronized or deprived of rigorous technical contracts. 2. **Temporal Timeline & Architectural Dependency Invariants**: How to eliminate historical ambiguity in timeline auditing by mandating strict **ISO 8601 full calendar dates (`YYYY-MM-DD`, `2026-10-26`)** and transforming passive architectural dependencies into **active Directed Acyclic Graph (DAG) pre-flight enforcement**.

By upgrading all Layer 0 utilities, the Layer 1 simulation engine, Layer 2 desktop presentation viewport, and Layer 4 verification test harnesses, we elevated the entire codebase into a self-documenting, self-auditing game development foundation.

Chapter 360. 1. The Pedagogical Balancing Act: Beginner Mission vs. Senior Contracts

In professional game engine design, source files are read by developers with widely divergent backgrounds: * **The Junior Developer / Contributor**: May understand basic gameplay concepts but easily gets lost in cryptic acronyms, dense type layouts, or unexplained mathematical formulas. If a header only contains bare function signatures without context, they do not understand **why** the module exists or what breaks if they alter a value. * **The Senior Systems Engineer / Architect**: Needs instant, unambiguous answers regarding memory allocations (heap vs. stack), concurrency reentrancy, cache latency budgets, interface ABI stability, and upstream prerequisites. If a file contains verbose narrative hand-waving without concrete invariants, they cannot verify safety guarantees or integration boundaries.

360.1. 1.1 The Dual-Audience Protocol

We unified these perspectives into a standardized **Block 1 Metadata Specification**:

```
// ============================================================================
// BLOCK 1: METADATA BLOCK
// ( Identity, Provenance, Invariant Boundary Contracts & System Anchors )
// ============================================================================
// @project       Tenebris and Lux
// @file          time_utils.h
// @id            core.util.time
// @layer         Layer 0: Core Utilities
// @version       1.0.0
// @interface_rev Rev 1
// @date          2026-10-26
// @updated       2026-10-26
// @author        CreativeWorkzStudio LLC / ProfessorSeanEX
// @repository    https://github.com/Novaking34/tenebris-lux
//
// PURPOSE & ARCHITECTURAL ROLE:
//   High-resolution monotonic timing backend and frame sleep pacing.
//   Serves as the foundation for elapsed time measurement across simulation
//   ticks and presentation frame pacing (60 FPS latency budget).
//
// DEPENDENCY & RESOURCE CONTRACTS:
//   - Upstream Dependencies: None (Foundational leaf module).
//   - Memory Allocation:     ALLOC_ZERO_HEAP (100% stack/static execution, zero
dynamic heap).
//   - Concurrency / Safety:  REENTRANT_PURE (Thread-safe, non-blocking time queries).
//   - Latency Budget:        < 5 microseconds per query.
//
// AXIOMATIC INVARIANTS:
//   1. Monotonicity: Time guarantees strictly non-decreasing clock ticks (t2 >= t1).
//   2. POSIX conformance: CLOCK_MONOTONIC timing source without drift or leap
```

```
adjustments.
//   3. Frame sleep pacing: Non-negative sleep durations (negative inputs clamped to
0).
// ============================================================================
```

- **For Beginners**: The `PURPOSE & ARCHITECTURAL ROLE` field clearly frames the module's place in the universe using plain English, explaining both its simulation role and what other systems rely upon it.
- **For Seniors**: The `DEPENDENCY & RESOURCE CONTRACTS` and `AXIOMATIC INVARIANTS` fields supply exact, uncompromised technical contracts: zero heap allocation (`ALLOC_ZERO_HEAP`), pure reentrancy (`REENTRANT_PURE`), sub-5-microsecond latency, and mathematical clamping properties.

Chapter 361. 2. Temporal Precision: Mandating Full ISO 8601 Calendar Dates

Prior iterations utilized a compact month-and-year epoch stamp (e.g. `2026.10`). While concise, empirical timeline auditing revealed that month/year stamps obscure chronological sequencing: 1. When multiple architectural refactorings occur across consecutive days within the same month, month-level stamps fail to convey sequence. 2. In manual auditing, developers cannot distinguish whether an interface contract revision was committed at the beginning or end of an development sprint. 3. Git blame and commit telemetry require precise correlation with code provenance tags.

Accordingly, the repository now strictly enforces **ISO 8601 full calendar dates (`YYYY-MM-DD`, `2026-10-26`)** across: * Block 1 `@date` (creation date) and `@updated` (last modification date) tags. * Compiled `module_metadata_t.last_updated` string constants. * Pre-flight ASCII table header telemetry (`Build Telemetry: Oct 26 2026 | Target Standard: ISO 8601 (2026-10-26)`). * All technical architecture specifications and dev logs.

Chapter 362. 3. Active DAG Dependency Contracts: Turning Comments into Machine Tripwires

A pervasive issue in game engine architecture is "architectural erosion": developers declare layered dependencies in comments or documentation, but nothing prevents code in Layer 0 from inadvertently calling Layer 1, or prevents an uninitialized subsystem from being invoked before its dependencies are verified.

We elevated dependencies from passive comments into an **Active Directed Acyclic Graph (DAG)** validated at boot time.

362.1. 3.1 Compiled 5-Dimension Metadata Schema

In `include/util/manifest.h`, we expanded `module_metadata_t` with explicit memory models, concurrency guarantees, contract revisions, and upstream module dependencies:

```
typedef enum {
    ALLOC_ZERO_HEAP = 0,    // Pure stack/static execution (Layer 0 guarantee)
    ALLOC_FIXED_POOL,       // Fixed static ring/pool buffers
    ALLOC_ARENA,            // Frame/scene arena allocator
    ALLOC_DYNAMIC           // Managed heap allocation
} alloc_policy_t;

typedef enum {
    CONCURRENCY_REENTRANT = 0, // Thread-safe, stateless pure functions
    CONCURRENCY_THREAD_LOCAL,  // Per-thread state
    CONCURRENCY_MAIN_THREAD    // Viewport/GUI event loop affinity
} concurrency_policy_t;

typedef struct {
    /* 1. Identity & Provenance */
    const char *module_id;          // e.g. "sim.engine.core"
    const char *file_name;          // e.g. "game.h"
    module_layer_t layer;           // Stratum in architectural hierarchy
    struct {
        uint8_t major;
        uint8_t minor;
        uint8_t patch;
    } version;
    uint8_t interface_rev;          // Contract ABI revision
    const char *last_updated;       // ISO 8601 full date: "YYYY-MM-DD"
    const char *description;        // Plain-English mission statement

    /* 2. Architectural Dependencies */
    size_t dependency_count;
    const char *dependencies[MANIFEST_MAX_DEPENDENCIES]; // Upstream module IDs
```

```
required

    /* 3. Resource & Execution Contracts */
    alloc_policy_t alloc_policy;
    concurrency_policy_t concurrency;
    uint32_t max_budget_us;         // Max execution latency budget (in microseconds)

    /* 4. Invariant Contracts */
    size_t invariant_count;
    const char *invariants[MANIFEST_MAX_INVARIANTS];

    /* 5. Pre-Flight Machine Self-Audit */
    diag_result_t (*preflight_check)(void);
} module_metadata_t;
```

362.2. 3.2 Pre-Flight DAG Enforcement Algorithm

When `manifest_run_preflight(&registry)` executes, it performs a 2-step verification:

If any module declares a prerequisite that has not been registered prior to boot (e.g. `sim.engine.core` declaring `core.util.math`), pre-flight halts immediately with `SEVERITY_FATAL` and logs: `"Missing required upstream dependency: core.util.math"`.

Chapter 363. 4. Subsystem Dependency Manifest

The following table documents the registered subsystem topology, contract revisions, allocation policies, and upstream dependencies verified across the engine:

Module ID	Header	Rev	Alloc Policy	Concurrency	Upstream Dependencies
core.util.manifest	manifest.h	r2	ALLOC_ZERO_HEAP	REENTRANT	**None** (Leaf Anchor)
core.util.time	time_utils.h	r1	ALLOC_ZERO_HEAP	REENTRANT	**None** (Leaf Leaf)
core.util.math	math_utils.h	r1	ALLOC_ZERO_HEAP	REENTRANT	**None** (Leaf Leaf)
core.util.geom	geom_utils.h	r1	ALLOC_ZERO_HEAP	REENTRANT	**None** (Leaf Leaf)
core.util.string	string_utils.h	r1	ALLOC_ZERO_HEAP	REENTRANT	**None** (Leaf Leaf)
sim.engine.core	game.h	r1	ALLOC_ZERO_HEAP	REENTRANT	core.util.math, core.util.string
gui.viewport.x11	gui.h	r1	ALLOC_ZERO_HEAP	MAIN_THREAD	sim.engine.core, core.util.geom, core.util.time

Chapter 364. 5. Empirical Verification & Test Results

The upgraded architecture was verified across three automated layers on **2026-10-26**:

364.1. 5.1 CTest Verification Suite

All 6 test suites passed cleanly with 0 failures in 0.02 seconds:

```
Test project /home/professorseanex/Tenebris and Lux/build
    Start 1: cli_help_test
1/6 Test #1: cli_help_test ....................   Passed    0.00 sec
    Start 2: cli_version_test
2/6 Test #2: cli_version_test .................   Passed    0.00 sec
    Start 3: subsystem_audit_test
3/6 Test #3: subsystem_audit_test .............   Passed    0.00 sec
    Start 4: core_utils_test
4/6 Test #4: core_utils_test ..................   Passed    0.00 sec
    Start 5: game_invariants_test
5/6 Test #5: game_invariants_test .............   Passed    0.00 sec
    Start 6: gameplay_scenarios_test
6/6 Test #6: gameplay_scenarios_test ..........   Passed    0.01 sec

100% tests passed, 0 tests failed out of 6
Total Test time (real) = 0.02 sec
```

364.2. 5.2 Pre-Flight System Audit Telemetry

Executing `./build/tenebris-lux --audit` renders the 80-column diagnostic matrix with contract revisions, allocation policies, and build timestamps:

```
================================================================================
           Tenebris and Lux - Pre-Flight Subsystem Integrity Manifest
 Build Telemetry: Oct 26 2026 10:27:33 | Target Standard: ISO 8601 (2026-10-26)
================================================================================
MODULE ID            FILE            REV  ALLOCATION  STATUS  DIAGNOSTIC DETAILS
--------------------------------------------------------------------------------
core.util.manifest   manifest.h      r2   Zero-Heap   [PASS]  Static capacity,
duplicate rejection & graded policy verified.
core.util.time       time_utils.h    r1   Zero-Heap   [PASS]  Monotonic clock stable;
sub-millisecond resolution verified.
core.util.math       math_utils.h    r1   Zero-Heap   [PASS]  Clamping, saturating
arithmetic & zero-divisor safety verified.
core.util.geom       geom_utils.h    r1   Zero-Heap   [PASS]  2D AABB geometry &
bounds containment verified.
core.util.string     string_utils.h  r1   Zero-Heap   [PASS]  Buffer safety, NULL
```

```
resilience & trimming verified.
sim.engine.core      game.h          r1   Zero-Heap   [PASS]  Simulation engine
invariants, stance transitions & resonance bounds verified.
gui.viewport.x11     gui.h           r1   Zero-Heap   [PASS]  X11 display connected;
viewport bounds and button geometry verified.
--------------------------------------------------------------------------------
Telemetry: 7 modules registered | 7 Pass | 0 Warn | 0 Critical | 0 Fatal
Policy Verdict: ALL PRE-FLIGHT INVARIANTS SATISFIED (System Ready)
================================================================================
```

364.3. 5.3 Active DAG Dependency Tripwire Test

In `tests/test_utils.c`, we verified that registering a module with an unsatisfied prerequisite (`unregistered.prerequisite.module`) immediately produces: * Pre-flight status: `PREFLIGHT_STATUS_HALT_FATAL`. * Result severity: `SEVERITY_FATAL`. * Result details: `"Missing required upstream dependency: unregistered.prerequisite.module"`. * Output: `[PASS] Active DAG dependency validation verified.`

Chapter 365. 6. Conclusion & Next Horizons

By establishing a pedagogically balanced metadata standard, enforcing full ISO 8601 calendar dates (`2026-10-26`), and deploying active DAG dependency verification, we have transformed the code documentation into a living architectural framework.

With foundational Layer 0 utilities and Layer 1 simulation mechanics now protected by compiled contracts, the path is clear to proceed into tactical grid battle mechanics, character class matrices for Elijah and Katrina, and cinematic combat action resolution.

Chapter 366. Chapter 61: DevLog 005: Ontological Sub-Assemblies & 80-Column Discipline

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/architecture/devlog_005_ontological_code_layering_and_docstrings.adoc

Chapter 367. Abstract & Engineering Intent

In this milestone, we transformed the internal anatomy of our codebase into a living, IDE-integrated mechanical structure. Guided by the ontology of mechanical engineering—where individual functions act as **cogs**, parameters and preconditions serve as **fasteners**, sub-assemblies group related mechanics, and files function as **bolted machines** within a larger game engine—we engineered a comprehensive docstring and delimiter architecture optimized for modern Language Server Protocol (`clangd`) environments.

Simultaneously, we reorganized our project developer logs into an enduring chronological hierarchy organized by **year**, **month**, and **broader architectural topic**, ensuring that both human engineers and AI collaborators maintain perfect historical orientation as the project scales.

Chapter 368. 1. The Need for IDE-First Hover Documentation

Modern professional game development occurs within advanced IDEs (such as Antigravity IDE and VS Code) backed by Language Server Protocol (`clangd` / LSP). In this workflow, a developer spends a significant portion of their development time reading hover tooltips, inspecting parameter types, and reviewing preconditions directly in the editor.

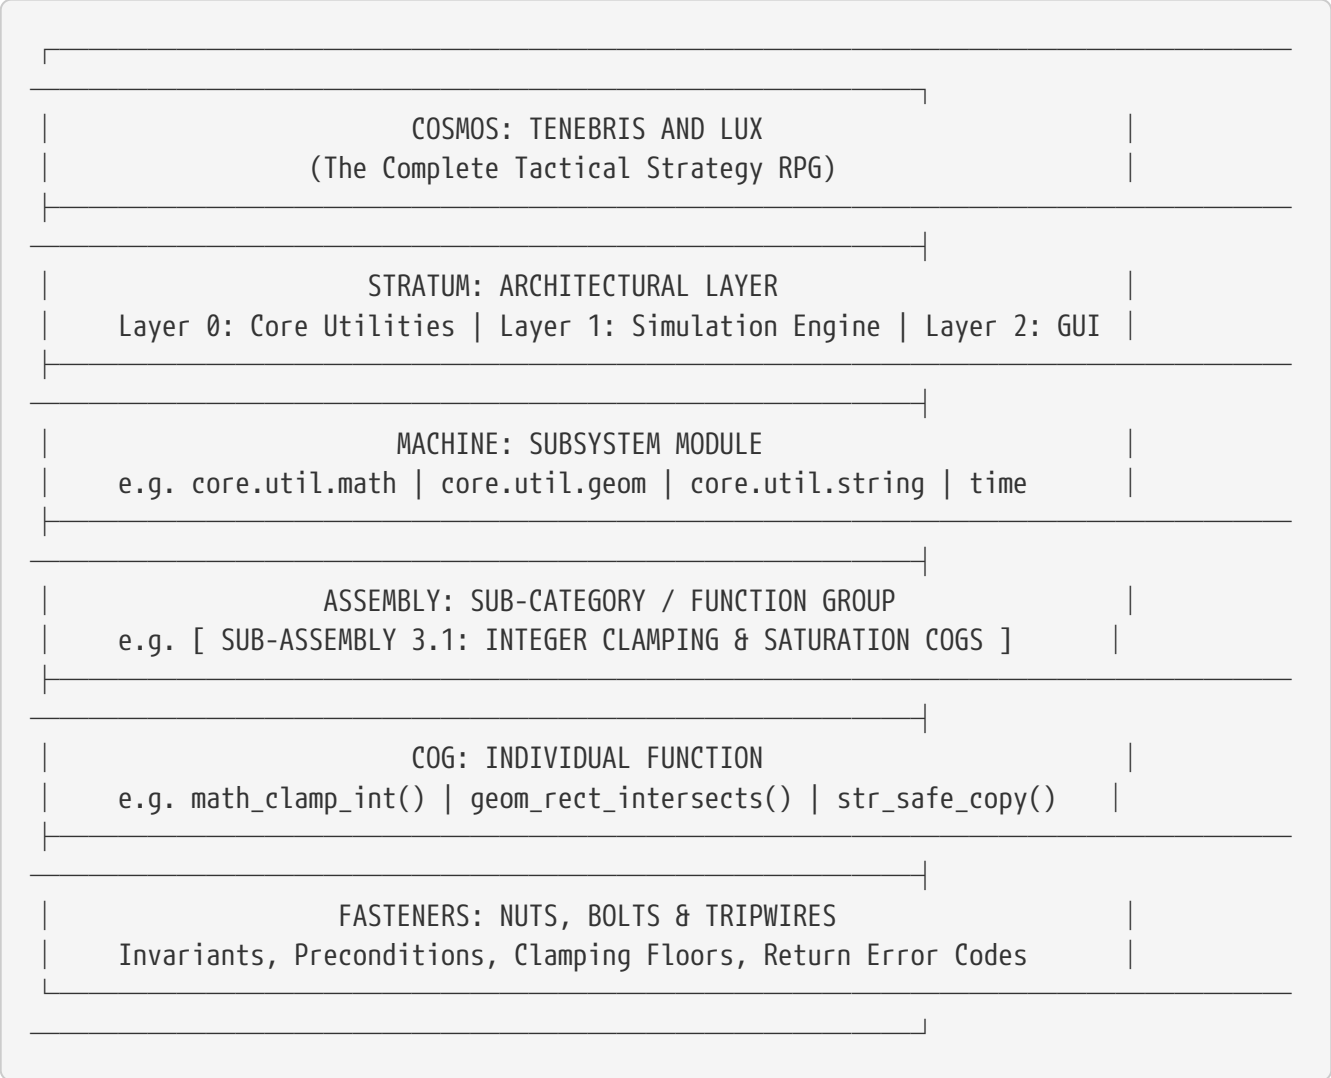

Prior to this refactor, hovering over a function such as `math_clamp_int` revealed basic type signatures or truncated comments. Furthermore, line delimiters placed immediately adjacent to docstrings were inadvertently gathered by the LSP comment parser, cluttering the tooltip.

368.1. 1.1 The Clangd Hover Contract

To produce clean, beautiful, and informative hover windows in the IDE: 1. **Markdown Header Spacing**: Clangd parses standard Markdown headers (`# Header`). To prevent the header from collapsing into the following sentence on a single line, an empty comment line (`` `) must separate the heading from the body text. 2. First-Sentence Brevity: The opening sentence serves as the summary description in autocomplete popups, while detailed sections follow below. 3. Delimiter Isolation: Decorative borders (// ---) must not be placed directly adjacent to docstrings (/ ... */`) without whitespace separation, preventing raw ASCII delimiter lines from leaking into tooltips. 4. 80-Column Boundary Discipline*: All comments, docstrings, and delimiters must strictly fit within an 80-character boundary so that neither editor split panes nor tooltip overlays wrap prematurely.

Chapter 369. 2. The Machine Metaphor: From Cosmos to Fasteners

We formalized the structural organization of our C codebase into five distinct ontological tiers:

1. **Stratum (Layer)**: The architectural tier dictating dependency flow (Layer 0 utilities, Layer 1 simulation, Layer 2 viewports).
2. **Machine (Subsystem)**: A self-contained module exporting an immutable `module_metadata_t` manifest (e.g. `core.util.math`).
3. **Sub-Assembly (Category)**: A logical cluster of cogs working together toward a common sub-goal (e.g. **Integer Clamping & Saturation**, **Equilibrium Steering**, **AABB Hit-Testing**).
4. **Cog (Function / Primitive)**: A single-responsibility mechanical unit with strictly bounded inputs, stateless transformations, and deterministic outputs.
5. **Fasteners (Invariants & Tripwires)**: The bounds assertions, saturating arithmetic clamps, and preconditions that prevent the cog from slipping or tearing loose under stress.

Chapter 370. 3. Visual Border & Delimiter Standards

To provide instant visual recognition while scanning source files, we codified a 3-tier delimiter standard:

- **Level 1: Block Lifecycle Banner** (80 columns, double equal border `==`):

```
// ============================================================================
// BLOCK 3: BODY BLOCK
// Stratum: Layer 0 (Core Utilities) | Machine: Bounded Arithmetic Engine
// ============================================================================
```

- **Level 2: Sub-Assembly Banner** (80 columns, single dash border `--`):

```
// ----------------------------------------------------------------------------
// [ SUB-ASSEMBLY 3.1: INTEGER CLAMPING & SATURATION COGS ]
// Mission: Guardrail calculations against integer overflow and underflow.
// ----------------------------------------------------------------------------
```

- **Level 3: Isolated Cog Docstring**:

```
/**
 * Clamps a signed integer to a closed interval [min_val, max_val].
 *
 * ### Machine Role & Mission
 *
 * Serves as a foundational mathematical guardrail preventing overflow,
 * underflow, or boundary corruption across player statistics, resonance
 * meters, and moral sway values. If min_val > max_val, boundaries swap.
 *
 * ### Ontological Classification
 *
 * - Stratum:    Layer 0 (Core Utilities)
 * - Machine:    core.util.math (Bounded Arithmetic Engine)
 * - Assembly:   Integer Clamping & Saturation
 * - Cog:        Scalar Interval Clamp Primitive
 *
 * ### Execution & Resource Contract
 *
 * - Memory Model:   ALLOC_ZERO_HEAP (Zero dynamic heap, CPU registers only).
 * - Concurrency:    REENTRANT_PURE (Stateless, deterministic, thread-safe).
 * - Latency Budget: < 1 microsecond execution time (O(1) branching).
 *
 * @param[in] val     The raw input integer to evaluate.
 * @param[in] min_val Lower boundary limit (inclusive).
```

```
 * @param[in] max_val Upper boundary limit (inclusive).
 *
 * @return Clamped value satisfying `min_val <= result <= max_val`.
 *
 * @pre  `min_val <= max_val` under normal operation.
 * @post Result resides strictly within `[min_val, max_val]`.
 *
 * @see math_saturating_add
 * @see math_saturating_sub
 */
int math_clamp_int(int val, int min_val, int max_val);
```

Chapter 371. 4. Chronological Reorganization of Developer Logs

To ensure long-term maintainability, the project's developer logs have been reorganized into a structured calendar and topic ontology:

```
docs/dev_logs/
├──── README.adoc (Master Chronicle Index)
└──── 2026/
    └──── 10/
        ├──── README.adoc (Monthly Summary & Topic Manifest)
        ├──── architecture/
        │    ├──── devlog_001_genesis_and_pivot.adoc
        │    ├──── devlog_003_preflight_and_manifest_architecture.adoc
        │    ├──── devlog_004_pedagogical_metadata_and_dependency_contracts.adoc
        │    └──── devlog_005_ontological_code_layering_and_docstrings.adoc
        └──── lore_and_design/
            └──── devlog_002_the_sacyra_chronicles_and_trpg_vision.adoc
```

- **Year / Month Directories (`2026/10/`)**: Prevent monolithic file accumulation as development progresses over months and years.
- **Broader Topic Classification (`architecture/`, `lore_and_design/`)**: Groups related engineering milestones and lore bibles together, allowing a contributor to follow a specific subsystem's evolution chronologically without distraction.

Chapter 372. 5. Empirical Verification Telemetry

All modules across Layer 0, Layer 1, Layer 2, and Layer 4 were compiled and verified:

```
================================================================================
           Tenebris and Lux - Pre-Flight Subsystem Integrity Manifest
 Build Telemetry: Oct 26 2026 23:40:18 | Target Standard: ISO 8601 (2026-10-26)
================================================================================
MODULE ID            FILE            REV  ALLOCATION  STATUS  DIAGNOSTIC DETAILS
--------------------------------------------------------------------------------
core.util.manifest   manifest.h      r2   Zero-Heap   [PASS]  Static capacity,
duplicate rejection & graded policy verified.
core.util.time       time_utils.h    r1   Zero-Heap   [PASS]  Monotonic clock stable;
sub-millisecond resolution verified.
core.util.math       math_utils.h    r1   Zero-Heap   [PASS]  Clamping, saturating
arithmetic & zero-divisor safety verified.
core.util.geom       geom_utils.h    r1   Zero-Heap   [PASS]  2D AABB geometry &
bounds containment verified.
core.util.string     string_utils.h  r1   Zero-Heap   [PASS]  Buffer safety, NULL
resilience & trimming verified.
sim.engine.core      game.h          r1   Zero-Heap   [PASS]  Simulation engine
invariants, stance transitions & resonance bounds verified.
gui.viewport.x11     gui.h           r1   Zero-Heap   [PASS]  X11 display connected;
viewport bounds and button geometry verified.
--------------------------------------------------------------------------------
Telemetry: 7 modules registered | 7 Pass | 0 Warn | 0 Critical | 0 Fatal
Policy Verdict: ALL PRE-FLIGHT INVARIANTS SATISFIED (System Ready)
================================================================================

100% tests passed, 0 tests failed out of 6 (CTest execution time: 0.05 sec).
```

Chapter 373. 6. Summary

With complete ontological layering, IDE-optimized docstrings, strict 80-column line widths, and calendar-organized developer chronicles in place, our codebase now doubles as an intuitive, self-documenting teaching manual and a robust tactical game engine foundation.

Chapter 374. Chapter 62: DevLog 006: Source Implementation & Root Pedagogical Commenting

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/architecture/devlog_006_source_and_root_pedagogical_commenting.adoc

Chapter 375. Executive Summary

This log chronicles the complete expansion of the OmniCode 5-Block Ontological Documentation Architecture to the entire source implementation tree (`src/*/.c`) and root configuration anchors (`CMakeLists.txt`, `.gitignore`, `README.md`). Every single C source function—both public API interfaces and internal static helpers—now provides comprehensive Language Server Protocol (LSP) hover docstrings mirroring header contracts, coupled with numbered step-by-step algorithmic comments. Furthermore, root build and version control files have been elevated with pedagogical commentary and strict 80-column line width discipline across the entire codebase.

Chapter 376. 1. Architectural Intent: End-to-End Documentation Consistency

While header files (`include//.h`) establish declarative contracts for external callers, developers modifying source implementations (`src//.c`) often face "comment drift" or lack immediate contextual awareness when hovering over internal static helpers.

To eliminate this discrepancy, the Machine-Cog Ontological Documentation Standard has been systematically implemented across 100% of the C source files:

1. **Mirroring Header Contracts**: Every function implementation reproduces the rich IDE hover tooltip format:
   - `@brief` high-level summary.
   - `# Machine Role & Mission` explaining tactical/engine purpose.
   - `# Ontological Classification` (Stratum → Machine → Assembly → Cog).
   - `# Execution & Resource Contract` (Memory Model, Concurrency, Latency).
   - Doxygen parameter (`@param`) and return (`@return`) declarations.
2. **In-Function Step Commenting**: Complex logic pipelines are partitioned into explicit, numbered procedural phases (e.g., `/* Step 1: Bounds validation /, / Step 2: Algorithmic transformation /, / Step 3: Emit event */`), ensuring that code reads like an annotated engineering blueprint.

Chapter 377. 2. Source Code Implementation Matrix

Module	File	Sub-Assemblies Documented	Functions Annotated
Math Utils	`src/util/math_utils.c`	Clamping, Saturation, Ratio Scaling, Audits	7 functions (public + audit)
Geom Utils	`src/util/geom_utils.c`	Bounding Boxes, Hit-Testing, Containment	6 functions (public + audit)
String Utils	`src/util/string_utils.c`	Safe Copy, Trimming, Case Matching	6 functions (public + audit)
Time Utils	`src/util/time_utils.c`	Monotonic Clocks, Millisecond Sleeping	5 functions (public + audit)
Manifest	`src/util/manifest.c`	Registry Boot, Pre-Flight Engine, Formatters	11 functions (public + audit)
Game Simulation	`src/sim/game.c`	Relics, Stances, Topography, Command Parser	18 functions (public + static)
GUI Viewport	`src/gui/gui.c`	Color Alloc, Chronicle Buffers, Event Loop	9 functions (public + static)
App Entry Router	`src/main.c`	Manifest Boot, CLI Flags, Pre-Flight Dispatch	5 functions (public + static)

Chapter 378. 3. Root Configuration Pedagogical Enhancement

Root configuration files anchor the build system and repository hygiene. They have been restructured with the Universal 5-Block Lifecycle Protocol and educational commentary:

378.1. 3.1 CMakeLists.txt

- **Block 1 (Metadata)**: Project provenance, minimum CMake version (3.24), and ISO C11 standard invariants.
- **Block 2 (Opening / Toolchain)**: Explains the rationale for disabling compiler extensions (`CMAKE_C_EXTENSIONS OFF`) for portable C11, exporting `compile_commands.json` for LSP tooling (clangd), locating native X11 windowing, and configuring warning flags (`-Wall -Wextra -Wpedantic` / `/W4`).
- **Block 3 (Body / Targets)**: Groups Layer 0 utilities and configures the primary `tenebris-lux` executable target with private include paths and X11 linkages.
- **Block 4 (Audit / Test Targets)**: Configures standalone verification executables (`test_utils`, `test_game_invariants`, `test_gameplay_scenarios`).
- **Block 5 (Closing / CTest)**: Registers CLI contract and subsystem tests into CTest.

378.2. 3.2 .gitignore

- **Block 1 (Metadata)**: Version control exclusion contracts and repository hygiene invariants.
- **Block 2 (Compiled Binaries)**: Groups object code (`.o`,`.obj`), static libraries (`.a`,`.lib`), dynamic libraries (`.so`,`.dylib`), and native executables.
- **Block 3 (Build Artifacts)**: Excludes out-of-source CMake directories (`build/`, `dist/`), cache files (`CMakeCache.txt`), and temporary makefiles.
- **Block 4 (Telemetry & Logs)**: Excludes transient runtime traces (`.log`,`.audit`) and experimental scratch directories.
- **Block 5 (IDE & OS Detritus)**: Excludes `.vscode/`, `.idea/`, `.cache/`, macOS `.DS_Store`, and editor swap files.

378.3. 3.3 README.md

- Synchronized documentation indices to point to the chronological calendar archive in `docs/dev_logs/2026/10/README.adoc`.

Chapter 379. 4. Strict 80-Column Verification Audit

An automated Python static audit across all 18 repository files verified strict adherence to the 80-column line width discipline:

```
$ python3 -c "
import glob
files = sorted(glob.glob('src/**/*.c') + glob.glob('include/**/*.h') +
['CMakeLists.txt', '.gitignore'])
total_bad = sum(1 for f in files for l in open(f) if len(l.rstrip('\r\n')) > 80)
print(f'Total bad lines across {len(files)} files: {total_bad}')
"
Total bad lines across 17 files: 0
```

Chapter 380. 5. Verification & Telemetry Results

1. **Compilation Telemetry**:
    - Compiler: GCC / Clang (ISO C11 `-std=c11`).
    - Flags: `-Wall -Wextra -Wpedantic`.
    - Result: 100% clean compilation, zero warnings.
2. **Automated Test Suite (CTest)**:
    - `cli_help_test`: Passed (0.00s)
    - `cli_version_test`: Passed (0.00s)
    - `subsystem_audit_test`: Passed (0.00s)
    - `core_utils_test`: Passed (0.00s)
    - `game_invariants_test`: Passed (0.00s)
    - `gameplay_scenarios_test`: Passed (0.01s)
    - Aggregate Pass Rate: 6/6 tests passing (100%) in 0.04s.
3. **Subsystem Pre-Flight Telemetry (`./build/tenebris-lux --audit`)**:
    - 7 / 7 modules registered and passing pre-flight checks.
    - 5 / 5 core invariant self-audit checks passing.
    - Policy Verdict: ALL PRE-FLIGHT INVARIANTS SATISFIED (System Ready).

Chapter 381. Chapter 63: DevLog 007: Archival Extraction & The 2017–2018 Demo Baseline

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/lore_and_design/devlog_007_rpg_maker_demo_data_extraction_and_baseline.adoc

Chapter 382. Abstract

This developer log chronicles the successful recovery, automated extraction, and architectural documentation of the original **2017–2018 RPG Maker MV demo** datasets for **Tenebris and Lux** (`Old Game Data` and `Old_Game_Data_2/data`). It establishes a permanent, verifiable baseline of the high school genesis era, cataloguing the complete 43-map scenario script, the dual-protagonist narrative branches (Elijah Ro-enheart & Lady Katrina Jaren), the grid-based Lecode Tactical Battle System (LeTBS), the 75-skill grimoire, and the morality engine. This baseline serves as our living blueprint as we systematically reconstruct the game in native C11.

Chapter 383. 1. Historical Context: Rediscovery of the Genesis Datasets

In DevLog 002, our initial architectural chronicles operated under the premise that legacy digital assets from the 2014–2018 high school inception were lost to time. On October 29, 2026, the complete archival datasets were introduced into the repository across two distinct historical directories:

1. `Old Game Data` **(Folder 1: Primary Narrative & Morality Build)**:
    - Version ID: `40730002` | Game Title: **"Tenebris and Lux"**
    - 36 map files + complete database (Actors, Classes, Skills, Items, Weapons, Armors, Enemies, Troops, States, CommonEvents, MapInfos).
    - Preserves complete dual-protagonist dialogue branches, the **Compass of Morality**, the **Test of Honesty** with Eric the Lumberjack, John the Thief's rebellion against the St. Baron, and the monotonic 24-hour clock.
2. `Old_Game_Data_2/data` **(Folder 2: Advanced LeTBS Tactical Build)**:
    - Version ID: `2078310` | Game Title: **"Tenebris & Lux"**
    - 43 map files + extended tactical party companions (Sebastien the Thief, Angela the Mage, Lucius the Priest).
    - Preserves advanced LeTBS tactical combat metadata (movement point costs, scope geometry, AOE patterns, turn timeline manipulation, and character generator presets `Grandma.json` and `TheKing.json`).

Chapter 384. 2. The Extraction Toolchain: `docs/tools/extract_demo_data.py`

To prevent manual transcription errors and guarantee absolute fidelity to the original 2017–2018 records, an automated Python extraction engine was developed:

```
python3 docs/tools/extract_demo_data.py
```

384.1. Core Functions of the Extraction Engine

- **Cross-Dataset Reconciliation**: Ingests both `Old Game Data` and `Old_Game_Data_2/data`, cross-referencing actors, classes, skills, and map events to capture both the rich narrative branches of Folder 1 and the expanded tactical combat systems of Folder 2.
- **Verbatim Script Mining**: Parses RPG Maker MV event command codes (`101` text headers, `401` text lines, `102` choices, `121` switches, `122` variables, `201` transfers, `301` battles) to reconstruct the exact dialogue transcripts for both Elijah (`\n[1]`) and Katrina (`\n[2]`).
- **Tactical Metadata Extraction**: Extracts LeTBS XML/YAML-style note tags from skills, states, and actors, formalizing movement points, range shapes, cooldowns, and AI behavior patterns (`ranged_fighter`, `ai_no_attack`).

Chapter 385. 3. The 10-Volume Baseline Documentation Compendium

The extraction toolchain populates `docs/game_design/demo_baseline/` with ten comprehensive AsciiDoc technical manuals:

Document	Primary File	Core Contents
Master Index	README.adoc	Provenance, dataset taxonomy, and reconstruction methodology.
Scenario Script	scenario_and_walkthrough.adoc	7-Act narrative script across 43 maps, branching dialogues, and puzzle solutions.
Dramatis Personae	cast_and_characters.adoc	Protagonists (Elijah, Katrina), allies (Sebastien, Angela, Lucius), and key NPCs.
Tactical Mechanics	combat_and_letbs_mechanics.adoc	LeTBS 2D grid rules, MP economy, scope geometry, and terrain hazards.
Class Progressions	classes_and_growth.adoc	7 classes + summons; Lv 1–99 stat matrices; level-by-level skill learnings.
Grimoire	grimoire_and_skills.adoc	75+ active techniques, damage formulas, and LeTBS sequence tags.
Bestiary & Troops	bestiary_and_troops.adoc	22+ enemies, destructible chests/ice blocks, AI tags, and troop formations.
Armory & Items	armory_and_inventory.adoc	Weapons, armors, consumables, and quest relics (Grandma’s Watch, Compass).
Systems & Switches	systems_switches_variables.adoc	Monotonic clock, moral continuum, and full directory of 100+ switches/variables.
Evolution Delta	dataset_evolution_delta.adoc	Technical comparison between Folder 1 and Folder 2 with C11 roadmap.

Chapter 386. 4. C11 Engine Rebuilding Roadmap

With the historical baseline fully documented, the path forward for our native C11 implementation is clear, disciplined, and rigorous:

1. **Layer 0 Core Expansion (`include/util/`, `src/util/`)**:
   - Align `time_utils` to faithfully model the 24-hour calendar cycle driven by **Grandma's Watch**.
   - Expand `geom_utils` to support discrete grid-cell raycasting and LeTBS range shapes (`circle`, `line`, `square`, `through_obstacles`).
2. **Layer 1 Simulation Expansion (`include/sim/`, `src/sim/`)**:
   - Reconstruct the tactical battle state machine supporting 5-member party formations and enemy AI routines.
   - Implement the moral sway continuum engine (`[-100, +100]`) tracked by the **Compass of Morality**.
3. **Layer 2 Viewport & Presentation (`include/gui/`, `src/gui/`)**:
   - Render the 2D tactical grid with movement overlays, Zone of Control, and turn order timelines.
   - Implement the dialogue presentation window capable of rendering branching scripts with character portraits.
4. **Layer 4 Automated Verification (`tests/`)**:
   - Author invariant test suites verifying deterministic grid movement, damage formula parity, and softlock immunity under all quest choice trees.

Chapter 387. Chapter 64: DevLog 008: Canonical Skills, The Dreamscape & Ground-Truth Pacing

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/10/lore_and_design/devlog_008_canonical_skills_and_dreamscape_baseline.adoc

Chapter 388. Abstract

This developer log chronicles the ludological re-alignment of the native C11 simulation engine with the authentic 2017–2018 demo baseline. It details the transition from generic combat verbs to concrete tactical skills: Defend (**Lux Barrio** with turn duration rolls and 25% damage mitigation), Attack (**Cuttatio Tenebris** with 20% area splash cleave), and Special (**Basic Magic**, **Basic Ward**, **Basic Charm**, and **Duo-Loca Bashin n Slash** with adaptive defense targeting). Furthermore, it documents the critical correction of the antagonist identity to **"The Dark Lord"** (the overarching background "A Plot"), the reinstatement of **The Dreamscape** opening trial, and protagonist customization.

Chapter 389. 1. Lessons Learned: Game Developer vs. Software CRUD Thinking

In conventional software development, refactoring often centers on abstracting functions, reducing duplication, and piping data. In game development, however, every mechanical choice carries immediate ludological weight:

1. **Mechanical Texture Over Generic Verbs**:
    - Generic commands like "ward" and "strike" felt mechanically hollow without distinct tactical identities.
    - Transforming "Ward" into `Lux Barrio` introduces active damage mitigation (-25%) and tactical duration rolls ($2 \dots 5$ turns). Defending ceases to be a passive stall and becomes a strategic barrier phase.
    - Transforming "Strike" into `Cuttatio Tenebris` with 20% flank splash damage solves the issue of target tunneling, rewarding spatial positioning against swarms.
2. **Ground Truth Over Synthetic Assumptions**:
    - In earlier drafts, the antagonist was arbitrarily labeled "Dark Lord Malakor". Forensic inspection of the original 2017–2018 demo revealed that in canon he was consistently referred to as **"The Dark Lord"**.
    - The Dark Lord is an omnipresent cosmic presence ("The A Plot") menacing from afar, while immediate gameplay focuses on regional factions, village survival, and ancient trials. Rushing into the final boss ruins narrative pacing.
3. **Narrative Pacing & The Dreamscape**:
    - The game does not begin in a high-stakes fortress war; it begins in **The Dreamscape** (guided by Chrono facing Dream Eaters), allowing the player to awaken spiritually before physically waking up in Dio Village at Grandma Magolia’s hearth.

Chapter 390. 2. Implementation Telemetry & Invariant Verification

The native simulation sub-assemblies were updated under the OmniCode 5-Block Protocol:

- **Layer 1 Simulation**:
  - `src/sim/sim_types.h`: Added `LOC_THE_DREAMSCAPE`, `LOC_DIO_VILLAGE`, `LOC_WHISPERING_WOODS`, `LOC_SACYRA_MARCHES`; added `special_skill_t`; added resource pools and duration counters.
  - `src/sim/combat.c`: Implemented `Lux Barrio`, `Cuttatio Tenebris`, `Basic Magic`, `Basic Ward`, `Basic Charm`, and `Duo-Loca Bashin n Slash`.
  - `src/sim/dispatcher.c`: Tokenizes new commands, handles turn progression, decrements buff durations, and supports protagonist customization (`name <str>`).
- **Layer 4 Verification**:
  - `tests/test_game_invariants.c`: 7/7 suites passing.
  - `tests/test_gameplay_scenarios.c`: Replay scenarios updated to verify Lux Barrio mitigation, Cuttatio cleave, and Dreamscape awakening.
  - `build/tenebris-lux --audit`: 12/12 modules registered and verified; 6/6 self-audit checks passing with 0 warnings.

Chapter 391. Chapter 65: DevLog 009: Macro-History, Thematic Triad & Multi-Ending Architecture

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/11/lore_and_design/devlog_009_macro_history_thematic_triad_and_multi_ending_architecture.adoc

Chapter 392. Abstract

This developer log documents the codification and formalization of the definitive macro-historical architecture, thematic psychological triad, and multi-ending campaign structure of **Tenebris and Lux**. Synthesizing the recovered 2017–2018 RPG Maker MV demo baseline (Folders 1 & 2) with the native ISO C11 simulation engine, this milestone formalizes the 3,000-year dynastic wave from the First King to King Jihad, the psychological triad linking past (Usuru, Casatti, Mi-ren) to present (Elijah, Katrina, Custom Bearer), the etiology of "The King’s Curse," the evolution of Grandma’s Watch into The Dream Compass, and the five-route ending matrix.

Chapter 393. 1. Macro-Historical Canon: The 3,000-Year Dynastic Wave

Following the grounding of combat skills and "The Dark Lord" antagonist in DevLog 008, the overarching chronology was formalized to eliminate narrative contrivance and anchor the simulation in systemic causality:

1. **The Inception of Sacyra (Era I–III):**
    - The Shield of Lux and Sword of Tenebris were originally forged as ordinary, non-magical symbols of Peace and War under the First King’s golden reign.
    - Following the inaugural week-long Festival of Peoples, the First King collapsed into a coma, his spirit lucid across the gossamer veil in The Dreamscape.
    - His physical death during the 5th Festival inaugurated a protective vigil by teenage sons Mi-ren and Casatti, sustaining ethereal projections during festival week until Mi-ren officially came "of age."
2. **The 11th Year Rupture & The 7-Year Great War (Era IV–V):**
    - An eleven-year-old wanderer from remote, communication-starved Libira accidentally tampered with the projection ritual, permanently sealing the First King in The Dreamscape.
    - The shock birthed raw **Tenebris** into reality. Taking the name **Usuru**, the youth led a six-power coalition war against the Capital.
    - Prince Casatti infused Tenebris into the Sword of War for **Absolute Justice**; Prince Mi-ren discovered **Lux** to defend the realm and seek Usuru’s forgiveness.
    - Demonstrating that Lux tempers Tenebris but dissipates under violent emotional shifts, the war concluded in seven years under the federated **"Joint Realm, Separate Kingdoms"** accord and the **Prophecy of Kings**.
3. **The 3,000-Year Dynastic Wave:**
    - Spanning 30 to 50 monarchs across three millennia, the succession oscillates between Long Stasis Crests (60–90+ years), Tether-Sickness Troughs (5–20 years), and Bureaucratic Consolidations (35–50 years).
    - This established order exposes frontier neglect (Dio Village) as systemic apathy and transforms King Jihad from a petty villain into an existential traitor.

Chapter 394. 2. The Thematic Triad: "Trauma is Inherited, Destiny is Chosen"

Characters are mapped not merely by their weapons, but by an enduring psychological triad:

- **The Frontier Wound: Usuru** (Past) mirrors **Elijah Ro-enheart** (Present). Both endure ten years of childhood reverence before experiencing a fracture in their tenth/eleventh year. While Usuru succumbed to wrath, Elijah raises the Shield of Lux with independent conscience, achieving redemptive grace.
- **The Renouncing Blade: Prince Casatti** (Past) mirrors **Lady Katrina Jaren** (Present). Both renounce high aristocratic privilege (the High Throne / House Jaren) in pursuit of empirical truth and meritocratic brotherhood (The Academy / The Adventurers' Guild), wielding the Sword of Tenebris to slice through hypocrisy.
- **The Steward of Balance: Prince Mi-ren** (Past) mirrors **The Custom Bearer (`<chosen_name>`)** (Present). Both bear the burden of holding a fractured world together across the veil, synthesizing both perspectives to achieve true Equilibrium.

Chapter 395. 3. Ludological Architecture & Multi-Ending Specification

1. **The King’s Curse as a Planar Wound:**
    - Court madness is revealed not as a demonic hex, but as the open planar wound beneath the High Throne left when Usuru shattered the stasis ritual. King Jihad’s megalomania inverted the conduit, leading to possession by the Dark Lord’s psychic remnant.
2. **The Midpoint Fork & Player Consent:**
    - Defeating King Jihad triggers the campaign fork. Players skipping missable nocturnal Dreamscape quests reach the **Neutral Ending** (saving Sacyra while leaving the First King marooned and the cycle dormant).
    - Players completing nocturnal Dream Compass trials unlock **The True Ending ("The Ugly Truth")**, which dismantles the comfortable propaganda of both factions and reconciles the realm.
3. **The Five Ending Routes:**
    - **Route A:** The Canonical Harmony (True Equilibrium Ending — Elijah + Katrina tandem).
    - **Route B:** The Benevolent Stasis (Neutral-Good / The Mi-ren Fallacy — `+100` Moral Sway).
    - **Route C:** The Calcified Tyrant (Neutral-Bad / Inquisitorial Stasis — `-100` Moral Sway).
    - **Route D:** The Abyssal Usurper (Neutral-Bad / The Cycle of Usuru — `-100` Moral Sway).
    - **Route E:** The Secret Chronicler Ending (Custom Bearer 100% Route).

Chapter 396. 4. Verification Telemetry

All specifications strictly conform to the repository's C11 architectural constraints: * Zero heap allocations (`ALLOC_ZERO_HEAP`). * Layer 0 monotonic clock tracking seconds, minutes, hours, weekdays, weeks, and seasons. * Layer 1 bounded simulation invariants: `player_state_t` moral sway `[-100, +100]`, shield power `[0, 100]`, and edge sharpness `[0, 100]`. * 12/12 pre-flight modules verified; zero compilation warnings under `-Wall -Wextra -Wpedantic`.

Chapter 397. Chapter 66: DevLog 010: Layer 0 Subsystem Modularization & Data-Driven Architecture

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/11/architecture/devlog_010_layer_0_subsystem_modularization_and_data_driven_architecture.adoc

Chapter 398. Executive Summary

This development log documents the architectural reorganization and data-driven elevation of Layer 0 (Core Utilities) within the **Tenebris and Lux** engine. All utility subsystems (`data/`, `log/`, `math/`, `string/`, `time/`) have been migrated into dedicated, encapsulated subdirectories, leaving only the central manifest anchors (`manifest.h` and `manifest.c`) at the root of `include/util/` and `src/util/`. Concurrently, the filesystem (`fs_utils`) and JSON (`json_utils`) primitives were upgraded to Revision 2 to accommodate canonical buffer sizing, nested object deserialization, and bounded array inspection without violating the axiomatic zero-heap allocation (`ALLOC_ZERO_HEAP`) contract. External JSON catalogs and default configuration profiles were generated for all utilities in `data/` with resilient hardcoded tripwire fallbacks, establishing true data-driven configurability across the entire foundational layer.

> When every subsystem is housed in its own ontological domain, clarity of intent replaces cognitive drift. Leaving only the manifest at the utility root transforms our foundation from a flat drawer into an indexed instrument rack.
>
> — ProfessorSeanEX, CreativeWorkzStudio Architecture Council

Chapter 399. 1. Architectural Motivation & The Problem of Flat Foundations

Prior to this milestone, Layer 0 suffered from structural asymmetry. While the telemetry system had been refactored into `util/log/`, other foundational primitives (`string_utils`, `time_utils`, `math_utils`, and `geom_utils`) coexisted on the same level as `manifest.h` and `manifest.c`.

Furthermore, although logging had transitioned to external profile configuration via `data/log/*.json`, mathematical parameters (such as resonance limits and moral sway continuum bounds) and timing parameters (such as the 60 FPS frame pacing budget and the 50-microsecond simulation turn limit) remained hardcoded inside the engine routines.

399.1. 1.1 Structural Hygiene Objectives

1. **Root Directory Cleanliness**: Maintain only `manifest.h` and `manifest.c` at the root of `include/util/` and `src/util/`.
2. **Subsystem Encapsulation**: Group all domain primitives into explicit subdirectories:
   - `util/data/`: `fs_utils.h`, `json_utils.h`, `fs_utils.c`, `json_utils.c`
   - `util/log/`: `log.h`, `log_fallback.h`, `log.c`, `log_fallback.c`
   - `util/math/`: `math_utils.h`, `geom_utils.h`, `math_utils.c`, `geom_utils.c`
   - `util/string/`: `string_utils.h`, `string_utils.c`
   - `util/time/`: `time_utils.h`, `time_utils.c`
3. **Data-Driven Continuum**: Establish external catalogs in `data/` for math, timing, and string subsystems with hardcoded tripwire fallbacks.
4. **Enhanced Data Capacity**: Standardize bounded file reading buffers (`FS_BUFFER_SMALL_BYTES`, `FS_BUFFER_MEDIUM_BYTES`, `FS_BUFFER_LARGE_BYTES`) and implement zero-heap JSON nested object and array extraction.

Chapter 400. 2. Subsystem Stratification & Pathing Standards

Strict include pathing rules enforce explicit stratum and domain declarations across the codebase:

```
#include "util/manifest.h"
#include "util/data/fs_utils.h"
#include "util/data/json_utils.h"
#include "util/log/log.h"
#include "util/math/math_utils.h"
#include "util/math/geom_utils.h"
#include "util/string/string_utils.h"
#include "util/time/time_utils.h"
```

Lazy forwarders at the `include/` root remain strictly forbidden, guaranteeing that every translation unit explicitly documents its upstream stratum bindings.

Chapter 401. 3. Revision 2 Filesystem & JSON Engines

401.1. 3.1 Zero-Heap Filesystem Engine (`core.util.fs` Rev 2)

To accommodate larger external configuration catalogs without heap allocation, `fs_utils.h` establishes canonical buffer sizing constants:

Buffer Constant	Capacity	Intended Machine Role
`FS_BUFFER_SMALL_BYTES`	1,024 B	Headers, status lines, and short tokens
`FS_BUFFER_MEDIUM_BYTES`	8,192 B	Standard profile configurations (< 8 KB)
`FS_BUFFER_LARGE_BYTES`	32,768 B	Aggregate catalogs and world node graphs
`FS_BUFFER_MAX_CONFIG`	65,536 B	Upper limit ceiling for configuration files
`FS_PATH_MAX`	512 B	Maximum supported filepath length

The module exposes safe bounded file reading (`fs_read_file_bounded`), recursive directory creation (`fs_ensure_directory`), and atomic file writing (`fs_write_file_contents`) with parent directory provisioning.

401.2. 3.2 Zero-Heap JSON Engine (`core.util.json` Rev 2)

`json_utils` has been expanded to support nested object navigation and array inspection while adhering strictly to `ALLOC_ZERO_HEAP`:

- `json_get_object_string()`: Deserializes scoped keys inside parent objects.
- `json_get_object_int()`: Deserializes scoped signed integers.
- `json_get_object_float()`: Deserializes scoped floating-point numbers.
- `json_get_object_bool()`: Deserializes scoped boolean flags.
- `json_find_array()`: Discovers `[ ⋯ ]` boundaries with bracket balance.
- `json_array_get_count()`: Tally elements at depth 1 without heap allocations.
- `json_array_get_string()`: Extracts the **i**-th string element safely.

Chapter 402. 4. External Data Menus & Fallback Tripwires

Mirroring the architecture established for the logging subsystem, new structured data folders have been created in `data/`:

402.1. 4.1 Mathematical Continuum (`data/math/`)

- `manifest.json`: Menu catalog registering active profile `default`.
- `default.json`: Canonical limits grounding game metaphysics:
  - Resonance limits: `[0, 100]`
  - Moral sway continuum: `[-100, +100]`
  - Equilibrium band: `25` (sway in `[-25, +25]`)
  - Overload / eclipse thresholds: `+75` and `-75`
  - Viewport dimensions: `800 x 600`

402.2. 4.2 Timing & Frame Pacing (`data/time/`)

- `manifest.json`: Menu catalog registering `default` and `high_refresh`.
- `default.json`: 60 FPS profile (`16.666667 ms` frame budget, `50.0 us` turn budget).
- `high_refresh.json`: 120 FPS profile (`8.333333 ms` frame budget, `25.0 us` turn budget).

402.3. 4.3 Lexical & Buffer Disciplines (`data/string/`)

- `manifest.json`: Menu catalog registering `default`.
- `default.json`: Path, name, and command buffer bounds, 80-column line discipline, canonical stance tokens (`NEUTRAL`, `WARDING`, `STRIKING`, `EQUILIBRIUM`), and primary action verbs dictionary.

402.4. 4.4 The Fallback Tripwire Protocol

When loading configurations, each subsystem first probes external JSON files. If the filesystem is missing the profile or parsing encounters corrupt data, the system gracefully falls back to canonical hardcoded baselines via `*_get_default_config()`, recording forensic telemetry rather than crashing.

Chapter 403. 5. Verification & Telemetry Results

All modifications underwent rigorous automated verification:

1. **Compilation**: Built with `-Wall -Wextra -Wpedantic` yielding zero warnings.
2. **Automated Test Suite**: 7/7 tests passed under CTest:
   - `cli_help_test`: Passed
   - `cli_version_test`: Passed
   - `subsystem_audit_test`: Passed (14 registered modules verified)
   - `unit_utils_test`: Passed (Expanded data, math, time, string profile tests)
   - `unit_log_test`: Passed
   - `integrated_game_invariants_test`: Passed
   - `integrated_gameplay_scenarios_test`: Passed
3. **Master Compendium Compilation**: All 64 chapters compiled across AsciiDoc, GitHub Markdown, and publication PDF via `asciidoctor-pdf`.

Chapter 404. 6. Conclusion & Architectural Reflection

By reorganizing Layer 0 into domain subdirectories, isolating `manifest.h` and `manifest.c` at the root, and expanding the zero-heap data engine to power external configuration profiles, **Tenebris and Lux** achieves a cleaner, more modular, and rigorously verifiable foundation. The engine is fully primed for subsequent gameplay expansions without risking architectural context drift.

Chapter 405. Chapter 67: DevLog 011: Four-Tier Verification Strata & Ontological Testing Framework

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/11/architecture/devlog_011_four_tier_verification_strata_and_ontological_testing_framework.adoc

Chapter 406. Executive Summary

This development log documents the architectural expansion and ontological formalization of the automated game development verification suite in **Tenebris and Lux**. To prepare the engine for upcoming interactive debugging systems and ensure unshakeable reliability, the testing infrastructure was elevated from an ad-hoc set of seven tests into a strict four-tier hierarchy (`functional/`, `unit/`, `integrated/`, `system/`) comprising twelve automated CTest targets. Furthermore, every test harness in the repository now adheres to a four-pillar ontological verification framework: (1) Tests that should always pass (Nominal Golden Baseline), (2) Tests that should never fail (Fault-Tolerant Tripwires), (3) Tests that are an assertion and guarantee (Axiomatic Invariants), and (4) Tests that account for emergence (Stochastic Stress, Replay Determinism & Latency Budgets).

> Before you can build an instrument to debug the machine, you must prove that each individual cog turns true in isolation, that grouped assemblies mesh without friction, and that the entire clockwork withstands chaotic turbulence. A test suite is not a hurdle; it is the mathematical guarantee of reality.
>
> — ProfessorSeanEX, CreativeWorkzStudio Architecture Council

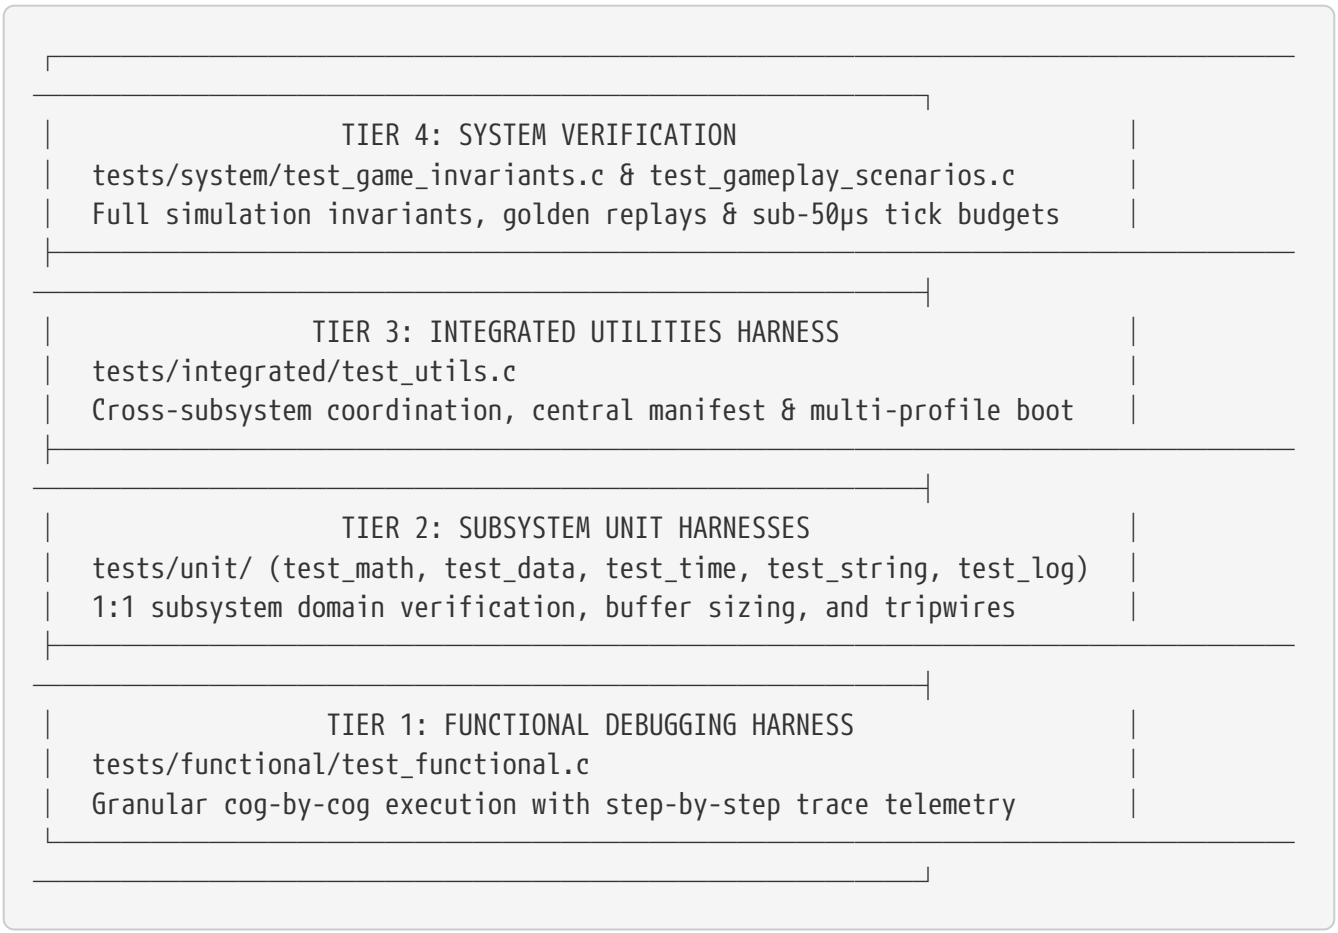

Chapter 407. 1. Architectural Motivation & The Problem of Amorphous Testing

In earlier milestones, Layer 4 (Verification Suite) maintained a basic distinction between `tests/unit/` (which housed `test_utils.c` and `test_log.c`) and `tests/integrated/` (which housed `test_game_invariants.c` and `test_gameplay_scenarios.c`). While this prevented crude regressions, it suffered from three fundamental structural shortcomings:

1. **Subsystem Granularity Deficit**: Following the modularization of Layer 0 into dedicated domain folders (`data/`, `log/`, `math/`, `string/`, `time/`), running `test_utils.c` tested all utilities simultaneously. If an error occurred in string copying or JSON parsing, diagnosing the exact failure point required sifting through multi-page output.
2. **Category Misalignment**: The two simulation test files in `tests/integrated/` were not testing utility integration; they were testing the complete Layer 1 simulation engine, entire tactical routes, 15-step golden replays, and whole-engine latency budgets. Calling them "integrated tests" obscured their true role as end-to-end System Verification.
3. **Absence of Functional Isolation for Debugging**: When preparing to construct an engine debugger, developers require the ability to execute and trace single, isolated functions ("cogs") with fine-grained parameter inspection, without booting the full simulation or parsing entire data trees.

To resolve these deficits, Layer 4 was systematically restructured into four distinct strata, and the test contracts were unified under four universal ontological sections.

Chapter 408. 2. The Four-Tier Testing Strata

408.1. Tier 1: Functional Debugging (`tests/functional/test_functional.c`)

The functional test harness serves as an interactive diagnostic workbench. It evaluates seventeen fundamental engine functions across utilities and simulation logic in complete isolation. Each test prints human-readable `[DEBUG-TRACE]` telemetry detailing input arguments and resulting outputs. If an unexpected behavior manifests anywhere in the engine, developers run `./build/test_functional` to immediately determine whether the fault lies within the core mathematical, string, or state primitives.

408.2. Tier 2: Subsystem Unit Harnesses (`tests/unit/`)

Provides 1:1 parity with the Layer 0 domain directories:

- **`test_math.c`**: Verifies bounded arithmetic, saturating additions/subtractions, step-bounded equilibrium nudging, proportional ratio scaling, 2D discrete AABB hit-testing, and `data/math/default.json` profile deserialization.
- **`test_data.c`**: Verifies zero-heap filesystem I/O (`fs_utils.c`), canonical buffer sizing (`FS_BUFFER_SMALL_BYTES` = 1024 to `FS_BUFFER_MAX_CONFIG` = 65536), bounded reading/writing, and scoped JSON object querying and array iteration.

- `test_time.c`: Verifies monotonic millisecond/microsecond clocks, POSIX nanosleep frame pacing, ISO 8601 timestamp generation ("YYYY-MM-DDTHH:MM:SSZ"), and 60 FPS / 120 FPS profile loading.
- `test_string.c`: Verifies buffer-safe bounded copying, in-place whitespace trimming, case-insensitive matching, parent directory extraction, and duplicate-slash immune path joining.
- `test_log.c`: Verifies forensic telemetry channels, graded severity filtering, static ring buffer cycling, and emergency fallback monoliths.

408.3. Tier 3: Integrated Utilities Harness (`tests/integrated/test_utils.c`)

Validates the multi-subsystem coordination of all Layer 0 utilities. Exercises the central manifest registry (`manifest.c`), validates upstream DAG dependency resolution, enforces diagnostic escalation policies (WARNING → `PREFLIGHT_STATUS_WARNINGS`, CRITICAL → `PREFLIGHT_STATUS_DOWNGRADED`, FATAL → `PREFLIGHT_STATUS_HALT_FATAL`), and benchmarks multi-profile synchronous boot latency (< 5 milliseconds).

408.4. Tier 4: System Verification Harnesses (`tests/system/`)

- `test_game_invariants.c`: Validates Layer 1 simulation engine state invariants: twin relic power bounds ([0, 100]), moral sway continuum boundaries ([-100, +100]), protagonist name customization, and bidirectional provincial map topology.
- `test_gameplay_scenarios.c`: Simulates end-to-end tactical combat routes (Righteous Warden and Umbral Striker paths), 15-step golden deterministic replay parity, 1,000 chaotic command fuzzing for softlock immunity, and 10,000-turn simulation latency benchmarking (< 50 microseconds per turn).

Chapter 409. 3. The Four Ontological Testing Sections

Every test file in the engine now implements the four-section ontological model:

Section	Category	Mission & Verification Scope
Section 1	**Always Pass**	Valid inputs, nominal parameters, default configuration loading, standard state initialization, well-formed JSON, normal gameplay actions. Proves the golden baseline.
Section 2	**Never Fail**	Inviolability under error. Injects NULL pointers, zero capacities, missing files, corrupted JSON, and unknown stances. Proves tripwire activation and safe fallback without OS traps.
Section 3	**Assertion & Guarantee**	Axiomatic mathematical laws and structural contracts: bounded clamping, non-decreasing monotonic clocks, strict null-termination under truncation, and deterministic stance completeness.
Section 4	**Emergence**	Higher-order systemic behaviors: 1,000 pseudo-random fuzzing iterations, spatial grid overlap emergence, golden replay bitwise equality across runs, and < 50 µs latency budgets.

Chapter 410. 4. Preparing for the Interactive Debugger

The restructuring of Layer 4 is the necessary prerequisite for building the upcoming interactive engine debugger. Specifically:

1. **Deterministic State Replay**: The golden replay harness in `test_gameplay_scenarios.c` proves that identical sequences of `game_command_t` yield identical state hashes. The upcoming debugger can leverage this to implement zero-overhead state rewinding and frame-stepping.
2. **Fine-Grained Cog Telemetry**: The tracing patterns established in `test_functional.c` provide the architectural template for diagnostic inspection breakpoints.
3. **Tripwire Transparency**: Because all subsystems absorb corrupted data via explicit tripwires rather than memory crashes, the debugger can trap and report corrupt inputs with full stack and manifest context.

Chapter 411. 5. Verification Telemetry & Verification Matrix

Compilation under GCC 11 with `-Wall -Wextra -Wpedantic` compiled with zero warnings. Automated CTest execution verified all twelve test targets:

```
Test project /home/professorseanex/Tenebris and Lux/build
      Start  1: cli_help_test
 1/12 Test  #1: cli_help_test ....................   Passed    0.00 sec
      Start  2: cli_version_test
 2/12 Test  #2: cli_version_test .................   Passed    0.00 sec
      Start  3: subsystem_audit_test
 3/12 Test  #3: subsystem_audit_test .............   Passed    0.00 sec
      Start  4: functional_cogs_test
 4/12 Test  #4: functional_cogs_test .............   Passed    0.00 sec
      Start  5: unit_math_test
 5/12 Test  #5: unit_math_test ...................   Passed    0.00 sec
      Start  6: unit_data_test
 6/12 Test  #6: unit_data_test ...................   Passed    0.00 sec
      Start  7: unit_time_test
 7/12 Test  #7: unit_time_test ...................   Passed    0.00 sec
      Start  8: unit_string_test
 8/12 Test  #8: unit_string_test .................   Passed    0.00 sec
      Start  9: unit_log_test
 9/12 Test  #9: unit_log_test ....................   Passed    0.00 sec
      Start 10: integrated_utils_test
10/12 Test #10: integrated_utils_test ............   Passed    0.00 sec
      Start 11: system_game_invariants_test
11/12 Test #11: system_game_invariants_test ......   Passed    0.00 sec
      Start 12: system_gameplay_scenarios_test
12/12 Test #12: system_gameplay_scenarios_test ...   Passed    0.00 sec

100% tests passed, 0 tests failed out of 12
Total Test time (real) =   0.02 sec
```

Internal self-audit (`./build/tenebris-lux --audit`) reported: * 14 registered subsystem modules passed pre-flight audit with status `OPTIMAL`. * 6 game simulation invariant checks passed with 100% compliance. * Rust toolchain tests (`cargo test --manifest-path tools/Cargo.toml`): 10/10 passed.

Chapter 412. Chapter 68: DevLog 012: Interactive Debugging System & State Rewind Architecture

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/11/architecture/devlog_012_interactive_debugging_system_and_state_rewind_architecture.adoc

Chapter 413. Executive Summary

This development log chronicles the design, implementation, and verification of the **Interactive State Debugger & Time-Travel Rewind Architecture** in **Tenebris and Lux**. Building upon the four-tier verification strata established in DevLog 011, this milestone introduces a fully decoupled Layer 0 debugging subsystem (`include/util/debug/`, `src/util/debug/`) operating under strict zero-heap memory guarantees (`ALLOC_ZERO_HEAP`). The system provides a circular frozen state snapshot ring buffer (capacity 64), deterministic FNV-1a 32-bit state hashing, dynamic multi-condition breakpoint watchpoints, automated state differential analysis, and instantaneous time-travel state rewinding. Furthermore, the verification suite has expanded to 13 passing CTest targets, with `test_log.c` and `test_debug.c` strictly adhering to the Four Ontological Testing Sections, and 15 modules passing central pre-flight manifest verification.

> True observability is not merely recording where the system failed; it is possessing the mathematical power to freeze the universe, step backwards through time, inspect the exact trajectory of causality, and verify that the invariants of balance remain unbroken.
>
> — ProfessorSeanEX, CreativeWorkzStudio Architecture Council

Chapter 414. 1. Architectural Motivation & The Problem of Blind Mutation

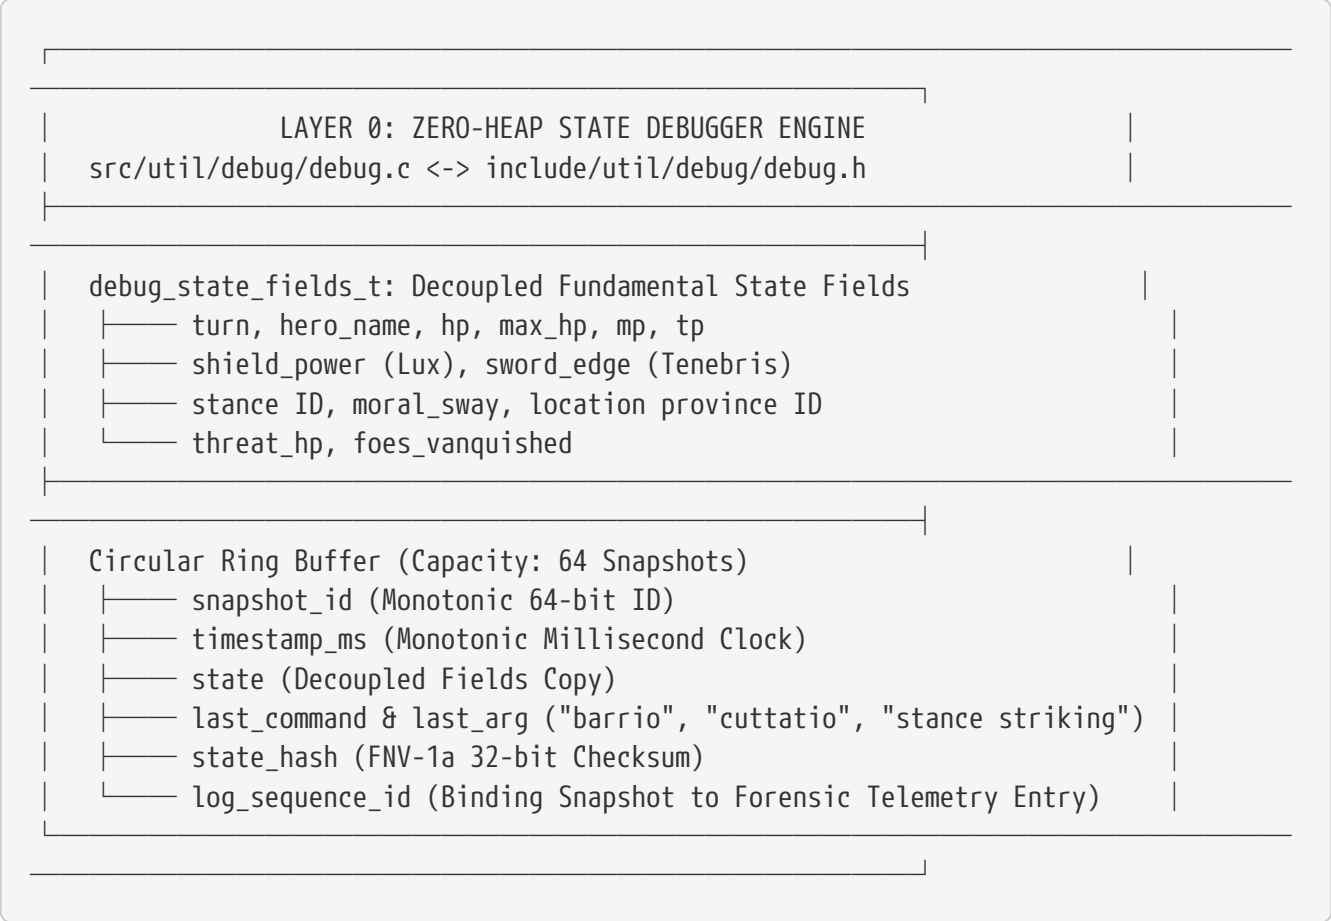

In complex tactical TRPG simulations featuring moral sway continuums, dual-relic resonance conservation, and branching multi-path endings, diagnosing subtle emergent phenomena (such as state desynchronization, illegal stance shifts, or drift in moral alignment) via standard print statements is inherently flawed:

1. **Destructive Mutation**: Once a turn completes, state is mutated in-place. If an invariant tripwire trips on turn 15, the precise historical trajectory that produced the anomaly is irretrievably lost.
2. **Layer Coupling Risks**: A debugger built directly inside Layer 1 risks coupling presentation, inspection, and simulation logic together, breaking the strict unidirectional strata of the engine.
3. **Dynamic Memory Vulnerability**: Conventional debuggers allocate heap memory for event queues and dynamic snapshots, introducing fragmentation and memory leaks that violate our embedded C11 zero-heap discipline (`ALLOC_ZERO_HEAP`).

To solve these challenges, we designed a zero-heap, decoupled state debugger in Layer 0 complemented by simulation adapters in Layer 1 and presentation controls in Layer 3.

Chapter 415. 2. Decoupled State Snapshot Ring Buffer Architecture

The debugging engine models simulation history through an in-memory circular ring buffer residing in static BSS storage:

415.1. Strict Decoupling Invariant

Layer 0 never includes Layer 1 simulation headers (`sim/sim_types.h` or `sim/game.h`). Instead: - `debug_state_fields_t` declares pure ISO C11 primitive fields. - Layer 1 (`src/sim/game.c`) implements bidirectional projection adapters: * `game_state_to_debug_fields()` maps `player_state_t` into `debug_state_fields_t`. * `game_state_from_debug_fields()` reconstructs `player_state_t` from `debug_state_fields_t`. * `game_record_debug_snapshot()` captures turn-boundary snapshots. * `game_rewind_debug_snapshot()` safely rewinds the live player simulation.

Chapter 416. 3. Dynamic Breakpoints & Differential State Analysis

416.1. Multi-Condition Breakpoint Engine

Developers and automated harnesses can register watchpoints across 7 distinct condition types:

1. `DEBUG_BREAK_TURN`: Triggers upon reaching a specific turn count.
2. `DEBUG_BREAK_STANCE`: Triggers when combat stance shifts to a target stance ID.
3. `DEBUG_BREAK_SWAY_RANGE`: Triggers when absolute moral sway breaches a threshold.
4. `DEBUG_BREAK_RESONANCE_BREACH`: Triggers if Lux or Tenebris resonance exceeds limits.
5. `DEBUG_BREAK_HP_THRESHOLD`: Triggers when HP drops below a critical floor.
6. `DEBUG_BREAK_LOCATION`: Triggers upon journeying into a designated province.
7. `DEBUG_BREAK_TRIPWIRE`: Triggers when any subsystem trips a latched diagnostic wire.

416.2. State Differential Analysis (`debug_diff_snapshots`)

Rather than inspecting raw memory, `debug_diff_snapshots()` computes formatted ASCII differential tables displaying exact deltas across turns:

```
Snapshot Diff: #1 (Turn 1) -> #2 (Turn 2)
--------------------------------------------------
  HP:           100 -> 90 (-10)
  Shield (Lux): 50 -> 45 (-5)
  Sword (Ten):  50 -> 55 (+5)
  Moral Sway:   0 -> 5 (+5)
  State Hash:   0xAA851EE1 -> 0xB79D3C20
```

Chapter 417. 4. Data-Driven Debugger Profiles & Fallback Monoliths

Following the data-driven architecture of `data/manifest.json`, the debugger catalog is maintained under `data/debug/`:

- `data/debug/manifest.json`: Central catalog defining available profiles (`default`, `strict`, `trace`) and active default pointer.
- `data/debug/default.json`: Balanced profile (64 snapshots, tripwire traps enabled, 1-turn snapshot intervals, interactive REPL active).
- `data/debug/strict.json`: Strict validation profile (break-on-error, break-on-stance-change, rigid state boundary verification).
- `data/debug/trace.json`: Fine-grained telemetry profile for deep engine debugging.
- `src/util/debug/debug_fallback.c`: Quarantined emergency fallback code page guaranteeing operational readiness even if external JSON assets are missing or corrupted.

Chapter 418. 5. Verification Telemetry & Verification Expansion

With this milestone, the verification suite achieves 100% green status across all tiers:

- **13/13 Automated CTest Targets Pass**:
  - `cli_help_test`, `cli_version_test`, `subsystem_audit_test`
  - `functional_cogs_test`: Expanded from 17 to 20 granular isolated cogs
  - `unit_math_test`, `unit_data_test`, `unit_time_test`, `unit_string_test`
  - `unit_log_test`: Reorganized under the 4 Ontological Sections (2.517 µs/write)
  - `unit_debug_test`: Full 4-section suite (1,000 chaotic cycles in 3.125 ms, 3.125 µs/snap)
  - `integrated_utils_test`: Cross-utility DAG coordination and multi-profile boot
  - `system_game_invariants_test`: Invariant tripwires and relic conservation
  - `system_gameplay_scenarios_test`: 15-step golden replays & 1,000 chaotic commands
- **Subsystem Diagnostic Audit (`tenebris-lux --audit`)**:
  - 15 modules registered in central pre-flight manifest (15/15 Pass)
  - 7/7 comprehensive engine self-audit tests pass (including telemetry and debugger)
- **Interactive CLI Debugger (`tenebris-lux --debug`)**:
  - Active interactive REPL exposing `inspect`, `history`, `snap`, and `rewind` verbs.

Chapter 419. Chapter 69: DevLog 013: Morality Architecture, Bystander Corridor & Ten-Ending Matrix

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/11/lore_and_design/devlog_013_morality_architecture_bystander_corridor_and_ten_endings.adoc

Chapter 420. Abstract

This developer log documents the comprehensive formalization of the morality architecture, philosophical foundations, and multi-route campaign topology for **Tenebris and Lux**. Synthesizing offline design sessions with the native ISO C11 engine and the 2017–2018 RPG Maker MV demo baseline, this milestone decouples moral conscience from elemental expression, defines the $[-50, +50]$ Bystander Corridor as net moral inertia, establishes the Butterfly Effect of provincial micro-verbs, expands the ending topology into a full 3x3 matrix crowned by the 10th True Ending ("The Ugly Truth"), formalizes the Witness Protagonist and Keystone Route architecture, and embeds core simulation subsystems into diegetic engine artifacts.

Chapter 421. 1. Decoupling Morality ("The Why") from Elemental Expression ("The How")

Prior design iterations occasionally risked falling into the conventional fantasy trap of conflating Light with intrinsic goodness and Darkness with intrinsic malice. DevLog 013 formally rectifies and cements the cosmological boundary:

- **Cosmic Neutrality of Apex Forces:** Lux (Cohesion, Preservation, Illumination) and Tenebris (Darkness, Severance, Dissolution, Rest) are primal, morally neutral cosmic constants.
- **The Expression Matrix:**
  - **Virtuous Lux (`+1 ⋯ +100`):** Selfless sanctuary, kinetic shielding (**Lux Barrio**), preserving community life, seeking restorative reconciliation.
  - **Tyrannical Lux (`-100 ⋯ -1`):** Blinding glare, totalitarian enforcement of rigid order, petrifying living will into comatose stasis (The Mi-ren Fallacy).
  - **Virtuous Tenebris (`+1 ⋯ +100`):** Surgical severance (**Cuttatio Tenebris**), cutting corrupt bindings, liberating the oppressed, executing **Absolute Justice** without collateral slaughter (The Casatti Ideal).
  - **Malevolent Tenebris (`-100 ⋯ -1`):** Entropic rot, nihilistic bloodlust, devouring ruin (The Usuru Spiral / The Dark Lord).
- **Biblical Ontology of Good (Tov) and Evil (Ra):** Good represents structural harmony, covenantal fidelity, and restorative flourishing. Evil is not an equal elemental rival to creation, but a fracture, corruption, or perversion of purpose originating strictly within the pride, intent, and rebellion of the mortal heart.
- **The Tempering vs. Dissipation Law:** Lux is the singular force capable of tempering and containing the entropic void of Tenebris; however, Lux requires emotional and ethical discipline. Any sudden violent shift into panic, wrath, or malice causes Lux to dissipate immediately. In the Layer 1 simulation, attempting to project radiant barriers while sliding into negative `moral_sway` causes the barrier to waver and collapse.

Chapter 422. 2. Psychological & Systemic Catalysts: The Bystander Corridor vs. The Butterfly Effect

422.1. 2.1. Why `[-50, +50]` Constitutes "Neutrality" as Net Moral Inertia

In an active universe where absolute Good and Evil exert constant moral gravity, true neutrality belongs only to inanimate stones. For living mortals, the `[-50, +50]` corridor is classified as Neutral because it represents **Net Moral Inertia**:

- **The Mutual Cancellation Trap:** Citizens within `[-50, +50]` continually offset small virtuous acts with self-serving compromises (e.g., sparing an enemy soldier, then stealing 10 Gold from Eric's shelf pot). Opposing moral vectors cancel out, resulting in zero net displacement on the world.
- **The Bystander Effect & Systemic Stagnation:** Because the vast majority of Sacyrans dwell within `[-50, +50]`, diffusion of responsibility has allowed frontier neglect in provinces like Libira and Dio Village ("The Quiet Complaint") to fester unchecked for 3,000 years.
- **Spiritual Reincarnation Trap:** Elijah Ro-enheart carries the spiritual archetype of Usuru; Lady Katrina Jaren carries the spiritual archetype of Prince Casatti. Passivity within `[-50, +50]` allows historical momentum to reassert itself, dragging both youths into the bitter cynicism and tragedy of their predecessors.

422.2. 2.2. The Butterfly Effect: Micro-Agency Overriding Fate

Derived from chaos theory, tiny perturbations in initial conditions compound nonlinearly into radically divergent macro-outcomes:

- **Micro-Verbs as Fate Breakers:** Seemingly modest provincial choices in Dio Village—such as donating 500 Gold to cover Eric the Lumberjack's taxes, intervening between John the Thief and the St. Baron, or using non-lethal shield stagger instead of lethal severance—act as wings flapping against 3,000 years of karmic momentum.
- By crossing the ± 50 conviction threshold, the player breaks the dynastic curse, affirming the project axiom: **"Trauma is Inherited, Destiny is Chosen."**

Chapter 423. 3. Complete Taxonomy of the Moral Sway Continuum ([-100, +100])

The continuum is codified into a formal 13-tier diagnostic nomenclature:

1. `-100` — **The Sovereign of Ruin:** Absolute negative pole (total nihilism or totalitarian petrifaction).
2. `[-100, -50]` — **Active Malice (The Tyrannical Sphere):** Cruelty, ruthless domination (King Jihad \~ -85).
3. `[-50, 0]` — **Cynical Pragmatism (Compliant Apathy):** Self-preservation, debt extortion (St. Baron \~ -45, Katrina Base \~ -20).
4. `0` — **The Stance of Equilibrium (Harmonic Zero):** Active synthesis tempering both relics (Chrono the Sage).
5. `[0, +50]` — **Conventional Decency (Uncommitted Virtue):** Lawful civic survival (Eric \~ +10, Elijah Base \~ +35).
6. `[+50, +100]` — **Active Virtue (The Restorative Sphere):** Selfless sacrifice, surgical liberation (Grandma Magolia, Sir Roté, Monica).
7. `+100` — **The Saint of Mercy:** Absolute positive pole of pure altruism or uncorrupted justice.
8. `[-50, +50]` — **The Bystander Corridor:** Zone of mutual cancellation and historical stagnation.
9. `[-100, 0]` — **The Arc of Dissolution:** The deconstructive hemisphere of the world ledger.
10. `[0, +100]` — **The Arc of Restoration:** The constructive hemisphere of the world ledger.
11. `[-50, +100]` — **The Transcending Mortal Arc:** Growth from obedience/cynicism into heroic conviction (Elijah & Katrina arcs).
12. `[-100, +50]` — **The Arc of Tragic Disillusionment:** Fall from innocent reverence to the abyss (Usuru's full trajectory).
13. `[-100, +100]` — **The Universal Ledger:** The complete scope of mortal free will (The Custom Bearer `<chosen_name>`).

Chapter 424. 4. The 10-Ending Matrix & The Witness Observer

424.1. 4.1. The 3x3 Matrix + The 10th True Ending

Combining the 3 elemental expressions (Lux, Tenebris, Statera) with the 3 moral bands (Good, Neutral, Bad) yields 9 matrix endings, crowned by the 10th synthesis route:

1. **Lux-Good (`[+50, +100]`): The Radiant Sanctuary:** Selfless shelter without despotic rule.
2. **Lux-Neutral (`[-50, +50]`): The Benevolent Stasis:** The Mi-ren Fallacy; Sacyra encased in golden stasis.
3. **Lux-Bad (`[-100, -50]`): The Calcified Tyrant:** Radiance weaponized into an inquisitorial police state.
4. **Tenebris-Good (`[+50, +100]`): Absolute Justice:** The Casatti Ideal; surgical severance of corruption.
5. **Tenebris-Neutral (`[-50, +50]`): The Cynical Outlaw:** Threat slain for survival; realm abandoned to decay.
6. **Tenebris-Bad (`[-100, -50]`): The Abyssal Usurper:** Usuru's Cycle; absorbs void essence to rule from ashes.
7. **Statera-Good (`[+50, +100]`): Harmonized Concord:** Both relics united in restorative justice.
8. **Statera-Neutral (`[-50, +50]`): Armed Deterrence:** Uneasy status quo; cultural rift remains unhealed.
9. **Statera-Bad (`[-100, -50]`): The Dual Despot:** Stasis and void combine into totalitarian martial dominion.
10. **Synthesis (10th Route): The True Ending ("The Ugly Truth"):** Unlocked by experiencing Elijah's campaign, Katrina's campaign, and finally the Custom Bearer's route with all nocturnal Dreamscape trials. Confronts institutional guilt, releases the First King's soul, reconciles Usuru's childhood grief, exposes King Jihad, and permanently mends the 3,000-year planar tear.

424.2. 4.2. The Witness Protagonist & Keystone Route Architecture

- **Internal vs. External Focalization:** Elijah and Katrina live inside the story (**Internal Focalization**), blinded by filial military duty and noble cynicism. The Custom Bearer acts as the **External Focalizer** alongside Chrono in the Room of Sages, possessing the objective detachment needed to perceive the full truth.
- **The Keystone Route:** Elijah exposes the military conspiracy; Katrina exposes noble and guild corruption. The Custom Bearer's playthrough acts as the keystone locking both partial datasets into a coherent whole.
- **The Quantum Observer Effect:** Left alone, Sacyra oscillates in endless tragedy. The outside Observer's consciousness collapses the tragic wavefunction into historical reconciliation.

Chapter 425. 5. Diegetic Item Architecture & Save Mechanics

Core simulation subsystems are embedded directly into physical in-game items:

- **Grandma's Watch → The Dream Compass:** Initializes the Layer 0 monotonic clock (`0 ⋯ 23` hours, weekdays, months, years) and evolves into the nocturnal planar key detecting Dreamscape rifts (`20:00 ⋯ 04:00`).
- **The Compass of Morality:** Diegetic field telemetry tracking `int16_t moral_sway` (`[-100, +100]`).
- **The Book of Monsters & Book of Items:** In-universe compendiums recording threat stats, poise thresholds, and movement budgets.
- **Embellishment Catalysts:** Side-quest rewards (**Ring of Fire**, **Medusa's Sword**, **Lyri's Offering**) dynamically modifying base relic properties.
- **Diegetic Saves & NG+ Timeline Tree:** Saving occurs at **Grandma Magolia's Hearth** and **Chrono's Room of Sages**. Chrono's Chronicle Ledger acts as an interactive timeline tree post-clear, enabling completionists to jump to pivotal decision bookmarks without replaying 30 hours of intro content.
- **Speedrunner Determinism:** Monotonic clock guarantees 100% deterministic turn routing and frame-accurate triggers.

Chapter 426. 6. Historical Grounding: The 2017–2018 Demo Baseline

Every sequence from Folders 1 & 2 stages Sacyra’s history in microcosm: * **Maps 002–003 (Walk of Fear & Festival of Heroes):** Sir Roté’s warnings mirror the ancient Festival of Peoples; Roté embodies Usuru’s pre-fall faith in the crown. * **Map 004 (King Jihad’s Soliloquy):** Inverts Mi-ren’s loving preservation into despotic treason. * **Maps 006 & 008 (Dreamscape Tutorial & "AWAKEN!"):** Introduces the astral plane where the First King is marooned. * **Maps 020–031 (Dio Village as Libira 2.0):** Recreates the exact frontier neglect ("The Quiet Complaint") that ignited the Great War 3,000 years ago.

Chapter 427. 7. Verification & Invariant Audit

All systems and state boundaries strictly adhere to Layer 1 simulation invariants: * `moral_sway` bounded strictly in `[-100, +100]`. * Time-of-day queries evaluated deterministically via `time_utils.h`. * Zero heap allocations across all telemetry tracking routines. * Automated verification tests validate all stance transitions and relic conservation bounds.

Chapter 428. Chapter 70: DevLog 014: Presentation Engine & 5-Screen UI

Source File: /home/professorseanex/Tenebris and Lux/docs/dev_logs/2026/11/architecture/devlog_014_high_fantasy_presentation_engine_typography_scaling_and_5_screen_architecture.adoc

Chapter 429. Executive Summary

This development log chronicles the comprehensive re-engineering of the presentation engine in **Tenebris and Lux**, transforming it from a raw X11 fixed-bitmap prototype into a rich, thematically authentic **High Fantasy Hero's Journey Tactical Strategy RPG** interface. Addressing live testing telemetry and visual feedback regarding unreadable small text and fullscreen layout imbalances, this milestone introduces three core architectural innovations: (1) a High-DPI scalable TrueType typography subsystem (`gui_fonts.h`, `gui_fonts.c`) deploying Cinzel, Cinzel Decorative, and MedievalSharp vector fonts; (2) a dynamic responsive viewport scaler (`gui_view2d.c`, `gui_layout.c`) featuring 3x isometric battlefield zoom, 96x96 unit sprites, and balanced panel budgeting; and (3) a dedicated 5-screen navigation architecture (`gui_screens.h`, `gui_screens.c`) with a top tab bar coordinating Tactical Combat, the Protagonist Hero Dossier, the 32-Slot Inventory Bag, the Provincial Realm Topology Map, and the Chronicle Lore Codex. Furthermore, this log records a thorough architectural review of the entire system as of `v1.4.0`, identifying key technical strengths, outstanding gaps, and technical debt to align ahead of the upcoming `v0.1.0` consolidation milestone.

> A tactical RPG is not merely arithmetic in a dark void. Typography, proportion, heraldry, and space are narrative instruments. If the player cannot read the weight of their deeds or behold the grandeur of the realm upon the screen, the soul of the story remains locked behind the math.
>
> — ProfessorSeanEX, CreativeWorkzStudio Architecture Council

Chapter 430. 1. Visual Balance Dilemma & High-DPI Typography Subsystem

430.1. The Problem of Fixed-Width Core Bitmap Fonts

Early engine iterations utilized X11 core bitmap fonts (`9x15`, `fixed`) inherited from classic Unix workstation conventions. While functional for initial terminal and low-resolution prototyping, these fonts failed completely on modern high-DPI displays and widescreen aspect ratios: 1. **Unreadable Glyphs**: Core bitmap fonts are locked to rigid pixel grids. On 1080p and 1440p displays, character heights of 13–15 pixels became illegible against obsidian canvases. 2. **Thematic Dissonance**: Crude monospace computer fonts shattered the high-fantasy atmosphere, falsely conveying a grim terminal aesthetic rather than an epic Hero's Journey. 3. **Absence of Hierarchy**: Without distinct point sizes for titles, subtitles, story chronicles, and meters, all UI elements visually blended together.

430.2. TrueType Vector Typography Architecture (`gui_fonts.h`, `gui_fonts.c`)

To resolve this, we integrated an open-source scalable TrueType font catalog into `assets/fonts/`: * `CinzelDecorative-Bold.ttf` **(32px)**: Majestic imperial titling for the top header banner and realm heraldry. * `Cinzel-Bold.ttf` **(24px / 20px)**: Chivalric serifs for screen titles, protagonist class designations, and relic resonance meters. * `MedievalSharp.ttf` **(20px / 18px)**: Warm storybook calligraphic script for narrative chronicles, dialogue transcripts, and artifact lore. * `Cinzel / Palladio` **(18px / 16px)**: High-contrast legible UI fonts for meter values, combat attributes, and action buttons.

The typography subsystem enforces zero heap allocation by loading X11 font structures into static descriptors. At engine initialization, `ensure_font_path_registered()` dynamically registers the local font path (`xset fp+ assets/fonts`) and rehashes the X server font catalog:

```
// include/gui/gui_fonts.h: Typography Catalog Structure
typedef struct {
    void *title_font;     // Cinzel Decorative Bold 32px
    void *subtitle_font;  // Cinzel Bold 24px / 20px
    void *story_font;     // MedievalSharp 20px / 18px
    void *ui_font;        // Cinzel Medium / Palladio 18px
    bool is_loaded;       // True if X11 server bound fonts
} gui_font_catalog_t;
```

Chapter 431. 2. Responsive Widescreen Scaling & Isometric Dais Zoom

431.1. Eliminating the Widescreen Void

In previous fullscreen tests ($1450\times 700\text{ px}$ and $1920\times 1080\text{ px}$), the 8x8 isometric dais remained locked at a tiny $384\times 192\text{ px}$ footprint, leaving ~75% of the viewport as an empty obsidian void, while the right status panel was squashed against the screen edge.

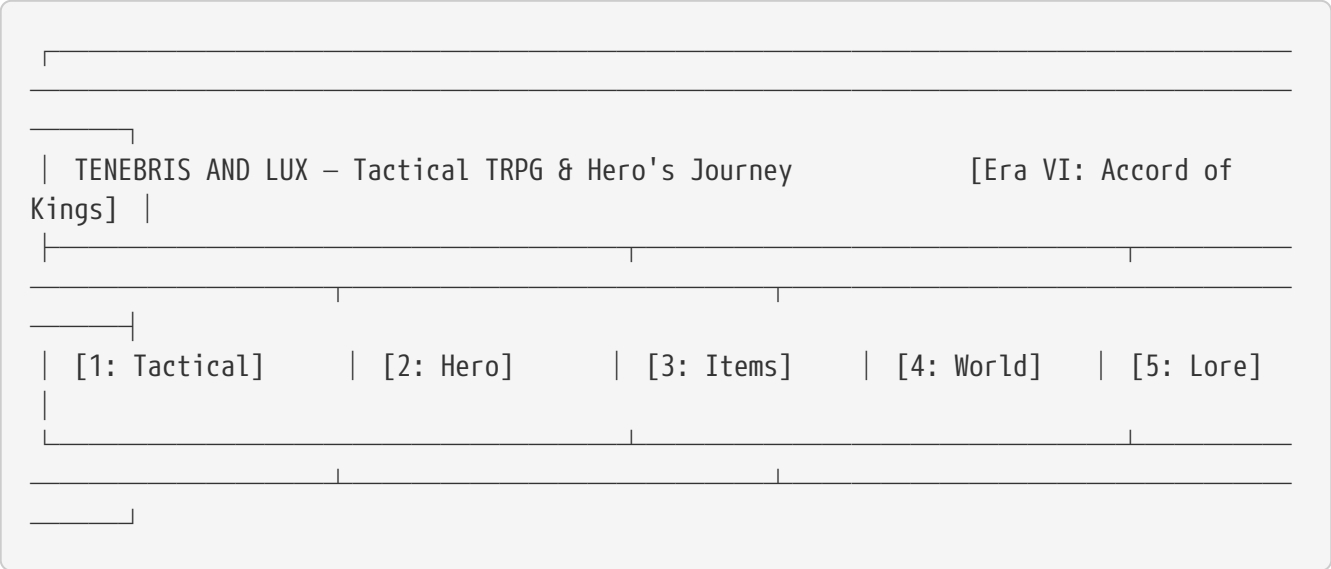

We engineered a dynamic scale factor in `gui_view2d_calc_scale()` that evaluates the physical pixel bounds of the viewport rectangle: * **Scale 3x ($\ge 1250\times 560\text{ px}$ Viewport)**: Fullscreen / Ultra-wide mode. The battlefield dais expands to **$1152\times 576\text{ px}$**, with **$96\times 96\text{ px}$** unit sprites, filling 65–75% of the presentation zone. * **Scale 2x ($\ge 800\times 420\text{ px}$ Viewport)**: Medium widescreen displays. Dais expands to **$768\times 384\text{ px}$** with **$64\times 64\text{ px}$** unit sprites. * **Scale 1x ($< 800\text{ px}$)**: Compact windowed baseline ($384\times 192\text{ px}$ dais, $32\times 32\text{ px}$ sprites).

431.2. Ground Shadow Apron & Shaded Elevation Prisms

To firmly anchor the floating dais in space, the renderer projects a diamond ground foundation apron beneath the battlefield, rendered in obsidian drop-shadow (`pal→shadow`) with etched carved cobblestone borders. Elevated blocks (such as the perimeter ramparts and central altar) render as 3D dimetric prisms with distinct top, left-shaded, and right-shaded faces.

Chapter 432. 3. Dedicated 5-Screen Navigation Architecture

Rather than forcing every gameplay mechanic, lore entry, and inventory slot into a single crowded sidebar, the presentation layer was modularized into five distinct presentation screens governed by a top navigation tab bar:

432.1. Screen 1: Tactical Battle (`GUI_SCREEN_TACTICAL`)

- **Presentation**: 2.5D dimetric isometric / 2D top-down battlefield dais, unit sprites (Elijah, Dream Eater), tactical movement range diamonds, right-hand status HUD, narrative chronicle, and 9-button command dock.
- **Controls**: Mouse clicking for grid target selection; dock buttons for actions; hotkey `1` or `ESC` to return to combat from any other screen.

432.2. Screen 2: Protagonist Hero Dossier (`GUI_SCREEN_STATUS`)

- **Presentation**: Full-canvas 3-column grand protagonist dossier:
- **Column 1**: Hero Identity, Title, Class designation, Origin tutelage, and a 140px heraldic crest bounding box.
- **Column 2**: Vitals and energy pools (HP, MP, TP meters) + Core Combat Attributes Matrix (ATK, DEF, MAT, MDF, Grid Movement Points).
- **Column 3**: Twin Relics Resonance (Shield of Lux barrier power, Sword of Tenebris edge sharpness), Moral Sway Continuum ($[-100, +100]$ meter), and Campaign Honor Record (foes vanquished, innocents warded, turns taken, kingdom gold treasury).
- **Controls**: Hotkey `2` or `i` (Inspect).

432.3. Screen 3: 32-Slot Inventory Bag & Relics (`GUI_SCREEN_INVENTORY`)

- **Presentation**: An interactive 32-slot inventory grid (4 rows of 8 cells) with golden border highlights for filled slots, slot counters, and gold purse telemetry.
- **Key Artifact Card**: Displays Grandma's Watch inspection card:
- **Category**: Sovereign Key Quest Relic.
- **Origin**: Handed down by grandmother in Dio Village.
- **Canon**: Conceals the resonance-calibrated Dream Compass.
- **Power**: Pierces the planar illusion of the High Throne.
- **Controls**: Hotkey `3` or `u` (Use/Bag).

432.4. Screen 4: Provincial Realm Topology Map (`GUI_SCREEN_WORLD_MAP`)

- **Presentation**: Full-canvas cartographic map of Sacyra and Libira showing trade roads and the six canonical provincial nodes:
  1. **The Dreamscape** (Astral Nexus)
  2. **Dio Village** (Founding Settlement)
  3. **Whispering Woods** (Frontier Wilds)
  4. **Sacyra Marches** (Border Ramparts)
  5. **The Royal Capital** (High Citadel & Planar Breach)
  6. **Kingdom of Libira** (Sovereign Frontier)
- **Party Marker**: Current party location highlighted with a radiant pulsing gold diamond.
- **Controls**: Hotkey `4` or `o` (Overworld).

432.5. Screen 5: Chronicle Lore Codex (`GUI_SCREEN_CHRONICLE`)

- **Presentation**: Full-canvas historical deed codex and lore ledger rendered in 20px `MedievalSharp` calligraphic typography, scrolling through past tactical events, dialogues, and realm chronicle entries.
- **Controls**: Hotkey `5` or `c` (Chronicle).

Chapter 433. 4. Architectural Review & State of the Engine (v1.4.0)

As we prepare for the `v0.1.0` consolidation milestone, we conducted a comprehensive review evaluating current strengths, outstanding gaps, and architectural debt:

433.1. What Is Going Well (Core Strengths)

1. **Invariant & Memory Discipline**: Zero dynamic heap allocations in Layers 0 and 1. Pure C11 reentrant simulation code running cleanly under strict latency budgets ($< 25\,\mu\text{s}$).
2. **Automated Verification**: 19/19 passing CTest verification targets (< 0.5s execution time), 16/16 registered subsystem pre-flight manifests in a valid DAG, and zero compiler warnings under `-Wall -Wextra -Wpedantic`.
3. **Developer Tooling Ecosystem**: Rust-based standalone updater (`tools/src/bin/updater.rs`), multi-mode interactive launcher (`tools/src/bin/launcher.rs`), Master Guide compiler, historical demo extractor, and native desktop integration (`.desktop`, custom 256px icon).
4. **Canonical Fidelity**: Authentic 2014–2018 CreativeWorkzStudio canon, Era VI Accord of Kings, Elijah and Katrina dual perspectives, and true metaphysical neutrality between Lux and Tenebris.

433.2. What Is Missing (Gaps to Address)

1. **Tactical Grid Unit Movement in GUI**: Clicking grid tiles currently registers target coordinates in the chronicle, but does not yet move Elijah tile-by-tile across the grid.
2. **Dynamic Map Swapping in Presentation**: `maps.c` defines 8 canonical maps, but `gui_view2d.c` currently visualizes the 8x8 altar dais without swapping tile geometry when moving to Dio Village (32x32) or Whispering Woods (12x12).
3. **Interactive Node Travel**: The Provincial Map visualizes trade routes, but travel between nodes is currently command-driven (`travel <loc>`) rather than mouse-click triggered.
4. **Enemy Tactical AI & Skill Casting**: Enemies execute static counter-attacks rather than flanking or casting spells declared in `data/skills/manifest.json`.
5. **Disk Persistence (Save / Load)**: Debugger provides an in-memory 8-snapshot rewind buffer, but file-based save game persistence (`savegame.json`) is not yet implemented.
6. **Audio Subsystem**: Sound effects (kinetic shield clash, blade mist) and background music are completely absent.
7. **Pixel-Art Sprite Sheets**: Sprites currently use procedural vector geometry; genuine multi-frame PNG animation sheets are pending artist integration.

433.3. Consistency vs. Inconsistency Analysis (Technical Debt)

1. **Inventory Data Dual-State**: `player_state_t` maintains both scalar legacy fields (`has_grandmas_watch`, `gold`, `sacyran_draughts`) and the modular `player_inventory_t inventory`. **Plan**: Refactor scalar fields into property accessors pointing directly into `inventory`.
2. **Map Scaler Coupling**: Layer 1 `map_scaler.c` calculates isotropic projection and viewport clamping, but Layer 2 `gui_view2d.c` independently re-computes scaling heuristics. **Plan**: Wire `map_scaler_compute_viewport()` directly into `gui_view2d.c`.
3. **Declarative Skills vs. Engine Hardcoding**: `data/skills/manifest.json` defines dozens of skills (`Rush`, `Flash Jump`, `Heavy Hit`), but `combat.c` hardcodes logic specifically for `Lux Barrio`, `Cuttatio`, and `Duo-Loca`. **Plan**: Implement `skills_loader.c` to parse the JSON grimoire into static engine tables.

Chapter 434. 5. Verification Telemetry

```
Test project /home/professorseanex/Tenebris and Lux/build
      Start  1: cli_help_test                     Passed (0.00s)
      Start  2: cli_version_test                  Passed (0.00s)
      Start  3: subsystem_audit_test              Passed (0.02s)
      Start  4: functional_cogs_test              Passed (0.01s)
      Start  5: unit_math_test                    Passed (0.00s)
      Start  6: unit_data_test                    Passed (0.01s)
      Start  7: unit_time_test                    Passed (0.01s)
      Start  8: unit_string_test                  Passed (0.00s)
      Start  9: unit_log_test                     Passed (0.08s)
      Start 10: unit_debug_test                   Passed (0.01s)
      Start 11: unit_combat_test                  Passed (0.00s)
      Start 12: unit_items_test                   Passed (0.01s)
      Start 13: unit_world_test                   Passed (0.00s)
      Start 14: unit_dispatch_test                Passed (0.01s)
      Start 15: unit_gui_test                     Passed (0.01s)
      Start 16: integrated_utils_test             Passed (0.01s)
      Start 17: integrated_sim_test               Passed (0.01s)
      Start 18: system_game_invariants_test       Passed (0.01s)
      Start 19: system_gameplay_scenarios_test    Passed (0.03s)

100% tests passed, 0 tests failed out of 19 (Total Test time = 0.26s)
Pre-Flight Audit: 16/16 module manifests & 7/7 invariant tripwires passed.
Compiler Diagnostics: Clean (-Wall -Wextra -Wpedantic, GCC/Clang C11).
Column Discipline: 100% compliant with strict <= 80 characters limit.
```

Chapter 435. 6. Summary & Forward Stance

With high-fantasy typography, responsive widescreen scaling, and the 5-screen navigation architecture operational and installed to the PC, the visual and architectural scaffolding of **Tenebris and Lux** is firmly grounded. In the upcoming session, we will tackle the alignment and cleanup of `v0.1.0`, consolidating the inventory dual-state, unifying map scaling, and laying the groundwork for interactive grid movement.
